99...♔e6 100.g7 ♕xf6+ 101.♔g6 ♕xg7 Taking the last pawn. What seemed to be so easy was actually great play by Dominguez. A very good example on what to do in similar endgames! **1/2-1/2**

**(15) Jobava, Baadur (2699)
- Nakamura, Hikaru (2799)**Khanty Mansiysk Grand Prix,
2015.05.22GM Csaba Balogh
Best rating: 2672

Black is two pawns up, but the doubled g-pawns should deprive him from realistic winning chances in case of best defense by White. Black should pin his hopes to a well-timed knight exchange, transposing to a rook endgame.

68. ♖xg6? White wins back one of the pawns, but he transposes into a lost, but very instructive rookendgame. [White should have waited for instance with 68. ♖d2 and see how Black intends to make progress. 68... ♖f4 is met by 69. ♖d8+ ♔h7 70. ♖f7! creating a mate net. White should hold.]

68... ♖xg6 69. ♖xh5 Black is winning here. The reason is the horizontally cut off white king. He cannot pass the rook's rank and Black advances his pawn square by square. Nakamura realizes his advantage with perfect technique.

69... ♖a6! with the idea of playing g6 and Kg7.

70. ♖f5 [70. ♖g5 70...g6 White cannot use his king, Black slowly makes progress like it happened in the game.]

70...g6 71. ♖f6 A clever defensive attempt. White would like to pass the rook's rank with the king by offering the trade of the rooks. The trade leads to an easy theoretical draw, however Black is not forced to do it...

71... ♖a7+! 72. ♔e6 ♔g7! White faces the same problem as before. His rook is misplaced on f6, it stands in the motif of Ra6, therefore he must lose a very important tempo, which allows Black to occupy the ideal position with his rook...

73. ♖f3 [If the rook was somewhere else than f6, then 73. ♔e5 would hold the draw, but now it drops the rook after 73... ♖a5+]

73...♖a5! Nakamura uses the same idea again! We have the same position as before, just all pieces are a rank ahead.

74.♜f7+ [Waiting with 74.♜f2 does not change anything, since Black makes progress with the same motif: 74...g5 and after 75.♜f5 ♖a6+! 76.♙e5 ♙g6—+]

74...♙h6 75.♜f1 The frontal attack is a very important defensive resource in many rook endgame with 1 vs 0 pawn. The idea is to send the black king behind the pawn with checks and then stay in front of the pawn. However it does not help here. [Another defensive attempt is 75.♜f8 75...g5 76.♜h8+ ♙g6 77.♜g8+ ♙h5 78.♜h8+ ♙g4 79.♜h1 ♙f3—+ Black wins easily.]

75...g5 76.♙f6 Creating the mate threat in one move. [76.♜h1+ 76...♙g6 77.♜g1 This is the standard defense with the frontal attack, however with the horizontally cut off king it does not help. Black makes progress with 77...♖a4! and continues with the same method as before.]

76...♖a4! Black prevents the mate and keeps the king cut horizontally. He is also threatening with Rf4, trading rooks. [76...g4? spoils the advantage because of 77.♜h1+ ♜h5 78.♜g1=]

77.♜h1+ [Preventing Rf4 with 77.♙f5 loses to 77...♙h5! 78.♜h1+ (78.♜f2 78...♙h4—+ followed by g4 wins easily.)

78...♜h4 79.♜f1 Otherwise Rf4 check cuts the king away. 79...♜h3! 80.♜f2 g4 81.♙f4 ♙h4—+ etc...]

77...♜h4 78.♜g1 ♜f4+ 79.♙e5

79...♙g6! Taking control over the f5 and f6 squares. Black again wants to drop his rook to the a-file and avoids Kf6. White cannot prevent it...

80.♜h1 ♖a4 White resigned. He cannot fight against the technique employed by Nakamura. **0-1**

Chess and the City. Good, better, Georgia - Part 2

WGM Elisabeth Pahtz

Best rating: 2493

After 9 tough rounds we have a sole leader and that is Nino Batsiashvili from Georgia, who has the stunning score of 8/9. Mihaela Sandu from Romania had the most incredible start in this tournament, as she seemed unstoppable after 5 rounds with 100 percent. Some of the participants had concerns about her performance and asked the arbiters for action. In round 6 the live transmission of her game against the current leader was cut and she eventually lost in a tough but good game. In round 7 former World Champion Antoaneta Stefanova, who was paired against Sandu, asked the ECU president Zurab Azmaiparashvili for a 15 min delay of all live games. This request was not accepted and Stefanova lost her game after a huge blunder in time trouble. On the free day two letters were published. The first one was officially asking for a delay of all the games and was signed by 32 players. The second letter, which was asking to cut the live transmission in Sandu's game, was not approved. The whole issue about cheating is of course nasty and seems to be a big problem in nowadays' chess society. I can understand that one may worry when some lower rated player comes up with such a performance. The usual measure taken by FIDE nowadays is

a common delay of live transmission but was not practiced in our tournament until round 8. Looking at Sandu's current position, I feel sad and some taste of unfairness about the whole issue. It must also be very hard psychologically to continue playing after you basically get accused by the other players. She lost her last 2 games in a row, yet she is likely to need only one more point to qualify. I bet this will be the last international tournament without precautions regarding this topic. Then at least everybody can play calmly and should not feel anxious in case of a player scoring too well. As for me I managed to win today and recovered from a terrible start to come back to plus 3. There are two more games to go and you will get a final report next week.

Best rating: 2655

In this issue I would like to show one of the many games between two American masters. We should note that Edward Lasker was not related to the second World Champion Emanuel.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.g3 O-O 5.♙g2 d5 6.cxd5 A premature move, but that is probably because the Catalan structures after dxc4 were not very well-known yet. [6.♘f3 6...dxc4 7.♘e5 (7.O-O 7...♘c6 and Black's main idea is to push e5 at some moment and equalize in the center.) 7...♘c6! A typical strong move which prevents White from recapturing the c4 pawn and keeps the advantage in the center. If White want to take another pawn on c6 and plays 8.♘xc6 bxc6 9.♙xc6 ♖b8⇐Black gets active play.]

6...exd5 7.♙g5

7...c5 An active move. An alternative was the strong [7...c6! in order to play against bishop on g2, which is placed much worse than on d3 in Carlsbad structures.]

8.a3 This looks a bit slow. More active was to just develop the pieces, for example [8.♘f3 8...h6 (8...♙xc3+ 9.bxc3 ♔a5 10.O-O!↑ and thanks to his quick development White is going to use the power of the two bishops and the central pawns.) 9.♙xf6 ♔xf6 10.O-O ♙e6 11.♖c1 (11.dxc5 11...♙xc3 12.bxc3 ♘d7 Nxc5-Rc8 next with a typical equal position.) 11...♙xc3 12.♖xc3 c4 13.♘e5 with the idea to destroy Black's central pawns after e4 or b3. 13...♘c6 14.♘xc6 bxc6 15.b3 cxb3 16.axb3 ♙d7 17.e3 with equal play.]

8...♙xc3+ 9.bxc3

9...cxd4?! I don't like this move. Black could organize typical counterplay against the c3 pawn. [9...♔a5! 10.♙d2 looks a bit passive. (

a) 10.♙xf6 10...♔xc3+ 11.♔f1 gxf6 12.dxc5 (12.♙xd5 12...♖d8=+) 12...♔xc5 13.♔xd5 ♔xd5 14.♙xd5 ♖d8= and only Black can be better here.;

b) 10.♘f3!? 10...♘e4 (10...♔xc3+ 11.♙d2↑) 11.O-O↑)

10...♘e4 11.♘f3 (11.c4 11...♘xd2 12.♔xd2 ♔xd2+ 13.♔xd2 dxc4! (13...cxd4 14.cxd5 ♖d8 preventing Nf3. 15.♖c1! preparing Nf3.

(15.♔d3!? is a bit risky because there are still many pieces on the board! 15...♙f5+ 16.♙xd4 ♘c6+→) 15...♘d7 16.♘f3 ♘f6 17.♘xd4 ♘xd5 18.e3 and because of the strong knight on d4 and White's more active pieces this endgame should be unpleasant for Black.) 14.dxc5 ♖d8+ 15.♙c3 ♘a6 16.c6 bxc6 17.♘f3 (17.♙xc6 17...♖b8) 17...♘c5→) 11...c4 (

a) 11...♙g4 12.♘e5†;

b) 11...♘c6 12.dxc5 ♖xc5 (12...♘xc3 13.♖c1 d4 14.♘xd4 ♘xd4 15.♙xc3 ♖xc5 16.♖b2) 13.O-O ♘xc3 14.♙xc3 ♖xc3 15.♖xd5 ♙e6)

12.O-O ♘c6 (12...♘xc3 13.♖e1) 13.♖c2 ♖e8 (13...♙f5 14.♘h4!)]

10.cxd4 ♘c6 11.♙xf6 ♖xf6 12.e3+= White has a stable plus because of the isolated pawn on d5.

12...♖e8 13.♘e2

13...♙g4! A good and active setup for Black.

14.O-O [14.♖a2 The idea of this move is to prevent the exchange of the d-pawns. 14...♖ad8 15.O-O h5! A strong and typical move which should help Black to find some counterplay on the kingside.]

14...♙xe2 15.♖xe2 ♘xd4 16.♖d1 Black managed to get rid of the weak pawn but White still keeps a symbolic advantage

thanks to the strong bishop on g2.

16...♘c6 is probably not accurate, since now the knight on c6 and the pawn on b7 will stay under the bishop's pressure. Black could have played [16...♘e6 The idea of this move is to build a more solid b6-Nc5 setup and empty the bishop's diagonal! 17.♖xd5

17...♖e7! (17...♖ab8 18.♖a5! and after 18...a6 it will not be possible to play b6-Nc5.; 17...b6 18.♖xa8 ♖xa8 19.♙xa8 ♘c5 It is clear that the two rooks are stronger than the queen and the b7 pawn can also be a potential weakness.)]

17.♖xd5 ♖ad8 18.♖b5 ♖e7 19.♖ac1 ♖c7

20.♖c4! += A strong move because the white rook is going to play along the 4th rank.

20...g6 [20...♖d6!?]

21. ♖d5 [21.h4!? deserves attention, since this kind of move always improves the position because the idea is to play h5-h6 and weaken the black king.]

21... ♖d6 22. ♖d1 [22. ♖xc6 22... bxc6 (22... ♖xc6 23. ♖d4±) 23. ♖a5 (23. ♖c5 23... ♖xc5 24. ♖xc5 ♖d3=) 23... c5 24. ♖fc1 ♖e7! and one weak pawn on c5 is not enough. 25. ♖xc5? ♖xc5 26. ♖xc5 ♖d1+! 27. ♖g2 ♖e4+; 22. ♖c5 22... ♖e7 23. ♖xc7 ♖xc7 24. ♖xb7 (24. ♖f3 24... b6=) 24... ♖b8 25. ♖b1 ♖f5±]

22... ♖xa3 23. ♖xc6 ♖xd5 [23... bxc6 24. ♖xf7+ ♖xf7 25. ♖c4+

25... ♖d5! (25... ♖g7 26. ♖xd8→) 26. ♖xd5 cxd5 27. ♖xc7+ ♖f6 28. ♖c6+ ♖g7 29. ♖xd5 a5 and the a-pawn gives Black enough counterplay for a draw. The game should end after a perpetual check somewhere.]

24. ♖xd5 ♖a1+? An unnecessary move, as it was more important to control the a3-f8 diagonal. [24... ♖xc6 25. ♖d8+ (25. ♖xb7 25... ♖f6=) 25... ♖g7 26. ♖e5+ ♖f6! and Black is fine. 27.g4 ♖c1+ 28. ♖g2 ♖c6+±]

25. ♖g2 ♖xc6? The decisive mistake. Black could still fight after [25... bxc6 26. ♖d8+ ♖g7 27. ♖c5 h5 28. ♖f8+ ♖h7 29. ♖g8+! otherwise Black would play Qg7! 29... ♖h6 30. ♖d4! preventing Qg7 and threatening Qh8-Rg4. 30... f5 31. ♖h8+ ♖h7 32. ♖f8+ ♖g7 33. ♖d8 ♖a2 34. ♖h8+ (34. ♖d7 34... ♖g8!) 34... ♖h7 35. ♖e5! and White is not winning by force but he

keeps the initiative.]

26. ♖d8+ ♖g7

27. ♖b4! +— ♖c3 28. ♖f8+ ♖f6 29. ♖d4! ♖g5 30. h4+ ♖h5 31. ♖d5+ and after 31... f5 White mates with 32. Rxf5 gxf5 33. Qxf5 Kh6 34. Qg5. 1-0

Editorial Preface

From the World's top events there is only one to be written about, and that is the French Team Championship, where a lot of top chess players are playing, such as for example So, Giri, Jakovenko, Wojtaszek, Vachier Lagrave and many more. As usual the very strong team from Clichy (So, Jakovenko, Vachier Lagrave, Fressinet...) defends the title but this time the team of Bischwiller (Giri, Naiditsch, Bacrot, Edouard, Ragger...) is a very serious competitor. Both teams managed to win the first 5 rounds and in the 6th it came to the direct encounter, where Bischwiller managed to decide the match in its favor with wins from Giri and Bacrot, while Skripchenko scored Clichy's only win.

In the current issue you will find the best games from the French league, combined with a lot of other interesting chess material!

Enjoy!

Two best games of the past week

(1) Jakovenko, Dmitry (2738)
- Cornette, Matthieu (2590) [B31]

TCh-FRA Top 12 2015(1.3),
2015.05.30

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a long line of theory, where according to the computer Black is fine, but in practical play it is almost impossible to find the right moves. A very good example on the fact that human understanding can still beat a computer preparation! Big credit of course goes to Jakovenko, who showed with very convincing play what the dangers are in such a risky line.

1.e4 c5 2.♘f3 ♘c6 3.♙b5 g6 Cornette is usually very well-prepared and doesn't just play some "random" lines.

4.♙xc6 bxc6 [4...dxc6 5.d3 ♙g7 6.h3 is the main line here.]

5.O-O ♙g7 6.♖e1 the main move. White is not trying to play c3-d4 immediately but waiting for Black to decide where the knight is going from g8.

6...♘f6 [6...♘h6 is another possible line, but it seems like White is a bit better after 7.c3 O-O 8.h3 d6 9.d4+ =]

7.e5 ♘d5 8.c4 Now we see that the move Re1 was very useful and White can immediately play c4.

8...♘c7 9.d4 cxd4 10.♙xd4 O-O This is of course all still theory.

11.♙h4 White wants to exchange the bishop with Bh6 next.

11...f6 The main move for Black, because in case he would let White play Bh6 then after Nc3-Ne4-Rad1 his position would be clearly better.

12.♘c3 Jakovenko chooses the most direct line. [An easier try for White is 12.exf6 12...exf6 13.♙d2 preparing to play Bc3, with a small plus for White.; It is too early for 12.♙h6?! 12...g5 13.♙h5 ♘e6 and Black is threatening to play Nf4 next.]

12...♘e6 13.♘e4 White is giving the e5 pawn in exchange for a strong initiative on the kingside.

13...fxe5 This move is also a must. We are in quite a forced position.

14.♘fg5 ♘xg5 15.♙xg5 We are still following theory.

15...♙b6 Black is going for the b2 pawn. White can't take on e7 on the spot because of Rf4.

16.c5 fixing the bishop on c8. We are still in a more or less known position.

16...♙xb2 17.♖ad1 Now White finally wants to take on e7.

17...♙xa2 Cornette played everything very quickly until here, so it seems to be his preparation.

18.♙xe7 Now that Rf4 is not that dangerous any longer, White is taking the e7 pawn.

18...♖f4 19.♔g3 So we are in the first critical position. It is clear that White will try to mate on the kingside and that Black will try to push the a-pawn. The position is very dynamic.

19...a5 Cornette is immediately launching his play. [In case Black would try to get rid of the knight on e4 with 19...♖c2 a simple move like 20.f3 looks very solid. White's idea would remain to play Bg5 or maybe the direct h4-h5.]

20.♘g5 Asking Black a difficult question.

20...♖xe4 [After 20...♖f8 21.h4 a4 22.h5 White's attack looks very dangerous, not to say winning... 22...a3 23.hxg6 hxg6 24.♖d6 and all the white pieces are mating the black king!]

21.♖xe4 Now White is an exchange up but in case Black would manage to hold on the kingside, the a-pawn and the bishop pair would give him enough compensation.

21...♘a6 Cornette is trying to transfer his bishop from c8 to d5; a very logical decision, but it costs him a lot of time. [It would end up badly for Black to go for the c5 pawn: 21...♖c2 22.♖de1 ♖xc5 and White is winning with 23.♖xe5! ♘xe5 24.♖xe5 and as we know, the attack is only getting stronger when there are opposite colored bishops on the boards. White must be winning here.]

22.h4! A strong move! White does not only want to break Black's pawn structure with h4, but he also creates an escape square for the white king in case there will be opportunity to play Rxe5.

22...♘c4 Black is trying to get the bishop back into defense.

23.♖de1 Another good move. Now White is really considering to take on e5.

23...♘f7 [After 23...♘d5 White has 24.♖xe5! ♘xe5 25.♖xe5 Now the deadly threat is Bh6 next. 25...♖f8 and after the cool 26.f3 Black can't do anything against the upcoming Bh6.; It also seems to be too late for 23...a4 24.h5 and I don't see how Black can hold this position.]

24.h5 a4 The black pawn is only 3 squares away from a1, so White needs to act fast!

25.h6!! A great move by Jakovenko. It looks strange to close the position where you are attacking, but White has a deep idea in mind!

25...♟h8? Missing White's next move... [Black should have tried 25...♟f8 but now White can even continue with the simple 26.♟f6 a3 27.♟xe5 controlling the a1 square. 27...♟xh6 28.♞f3 threatening to play Qf6 next. Black's position is clearly very bad.]

26.♞h4 This is what White had planned before playing 25.h6!! Black cannot stop White from playing Bf6next!

26...♟d5 Probably the only move.

27.♞b4 Bf6 is still a threat.

27...♞c2 [After 27...a3 28.♞eb1! would just end the game. (28.♟f6 would be a mistake now since after 28...♞d2! Black would be back in the game.) 28...♞f8 29.♞b8 and White will mate in the next moves.]

28.♟f6 g5 [28...♞f5 doesn't help either. 29.♟xh8 ♟xh8 30.♞xa4 and it is only matter of time until Black will resign.]

29.♟xg5 The most simple.

29...a3

30.♞g4 The white rook is switching from b4 to g4. The game

is over.

30...♟f7 31.♟d8! The last exact move!

31...♞xc5 32.♞h5+ and mate will follow in a couple of moves. A great game by Jakovenko, smartly using the bad position of the black king and of course a very strange preparation by Black, who deliberately went for a line which just seems to be close to lost! **1-0**

(2) So, Wesley (2778)
- Vazquez Igarza, Renier (2606)
[C42]

TCh-FRA Top 12 2015(3.2),
2015.06.01

GM Csaba Balogh
Best rating: 2672

The World Nr.6 Wesley So is playing in the French league. His next game has a calm start in the Petroff defense, but suddenly it turns out to be a tactical struggle.

1.e4 e5 2.f3 f6 The Petroff defense went out of the fashion after Kramnik and Gelfand stopped playing it, but of course it remains a rock-solid opening.

3.fxe5 d6 4.f3 xe4 5.d4 The main move. Interestingly, a few days after this game, So himself deviated from this game and played the currently most popular 5.Nc3 variation against Iordachescu.

5...d5 6.f3 d6 [6...c6 7.O-O e7 is the main line.]

7.O-O O-O 8.c4 c6 9.e1 Wesley So is hard worker and very strong theoretician, there is a reason behind each of his opening choices. [The other main line starts with 9.c2 9...a6 10.a3 g4 11.e5 xe5 12.dxe5 ac5 13.f3 xd3 14.xd3 c5 15.d4 b3 16.xg4 xa1 17.h6 g6 with hundreds of games and big complications.]

9...f5 10.c2 d7 A rare move by Black. I don't know if it was prepared or found over the board. [Most of the games continue with 10...a6 11.a3 g6 12.c5 b8 Keeping the c7 square free for the knight. 13.c3 f5

A big positional fight starts for the squares. Black has consolidated the light squares, while White is going to establish control over the dark ones with 14.e2 c7 15.f4 e8 16.h4 with a complex game.]

11.c3 df6 This looks healthy than the 10...Na6 line at first sight, because Black does not give up the dark squares with f5. However, the truth is that Black also lacks the control over the e4 square and White immediately makes use of it.

12.e5! With the idea of winning a piece with f3, because after Nxc3 Bxf5 the knight is trapped on c3.

12...g6 13.xg6

13...xh2+ [A similar game was won by Ivanchuk, which continued with 13...fxg6 14.xe4! (Here again 14.xe4 is wrong because after 14...dxe4 15.xe4 g4! is coming with

big power. White should have a knight on e4 to have the f2 pawn protected.) 14...♙xh2+ (14...dxe4 15.♘xe4 ♘g4 is not dangerous now, as White can simply play 16.h3±) 15.♙xh2 ♘g4+

16.♙g3! Ivanchuk has no fear. He is two pieces up and those will grant enough safety for the king... 16...♖xf2 (16...dxe4 17.♙xg4+- and the king comes back in the next moves.) 17.♖e2 ♖f1 18.♘xd5! Not the only win, but the best one according to the computer. 18...cxd5 19.♙xd5+ ♙h8 20.♙xg4 ♖h1 (Black has only two checks because after 20...♙d7+ 21.♙g3 ♙c7+ 22.♖e5!+- saves everything!) 21.♙e4 (21.♙f3+- is also winning with the idea to hide the king behind the d-pawn.) 21...♖h4+ 22.♙g3 ♖xe4 23.♖xe4 White ended up with a winning material advantage. Black resigned a few moves later. 23...g5 24.♙d2 ♙f6 25.♖ae1 ♖f8 26.♙b4 1-0, Ivanchuk -Frolyanov, Yerevan 2004. Wesley So was probably familiar with this game.]

14.♙xh2 ♘g4+ 15.♙g1 In comparison to the Ivanchuk game, White cannot go to g3, but this one is also completely fine.

15...fxg6

16.♙xe4! It is very important to have a knight on e4 again as it defends the kingside much better than the bishop. [After 16.♘xe4 16...♙h4! is also already good for Black. For instance after 17.♙g5 ♙h2+ 18.♙f1 dxe4 19.♙xe4 ♖ae8!+- too many pieces are attacking the white king.]

16...♙h4 [16...dxe4 17.♖xe4 White is ready to give back some material on g4. (17.g3 is also good with the idea of preventing Qh4!) 17...♖xf2 18.♙d1+- wins.; 16...♖xf2 is simply met by 17.♖e2!+- forcing exchanges, which clearly favors the side with a material advantage.]

17.♙f3! Calm defense, but on the other hand it is very logical as White wants to get rid of the attacking knight on g4! White is ready for a king journey towards the center.

17...♙h2+ 18.♙f1 ♖ae8 The logical follow-up! Black cuts the king's escaping route. However Wesley So keeps his mind cold and continues defending tenaciously... [18...♙h1+ 19.♙e2 ♖ae8+ brings nothing as White has 20.♙e3+-]

19. ♖xe8 ♖xe8

20. ♘e4! This line's closing idea brings White the full point. White was two pieces up, so he can easily sacrifice back one and he refreshes his emergency exit for his king on e2. [But not 20. ♘e3? because of 20... ♖xe3! and suddenly Black wins: 21. fxe3 ♘xe3+—+]]

20... ♖h1+ [20... dxe4 21. ♘xg4+— is over.]

21. ♔e2 ♖g1 Desperation! [21... ♘f6 does not change anything. White wins for instance after 22. ♘e3 ♖xa1 23. ♘xf6+ gxf6 24. ♖b3+—; 21... dxe4 22. ♘xg4 ♖xg2 was probably the most tenacious, although White wins after 23. ♘d7 ♖f3+ 24. ♔e1 ♖e7 (24... ♖h1+ 25. ♔d2+—) 25. ♘c8+— The two extra piece should ensure the victory after some precise moves...]

22. cxd5 cxd5 23. ♘xg4 ♖xe4+ 24. ♔f3+— White ran out of checks and he enjoys two extra pieces. The game is over.

24... h5 25. ♘e6+! A small tactical trick.

25... ♔h7 [25... ♖xe6 loses to 26. ♖c8+ ♔f7 27. ♖d7+ ♖e7 28. ♖xe7+! ♔xe7 29. ♘g5+—]

26. ♖c8 [Black resigned as after 26. ♖c8 26... ♖d1+ 27. ♔g3 h4+ 28. ♔h2 the king comes back behind his shelter and Black gets mated on g8!] **1-0**

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 21 upsets. It is time to celebrate the 100th edition of the David vs. Goliath series. In fact, it is only the 24th column for Top GM Secrets and #100 overall.

The number of moves ranges from 20 in Koci (1703) - Zurawicki (1138), 0-1 to 74 in IM Moussard (2444) - GM Wojtaszek (2746), 1-0. The latter is also the highest-profile upset of the week.

I feel sorry for Oputic (1930) who blundered a queen in one move against Tomic (1333):

18...Qxg2?? 19.Bh5+ and White won a few moves later.

Top-10:

Tomic (1333) - Oputic (1930), 1-0, [597](#) points
Koci (1703) - Zurawicki (1138), 0-1, [565](#) points
Elmejbri (1841) - Ahmed (2346), 1-0, [505](#) points
Sulkowski (1238) - Christensen (1700), 1-0, [462](#) points
Orzechowski (1372) - Cervenka (1825), 1-0, [453](#) points
Walter F (2134) - Walter T (1709), 0-1, [425](#) points
Fejzic (1690) - Lakovic (2110), 1-0, [420](#) points
Galuszka (1454) - Szmek (1873), 1-0, [419](#) points
Bar (2110) - Strikovic (2526), 1-0, [416](#) points
Drino (1774) - Karup (2156), 1-0, [382](#) points

Average gap: 464; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(3) Donchenko, Alexander (2570) - Dorfman, Iossif (2574) [A15]

TCh-FRA Top 12 2015(1.1),
2015.05.30

Alexander Donchenko is a 17-year old from Germany who is having a great chess year and is fastly improving (he was 2511 on the January list). Here he was a little lucky to beat the experienced coach Iossif Dorfman in the French league.

1.c4 ♘f6 2.g3 c6 3.♘f3 d5 4.♙g2 g6 Two weeks ago I analyzed the Reti opening with 4...Bg4 and this time we have the version with g6.

5.b3 White can transpose to a g3 Grunfeld by playing d4 but it is not the idea of starting with 1.c4.

5...♙g7 6.♙b2 O-O 7.O-O ♙g4 This year I played 7...a5! here.

8.d3 The main move. [8.d4 Since it is not usual to play Bg4 with a pawn on d4 this move makes sense, but maybe Black can go 8...♖c8!?!; 8.h3 is also a possibility but I think Black is fine after 8...♙xf3 9.♙xf3 ♘bd7 10.d4 ♘e4=]

8...♘bd7

9.♘bd2 From a theoretical point of view I think White should take the bishop so h3 at any moment should be analyzed more deeply. [9.h3 9...♙xf3 10.♙xf3 e5!? It seems like in this game Black played for this move. 11.cxd5 cxd5 12.♘c3 ♘b8!? The knight should go to the good c6 square. Black has the center to compensate for the bishop pair.]

9...♖e8 10.♘e5?! After this move Black has no problems at all. [10.h3 10...♙xf3 11.♘xf3 e5 is the point behind Black's 9th move. 12.cxd5 cxd5 13.♖c1 with complicated play.]

10...♘xe5 11.♙xe5 ♖d7 It is very logical to improve the position of the g4 bishop.

12.♖e1 [12.♘f3 12...♙h3 13.♖c2 ♙xg2 14.♖xg2 ♘g4=]

12...♙h3 13.♙h1 I would not avoid the exchange, as it is too late to seek an advantage.

13...♘g4 14.♙xg7 ♖xg7

15.d4 Black was ready to take the center with e5.

15...dxc4!? There are many ways to play and Dorfman chooses the most active one. The position seems easier to play with Black but is around equal.

16.♖xc4 ♜ad8 17.e3 e5 18.f3 This ugly-looking move is forced.

18...b5

19.♘a5? It was time to exchange some pieces, as now Black has a great piece sacrifice. [19.♘xe5 19...♘xe5 20.dxe5 ♜xe5 21.♞xd7 ♜xd7 At first it might seem like this endgame is better for Black, but his pawn structure on the queenside is bad. White needs to play a few precise moves to equalize. 22.f4 ♜c5 (22...♜e6 23.♞f2 ♘g4 24.♘f3=) 23.♜ac1 ♜xc1 24.♜xc1 ♜d2

25.♘xc6 b4 26.♜a1 a5 27.a3 ♜d3 28.axb4 axb4 29.e4 ♜xb3 30.♞f2= followed by Bd5.]

19...♞c7? Black misses his chance, probably missing White's strong 21th move. [19...♘xe3! With all the pieces well placed, it is logical that an advantage should be found. 20.♜xe3 exd4 21.♜d3 (21.♜xe8 21...♜xe8 22.♞d3 ♘f5 23.♞d2 d3—+ The passed pawn is too strong for White's uncoordinated pieces.) 21...♞c7 22.b4 c5+ White's position is horrible to play.]

20.b4 ♘f6 21.♞c1! Strangely enough, everything is fine again.

21...♜c8? Not a great defensive move. [21...exd4 gives equality. 22.♘xc6 ♜c8 (22...dxe3 23.♘xd8 ♞xd8 24.♘g2 ♘g2 25.♞xg2 ♞d4 26.♜b1+=) 23.♘xd4 ♞xc1 24.♜exc1 ♜xc1+ 25.♜xc1 ♜xe3 26.♘xb5 ♘d5= Black will regain the pawn thanks to his active pieces.]

22.dxe5 ♜xe5 23.f4+= The bishop on h1 is much stronger than a few moves ago!

23...♜e6 [23...♜ee8 was more precise in order not to be chased by White's knight with tempo.]

24.♘b3 ♘e4 25.♞c2 ♘d6 Not the best maneuver, seeing as the c4 square is clearly not equivalent to the c5 one.

26. d4? Positional way of playing been much better, [26. c5 26... e7 27. c3+ g8 28. a4 with a great position for White.]

26... e8 27. xc6? This move activates Black's pieces, but after 27. a4 White would still have an advantage.

27... e7 Black wants to attack the e3 pawn in case of 28. Qf3, but there was an even stronger maneuver: [27... b8 28. f3 b6 with full compensation over the board. 29. g4 is of course scary but Black has many possibilities, for example: 29... c4 30. ad1 (30. xh3?? 30... xe3 and Black wins.) 30... cd8]

28. d5 [28. f3 28... c3=]

28... a6? is too slow. Black would have been fine after [28... f6 29. ad1 c4]

29. c6! c7

30. a4± Suddenly White is a pawn up and has good pieces.

30... e6 31. d4+ g8 32. axb5 xb5 33. c5 b7

34. ec1 f5 It is strange to provoke White into improving his pawn structure. 34... Rc7 was more stubborn.

35. e5? [35. e4 35... g4 36. e5±]

35... b8? An exchange of tactical mistakes... [35... e4 was a logical continuation after Bf5! 36. xe4 xe4 37. xc8 xe3+ 38. f1 xc8 39. xc8+ g7 White has a material advantage but it is impossible to win with his bad king.]

36. c6+— Now it is all over.

36... a7 [36... f6 37. e4! e6 38. f3+—]

37. xa6 c7 38. b5 ec8 39. b6 trapping the queen! **1-0**

Endgame section

(14) So, Wesley (2778)
- Edouard, Romain (2627)

TCh-FRA Top 12 2015(6.2),
2015.06.04

GM Arkadij Naiditsch
Best rating: 2737

In the critical match between the 2 strongest teams, Edouard showed great defensive skills, as he had a very unpleasant endgame since an early stage of the game. Right now, things are still looking dangerous for Black. The white king is almost in the center and the black king is sort of cut by the pawn on f4, while the pawns on a6 and c4 could become potential targets.

34. ♖e3 White wants to bring his king to d4.

34... ♜b3+! A very good decision. Black is forcing the exchange of a pawn, but the position remains very dangerous.

35. ♕d4 c3 36. bxc3 ♜xa3 White is clearly better, but the a-pawn could become the game saver.

37. c4 a5 The best move again. There is no need to lose

time for Ra1-Rc1 or similar things. Black needs to hope to be fast enough to get the a-pawn as close to possible to the promotion square.

38. ♙d5 a4 39. ♜b2 White wants to play Rb6 next.

39... ♙xd5 The exchange of bishops is forced.

40. cxd5 ♜a1 Black is preparing to check the white king from behind.

41. ♜b6+ ♕f7

42. ♕e5 White's position is still better and Black remains under pressure.

42... a3! Another great move by Romain who is defending the endgame perfectly. Black should not care about losing the f-pawn, but the idea should be to exchange the a-pawn against the d-pawn, which would leave a drawish rook endgame with 3 vs 2 pawns on the same side.

43. ♜a6 [43. ♜b7+ also leads to a draw: 43... ♕g6 44. ♕d6 a2 45. ♜a7 ♕h5 and White has no idea to improve the position.]

43... a2 Black reached what he started with 37...a5.

44. ♕xf5 g6+ The most accurate move. [Of course Black could immediately have gone for 44... ♜d1 45. ♜a7+ ♕g8 46. ♜xa2 ♜xd5+ 47. ♕e6 but now a bit more accuracy would be needed

to hold. 47...♖d8 48.♔e7 ♜f8! The only move. (48...♖b8? 49.♜d2! and Black can't avoid the exchange of rooks, which would lead to a lost pawn endgame.) 49.g3 (In case of 49.♜d2 Black would save the game with 49...♜f7+!) 49...g6 and White even has some practical chances here, although the game should end in a draw.]

45.♔g4 h6 Another very accurate move by Black! White can't avoid Rd1 next.

46.g3 ♔g7 [Of course the direct 46...♜d1 47.♜xa2 ♜xd5 would lead to a drawish endgame as well.]

47.♜a7+ ♔f6 48.♜a6+ ♔g7 49.♜a8 ♔f7 50.♜a5 ♔g7 51.♜a6 ♜d1 So finally Black decides to put an end to "playing around" and takes the d5 pawn.

52.♜xa2 h5+ Fixing the structure is always a good option if you are defending a worse position.

53.♔h4 ♜xd5 and this position is an easy draw.

54.♜a7+ ♔h6 55.♜a6 ♜d2 [Of course 55...♔g7 would also be good enough for a draw.]

56.♔h3 ♜f2 Now White doesn't even have theoretical threats any longer.

57.♜a7 ♜b2 58.♜e7 ♜a2 59.♜e6 ♜f2 60.♜d6 ♔g7 61.♔h4

♔h6 62.♔h3 ♔g7 63.♜d7+ ♔h6

64.♜f7 As we can see, So doesn't even find ways of trying something.

64...♜a2 65.♜e7 ♜b2 66.♜e1 ♜a2 67.♜b1 ♜c2 68.♜b6 ♜f2 69.♜e6 ♔g7 70.♔h4 ♔h6 71.h3 White finally plays h3, but it doesn't help much.

71...♜f1 Black just keeps on waiting.

72.♜f6 ♜f2 73.♜f8 ♜f3 74.♜f6 We just saw a perfect defense of an unpleasant endgame by Edouard. What is very important to learn from this game is that in a position where the opponent's king is much better placed, it is necessary to find an active plan instead of keep on waiting and of course the very typical play with the a-pawn, which secured the drawish outcome! **1/2-1/2**

(15) Gajewski, Grzegorz (2648)
- Fedorchuk, Sergey A. (2657)

French league,
2015.05.30

GM Csaba Balogh
Best rating: 2672

We have an endgame with unbalanced material. Black has a rook, knight and a pawn for the queen. In general we could consider it as equal to the queen, but of course the correct evaluation should be drawn according to the concrete position. The key factor here is the passed pawns. White cannot create one after Black successfully protects d6, while Black has the f6-e5 connected passers which are going to advance soon. White could pin his hopes to perpetual check, but the knight provides very good shelter for the king.

44...♙e4! 45.♙xe4+ ♘xe4 The d6 pawn is safe. White has no chance to break through with c5. The next step to make progress is to push the central pawns. The white king is also badly placed, cut from everything on its own back rank.

46.♔c6

46...♔g5! Black can go ahead with his king without fear. A queen alone cannot create any serious threats. Another possible plan is simply to go towards the c4 pawn and capture it with the rook.

47.♖a4 White sends the well-placed rook away in order to either ease the pressure on the c4 pawn or to get his king out from the first rank.

47...♖c1+ 48.♔g2 ♔f4! The white king is still trapped after the activation of the black one. Black is ready to push his f-pawn.

49.♖b3 Hoping for perpetual with the check on f3, but Black prevents it with another prophylactic move.

49...♖c3! 50.♖b1? This loses quickly, but other moves were not much better either. [

Let's say 50. ♖a2 50...f5 (Now on 50... ♖g3+ White could avoid getting squeezed to the h-file and play 51. ♔f1 although his position remains very bad. 51...f5+ 51. ♖e2 ♖g3+ 52. ♔f1 ♖e3 53. ♖d1 The only move, otherwise White loses his queen. (53. ♖a2? 53... ♖g3+ 54. ♔g1 ♖e1+ 55. ♔f2 ♖e2+) 53... ♔g3 followed by f4-f3. Black should win the game without too many difficulties.)

50... ♖g3+! The king gets trapped again and this already turns out to be decisive.

51. ♔h1 [51. ♔f1? 51... ♖d2+—; 51. ♔h2 51... ♖g5! 52. ♖c1+ ♔g4 There are no more checks and Nf3-Rg1 mates or wins the queen. 53.c5 ♖f3+ 54. ♔h1 ♖h3+ 55. ♔g2 ♖h2+ 56. ♔f1 ♖h1+—]

51... ♖f2+ 52. ♔h2 e4! Perfect technique by Fedorchuk! The queen is hopeless to create any counterplay.

53. ♖b2 [53. ♖f1 53...e3 54.c5 might give some hopes, but White finds himself in a mating net after

54... ♔f3! 55.cxd6 ♖g8—+ and the mate is coming on h1, White cannot avoid it.]

53... ♖g4+ 54. ♔h1

54... ♔f3! The black pieces are in perfect harmony! They protect each other and at the same time they create decisive threats against the white king. Nf2 followed by Rg2 is threatening with mate in two. White can only give a few checks before resigning.

55. ♖b3+ e3 56. ♖d1+ e2 57. ♖d3+ ♔f2 Black cannot play Nf2 anymore, but he has created enough other threats instead. Rh3, Rg1 and e1Q are all hanging in the air...

58. ♖d4+ [58. ♖f5+ 58... ♖f3 59. ♖xg4 e1=♖+—]

58... ♔f1 [White resigned in view of the countercheck 58... ♔f1 59. ♖f4+ ♖f2+! and White cannot hope for stalemate because of his c4 pawn.] **0-1**

Chess and the City. Good, Better, Georgia Final III

WGM Elisabeth Paetz
Best rating: 2493

After over 2 weeks of tough battles, the European Women's Championship finally came to an end. However, it was not won by the long-time leader Nino Batsiashvili, from Georgia, but by Natalia Zhukova, from the Ukraine.

She not only managed to beat her toughest challenger in their direct encounter, but also convincingly outplayed each of her last 5 opponents. She scored 9,5/11 to regain the title she won back in 1999 in Batumi.

For me, personally, it is amazing to witness how many victories, of late, have been earned by Ukrainians! It started with the World title of Anna Ushenina, in 2012, followed by Mariya Muzychuk in 2015, and only a short time after that, the European title, by Natalia Zhukova. Furthermore, their strongest player, Anna Muzychuk, is a hot candidate to follow in their footsteps.

If we speak about justice, maybe we cannot speak of coincidence, in pointing out all the latest developments in the political conflict, and the pain the Ukrainian citizens in the East of the country have to suffer from. Maybe it is a form of reaction, but it is more likely that all of these women I've listed are simply very strong players!

'Justice' is a word, by the way, which could also be understood in a different context - viz, when we remember the goings on in this Championship. In my last newsletter I mentioned the case of Rumanian player Mihaela Sandu. Perhaps she just started the tournament too well, and eventually became a victim - or rather, *the* victim of the tournament. After both letters were published, she was not able to continue at the same level, and bitterly lost all 4 remaining rounds.

This case will not be forgotten, and it should teach all of us that certain things are better handled in a more sensitive and discrete way. Paranoia was rife, and 'witch hunting', as it was so "nicely" described on certain blogs, may be just what the resulting action was. I can't, and anyway don't want to, judge this matter, but what I can say for sure is that it crossed a

line that should never have been crossed. In court we call it 'benefit of the doubt', and as long nothing is proven or can be proven afterwards, only apology is left. Just like when we play chess, we know that moving quickly, rather than thinking first, can often lead to blundering.

Clash of the Titans

1.e4 c5 2.♘f3 e6 3.♗c3 a6 4.♕e2 I don't know why White is waiting with d2-d4. [4.d4 4...cxd4 5.♗xd4 leads to main positions.]

4...b5 [4...d5 5.exd5 exd5 6.d4 c4 7.O-O and White should take the advantage thanks to his better development.]

5.d4 cxd4 6.♗xd4

6...♕b7 7.a3 It is clear that White prevents b4 but in many Sicilian positions a2-a3 is a bit slow. Maybe an alternative idea is just to sacrifice the pawn for active play. [7.O-O!? 7...b4 8.♗a4 ♕xe4 (8...♖a5 9.c4 ♕xe4 10.♕f3 ♗f6 11.♖e1 d5 12.♕g5 The white pieces are very active, for example 12...♕xf3 13.♖xf3 ♖xa4 14.♕xf6 gxf6 15.♗xe6 fxe6 16.♖xe6+--)] 9.♕f3

xf3 10. ♖xf3 d5 11. ♖e1 ♘f6 12. ♗g5 ♘bd7 13. ♘xe6 (13. ♖ad1) 13...fxe6 14. ♖xe6+ ♖f7 15. ♖ae1→With only a pawn for the piece, but is not easy to play for Black.]

7... ♖c7 8. O-O ♘f6 9. ♖d3 [9. ♗f3 9... ♗d6 or even 9...d6 and the bishop is not placed perfectly on f3.]

9...d6 10. ♗g5 ♘bd7

11. ♖e3 Another move I don't like. In Sicilians White should play more dynamicly, even at the cost of some material! [11.f4 11... ♘c5 (11... ♗e7! The most solid option is to just finish the development. 12.f5 e5 13. ♘b3 and the knight on b3 is very far from the important d5 square, so Black is fine here.) 12. ♖h3 A useful place for the queen, which now supports the sacrifice on e6. (12. ♖e3 12... ♘cxe4 13. ♘xe4 ♘xe4 14.f5 ♘xg5 (14...e5 15. ♘e6! is one of the typical sacrifices. 15...fxe6 16. ♗h5+ ♖d7 17.fxe6+ ♖c8 18. ♖f7+-) 15. ♖xg5 ♖c5! with counterplay. (15...e5 16. ♘e6!) 16.c3 e5 17. ♖ae1 ♗e7 18. ♖xg7 O-O-O) 12... ♘cxe4 13. ♘xe4 ♘xe4 (13... ♗xe4 14. ♗xf6 gxf6 15. ♗h5 O-O-O (15... ♖e7 16. ♗xf7!) 16.a4→ (16. ♘xe6 16...fxe6 17. ♖xe6+ ♖b8 18. ♖xe4 ♖c5+-) 16...d5! A typical answer because activity is the most important factor! 17.axb5 ♗c5 18.c3 ♖hg8∞) 14. ♗h5 g6

15. ♗xg6! fxg6 16. ♘xe6 (16. ♖xe6+ 16... ♗e7 17. ♖ae1 d5 18.f5 ♖d6 Exchanging the most dangerous piece. 19. ♗xe7 ♖xe7 20. ♖b6 O-O It looks like the king is safe, so Black is better now.) 16... ♖b6+ 17. ♖h1 with complex play. 17... ♘f2+?? doesn't work because of 18. ♖xf2 ♖xf2 19. ♘c7+ ♖f7 20. ♖e6+ ♖g7 21. ♗f6+ ♖h6 22. ♖h3+-]

11... ♗e7 12. ♖ad1 O-O 13.f4 ♖ac8

14.g4?! White is mixing too many plans and setups. This move can not be good. [14. ♖h1!? is almost always a useful prophylactic move. 14... ♘c5 (14... ♘b6 15. ♖h3 with ideas of Bd3 or Rd3-Rg3. Sometimes Nxe6 is working as well, so as we said before the h3 square is good for the white queen. 15... ♘c4 (15... ♘xe4 16. ♘xe4 ♗xe4 17. ♘xe6! ♗xg2+ 18. ♖xg2 fxe6 19. ♖xe6+ ♖f7∞) 16. ♗xc4 bxc4 Now the b7 bishop can become

a very strong piece. (16...♖xc4? 17.e5+-) 17.f5 e5 18.♟xf6 ♟xf6 19.♞de2∞ An interesting position from a strategical point of view, which is not easy to evaluate. White should easily take control over the d-file but Black can look for counterplay over the b-file.) 15.f5 (15.e5 15...dxe5 16.fxe5 ♞d5 17.♞xd5 ♟xd5 18.♟xe7 ♖xe7 With no problems for Black.) 15...e5 (15...♞cxe4 16.♞xe4 ♞xe4 17.♟xe7 ♖xe7 18.fxe6 fxe6 19.♟g4 ♟h8 20.♟xe6 ♖ce8=) 16.♟xf6 ♟xf6 17.♞f3 ♖fd8 18.♖d2 (18.♞d5 18...♟xd5 19.♖xd5 ♞a4!±)

18...d5! A typical reaction. Black needs to activate his pieces! 19.exd5 e4±]

14...♞b6 [14...h6 15.♟xf6 (15.♟h4 15...♞xg4) 15...♟xf6 16.g5 hxc5 17.fxc5 ♟e5=+ and it looks like White doesn't have any chance to create any pressure over the h-file.]

15.♟xf6 ♟xf6 16.g5 ♟xd4 [16...♟e7 17.f5 e5 18.♞b3 d5!±again the same important idea.]

17.♖xd4 [17.♖xd4 17...♖fd8=+]

17...e5! =+ Because of the weak king on g1 only Black can be looking for an advantage here.

18.♖d2 exf4 19.♖xf4 ♖fe8 20.♖f2 preventing d5.

20...♖e7 [20...♖e5 21.h4 ♖ce8 with the idea to open the position a bit more after d5 at some moment.]

21.h4 ♞c4 22.♟xc4 ♖xc4 23.♖d4 A good decision. White is going to exchange the active rook on c4.

23...♖ec8 24.♖xc4 ♖xc4

25.♖a7! White is looking for his chances.

25...♖d7 26.♞f2 [26.♞d5 26...♖xc2± and White doesn't have any tricks.]

26...d5! A logical move.

27.♞xd5 ♖xc2+ 28.♞g3 ♖c8 Securing the 8th rank.

29.♖f6 White nicely activates the rook. [29.h5 White is going to push h6 and create weaknesses around the black king. 29...♖d8 30.♖f5∞]

29...♖a8 Black manages to get rid of the unpleasant queen on a7, but now the black rook will be less active. [29...♖c4!±]

30.♖c5 ♖d8 31.♖b6 ♟xd5 [31...♟c8 32.♞e7+ ♟h8 33.♞xc8 ♖xc8 (33...♖d3+=) 34.♖d6 ♖a7∞Black must keep the queens on the board.]

32.exd5 ♖f5 33.♖d6 [33.♖d4 and Black has no time to activate the rook since the d-pawn is very strong! 33...♖e8 34.d6∞]

33...♖d3+ 34.♞g2 ♖c2+ 35.♞g3 ♖b3+ 36.♞f4 ♖e8

37. ♖b8?? What a blunder! Now White is losing the rook by force! [37. ♕e7! preventing Qe3 and now Black doesn't have anything better than perpetual check: 37... ♖c8?! 38. ♖c6↑]

37... ♕e3+ 38. ♖g4 f5+! 39. gxf6 h5+ A nice trick!

40. ♖xh5 ♕f3+ 41. ♖g5 ♕xf6+ [41... ♕g2+ 42. ♖f5 g6+ 43. ♖f4 ♕h2+ 44. ♖g5 ♕xd6 45. ♖xe8+ ♖f7 46. ♖e7+ ♖f8 47. ♖xg6 ♕xd5 also leads to a winning position.]

42. ♕xf6 gxf6+ 43. ♖xf6 ♖xb8+— 44. d6 ♖f8 45. h5 ♖b7 46. ♖e6 ♖h7 47. ♖d5 ♖e8 48. ♖c6 ♖d8 0-1

Editorial Preface

And the team of Bischwiller is the new French Champion with a perfect score of 33 points (3 points for a win). 2nd place went to the team from Clichy (30 points) and 3rd to Bois-Colombes. It is the second title for the Sponsor "Grenke Group" after winning the German Bundesliga for the 10th time.

That is everything from big events of the past week, but already in a couple of days the Super Tournament in Norway begins, with the participation of Carlsen, Caruana and many more of the world's best players. It is going to be a very exciting event since it is the first tournament of the "Grand Chess Tour", which will consist of a total of 3 super events (Norway, Saint Louis and London).

We can expect a lot of fighting games and you will definitely find a few of them analyzed in the next issue of your weekly chess magazine.

For now, enjoy the best moments of the French Team Championship, combined with a range of interesting articles!

GM Csaba Balogh
 Best rating: 2672

A very nice attacking game by Alexander Fier!

1.d4 d5 2.c4 e6 3.Nc3 Bc7 Black would like to play the Queen's Gambit declined, but in this moveorder White has an extra option at his disposal.

4.cxd5 exd5 5.Bf4 c6 6.e3 Bf5 7.g4!? This is the point of keeping the knight back on g1. White takes ground on the kingside and asks the bishop which diagonal he wants to choose. On the other hand, Black hopes that this move might turn out to be weakening of which of he later make use. This move was introduced by Botvinnik more than 50 years ago.

7...Be6 8.h3 White wants to develop his bishop to d3, consolidating the important b1-h7 diagonal followed by Nf3-e5. Later he intends to castle queenside and then the g4-h3 pair of moves are rather grabbing space, than weakening the structure. [8.h4 with the idea of h5 is the other option for White. The pawn should not be taken, because after Qb3, Black must be serious weakening on the queenside as he cannot play anymore Qb6 because of the hanging bishop on h4.]

8...Nd7 9.Bd3 Nb6 The latest ent of the theory shows Black should drive first his knight to b6 from where it can often jump to c4. It also prepares for the potential e4 break, because Black could occupy the d5 square then. Trade the dark squared bishops on d6 and decide the development of the g8 knight only after making all these preparations.

10.Nf3 Bd6 11.Bxd6 Bxd6 12.Qc2 Ne7 [In my opinion, Black should start with 12...O-O-O!? and Kb8 next, because now the manoeuvre executed perfectly in the game with 13.Nb5 makes no sense, as Black has 13...Bb4+]

13.O-O-O It is already difficult how Black should play. He cannot castle kingside, keeping the king in the center is also bad, but O-O-O happened in the game is not so good as before...

13...O-O-O 14.Nb5! Bxd7 Black tries to use the fact, that the pawn on a7 cannot be taken because the knight gets trapped. However things are a bit different... [14...Bb8 is better, but it is not much fun either start to run with the king after 15.Qc5 Qd7 16.Nc3 White is better again.]

15.Ne5! Bringing the knight to a central square with tempo is always welcomed.

15...♔e8 16.♚c5! [16.♘xa7+! leads to the same with transposition.]

16...♚b8

17.♘xa7! There is no way back! White must accept the challenge and go for the complications, otherwise Black pushes back the pieces with f6 and he is completely fine.

17...♘d7 [17...♔xa7 18.♚a5+ ♚b8 19.♚xb6± wins a healthy pawn.; 17...f6 18.♚xb6 fxe5 hoping that the knight remains trapped on a7, however White could save it with a small tactical trick 19.♘b5! cxb5 20.♚xe6±]

18.♘axc6+!! White destroys all the kingside pawns. He gets 3 pawns for the sacrificed piece and the black king gets exposed against which White launches a very strong attack within few moves! [18.♘xd7+ 18...♚xd7 is already good for

Black. He is already threatening with Qd6 Qb6 Qc7 haunting the queen which cannot be traded because the knight gets lost. ; 18.♚xe7 could be another brilliant tactical blow, but it is less strong because of 18...♘xe5! (On 18...♚xe7 19.♘axc6+! transposes to the line below...) 19.♚xe8 ♘xd3+! intermediate move leaves the knight trapped on a7!]

18...♘xc6 [18...bxc6 is strongly met by 19.♚xe7! ♚xe7 (Now on 19...♘xe5 White has 20.♚b4+!+- and taking back on e5!) 20.♘xc6+ ♚c7 21.♘e7 g6

The knight looks still trapped on e7, however the truth is 22.♘f5! saves the knight because after 22...gxf5 23.gxf5+- the bishop gets suddenly trapped!]

19.♚d6+! A very important check with the point of taking the c6 pawn with check!

19...♔a8 Only move! [19...♔a7 is even worse because 20.♘xc6+ bxc6 21.♚c7+ ♔a8 22.♘a6 ♚b8 23.♚d3! and Black gets mated! For instance 23...♚d8 24.♘b7+ ♚xb7 25.♚a3+--]

20.♘xc6 bxc6 21.♚xc6+ ♚b8 [21...♔a7 loses quickly to 22.♚c7+ ♔a8 23.♘b5!+-]

22.♚d6+ ♚b7 23.♚a6+ [The fastest way to the victory was 23.♘a6+! 23...♔a7 24.♘b5! ♚c8+ 25.♔b1 and Rd3 is coming

next against which Black is hopeless. 25...♔f8 just delays the Rd3 threat 26.♚a6+ ♔b8 27.♖d3+- and Black gets mated soon.]

23...♔b8 24.♚b5+ ♔c7 [On 24...♔a7 Fier has probably wanted to play 25.♔b1 bringing to rook into the attack along the c1 square 25...♘b8 26.♚a5+ ♔b7 27.♖c1 ♖c8 28.♖xc8 ♚xc8 29.♖c1+- The game will not last long.]

25.♔b1! It is clear, that Black cannot hold for long after the rook goes to c1, but Black continues defending tenaciously.

25...♖b8 [An attempt to close the c-file with 25...♘b6 26.♖c1+ ♘c4 fails in view of 27.♚a5+! and the king has no good square to leave. 27...♔b8 (27...♔b7 28.♖xc4! dxc4 29.♙e4+ ♔c8 30.♚c5+ ♔d7 (30...♔b8 31.♚b6+ ♔c8 32.♚b7#) 31.♙c6+-; On 27...♔d7 the easiest is 28.♙xc4 dxc4 29.d5+-; 27...♔d6

loses nicely to 28.♖xc4! dxc4 29.♚c5+ ♔d7 30.♙c2! ♖a8 Otherwise Ba4 is decisive and now 31.d5!+- wins. After white takes on e6 he will be winning even materially, but the rook is coming to d1 which is even more important.) 28.♖xc4! dxc4 29.♚b6+ ♔c8 (29...♔a8 30.♙e4+ ♙d5 31.♚a5+ ♔b8 32.♙xd5+-) 30.♖c1! +- Black cannot defend. The most tenacious way to prolong the defeat is 30...♚a4 but after 31.b3! ♚a8 32.♙xc4 ♙xc4 33.♖xc4+ ♔d7 34.♖c7+ ♔e8

35.♚b5+! ♔f8 36.♚f5! A calm move after which the mate can be avoided only by losing big material 36...♚d5 (36...f6 37.♚e6+-) 37.♚xd5 ♖xd5 38.♖c8+- entering to the rook endgame with 4 extra pawns.]

26.♚a5+ ♖b6 [On 26...♘b6 27.♖c1+ ♔d8 28.♚a7 ♘d7 29.♖c7 ♔e7 30.f4! and Black collapses after f5 in the next move!]

27.♖c1+ ♔b7 [27...♔d8 28.♖c6+-; 27...♔d6 28.♚a3+-]

28.♙a6+!! ♖xa6 [Black should have played 28...♔b8 after which White can choose between two good options. One is the direct 29.♖c8+ (And the other, more human is 29.♖c3!+- bringing all the remaining pieces to the attack!) 29...♚xc8 30.♙xc8 ♖xc8 31.♖c1 ♖xc1+ 32.♔xc1+- The computer considers this endgame to be completely winning with the

3 pawns, especially with the two connected ones on the queenside, but I am not sure if it going to be such an easy task to convert. Also the psychological advantage is on Black's side, that he managed to avoid getting mated. Therefore I would prefer the 29.Rc3 line!]

29.♖c7+ ♔b8 30.♙xa6 ♕xc7 31.♖c1+ ♘c5 [31...♔d8 32.♖c8+ ♔e7 33.♙a3+ ♔f6 34.♖xe8 ♖xe8

35.♙d6+- This is obviously just materially the same position like in the 28...Kb8 29.Rc8 line. Now the black pieces are totally disharmonized, White only needs to advance the a- and b-pawn and they will promote automatically.]

32.♖xc5+ ♔d8 33.♙d6+ ♘d7 [33...♙d7 34.♙b8+ ♔e7 35.♙xh8+- is also over.]

34.♖b5! A calm finish to the end of the game. Black gets

mated, he can only give a desperate check on e4...

34...♙e4+ 35.♔c1! Of course not to a1, as it changes the game with 360 degrees because of Qh1! Now Qh1 Kd2 and no more checks. **1-0**

(2) So, Wesley(2778) - Fedorchuk, Sergey A(2657) [A27]

TCh-FRA Top 12 2015(10.1),
2015.06.08

GM Arkadij Naiditsch
Best rating: 2737

There has been some controversy around Wesley So lately. By playing great fighting chess, his rise to the Top 10 was very quick, but the story at the US Championship where he got a 0 for taking notes didn't just bring him fans. Anyhow, until the current game So was showing a very good result at the French league. Shortly after the opening, the position got crazy and very complicated. It seemed like White managed to outplay his opponent, but Black always kept dangerous play around the white king and taking advantage of a mistake by So, Fedorchuk finally mated the white king with a nice but not too difficult combination. A very interesting game to watch.

1.c4 So likes to start with 1.c4.

1...e5 2.♘c3 ♘c6 3.♘f3 ♙c5 Black rarely chooses this move order. It is much more popular to play 3...Nf6.

4.a3 Threatening to play b4. a3 is often a very useful move anyway.

4...d6 A solid reply. [After 4...♘f6 5.b4 ♙d4 6.♙b2 White will play e3 next and get the bishop pair.; But it might have been interesting for Black to continue with 4...a6 5.b4 ♙a7 and the game might transpose to known positions.]

5.b4 Of course!

5...♙b6

6.e3! A strong move! White is playing against the b6 bishop which is stupid now. If we look at this position, White actually has a very good Sicilian.

6...♙g4?! I don't like this move. [I think 6...♘f6 was more solid. 7.d4 exd4 8.exd4 a5 A very typical move. 9.b5 ♘e7 and White is just a bit better.]

7.h3 A good move, asking Black where the bishop is going.

7...♙h5 8.g4 So far So played a very logical and good game.

8...♙g6 Black's play is a bit funny with this double bishop development... :)

9.d4! White continues playing strong chess. The center belongs to White now and the position of the black bishop on b6 is getting worse and worse.

9...exd4 10.exd4 a6 is almost the only move to escape losing the bishop after c5.

11.♙g2 White is playing a perfect game. Before starting the final action, So brings all his pieces into the game and the bishop's position on g2 is clearly just great.

11...h5 Black is looking for counterplay.

12.O-O A good move, but it is a bit risky. [White could just have continued with 12.g5 closing the h-file. 12...♘ge7 13.O-O O-O

14.c5 and the domination in the center should give White a clear plus.]

12...hgx4 13.hxg4 Black has opened the h-file, which could potentially be dangerous for White, but the bishop on g2 is a great defender so White has no reasons to worry too much.

13...♖d7 A very logical move, attacking the only weakness of White's position, the g4 pawn.

14.♖e1+ ♔f8 The black king would have gone to f8 anyway.

15.c5 A very logical move. Now that all the white pieces are perfectly placed, it is time to start some action.

15...♙a7 The only move. [The endgame after 15...dxc5 16.dxc5 ♖xd1 17.♖xd1 ♙a7 18.♙f4 is almost winning for White.]

16.d5 It is pity play such a move, which might free the bishop from a7. On the other hand, White is really dominating the center, so from a practical point of view it is hard to stop yourself from playing d5. [16.g5 would give White quite a big advantage.]

16...♘ce7 17.♖d4 Defending the c5 pawn and the g4 pawn.

17...♖d8?! A very slow move. [Black should have hurried with 17...♘f6 Fedorchuk maybe did not see what he could do after 18.♙g5 but Black has 18...♘eg8! and of course White is better, but the g4 pawn is in serious trouble.]

18.♙b2 All the white pieces are out.

18...f6 There was already no other move. [18...♘f6 didn't work because of

19.♖xe7! ♖xe7 20.cxd6 and the bishop on a7 is hanging!]

19.♖f4 White wants to play Nd4-Ne6 or Ng5-Ne6. [But he could have tried the direct 19.g5 19...dxc5 20.bxc5 ♙h5 (20...♘xd5? doesn't work because after 21.♘xd5 ♖xd5 22.♘e5! White is just winning.) 21.gxf6 ♘xf6 22.♘g5 and I cannot imagine White's attack not being enough for a serious advantage.]

19...♘h6 is Black's only hope. [19...dxc5 20.♘g5 ♙f7 21.♘e6+ ♙xe6 22.dxe6 ♖e8 23.♖xc7+-]

20.g5 So is still playing the good moves to put maximum

pressure on Black's position. [White could have won an exchange after 20.♖d4 20...♙xg4 21.♗e6+ ♔f7 22.♗xd8+ ♚xd8 but now because the white pawn is on d5 and not on d4, the bishop from a7 is becoming a dangerous piece. 23.♕c1! (The endgame after 23.♙xg4 23...♗xg4 is not that clear at all!) 23...♕f5! with the idea of playing Ng6 next and White might be better, but things are pretty unclear.]

20...♙g4 Black hopes to escape into an endgame.

21.♙d2?! A logical, but White should not have avoided the endgame. [21.♖d4 was better. 21...♙xf4 22.♗e6+ ♔f7 23.♗xf4 Now White's threat is to play Rxe7 and Nxc6. 23...♗hf5 24.gxf6 gxf6 25.♗e4! and Black's position seems to fall apart.]

21...♗f7 The black knight is going to e5 to block White's attack a bit.

22.gxf6 gxf6

23.♙d4?! This move is really strange. White just avoided the exchange of queens and now loses a clear tempo to achieve it! [23.♖d4 leads to very unclear play. 23...♗e5 24.♗e6+ ♔f7 25.♗xd8+ ♚xd8 The usual exchange sacrifice by Black. 26.♙d1! ♙g5 and the position is really unclear.; But White had a strong alternative: 23.♙e2! Avoiding the Ne5 move for a moment and attacking the e7 knight 23...♗f5 24.♗e4 ♚e8

25.♗d4 with an obviously better endgame for White.]

23...♗e5 24.♙xg4 ♗xg4 and now the game is totally open! Black is targeting the kingside and the pawn on f2.

25.♗d4 ♔f7 [25...dxc5 26.bxc5 ♔f7 was another possible move.]

26.♗e6

26...♚dg8! An excellent move! Fedorchuk doesn't care about the c7 pawn, but fixes the white king on g1.

27.♗xc7 So is still hoping to be better when actually his position is already in big danger. [Maybe it was a good moment for White to start defending with 27.♗e2]

27...♗e5 The threat of playing Nf3 is in the air and a move like Nd3 could also be very unpleasant.

28.cxd6 ♗c8! Another excellent move by Black. [It is too early for 28...♗f3+? 29.♕xf3 ♕e4+ 30.♔f1 ♕xf3 because the knight on e7 is hanging with check. 31.♚xe7+ ♔g6 32.♔e1 and the white king escapes.]

29.d7?? Having followed a wrong path for a couple of moves, So blunders a pretty mate... [The only way for White to go on was 29.♚xe5 29...fxe5 30.d7 but Black's position still looks clearly better after 30...♗b6! winning the d7 pawn. Things are

still far from clear in a practical game, for example after 31.d6 and White keeps an open fight in a worse position.]

29...♘f3+ Black doesn't miss his chance.

30.♔f1 [30.♙xf3 also leads to mate. 30...♙e4+ 31.♔f1 ♙xf3 and there is no defense against Rh1 mate.]

30...♙d3+ 31.♖e2 and here comes the last pretty move of the game:

31...♖h1+! To call it deserved win by black would be a bit unfair because White was really dominating most of the game, but Black showed good fighting spirit. He defended a difficult position and used his chances very well when the game started to change. As Carlsen once said: "I don't care if my opponent played a great game". **0-1**

The K-Files. Sicilian 3.Bb5+

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Sicilian 3.Bb5+ [B51]

The "strange" bishop retreat - part 1.

1.e4 c5 2.♘f3 d6 3.♙b5+ ♘c6 This opening system has a very solid reputation. It was played with Black by many strong players with good results. One of its advantages is that Black players who play both Sicilians with 2...d6 and 2...Nc6 don't have to study two different systems in case of 3.Bb5. White has tried different plans looking for an advantage but none of them were too convincing. And then...

4.O-O ♗d7 The alternatives look dubious here. [4...♗f6 5.e5

dx e5 6.♗xe5 ♖c7 7.♖f3 ♗d7 8.♙xc6 ♗xc6 9.♗xc6 ♖xc6 10.♖xc6+ bxc6 11.♗a3+= with a very nice structural advantage in the endgame Georgiev.Kr - Piket, Corfu 1990.; 4...♙g4 5.h3 ♗h5 6.c3 ♗f6 (6...♖b6 7.♗a3+=) 7.d4 a6 8.♙xc6+ bxc6 9.♖a4 ♖b6 10.dxc5± Boleslavsky - Petrosian, Gagra 1953 and the natural answer 10...♖xc5 fails to 11.♗d4]

5.♚e1 The accurate move order. [After 5.c3 5...a6 6.♙c4 b5 the main idea doesn't work.]

5...♗f6 [5...a6 This move order has become popular recently. However, it doesn't stop our plan. 6.♙c4!? Now Black has different ways to dealy the natural developing move Ng8-f6 which transposes to the main line but none of them seems to be enough to equalize completely. (6.♙xc6 6...♙xc6 7.d4 cxd4 8.♗xd4 is White's main reaction where the clear road to equal chances is also not shown yet.) 6...e6 (

a) 6...♗e5? just gives a pawn for nothing after 7.♗xe5 dx e5 8.♖h5± Gurgenidze - Karolyi, Tbilisi 1986;

b) 6...b5 7.♙f1 e5 (7...♗f6 8.c3 - 5...Nf6) 8.c3 ♙g4 This solid move stops d2-d4 but costs the bishop pair. (8...g5!? Nowadays this move is more or less standard in similar positions but here it doesn't reach its main goal (to stop d2-d4). 9.a4 An important intermediate move. White tries to define the queenside structure first. (9.d4 9...g4 10.d5 ♗a5 (10...gxf3 11.dxc6 ♙xc6 12.♖xf3±) 11.♗fd2 h5± is less clear) 9...g4 (9...b4 10.d4 g4 11.d5 ♗a5 12.♗fd2±) 10.axb5 axb5 11.♖xa8 ♖xa8 12.♗h4 b4 13.♗f5± and Black has too many weaknesses everywhere) 9.h3 (9.a4 9...b4 10.h3 ♙xf3 11.♖xf3 ♗f6∞) 9...♙xf3 (9...♙h5 10.g4 ♙g6 11.d4±) 10.♖xf3 ♙e7 11.♗a3 ♗f6 12.♗c2 O-O 13.♗e3+= with a solid long-term advantage;

c) 6...e5 7.c3 ♙g4 8.h3 ♙h5 9.d4 cxd4 10.g4 ♙g6 11.cxd4+= White is ahead on development and Black can hardly use the

opponent's weakened kingside.;

d) 6...♘f6 7.c3 - 5...Nf6)

7.c3 ♘e5 This is in my opinion the most interesting attempt to avoid the main line but still White is slightly better here. (7...g6 8.d4 ♙g7 9.d5 ♘a5 10.♙f1± Gurgennidze - Chatebashvili, Tbilisi 2001) 8.♙e2 (After 8.♘xe5 8...dxe5 9.d4 cxd4 10.cxd4 ♖c8 11.♙b3 exd4 the fact that the knight is still on g8 works in Black's favor: White doesn't have the important resource e4-e5. 12.♖xd4 ♙c6=) 8...♘f6 9.d4 ♘g6 10.♙d3 (10.e5 is premature due to 10...dxe5 11.dxe5 ♘g4=+ and the e5 pawn is just weak.) 10...♙e7 11.e5 dxe5 12.dxe5 Now it's another story. 12...♘d5 (12...♘g4 13.h3 ♘h6 14.♙xh6 gxh6 15.♙e4±) 13.g3 ♙b5 14.♙c2↑ and White's space advantage promises him somewhat better chances.]

6.c3 a6 Now it is already necessary. Black has to do something about d2-d4.

This is in fact the critical position of the whole variation. For a long time the discussion was going around two logical bishop retreats - to a4 and f1 (the gambit line 7.Bxc6 bxc6 8.d4 is rather tricky but not really dangerous for Black). Both have their merits and drawbacks but in both lines there are lines which are quite OK for Black. At least I think so. As I mentioned already before the whole line for Black is attractive

for lazy players who don't want to study different setups against 2...Nc6 3.Bb5 and 2...d6 3.Bb5+ in Sicilian - this is my case. But then at some moment really strange move attracted my attention... [The quiet development. like 6...g6 gives White clear advantage after 7.d4 cxd4 (7...♙g7 8.dxc5 dxc5 9.e5 ♘g4 (9...♘xe5? This pawn is poisoned 10.♘xe5 ♙xb5 11.♖b3+-) 10.♙f4 ♙xe5 Now this pawn is not poisoned like one move before but still not tasty at all. 11.♘xe5 ♘gxe5 12.♘a3= with great compensation (Glek - Kupreichik, Germany 1998)) 8.cxd4 ♙g7 9.♘c3 O-O 10.h3+= with a typical position where Black has no compensation for White's strong pawn center and space advantage (De Greif - Ramirez. Columbia 1958)]

7.♙c4!? ... And more and more I looked at the resulting lines less and less I liked it for Black. Well, in this case it's not about being crushed in 20 moves (although everything might happen as we will see later) but it looks like everywhere White is comfortably better after the opening phase. Maybe it's too early to come with some strong conclusions as the variation is not analysed well enough till now (only 20 games in Megabase) but still... The idea is fairly simple: White claims that in many lines bishop is better on c4 than let's say on f1 (the cooperative line 7..e5? 8.Ng5 is first what comes to mind). But then why did I call this move : "strange"? Mainly because of

7...b5 gaining space with tempo looks perfectly logical. So it's no surprise that more than 50% of grandmasters who played this position with Black have chosen this move. However, the sad truth about it is that ifirst of all it seriously weakens the queenside structure and after Bf1 and a4 Black faces serious problems just immediately. [

7...♘e5 This move is already rather standard for the whole 3.Bb5+ system. Black hopes that firm control in the center will

compensate a little structural defect. In many cases it's true but here White has strong concrete answer. 8.♖xe5 (8.♙e2 8...♗g6!?⇒) 8...dxe5 9.d4! and it turns that White is better prepared to open the center. 9...cxd4 10.cxd4 ♖c7 this is relatively best but still the following complications work fine for White (

a) 10...♞c8 11.♙b3 exd4 12.e5 ♗g8 13.♙g5!?± looks ugly for Black;

b) 10...♞b6 Smart tactical trick which meets very strong reaction 11.h3! ♞xd4 (11...exd4 12.e5 ♗g8 13.e6! ♙xe6 14.♙xe6 fxe6 15.♞a4+ ♞c6 16.♞xd4♞) 12.♞b3 e6 13.♞xb7 ♞a7 14.♞xa7 ♞xa7 15.♙e3± and White is much better here due to better development and queenside pawn majority.)

11.♙b3 e6 (11...exd4 12.e5 ♗g4 13.♞xd4±) 12.dxe5 ♞xe5 13.♗d2 ♞d4 14.e5 ♗g4 15.♞e2 ♙b5 16.♙c4 ♙xc4 17.♗xc4 ♞c8 18.♗d6+ ♙xd6 19.exd6 ♗f6 20.♞d1 ♞c4 21.♞f3 O-O 22.♙g5± and the pawn is very strong on d6;

7...e6 8.d4 b5 9.♙f1 - 7...b5;

7...g6 Ignoring White plans to build strong pawn center doesn't promise anything good here is well. 8.d4 cxd4 (8...♙g7 9.e5 dxe5 10.dxe5 ♗g4 11.♙f4±) 9.cxd4 ♙g7 (9...♙g4 10.♞b3 e6 Kapp - Mlecnik, Laguna 1996 (10...d5 11.♙xd5 ♗xd5 12.exd5 ♗a5 13.♞d3±) 11.♞xb7 ♗a5 12.♞b4 ♙xf3 13.gxf3 ♗xc4 14.♞xc4 ♞d7 15.♗c3 ♙g7 16.♞a4±) 10.e5 dxe5 11.dxe5 ♗g4 12.♙f4 ♙e6 13.♗bd2!+=;

7...♞c7 Verspecht - Werner, Belgium 2004 8.d4 e5 9.d5 ♗e7 10.a4+=;

7...♙g4 will be analysed in part;

7...e5? 8.♗g5±]

8.♙f1 e5 Now the game develops very similar to some Ruy

Lopez lines (what is also not attractive for many @pure Sicilian players). But the big difference is white bishop on f1 (instead of c2) and this difference clearly favours White as b5 becomes the target. [

a) 8...♙g4?! is logical/ Black fights for square d4. But at the same time when queen side light squares are seriously weakened Black just needs the bishop here - not on g4. So if Black's previous move might be treated as some inaccuracy this one turns to be a serious mistake. The following lines confirm this assessment. 9.a4 (9.d4 9...cxd4 10.cxd4 e5 11.d5 ♗d4 12.a4) 9...b4 10.d4 cxd4 11.cxd4 e6 (11...e5 looks consistent but after 12.d5 ♗d4 13.♙e3± Black's queenside is in ruins. The important point is that White wouldn't be afraid of weakening his kingside structure. Black lacks time and piece coordination to use it (Baklan - Mamedov, R Turkey 2014)) 12.d5 ♗e5 Sutovsky - Mchedlishvili Baku 2011 and now the simple 13.♗bd2 ♙e7 14.h3 ♙h5 15.dxe6 fxe6 16.♞b3± would bring White clear advantage;

b) 8...e6 9.d4 cxd4 10.cxd4 ♙e7 and now White faces an important choice 11.d5!? this is more dangerous (The normal developing move 11.♗c3 meets strong reaction 11...b4 12.♗e2 (12.♗a4 12...♞a5) 12...♗xe4 13.d5 exd5 14.♗f4 ♗f6 15.♗xd5 ♗xd5 16.♞xd5 O-O 17.♙f4 ♗e5! 18.♗xe5 dxe5 19.♙xe5 ♙b5 and Black must be able to hold rather easily) 11...♗e5 12.♗xe5 dxe5 13.d6! Yet another pawn sac. 13...♙f8 14.a4 b4 15.♗d2 ♙xd6 16.♗c4 ♙c7 17.♗d6+ ♞e7 18.♗c4 Smart trick to leave Black king in the center. White's compensation here is even stronger than it might seem. 18...♙c6 (18...♞e8 19.♙e3 ♞f8 20.♗b6 ♙xb6 21.♞d6+ ♞g8 22.♙xb6±) 19.♞c2 ♞b8 20.♙e3 ♗xe4 21.♙d3 ♗f6 22.♙c5+ ♞e8 23.♞ad1♞;

c) 8...♗e5 When this knight doesn't attack white bishop it makes less sense. White just continues his play. The

knights' exchange itself doesn't help Black too much. 9.d4 ♖xf3+ 10.♔xf3 e5 11.a4! It's not easy for Black to complete development as 11...♙e7 just gives a pawn 12.axb5 axb5 13.♖xa8 ♖xa8 14.dxe5 dxe5 15.♗g3±;

d) 8...g6 Here once again the pawn centre provides White pleasant positional advantage. 9.d4 cxd4 (9...♙g7 10.e5±) 10.cxd4 ♙g7 11.a4 (11.e5 11...dxe5 12.dxe5 ♖g4 13.♙f4 ♙e6 14.♖bd2+=) 11...b4 12.♖bd2 O-O 13.h3+=]

9.a4 It's very useful to define queenside structure as soon as possible.

9...b4 Guerra - Ceschia Venice 2012 [9...♖b8 if Black tries to protect this pawn and keep control over c4 it really doesn't help after the natural 10.axb5 axb5 11.♖a3 b4 12.♖c4± and White's pressure is only increasing; 9...bxa4 This capture is considered to be certain concession in Ruy Lopez structure but the whole situation is not very much attractive already 10.♖xa4 a5 11.d4 (11.d3 is more quiet choice 11...♙e7 12.♖bd2 O-O 13.♖c4 ♖c7 14.g3+= also with some positional advantage; c4 is an excellent square for the knight.) 11...cxd4 12.cxd4 ♙e7 13.♖c3 O-O 14.♙b5+= Now Black has good square b4 for his knight bit everything else is in White's favour.]

10.d4! N Quite important: White doesn't have to waste time for h3 because Bg4 is not dangerous in any line.

10...♙e7 Black has different options to define the central pawn structure here but none of them looks fully satisfactory. Most of the following lines have one common point: white knight arrives from b1 to c4 and becomes the real force. It might be a bit early to speak about White's big advantage but the opening results clearly favours him and his play is much easier. [10...bxc3 11.bxc3 ♙e7 12.dxc5 (12.♖a3!? looks risky but actually may be even stronger. 12...cxd4 13.cxd4 ♙g4 14.d5 ♖d4 15.♙e3 ♖xf3+ 16.gxf3 ♙h5 17.♖c4 O-O 18.a5 ♖d7 19.♙h3!) 12...dxc5 13.♖bd2 ♖c7 14.♖c4 ♙e6 15.a5! ♙xc4?! 16.♙xc4 ♖xa5? 17.♖a4+-; 10...cxd4 11.cxd4 ♙e7 (11...exd4 12.♖bd2 ♙e7 13.♖b3 O-O 14.♖bxd4 d5 15.e5 ♖e4 16.♙e3+=; 11...♙g4 12.dxe5 ♖xe5 13.♖bd2+=) 12.♖bd2 O-O 13.dxe5 ♖xe5 14.♖xe5 dxe5 15.♖c4 ♖c7 16.♙e3 ♙c5 17.♖c1 ♙xe3 18.♖xe3 ♖b6 19.♖c4 ♖e6 20.a5+= It might seem like Black manages to reach something with minor pieces exchanges. But in fact his position is still extremely unpleasant because of numerous weaknesses. Once again: Nc4 is a monster.]

11.dxc5 dxc5 12.cxb4 cxb4 13.♖bd2 O-O 14.♖c4 ♖c7 15.♙e3+= and Rc1 on the next move. Black is under pressure.

15...♖xe4? 16.♙b6+-

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 27 upsets.

The number of moves ranges from 16 in IM Bogdanovic (2268) - Sinanovic (1930), 0-1 to 78 in FM Ahmed (2346) - Sharabaty (1884), 0-1.

We didn't get to see many high-profile upsets this time. A game worth mentioning is Rosmuller (2142) -GM Pruijssers (2507), 1-0.

One of the greatest upsets ever happened in Bryn (2071) - Tomic (1333). This is a 738 rating points difference! To be honest, it is not clear from the final position how Black prevailed. Still, the official site confirms the result, so we can be sure that the upset did occur.

Over the course of my chess career I have won a couple of games as the "David", but decided that including them into the column would be classified as unsolicited bragging. On the contrary, here is a fresh example of how terribly one can fail as a "Goliath".

I have outplayed my young opponent in the endgame. By this point the game is a technical win, so I was expecting to put my king on b6 and to devour another pawn a few moves later. After the disastrous move 45...Ka5?? (instead of the obvious Kc5 -+) White quickly played 46.Nc4X and pressed the clock. Somewhat dumbfounded, I smiled helplessly and asked "It is mate, right?". "Yes!", replied the kid. It requires a lot of love for the game and a strong will to recover after such inexplicable blunders. To be honest, after this misfortune I was considering to quit tournament chess altogether.

In fact, quite a few of this week's upsets hail from Nezhmetdinov Memorial. On one of the adjacent boards next to mine the following finale took place:

Shkalikova (1737) wrapped up the game against Martynyuk (2078) with 18.Qc4+ e6 19.Qc3 Kf7 20.Qf6+ Ke8 21.Ng7X

Top-10:

Bryn (2071) - Tomic (1333), 0-1, [738](#) points
 Orysenko (1560) - Gilyazitdinov (2067), 1-0, [507](#) points
 Ahmed (2346) - Sharabaty (1884), 0-1, [462](#) points
 Abdulla (2498) - Sammed Jaykumar (2071), 0-1, [427](#) points
 Himanshu (2420) - Sa (2003), 0-1, [417](#) points
 Ambartsumova (2331) - Tukaeva (1922), 0-1, [409](#) points
 Orysenko (1560) - Mischeryakov (1945), 1-0, [385](#) points
 Rosmuller (2142) - Pruijssers (2507), 1-0, [365](#) points
 Van Dael (1701) - Koudinov (2065), 1-0, [364](#) points
 Bylino (2067) - Khlopushin (1724), 0-1, [343](#) points

Average gap: 442; White won 4 games, Black won 6 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

For once I will change the theme of my column, which is analysing a junior game. I will show you one of my very few but important successes, which helped my team Bischwiller to win 2-1 against Clichy and eventually become French team champion!

1. ♖f3 d5 This day I switched back to the Queen's Gambit, since I had too much of King's Indians lately.

2.d4 ♗f6 3.c4 e6 4. ♘g5 ♙e7 5. ♔c2 Going for an unusual move order.

5...h6 6. ♘xf6 ♘xf6 7.e3 O-O I started to think around here, and I didn't like the immediate [7...c5 8.cxd5 cxd4 9. ♘b5+! It appears this was played recently in Nakamura-Adams London 2014 and White had the edge. I of course saw the game but couldn't remember exactly how it went.]

8.h4 Played instantly. 8.Nc3 would simply turn back into a usual Queen's Gambit with Bxf6.

8...g6 I thought a long time about it and played the usual solid move to save the kingside by answering Bg7 to g4. White's play on the flank might induce play in the center but [8...c5 9.g4! cxd4 10.g5 seems really awful for Black over the board!]

9. ♗c3 c6 10.O-O-O A normal move. It is funny that if White now plays [10.h5 10...g5 we got a position that I quickly checked during the last FIDE Grand Prix while I followed the Nakamura-Svidler game, which came from a totally different opening: 1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.Nf3 Bg7 5.h4 c6 6.Bg5 h6 7.Bxf6 Bxf6 8.h5 g5 9.e3 e6 10.Qc2 a6?! If 10...0-0 was played it would transpose to the same exact position! Back then I let the computer think a little about it and he couldn't find a good plan for White.]

10...♗d7 11. ♖b1 White started to think around here so at least I was safe from huge preparation. Here I think the most principled move is [11.e4 11...♘g7 with very complex play.]

11...♘g7 12. ♘d3

12...a6 I decided to stick to the same strategy all game to slightly improve my position and wait for a good moment to use the bishop pair. The opening position should help White make use of his development advantage. Another option is [12...dxc4 13.♟xc4 ♚e7∞]

13.cxd5!? [13.e4 runs into 13...dxc4! 14.♟xc4 b5 followed by c5, with great play for Black.]

13...cxd5 [13...exd5 14.h5 g5 15.♞e2 didn't appeal to me as after Ng3 White takes control of the important f5 square.]

14.e4 A logical opening of the position. [14.♞e2 14...b5∞]

14...dxe4 15.♟xe4 [15.♞xe4 15...b5=+]

15...♞b6 Another safe move. Now I am ready to easily meet the d4-d5 break. My plan is Rd8 Nf6 (or Nf8) Bd7-e8 Rac8. One of the other interesting options is [15...♞f6 16.♞e5 ♟d7!? 17.♟xb7 ♞b8 18.♟xa6 ♞a5 with compensation.]

16.g4 A good move. White will take the f6 square for my knight and improve his dark squares position.

16...♞d8 17.♞a4 ♞a5 18.g5 h5 19.♞c5 [19.a3 19...♞b8 20.b4 ♞b5 21.♞c7 ♞f8 22.♞c3 ♞b6 23.♞xb6 ♞xb6∞]

19...♞b8

20.♞e5? This is a big mistake. Black's pieces are quite restricted so he cannot make use of his positional and two bishops advantage. Play might continue with [20.♞b3 20...♞b4 21.♞he1 ♞f8 (21...♞b6 22.♞e5 ♞d5∞) 22.♞e5 ♟d7 23.♞c5 ♞a4∞]

20...♞xc5 21.♞c4 ♞b4 Finally an active move. I calculated it until the 24th move and decided it was stronger than [21...♞c7 22.dxc5 ♟d7=+ which is also clearly in Black's favor.]

22.dxc5 [22.a3 22...♞xc4! 23.♞xc4 ♞xe4— The pieces are much stronger than the queen here.]

22...♟d7 23.♞d6 [23.♞b6 23...♟xb2! 24.♞xd7 ♟e5+ 25.♞b3 (25.♟c1 25...♟f4+—) 25...♞xe4+∞]

23...♟a4 24.b3

24...b6! Not the only way but the most forced and best one.

25. ♖c4 Entering a lost endgame. [25. ♗xf7 might give more practical chances. 25... ♕xf7 26. c6 ♜d4 27. c7 ♜c8 28. ♖b7 ♖d7+]]

25... bxc5 26. ♖xb4 ♜xb4—+ Two bishop s and a pawn up should be enough but even then, under time pressure, I gave some saving chances!

27. f3 ♖d4 [27... ♖f8! is a very strong computer move which didn't cross my mind. 28. ♗b7 (28. ♗c4 28... ♜xd1+ 29. ♜xd1 ♜xc4 30. bxa4 ♜xa4—+) 28... ♜xd1+ 29. ♜xd1 c4—+]]

28. ♗b7 ♜c8 29. ♕c2 ♖d7 30. ♗a5 ♜b5 31. ♗c4 ♜cb8 [31... ♜bb8 Considering the chance I gave in the game, this option was better!]

32. ♜d3 ♕f8

33. ♗d6! Aasty surprise! I have to save the rook now!

33... ♜5b6 34. ♗c4 ♜b5 [34... ♜b4 is the other choice but after 35. a3 ♜xc4+ 36. bxc4 ♖a4+ 37. ♕c1 ♖e5 38. ♕d2 ♖f4+ 39. ♕c3 ♕e7 40. ♜g1+ it is not so easy for Black to improve. 40... ♜b3+ 41. ♕c2+ There is no lethal check.]

35. ♗d6 ♜b4 36. a3 ♜4b6 37. ♗c4 ♜b5 38. ♗d6 ♜5b6 39. ♗c4 ♖b5 After maneuvering to get closer to move 40 I need to play this move.

40. ♗xb6 It is very natural to go for opposite colored bishop endgame but maybe the other possibility is more tenacious: [40. ♜xd4 40... cxd4 41. ♗xb6 ♜xb6 42. ♜d1 e5 43. ♜e1 ♕g7 followed by f6 and Black has good chances to convert the extra pawn.]

40... ♖xd3+ 41. ♕xd3?! To save the game White should try to transfer his king to the kingside to protect his weak pawns. [41. ♖xd3 41... ♜xb6 42. ♖c4 ♜d6 43. ♕d2 ♖f2+ (43... ♖b2+ 44. ♕e2 ♖xa3?! 45. ♜a1 ♖b4 46. ♜xa6 ♜d2+ 47. ♕e3 ♜h2 48. ♜a8+ ♕g7 49. ♜a7!=) 44. ♕e2 ♖g3+]]

41... ♜xb6 42. ♕c4

42... ♖e3—+ Now it seems clear that Black is winning thanks to the extra pawn, the active pieces and the big weakness of the h4 pawn. I will slowly improve the position until I win extra material.

43.♖h2 ♔e7 44.♞e2 ♘c1 45.♞a2 ♘f4 46.♞g2 ♜b8 47.♘c2
♘c1 48.a4 ♘a3 49.♘e4 ♞d8 50.♛c3 ♘b4+ 51.♛c2 ♞d4
52.♞e2 a5 53.♛c1 ♔d7 54.♛c2 ♔d6 55.♛c1 c4 56.bxc4
♞xc4+ 57.♛d1 ♞d4+ 58.♛c2 ♛e7 White is not able to defend
the a4 pawn after Bd6, so he resigned. 0-1

Best rating: 2672

Without the rooks, the bishop and knight vs the bishop is an obvious draw. White does not even have the slightest winning chance there. The story is different with a pair of rooks on board. The objective evaluation should be still draw, but White retains excellent practical chances because of different kind of mating nets. In the game, Black makes some inaccuracies and White gets what he wants...

56. ♖h6+ A good practical idea could be to try for 50 moves and if Black defends perfectly then trade off the knight for the black bishop and try for another 50 moves with the rook and bishop vs the rook. In our current chess, making our opponent as tired as possible is an important factor.

56... ♔d5 57. ♘c3+ ♔c4 58. ♖c6+ White squeezes the king to the edge of the board. This is clearly the right idea to create

successful mating nets.

58... ♔b3 [Black cannot stay in the middle of the board with 58... ♔d3? because of 59. ♘d5+- with the multiply threats of Rc3, Nf4 and Nxe7.]

59. ♘d5 ♙a3

60. ♔e4! Very good technique by White! He brings all his pieces closer to the opponent's king. Black is getting squeezed and defending is getting more and more tricky with each move. The idea is to play Kd3 followed by Rb6 check forcing the king to go to the a-file. It is very strange, but I already don't see a draw for Black!

60... ♖d8 Logical, Black stops the Kd3 plan. [Another defense is 60... ♖e8+ 61. ♔d3 ♖d8 62. ♖b6+ ♔a4 The point is Kc4 is met by Rc8 and the king is forced to retreat. White needs to make some unwanted move, however it does not change the outcome... 63. ♔d4! ♖c8 64. ♙g5! Controlling the d8 square and using the fact, that the rook cannot be taken after Bc5 check because the knight forks the rook. 64... ♙c5+ 65. ♔d3 ♔a5 (65... ♖g8 loses to 66. ♘c3+ ♔a5 (66... ♔a3 67. ♙c1#) 67. ♖b5+ ♔a6 68. ♖xc5+-) 66. ♙d2+ ♔a4

67. ♖b1 Black is lost again. There are too many threats around the king. He cannot move his rook, because Kc4 decides, while the bishop must control the b6 square. Not too many legal moves are left, one of them is 67... ♗f2 but it moves into another motif... 68. ♘c3+ ♔a5 69. ♘e4+-; Another attempt is 60... ♖b8 trying to control the b-file to avoid getting a check, but it also does not help for long 61. ♔d3 ♗b4 62. ♖c1! White gives the wished check from behind. 62... ♖d8 63. ♖b1+ ♔a2 64. ♖xb4 ♖xd5+ 65. ♔c2

The following endgame is winning, because the black king is trapped! It still requires good technique. 65... ♔a3 66. ♖c4 White is threatening with mate in two moves, therefore the only move is to send the rook into passivity to the a-file. 66... ♖a5 67. ♗c5+ ♔a2 68. ♗d6 White slowly makes progress, but taking away the possible squares from the black rook on

the a-file... 68... ♖a6 69. ♖c5 ♖a4 70. ♖c6 ♖a8 71. ♗b4! Black is getting squeezed. A possible finish is 71... ♔a1 72. ♗c3+ ♔a2 73. ♖d6+- and Black has no defense against Rd1-a1!]

61. ♗d4 ♗f8 62. ♖b6+ ♔a3 63. ♖b7! Putting the pieces to light squares to ignore the black bishop is another sign of the good technique.

63... ♔a4 64. ♗b2 [White should have asked the rook where does it want to go 64. ♗f6! 64... ♖e8+ (64... ♖d6 is the only way to avoid Kd3-c4, but it moves into 65. ♘b6+!+- and Nc4 check wins the rook!) 65. ♔d3+- A possible finish is: 65... ♔a3 66. ♗b2+! ♔a4 67. ♔c4 ♖c8+ 68. ♘c7!+- and the king is trapped again!]

64... ♗d6 65. ♗d4 ♖b8 Black tries to get the b-file for his king, but it does not solve the problems... [On 65... ♗f8 White already wanted to play 66. ♗f6!]

66. ♘c3+ ♔a5 Otherwise Nb5 wins the bishop.

67. ♖a7+

67... ♔b4 68. ♔d3! Taking control over the c4 square! Black temporarily controls the b-file and the b7 check, but it only delays the problems...

68... ♗f8 69. ♖a4+ ♔b3 70. ♖a1! and Black gets squeezed again to the edge of the board!

70...♙b4 There is already no salvation for Black. All the moves are losing on the spot.. . [70...♙a3 71.♖b1+ ♙b2 72.♘d1+-; 70...♖d8 71.♖b1+ ♔a3 72.♙c2 ♖xd4 73.♖b3#; 70...♙d6 71.♖b1+ ♔a3 72.♙c5+ ♙xc5 73.♖xb8+-]

71.♖b1+ ♔a3 72.♙c2! ♙xc3 73.♙c5+! An unpleasant intermediate check and Black resigned because his rook falls next move. Very interesting endgame. After all, I don't wish to anyone to end up in such endgame, it looks practically impossible to hold over the board. **1-0**

(16) Postny, Evgeny(2630)

TCh-FRA Top 12 2015(10.2),
2015.06.08

GM Arkadij Naiditsch
Best rating: 2737

White was better all game long and managed to reach this very promising endgame. Postny perfectly converts it into a full point.

42.d6 A very logical move and probably the best. White wants to play Ba5 or Bf6 next to support the movement of the pawn.

42...f5 [42...♖d8 is not much better. 43.♖d2 ♖d7 44.♙f6 and the g5 pawn is getting lost, which means game over in the long term.]

43.♙a5 ♖d8 What else to do?! [In case of 43...♖e4 44.♖d2 White wants to play d7. 44...♘d7 45.♖d5 and Black's position is just lost.]

44.♖xc4! A good move. There is no reason for White to enter a rook endgame on the spot.

44...♖xd6 45.♖c7 The rook is perfectly placed on c7.

45...g4 [In case Black would try to save the a7 pawn by playing 45...a6 a calm move like 46.h3! is just deadly. White will slowly get to attack the g5-a6 pawns and it will be impossible to defend them. Another idea could be to play h4 in a good moment.]

46.♔g2 A very safe move, but White should have taken the a7 pawn. [Why not play 46.♖xa7 46...♘c4 47.♔g2 and Black doesn't have enough time to play Nd2-Nf3-Rd1, which is easy to see!]

46...a6 47.♙xb6! A nice move. White correctly evaluates that this endgame is winning.

47...♖xb6 48.♖c5 fixing the black rook on f6.

48...♖f6 49.a4! Another accurate move. Before taking actions on the kingside, Postny wants to play a5 followed by Rc7-Rb7-Rb6, winning the a6 pawn.

49...♔g7 50.a5 ♙g6 Black wants to free the rook from f6, but White is in time.

51.♖c7 The threat is now to play Rb7-Rb6, offering the exchange of rooks which would lead to an easily winning pawn endgame for White.

51...f4 Once again Black is taking his only chance.

52.gxf4 White needs to take otherwise Black would push f3.

52...♖xf4 53.♖c6+ and the a6 pawn is falling.

53...♔g5 54.♖xa6 ♖a4 For those who know it, this is an easily winning rook endgame. but for those who don't it can be very unclear.

55.♖a8! The absolutely correct plan. In case White would exchange the f-pawn against the g-pawn the position would be a draw and the same goes for the exchange of the a-pawn against the g-pawn, which would also be a theoretical draw.

55...♖a3 Black can only keep on waiting.

56.a6 ♙g6 57.a7 ♙g7 and what now?

58.h3!! Exactly! White sacrifices the h-pawn to get a passed f-pawn. All that White then needs to do is to push the f-pawn to f6, after which Black will need to play Kf7 and then Rh8 Rxa7 and Rh7+ wins the black rook. This is a typical winning idea in rook endgames, so Dorfman decided that enough was enough and resigned. Very nice endgame technique by Postny! **1-0**

Chess and the City. Injustice to one is a threat to all...

WGM Elisabeth Paetz

is the slogan the ACP (association of chess professionals) has chosen. ACP is a non-profit organisation which was founded in 2003 for improving the life of chess professionals and particularly in financial and legal aspects. During the relatively few years from its foundation, ACP managed to organize and co-organize several tournaments totalling a budget in excess of million Euros.

The president of ACP - Israeli Emil Sutovsky- is a strong Grandmaster himself and a good singer either. Thanks to his efforts, and to the efforts of the ACP team, the association could not only collect members all over the world, but also convince world class players to join.

I am choosing the results of ACP as my topic of this weeks' newsletter as players often forget how important, and difficult, it is to find sponsors, organize tournaments and support professional chess. I, and my female colleagues at the European Women Chess Championship, recently had a first hand experience of the positive aspects of the ACP organization.

After the main tournament, ACP collaborated with the Georgian Organisers to raise the prize fund of the European Rapid Championship managing to attract more strong players in joining the event. In addition to the participants already present at the main event in Chakvi, players of the caliber of Alexandra Kosteniuk and Valentina Gunina decided to come all the way from Russia to participate to the rapid event. After a three-day battle and 11 rounds, these very two players topped the event and collected the first two places.

Who said that practising before rapid games is the best way to go?!:) Sometimes perhaps a temporary break from chess is the key to success. Despite the trip from Russia, Valentina and Alexandra displayed an excellent shape and managed to keep at the minimum the nightmare of all blitz players, the blunder...

1.d4 e6 2.♘f3 ♘f6 3.c4 c5 4.d5 b5 This opening is called the Blumenfeld Gambit.

5.e4!? An interesting idea discovered so many years ago! Instead of accepting the sacrifice White is going to develop his pieces very quickly. The alternative is [5.dxe6 5...fxe6 6.cxb5 d5 7.g3 This should be the best setup for White. 7...♙d6 8.♙g2 O-O 9.O-O ♙b7 Black has strong central pawns for the pawn. 10.♘bd2 One of White's ideas can be to destroy the black structure after e4. 10...♘bd7 11.b3 ♙e7 12.♙b2 with complex play.]

5...♘xe4 6.dxe6 Premature. Nowadays theory says that more [6.♙d3 is more accurate. 6...♘d6 (6...♘f6 7.O-O↑ and White's initiative is based on his strong development.) 7.cxb5 a6 (7...exd5 8.O-O ♙e7 9.♘c3 ♙b7 10.♙e1 and Black is not able to escape with the king. 10...O-O because of 11.♘xd5! ♙xd5 12.♙xh7+ ♙xh7 13.♙xd5+-) 8.b6 The best move to keep the initiative. 8...♙b7 9.♘c3 ♙e7 10.O-O ♙xb6 11.♙e1 O-O 12.♙f4↑]

6...fxe6 7.♙d3 ♘f6 8.♘g5

8...♙e7?! preventing the Bxh7 idea but this is not a perfect place for the queen. [8...bxc4 9.♙xh7 ♙c7 (9...♘xh7? 10.♙h5+ ♙e7 11.♙f4! not allowing the black king to escape. 11...♙e8 12.♙d6+-) 10.♙g6+ ♙e7 11.h4 ♙b7 12.♙f1 ♘c6 with an unclear position.; 8...♙c7!?∞]

9.cxb5 [9.♙xh7?! 9...♙xh7 10.♘xh7 ♘xh7 11.♙h5+ g6 12.♙xg6+ ♙f7 13.♙xf7+ ♙xf7 14.cxb5 ♙b7 with a clearly better position for Black.]

9...d5 10.O-O g6 and Black has to lose more time to develop the pieces because the queen is placed on e7.

11.♙e1 ♙g7

12.♔e2?! An important moment, where White took the wrong decision. Rubinstein should still focus on developing his pieces instead of hurrying with grabbing the e6 pawn. [12.♘c3! 12...O-O 13.♕f4 h6 (13...a6 14.b6 ♘c6 15.♖c1 All the white pieces are in the game.) 14.♘f3 g5 15.♕g3 ♕b7 16.h4→ This position looks very unpleasant for Black.]

12...c4 13.♕c2 [13.♘xe6? 13...♕xe6 14.♖xe6 ♖xe6 15.♖xe6+ ♗f7; 13.♕xc4 13...dxc4 14.♖xc4 O-O 15.♘c3 h6 16.♘xe6 ♖f7 and Black is fine.]

13...O-O 14.♘xe6 Winning the e6 pawn cost White too much time, so now Black gets the initiative.

14...♖e8 [14...♕xe6 15.♖xe6+ ♖xe6 16.♖xe6 ♘bd7 All of White's queenside is still undeveloped. 17.♘d2 ♖ae8 18.♖xe8 ♖xe8 19.♘f3 d4!]

15.♘f4 [15.♘d4 with the idea to create a blockade on the d4 square. 15...♖c5 (15...♖b4 16.♕e3 ♖xb2 17.♘d2 ♘g4 18.♘xc4! dxc4 19.♖xc4+ ♗h8 20.♕e4+-) 16.♕e3 ♘g4! Black immediately attacks the d4 square. 17.♘e6 ♖d6 18.♖xg4 ♕xe6+]]

15...♖f7! [15...♖b4 is bad because of the following trap: 16.♖xe8+ ♘xe8 17.♖xe8+ ♗f7 18.♘d5! and the white pieces get nice coordination. 18...♖xb5 19.♖e7+ ♗f8 20.♘bc3 ♕xc3 21.♕h6+-]

16.♖f1

16...a6! A typical move which helps activate the black pieces.

17.♖xe8+ ♘xe8 18.♘c3 [18.♕d1!? 18...axb5 19.♘xd5 ♕b7 20.♘bc3 ♘c6 and thanks to his more active pieces Black has compensation.]

18...♕b7 [18...♕xc3?! is not a logical move. 19.bxc3 axb5 20.♕e3± and White is better because of the weak dark squares.]

19.♖e1 [19.♕d1 White could try to activate the limited bishop. 19...axb5 (19...d4 20.♕g4! ♗h8 21.♕e6 ♖f8 22.♖xc4 dxc3 23.♘xg6+ hxg6 24.♖h4+-) 20.♕g4 ♖a6 21.♘b5 ♘f6]]

19...d4

20.♘e4?! The idea of activating the pieces is correct but

Rubinstein could do it more accurately and first exchange his bad bishop, for example with [20.♙e4! 20...♙xe4 21.♘xe4 (21.♙xe4 21...♖a7 22.♘cd5 axb5 23.♙d2 ♘d6+) 21...axb5 22.♘g5 ♙d7 23.♘d5! ♖a7 24.♙f4 ♘a6 (24...♘c6 25.♘b6+)]

25.a4!⇒activating the last piece, the rook on a1.]

20...axb5 21.♘g5 ♙d7 22.♘fe6 [22.♘xg6!? with hope for some practical chances. 22...hxg6 (22...♘c6!? An interesting idea. Black just doesn't care about the kingside and plays over the center. 23.♘f4 d3 24.♙d1 ♘d4→) 23.♙xg6 ♘f6 24.♙f7+ ♙f8 (24...♙h8?? 25.f3+- and Qh4 is coming.)]

22...♘a6 23.♙f4 d3+ and the black pawns are very unpleasant.

24.♙d1

24...h6! A very good move, forcing exchanges and making the position more stable. [24...♙xb2]

25.♘xg7 ♘xg7 26.♘f3 ♖e8! 27.♙a5 White is hoping for some counterplay but the d3 pawn decides the outcome of this game.

27...g5 28.♙e3 [28.♙d2 28...g4 29.♘h4 ♙e7! 30.♘g6 ♙e4 31.♘h4 ♘c5+-]

28...♘f5 29.♙b6 [29.a4 29...b4! stopping the white pieces from activating. 30.♘e5 ♙d5 31.♙xd5+ ♙xd5+-]

29...♖e6 30.♙a7 ♙e7 31.♖c1 [31.♙d2 31...g4+-]

31...♘xe3 0-1

Editorial Preface

This week is full of chess events! The super tournament in Stavanger, the Capablanca Memorial in Cuba and the match between So and Navara.

Let us start with the past events:

1) A mini-match consisting of 4 classical games between So and Navara was held in the Czech Republic. In all 4 games So had a better position and managed to win the match very convincingly with 3-1.

2) In Cuba, where the 2 best Cubans (Dominguez and Bruzon) are playing alongside 4 foreigners, the lead belongs to the very strong Yu Yangiy with 3.5/4. The Chinese player seems to be unstoppable!

3) But clearly the main event of the week is the Stavanger tournament with Carlsen, Caruana, Anand, Topalov and many more top players.

After 4 rounds, clearly the biggest surprise of the event is that Carlsen has 0.5 points out of 4! In the first round, Carlsen had played a great game and when it seemed like the win was close, he lost on time on move 60, thinking that there was additional time coming, but there was not! It seems like he did not manage to recover from this terrible blow and keeps on losing his games.

The leader of the tournament is Topalov with a fantastic 3.5/4. In second position we find Nakamura with 3/4 and Carlsen is last with 0.5/4.

In the current issue, we focus on the freshest games and analyze the best moments of the super event in Stavanger! We hope you enjoy the issue of Top GM Secrets Nr173!

Two best games of the past week

(1) Dominguez Perez, Leinier (2746)
- Yu, Yangyi (2715) [E10]

50th Capablanca Mem Elite(3.2),
2015.06.17

GM Arkadij Naiditsch
Best rating: 2737

Yu Yangyi is one of the Chinese superstars that are on the rise. He was in the winning Olympiad team, won the very strong Qatar Open and many other top events, all the while just being 21 years old. In the Capablanca Memorial, he is once again showing fantastic chess and had an almost perfect start with 3.5/ 4 points. In the current game, Dominguez risks a lot in the opening and gets a slightly worse position. Playing really great chess, Yu makes the most out of his position and manages to catch Dominguez' queen, which brings him the full point on the spot! A great game awaits us!

1.d4 As usual Dominguez starts the game with 1.d4. The Cuban Nr1 is a very safe player who likes to play slightly better positions with minimal risk.

1...♘f6 2.c4 e6 3.♘f3 d5 4.g3 Another Catalan...

4...♙b4+ 5.♙d2 ♙e7 This is one of the main lines. Black's idea behind playing Bb4 first to provoke Bd2 is that the d2 square is usually perfect for the knight and not the bishop.

6.♙g2 O-O 7.O-O c6 8.♙c2 ♘bd7 Nothing new so far...

9.♖d1 Usually Black's main idea is to play c5 somewhere, so

White is prophylactically putting the rook on d1.

9...b6 Another typical move.

10.b3

10...a5!? An interesting approach. Black doesn't play the standard Bb7 and c5, but tries to maybe even take over the game by putting the bishop on a6 and then to play Rc8 and c5.

11.♙f4 ♙a6 12.♘e5 Maybe a bit premature... [More normal is 12.♘bd2 12...♖c8 13.e4 with maybe a minimally better position for White.]

12...♖c8 Black is ready to play c5.

13.e4?! What a strange decision to give up the g2 bishop... [13.♘xd7 13...♙xd7 14.♘d2 c5 just leads to an equal position.]

13...♘xe5 is probably not the best. [13...♘e4!? looks very strong. 14.♙xe4 dxe4 15.♙xe4 and now the interesting 15...g5! 16.♙e3 f5 and I think Black's play is very dangerous.]

14.♙xe5?! [White should have continued with 14.dxe5 14...♘d7 15.exd5 cxd5 16.♘c3! dxc4 17.♘e4 with probably enough counterplay for the pawn.]

14...♘xe4 Now Black is going to have the bishop pair.

15. ♖xe4 dxe4 16. ♔xe4

16...f6! An excellent move by Yu! Black is not going for the standard c5 push -which is not that easy to play because of White's d5, with a probably equal position- but for e5, followed by a regrouping idea on the kingside.

17. ♖f4 e5 18. ♖e3 white wants to play Nc3 after which position is equal

18...c5! Yu is showing extremely good understanding of the position.

19.d5 The only move.

19...♗d6 Now Black is going to proceed with f5 and then with Rc7 and Bc8, bringing all the pieces to the kingside.

20.f4 Dominguez is trying to block as much as he can.

20...f5 21. ♔f3 ♖c7 Black needs to bring the bishop to c8.

22. ♖d2 ♗c8 23. ♖e1

23...g5!? An interesting approach! [23...e4 was a simpler move. 24. ♔g2 ♖cf7 followed by Bd7 and then h6-Rg8, preparing to play g5. In that case it would have been a game for 2 results.]

24.fxe5 is probably the best. [It looks very risky for White to play 24.fxg5 24...f4 25. ♖f2 because of the beautiful 25...e4! (After 25...♔xg5 26. ♖e4 ♔g6 27. ♔c3 White is fine.) 26. ♖xe4 fxg3 27. ♖f6+ ♖xf6 28.gxf6 gxf2+ 29. ♔xf2 ♖f7 and Black is clearly better.]

24...♗xe5 25. ♖ad1 ♗d6! Another fantastic move by Black in my opinion. It is clear that the d-pawn has to be blocked, but it looks very tempting to just play Bg7, h6 and then Qd6. In fact, I think the black bishop is perfectly placed on d6 and supports Black's main idea, which is to play f4 at some point.

26. ♖f2 ♔f6 27. ♔h5 White is trying to be as solid as possible.

27...♖g7 Black is also bringing all his pieces to the kingside.

28. ♖e8 The right decision. White should try to exchange as many pieces as possible.

28...♗d7 29. ♖xf8+ ♔xf8 Black's advantage is slowly increasing.

30.♖e1 h6 A nice prophylactical move, but h6 might be needed anyway.

31.a4 Dominguez continues playing for survival and tries to close the position.

31...♖f7 Black improves the position to the maximum before starting the action on the kingside.

32.♔g2 ♕g7 [It is too early for 32...g4 33.♗e3 ♔g7 34.♘f1 followed by Bd2 and White is fighting, although Black is still clearly better.]

33.♖e2?! A very careless move... [White should have been much more careful with his queen on h5... 33.♖f3 but of course Black is much better and it would have been a long road for Dominguez to finally draw this game.]

33...g4! The perfect moment to play g4 as White doesn't have

the usual Be3!

34.♗e3? This move loses on the spot. [White should have defended with 34.♖e1 34...♖e7 35.♘f1 and he has a horrible position but is still fighting.]

34...♖e7! The game is over... White probably missed Black's next move.

35.♔f1 ♖e5! [35...♗e8? of course doesn't work since after 36.♗xh6+! ♖xh6 37.♖xe7+ ♗xe7 38.♖xe8 the position is about equal.]

36.♗f4 Everything else loses as well. White has no defense against f4.

36...♖xe2 37.♔xe2 ♗xf4 38.gxf4

38...♔f8! Black's next move is Be8 after which the queen on h5 is caught! It is very rare in chess to be able to catch a full queen. What can we say about this game?! We just witnessed perfect play by Yu, who showed great positional understanding and great tactical skills when needed! **0-1**

**(2) Caruana, Fabiano (2805)
- Carlsen, Magnus (2876) [C67]**Norway Chess(2),
2015.06.17GM Csaba Balogh
Best rating: 2672

After the scandalous loss of Carlsen in the first round by being forfeited on time in a winning position, he ran into another painful defeat, this time getting completely outplayed by Caruana in his favorite Berlin.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.O-O ♘xe4 5.d4 ♘d6 6.♙xc6 dxc6 7.dxe5 ♘f5 8.♙xd8+ ♔xd8 9.h3 Recently Caruana is the only one player in the World, who can always show something against the rock-solid Berlin Wall! Most of the others just aim to get a playable position and avoid theory after 4.d3.

9...h6 10.♖d1+ ♔e8 11.♘c3 ♘e7

12.b3 Caruana's improvement on their previous encounter earlier this year. That game and also the game Caruana-Dominguez continued with 12.Bf4, but both ended in a relatively easy draw. This time he gives a try to develop the bishop to the other diagonal.

12...♙f5 This move in the Berlin is always double-edged. Firstly, it is always nice to develop the bishop to an active square, but it also has the drawback that after the next pair of moves, the black bishop leaves the important c8-h3 diagonal, which makes the breakthrough of e5-e6 more effective and more easy to achieve. [The main move is 12...♘g6 which should be countered by 13.♘e2! (The direct 13.♙b2 allows the standard regrouping of the pieces with 13...♘f4! and the knight ends up on e6, when the position is considered to already be fine for Black!)]

13.♘d4 ♙h7 14.♙b2 ♖d8 Black brings one of his rooks into the game, which is usually an important factor, but he still needs to work to do something with the one on h8. Black cannot go for the c2 pawn with c5, because the b5 square needs to be controlled.

15.♘ce2 The real novelty and a prepared one as Caruana played it instantly. A multi-purpose move: he removes the knight from the long diagonal in order to make to e6 break more effective, he wants to place his pawn on c4 to take ground on the queenside and to take control over the d5 square and last but not the least, he wants to play Nf4, supporting even more the e6 break and after opening the diagonal jumping to h5, putting pressure on the g7 pawn. [The previous game continued with 15.e6 which is logical, but

looks premature as exf7 Kxf7 is not a real threat yet. Somehow it allows Black to finish the development more comfortably. 15...♖c8 (15...♖d5 was also possible...) 16.♗ce2 ♕d6 17.c4 ♗e7 with mutual chances in the game Polgar-Howell, Warsaw 2013.]

15...♖d5 Black tries to activate his knight before White could play c4. [In general the exchange of the knights favors Black, therefore 15...♖f5 was a logical move, although it is met by the very strong 16.♖f3! keeping the pieces on the board and g4 next sends the knight back to its previous position.]

16.c4 ♖b4 17.♖f4 Caruana still plays without thinking, showing great preparation again.

17...♖g8?! Not a happy decision. Black was afraid of developing his bishop because after the e6 push the g7 pawn might get weak. [However it still looks much more natural to play 17...♕c5 18.e6 (18.g4 18...♕xd4 19.♖xd4 Otherwise Nc2 wins material. 19...♖e7 Black connects his rooks and seems to the fine.) 18...♖e7! Connecting the rooks. If White does not have something concrete, then Black is going to hold.]

18.g4! Securing the excellent f5 outpost for the knight! Bc5 is already met by Nf5!

18...♖a6?! Another sad decision, showing that Carlsen was very disappointed about his position. He tries to maneuver

his knight to e6, but it simply costs too much time. [Perhaps it was still better to play something like 18...♕e7 with the idea of Bg5, although I don't like Black's position.]

19.♖f5! White improves his position with each move!

19...♖c5 20.♖xd8+ [It was possible to keep the black king in the center with 20.♖g2!? because the plan of 20...♖e6 does not seem to give equality after 21.♖xe6 fxe6 22.♖xd8+ ♖xd8 23.♖d1+ ♖e8 24.♖d4 ♖f7 25.♖e2+= It is not easy to deal with the d-file and Nf4, threatening the e6 pawn at the same time.]

20...♖xd8 21.♖d1+ ♖c8

22.♕a3! Another excellent positional move by Caruana, which had to be foreseen before taking on d8. The critical tactical line which was tested in the game favors White. Otherwise White just wants to get rid of the dark squared bishops, leaving Black without his bishop pair in an inferior structure. Black does not really have a useful move, while White can improve his position with Kg2 for instance...

22...♖e6 [In similar positions, I was faced with the idea of 22...♕xf5 23.gxf5 g6 but it does not seem to solve the problems after the simple 24.fxg6 (24.f6 24...g5 followed by Ne6 is not easy.) 24...fxg6 25.♖g2+=]

23. ♖xe6! ♟xa3 [The key is that (and this is perhaps what Carlsen missed in his pre-calculations) 23...fxe6 loses to

24. ♟e7!! and the game is suddenly over! It is easy to miss such moves!]

24. ♖exg7 ♟f8 The problem is Black is not threatening to play Bxg7 because of Ne7 Kb8 Nxg8 and mate on d8!

25. e6! Saving the knight again by using a tactical motif!

25... ♟xf5 [25...fxe6 26. ♖xe6 ♟xf5 27. ♖d8# was the point this time!]

26. ♖xf5 fxe6 27. ♖g3 The material is balanced, but the game is over from a positional point of view! Black has a useless extra pawn on the queenside, which cannot be used because of the doubled c-pawns. On the other side of the board, White has the pawn majority and a much more healthy structure, which will be converted easily with the support of the white pieces. Black cannot create any counterplay, he must watch how White continues improving his position move by move.

27... ♟e7 28. ♖g2 The next plan could be Nh5, f4, Kf3-e4, with total domination. Exchanging the rooks on d8 leads to a hopeless endgame for Black and otherwise he must defend without his king...

28... ♖f8 29. ♖d3 Nh5 was also possible, but Caruana knows that the endgame is winning, therefore he wants to play Rf3 and if Black avoids the exchange he invades on f7!

29... ♖f7 30. ♖h5 ♟d6 31. ♖f3 ♖h7 The sad plan of Black to avoid the exchange and at the same time prevent the penetration on the 7th rank, but of course White is winning anyway.

32. ♖e3 ♖e7 A dream position to play against anyone, but of course to have it against the World Champion is an extra pleasure! White can play on and his position wins by itself...

33.f4+- ♖a3 34.♔f3 ♜b2 35.♞e2 ♜c3 36.g5 White had other winning plans too, but he wants to create connected g- and h- passers.

36...♔d7 37.♜g4 ♞e8 38.♞g3 Opening the way for the h-pawn.

38...♞h8 39.h4 b6 40.h5 c5 41.g6 The game is over. Black cannot fight against the protected passed pawn on g6. White pushes f5 next and if the knight occupies the ideal f5 square it will perfectly support the progress on the kingside...

41...♞e8 42.f5 exf5+ 43.♜f4 ♞h8 [43...♞xe2 44.♞xe2+- is the tactical point and Black cannot stop the pawn with Ke6, because the bishop is hanging.]

44.♞xf5 ♜f6 45.♞g2 Black resigned as g7 is coming next and Bg5 is met by Rxc5! A very nice and convincing win by Caruana and an usual feeling for the World Champion to start a tournament with 0/2. **1-0**

The K-Files. Sicilian 3.Bb5+

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Sicilian 3.Bb5+ [B51]

1.e4 c5 2.♘f3 d6 3.♙b5+ ♘c6 4.O-O ♙d7 5.♖e1 ♘f6 6.c3 a6 7.♙c4!? ♙g4 In my opinion this is the only critical line. My intuition tells me that if Black is able to equalize somehow after 7.Bc4 then he must start with this move.

8.d4 This is the only way to proceed. The basic idea of White's play is that he is almost never afraid to take on f3 with the pawn. In most cases the kingside weakening is only an optical illusion because the black pieces are not active enough to create some real threats there. [The "solid" 8.h3 8...♙xf3 9.♖xf3 ♘e5 10.♖e2 ♘xc4 11.♖xc4 e6= gives White absolutely nothing (Solak - Ibrayev, Calvia 2004)]

8...cxd4 This is the main answer. The alternatives don't make life easier. [

a) 8...e6 9.d5 ♘e5 (9...♙xf3 10.gxf3 This sharp line might be even more promising than (the solid 10.♖xf3 10...♘e5 11.♖e2 ♘xc4 12.♖xc4+= which is also enough for some positional advantage.) 10...♘e5 (10...exd5?! 11.exd5+ ♘e7 (Bartel - Bu Biel 2013) is quite dubious first of all because of 12.b4!? cxb4

13.♙b3! ↑ and the following lines prove that it's very difficult for Black to do something with his misplaced pieces: 13...g6 (13...♖d7 14.♖d4 O-O-O 15.cxb4±) 14.♙g5 ♙g7 15.♖d4 O-O 16.♙xf6 ♘f5 17.♙xd8 ♘xd4 18.cxd4 ♖fxd8 (18...♙xd4 19.♙c7 ♙xa1 20.♙xd6±) 19.♘d2 ♙xd4 20.♖ad1 ♙c3 21.♖e2±) 11.♙f1 and the complications are always in White's favor. 11...exd5 (11...g5 12.♙xg5 ♖g8 13.f4 h6 14.♙g2 hxg5 15.fxe5 dxe5 16.dxe6 fxe6 17.♘d2+=) 12.f4 ♘fg4 This aggressive attempt looks very dangerous at first, but White has enough resources. (12...♘g6 13.e5 dxe5 14.fxe5±) 13.h3 ♖h4 14.♖e2 ♘f3+ 15.♙g2 O-O-O 16.♙xf3 dxe4+ 17.♙g2 d5 18.hxg4 ♖d6 19.♖e3 ♖h6 20.♙xa6±) 10.♙e2 ♙xf3 11.♙xf3 Now it's better to choose the solid capture as (11.gxf3 11...exd5 12.exd5 ♙e7∞ is far from clear.) 11...♘xf3+ (11...♙e7 12.♙e2 O-O 13.f4 ♘ed7 14.dxe6 fxe6 15.a4+= and White has the bishop pair and a better pawn structure.) 12.♖xf3 ♙e7 (12...exd5 13.exd5+ ♙e7 14.♙f4 O-O 15.♘d2+=) 13.dxe6 fxe6 14.♘d2 O-O 15.♖h3 pointing at the weak point of Black's structure. 15...♖d7 16.e5 ♘d5 17.exd6 ♘f4 18.♖g4+= with a long-term positional advantage.;

b) 8...♙xf3 9.gxf3 e5 and now White has a choice: (9...cxd4 10.cxd4 - 8...cxd4; 9...e6 10.d5 - 8...e6) 10.d5 The most promising move in my opinion. On the next move White plays f3-f4 and the black pieces are not placed properly to establish a dark-squares blockade. (

b1) 10.♙e3 When cxd4 cxd4 is not included this move is a bit inaccurate. The problem is that on the next move White will have to define the structure in the center anyway and in this case the bishop on e3 is not very useful. 10...♙e7 11.d5 ♘b8 12.♘d2 ♘h5 13.a4 ♘d7 14.♙f1 ♙g5∞;

b2) 10.dxc5 The solid option 10...dxc5 11.♖xd8+ (11.♘a3 11...♖c7 12.f4 ♙d6 13.f5 Baklan- Jakubiec Bad Wiessee 2011 13...O-O∞) 11...♖xd8 12.♙f1 ♙e7 13.♘a3 ♘h5 14.♘c4 ♘f4

15. ♖e3+ is quite pleasant to play with White. The main idea is to exchange on f4 at the most convenient moment. However, Black's defensive resources shouldn't be underestimated.)

10... ♖e7 (10... ♖b8 11.f4 ♖bd7 12. ♖f1 ♖e7 13.fxe5 ♖xe5 14.f4 ♖g6 15.a4 O-O 16. ♖a3 ♖e8 17. ♖d2+)=) 11.f4 Hamidullin - Dolbnia Moscow 2008 11... ♖g6 12.fxe5 dxe5 13. ♖f1 ♖e7 14.a4 O-O 15.a5 ♖e8 (15... ♖d7 16. ♖h5+)=) 16. ♖e3 ♖c8 17. ♖d2 ♖g5 18. ♖g4 ♖xe3 19.fxe3+;

c) 8...b5 This is not better than 7...b5 and only weakens the queenside structure. 9. ♖e2!? (9. ♖d5!?) 9... ♖xe4?! 10.a4±;

d) 8...♖c8 just too artificial. After 9.e5 dxe5 10. ♖b3 e6 11. ♖xe5± White is clearly better as 11... ♖a5 fails to 12. ♖a4+ b5 13. ♖xb5+ axb5 14. ♖xb5+ ♖e7 15.dxc5+]

9.cxd4 ♖xf3 [

a) 9...e5 looks logical. Black tries to fight for the center. But White has a very strong answer: 10. ♖e3! and now White is ready to play d4-d5. Black has different ways to define the structure but none of them promises him equal chances. (The natural 10.d5 gives nothing after 10... ♖d4 11. ♖bd2 ♖c8 (11... ♖e7 is also playable. 12.h3 ♖h5 13.g4 ♖xf3+ 14. ♖xf3 ♖g6∞) 12. ♖d3 ♖e7 13.h3 ♖h5 and Black has good counterchances. (13... ♖xf3+ 14. ♖xf3 ♖xf3 15. ♖xf3 ♖d7 16. ♖g4+= Bartel - Ter Sahakyan Yerevan 2014) 14.g4? is only looking for trouble. 14... ♖xg4! 15. ♖xd4 (15.hxg4 15... ♖xg4 16. ♖g2 O-O+) 15... ♖xf2 16. ♖b5+ axb5 17. ♖xh5 exd4+) 10...exd4 (10... ♖e7 11.d5 ♖d4 12. ♖xd4 exd4 13. ♖xd4 ♖xf3 14.gxf3 ♖h5 15.e5 O-O 16. ♖c3±; 10... ♖xf3 This exchange now and on the next moves only transposes to the 9...Bxf3 line. 11.gxf3 - 9...Bxf3; 10... ♖xe4 11. ♖d5 ♖f6 12. ♖xc6+ bxc6 13.dxe5 dxe5 14. ♖xd8+ ♖xd8 15. ♖xe5±) 11. ♖xd4 ♖xd4 (11... ♖e7 12. ♖c3 O-O 13. ♖e3 ♖e8 14. ♖c1+= ♖f8 15. ♖b3±) 12. ♖xd4 ♖e7 13. ♖c3 O-O 14. ♖e3+= and the bishops' pair

doesn't fully compensate the weakness on d6. All white pieces are active.;

b) 9...e6 (Podoba - Nikolova Split 2012) is once again met with the standard 10.d5 ♖e5 (10... ♖xf3 only makes things worse after 11.gxf3 ♖e5 (11... ♖a5 12. ♖d3± Lasic - Kinez Velika Gorica 2007) 12. ♖b3±) 11. ♖e2 ♖xf3 12. ♖xf3 ♖xf3+ 13. ♖xf3+= with a very nice advantage.;

c) 9...♖c8 is an interesting alternative, which was not tested yet. The problem is that White has a lot of possibilities here. OK, it's a problem for both sides .

10. ♖e3 is very promising too. Frankly speaking, I don't know which bishop move deserves to be the main line here. It's more or less a matter of taste. (

c1) 10.d5 doesn't promise much if Black reacts properly. 10... ♖xf3 11.gxf3 ♖e5 12. ♖e2 g5 A very important idea. The dark squares blockade in the center suddenly becomes real. 13. ♖h1 h6 14.f4 ♖g6!? (14...gxf4 15. ♖xf4 h5 16. ♖c3 ♖g6 17. ♖g5 ♖h6 18. ♖xh6 ♖xh6 19. ♖d2 ♖h8 20.f4!) 15.f5 ♖f4 16. ♖xf4 gxf4 17. ♖c3 ♖d7∞;

c2) 10. ♖c3 is also not really dangerous. 10...e5 11.d5 (11. ♖b3 leads to a tricky forced line with a perpetual check in the end: 11... ♖a5 12. ♖xf7+ ♖e7 13. ♖d5+ ♖xf7 14. ♖g5+ ♖e8 15. ♖g3 ♖c6 16.dxe5 dxe5 17. ♖xf6+ gxf6 18. ♖xg4 fxf5 19. ♖d1

♖d4 20.♙h5+ ♔d7 21.♙g4+ ♔e8=) 11...♗d4 12.♙f1 g6! The best way. Only when the black bishop is on the long diagonal the knight on d4 is both safe and strong. 13.♙e3 ♙xf3 14.gxf3 ♙g7∞;

c3) 10.♙e2!? Not the most obvious, but a very interesting move. White plans to play d4-d5 at the most convenient moment. 10...d5 The critical answer, of course. (10...♗xe4? runs into standard the trap 11.d5+-; 10...e5 11.d5 ♙xf3 12.♙xf3 ♗d4 13.♗c3+=) 11.exd5 (11.e5 11...♗e4=) 11...♗xd5 12.h3 An important nuance. (12.♗c3 12...e6 13.♙b3 ♙b4 14.♙g5 ♙a5∞) 12...♙h5 (12...♙f5 13.♙c4 ♗cb4 (13...e6 14.♙xd5 ♙xd5 15.♗c3±; 13...♙xb1 14.♙xb1 e6 15.♗g5!↑) 14.♙xd5 ♗xd5 15.♗c3 ♗xc3 (15...e6? 16.♙a4+±) 16.bxc3 ♙xc3 17.♙d2 ♙c8 18.♙b3↑) 13.♗c3 e6 14.♙b3 ♙xf3 (14...♙b4 15.♙g5 ♙a5 16.g4 This is the reason why 12.h3 was absolutely necessary. 16...♙g6 17.♗xd5 ♙xd5 18.♙c4±) 15.♙xf3 ♗xc3 16.bxc3 ♗a5 17.♙d1 ♙d6 18.d5 e5 19.♙g4↑ and White's initiative is quite dangerous.)

10...e6 (

c1) 10...♗xe4 Here it's not so obvious why this pawn is poisoned. In fact it's not but still White has a way to an advantage. 11.♙b3 (11.♙xf7+ A smart tactical trick. However, it leads to a very unclear position. 11...♙xf7 12.♗g5+ ♗xg5 13.♙xg4 h6 14.f4 ♗h7 15.d5 ♗f6 (15...♗b4 16.f5) 16.♙e6+ ♙g6 17.dxc6 ♙xc6∞) 11...e6 12.♙xb7 Straightforward but good enough. 12...♗a5 (12...d5 13.♙xa6 ♗d6 14.♙b3 ♙a8 (14...♙b8 15.♙a4 ♙d7 16.♗bd2±) 15.♙b5 ♗xb5 16.♙xb5 ♙d7 17.♙c1±) 13.♙xe4 ♙xf3 (13...♙f5 enters a long forced line which leads to the endgame where White's big material advantage doesn't win automatically but still... 14.♙xf5 exf5 15.♙g5+ ♙e7 16.♙xe7 ♙xe7 17.♙f1 ♙xe1 ♙c1 19.♗d3 ♙d1 20.♗b4 ♙c1 21.g3 O-O 22.♙g2 ♙e8 23.♙xa6 ♙b8 24.♗d3

♙d1 25.♙f3±) 14.♙xf3 ♗xc4 15.d5 e5 16.♙c1 ♗xe3 17.♙xe3 ♙e7 18.♙c6 O-O 19.♗c3+=;

c2) 10...g6 11.♗bd2 ♙g7 12.♙d3 O-O 13.h3 ♙xf3 14.♗xf3+= with a solid long-term advantage due to the bishop pair and strong pawn center. 14...♗d7 15.♙e2 ♙a5 (15...d5 16.e5 e6 17.♙c1) 16.a3 e5 17.d5 ♗d4 18.♗xd4 exd4 19.♙xd4 ♙xd4 20.♙xd4 ♙c2 21.♙d3 ♙d2 22.♙e2±)

11.d5 and once again White has the upper hand in all lines. His advantage is not huge but very stable. (11.♗c3 11...♙xf3 12.gxf3 d5∞) 11...exd5 (11...♗e5 12.♙e2 ♙xf3 13.♙xf3 ♙e7 (13...exd5 14.exd5 ♗xf3+ 15.♙xf3 ♙e7 16.♗c3 O-O 17.♙ad1+=) 14.♙e2 O-O 15.dxe6 fxe6 16.♙b3+=) 12.♙xd5 (12.exd5 12...♙xf3 13.gxf3 ♗e5 14.♙f1 ♙e7∞) 12...♗xd5 13.exd5 ♗e5 14.♗bd2 ♙e7 15.♙b3 ♙xf3 16.♗xf3 ♗xf3+ 17.gxf3 ♙d7 (17...O-O 18.♙xb7 ♙g5 19.♙xa6 ♙f6 20.♙e2+=) 18.♙g5 f6 19.♙d2+=;

d) The major difference with 7.Bf1 line is that now 9...d5 doesn't work at all: 10.exd5 ♗a5 (10...♗xd5 11.♗c3±) 11.♙e2 ♗xd5 12.♗c3±;

e) 9...g6 is too slow. 10.♙b3 e6 11.♙xb7 ♗a5 12.♙b4±]

10.gxf3 g6!? This is most probably the critical line for the whole variation with 7. Bc4. It seems to me that White has a slight advantage anyway but the resulting positions are quite complicated and both sides have their own trumps. [10...e5 A logical move but it doesn't lead to the desired result. 11.♙e3 This is a very important idea which justifies the whole line. White is not afraid of the double exchange on d4 because after this all his pieces will become active. (11.d5 11...♗d4 12.♙f1 g6∞ is quite unclear. The knight on d4 is very strong and with the black bishop on g7 its position is quite stable.)

11...exd4 Now Black has to do something about a possible d4-d5. (

a) 11...♖c8 12.dxe5 dxe5 (12...♗xe5 13.♕f1±) 13.♖b3†;

b) 11...♕e7 12.d5 When the black bishop is not on the long diagonal the knight on d4 is not so strong anymore. 12...♗d4 13.♕f1 is stronger than the greedy (13.♕xd4 13...exd4 14.♖xd4 Smerdon - Hall England 2014 14...O-O 13...O-O (13...g5 This attempt to stop f3-f4 only creates new weaknesses. 14.♗a3 O-O 15.♕xd4 exd4 16.♗c2± and the knight goes to f5.) 14.f4 ♖c8 (14...♖b6 15.♗d2 ♖xb2 16.♖b1 ♖c3 17.♖xb7±) 15.♗c3+= and the knight on d4 is really shaky. Black has to do something about the positional threat fxe5 dxe5 f4.;

c) The fianchetto attempt c) 11...g6 doesn't work here because of the very direct reaction 12.♖b3 (Now 12.d5 12...♗d4 13.♕xd4 exd4 14.♖xd4 ♕g7∞ is quite satisfactory for Black.) 12...♖d7 13.dxe5 dxe5 (13...♗xe5 14.♕e2±) 14.♗c3 ♗a5 15.♖b6! ♗xc4 16.♖xf6 ♖g8 17.♖h4 ♗xe3 18.♖xe3±)

12.♕xd4 ♗xd4 13.♖xd4 ♕e7 14.♗c3 (The attempt to prevent Black from castling kingside doesn't work: 14.e5 14...dxe5 15.♖xe5 ♖c8 16.♗a3 ♖f8±) 14...O-O 15.♖ad1+= Despite the weakened kingside White's pressure in the center is very unpleasant. In some lines he can also use the g-file to launch a kingside attack himself.; 10...e6?! 11.d5 - 9. ..e6; 10...d5

doesn't work again because Black doesn't have enough control over the key d5 square. 11.exd5 ♗xd5 (11...♗a5 12.♕f1 ♗xd5 13.♗c3±) 12.♗c3 ♗xc3 (12...♗b6 13.♕b3 ♖xd4 14.♕e3 ♖xd1 15.♖exd1 (15.♖axd1 15...♗d7) 15...♗d7 16.♕xf7+ ♖xf7 17.♖xd7±) 13.bxc3 e6 14.d5 ♗a5 15.♕f1 ♕e7 16.dxe6 ♖xd1 17.exf7+ ♖xf7 18.♖xd1±]

11.♗c3 Precise move order is very important here. White is waiting for Bg7 to avoid a dark-squares blockade which is possible after the immediate 11.d5 Ne5 12. Be2(f1) g5!? [

a) 11.f4 allows typical counterplay: 11...e5!? 12.d5 ♗d4 13.♕e3 ♗h5±;

b) 11.♖b3?! With the exchange on f3 included there is a big difference! 11...e6 12.♖xb7 ♗xd4±;

c) 11.♕e3 Another half-waiting move which is less flexible in my opinion. 11...♕g7 12.d5 ♗e5 13.♕e2 (13.♕f1 13...O-O 14.f4 ♗eg4∞ This is exactly why the 11.Be3 move order is not the best.) 13...♖c8 14.♗d2 O-O∞ and the assessment is unclear. White has certain pluses but his knight is rather passive on d2 and the opponent's counterplay with e7-e6 shouldn't be underestimated. 15.f4 (15.b4 15...e6) 15...♗ed7 16.b4 e5 17.dxe6 fxe6 18.♖b3 d5 19.♖ad1 ♖h8∞;

d) 11.d5 This is White's key idea. However, this move order has a serious drawback. 11...♗e5 12.♕e2 (12.♕f1 12...g5!

is even more dangerous here than with the bishop on e2 because g5-g4 is always in the air. 13.♔h1 (13.♕xg5 13...♖g8 14.f4 ♕h6) 13...g4 14.f4 ♖f3 15.♖e3 h5) 12...g5! That's it! White's center is blocked and now it's quite questionable if he can find a good active plan. 13.♔h1 (13.♕xg5? 13...♖g8 14.f4 ♖ed7) 13...h6 14.♖a3 Moving the knight to f5 is logical but it takes a long time. (14.f4 14...♖g6 15.fxg5 hxg5 16.♕xg5 ♕h6; 14.♗b3 14...♖h5 15.♗xb7 ♕g7) 14...♗d7 15.♖c2 ♕g7 16.♖d4 ♖h5 17.♖f5 ♕f6 Black's counterplay on the dark squares is strong enough.]

11...♕g7 [If Black prefers to wait too with 11...♖c8 then White also has a useful move: 12.♕f1 ♕g7 (12...d5 13.♗b3! with the idea 13...♖xd4 14.♗a4+ ♖c6 15.exd5 ♖xd5 16.♖d1 e6 17.♖xd5 exd5 18.♖e1+ ♕e7 19.♕h6→ is much more unpleasant.) 13.d5 - 11...Bg7]

12.d5 [12.f4 doesn't bring anything after 12...e5⇒13.dxe5 dxe5 14.fxe5 ♖xe5]

12...♖e5 [12...♖a5 Well, there is some rational idea to avoid f3-f4 with tempo but such decentralization has some drawbacks as well. 13.♕f1 ♖c8 14.♕h3 ♖d7 15.♖b1+=]

13.♕f1 The right square. There are 2 important points: 1) the bishop gets the important h3 square 2) f3-f4 and e4-e5 is a threat now. [13.♕e2 13...♖c8 14.♗b3 ♖fd7]

13...O-O [13...♖c8 looks logical but White has a strong and straightforward response: 14.f4 ♖c4 15.e5! dxe5 16.fxe5 ♖d7 17.f4 O-O (17...♗b6+ 18.♔h1 ♖xb2 19.♗e2!±) 18.♔h1! It might look rather risky but in fact White's pawn center is very strong.]

14.f4 ♖ed7 15.♕e3 ♖c8 16.♖b1+= This is the critical position. Its assessment is not 100% clear but I believe White has better chances here. His space advantage and the bishop pair must

be more important factors than a slightly compromised pawn structure.

SOME CONCLUSIONS: Of course 7.Bc4 doesn't pretend to be a clear refutation of the whole opening system but at the current moment it looks quite dangerous and the way to equalize for Black is far from clear. Another merit of 7.Bc4 is that the theory of this line is not developed as deeply as in the other subvariations. The problem is of course that in many lines White has to play with a weakened kingside structure but nowadays it's almost a common point. If White wants to reach something more than a safe symbolical advantage he has to take certain risks. What can I recommend to the players who play this line with Black?! Well, it might be worth trying to take a closer look at the lines 9...Rc8 and 9...Bxf3 10.gxf3 g6 (the main line actually). Perhaps some of my evaluations may be rather subjective. If you'll fail to find something inspiring in these lines then it's probably time to think about some reliable alternatives on move 3.

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us only 9 upsets.

The number of moves ranges from 23 in Mrdjen (1942) - GM Drazic (2468), 1-0 to 59 in Belova (1993) - FM Puzko (2306), 1-0.

The highest-profile upset was FM Lomasov (2305) - GM Bukavshin (2647), 1-0. The decisive petite combination deserves a diagram.

24.Bg7+ Kxg7 25.Rg4+ Kf8 26.Qd5 1-0

Yet another summer tragicomedy occurred in Mrdjen (1942) vs. GM Drazic (2468):

Black has a winning position, but White plays 22.Ng5 and provokes the opponent into committing a huge blunder with 22...h6?? ("let's kick the knight away!"), which is exactly what happens. Black probably forgets that h7 is no longer defended after this move. As a result, the game ends with 23.Qh7X. This is actually a rather rare case of a GM blundering mate in one.

Top-9:

Mrjdgen (1942) - Drazic (2468), 1-0, [526](#) points
 Sorokin (2396) - Mingatin (1957), 0-1, [439](#) points
 Abdumalik (2393) - Kahramanova (2035), 0-1, [358](#) points
 Lomasov (2305) - Bukavshin (2647), 1-0, [342](#) points
 Spence (2246) - Blasco (1925), 0-1, [321](#) points
 Belova (1993) - Puzko (2306), 1-0, [313](#) points
 Shapiro (2249) - Tarlev (2554), 1-0, [305](#) points
 Lintchevski (2557) - Aminov (2255), 0-1, [302](#) points
 Kuipers (2409) - Kharitonov (2107), 0-1, [302](#) points

Average gap: 356; White won 4 games, Black won 5 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

**(4) Sosa, Tomas ARG. (2385)
- Pichot, Alan (2492) [B82]**

19th Copa Mercosur 2015(4.6),
2015.06.07

Alan Pichot is a 17-year old player from Argentina and the current under 16 World Champion. This week he took 3rd place in a closed tournament in Buenos Aires.

1.e4 c5 2.♘f3 e6 3.d4 cxd4 4.♘xd4 a6 This aggressive line is Pichot main weapon.

5.♙d3 [5.c4 5...♘f6 6.♘c3 ♙b4 7.♚d3 was Carlsen's choice in the match against Anand.]

5...♚b6 6.♘b3 ♚c7 The queen goes to the most natural square after annoying White's knight. **7.♘c3 ♘f6 8.f4 d6**

9.♚f3 In the game White chose an aggressive approach, but maybe it makes more sense to start kingside actions and then decide where to put the queen. On f3 it will be quite exposed.

9...♘bd7 A normal plan. The other one is [9...b5 10.g4 ♙b7 11.g5 ♘fd7 and then Black can choose between Nb6 Nb8-d7 or Nc6.]

10.g4 h6 A necessary move now that the d7 square is occupied.

11.♙e3 [11.h4 11...h5! 12.g5 ♘g4 13.g6 ♘c5 is also very sharp.]

11...b5 12.O-O-O [12.e5 is always countered by 12...♙b7; 12.a3 is a logical prophylactic move that White chose not to play in the game.]

12...♙b7

13.♖he1 White puts everything in the center but it is quite difficult to break.

13...b4 14.♘e2 ♖c8 The immediate center break is not good: [14...d5 15.e5 d4 16.♚h3 dxe3 17.exf6 ♘xf6 18.g5 ♘d5 19.g6 and White becomes strong on the light squares.]

15.♘g3 ♙e7 16.h4 [16.♚e2 is interesting, followed by h4-g5.]

16...g5!? It is an unclear choice between this move and 16...d5.

17.hxg5?! An automatic move but it is possible to keep more tension: [17.♔b1 17...gxf4 It is normal to take the e5 square. (17...d5 18.♘d4∞; 17...gxh4 18.♘h5 ♘xh5 19.gxh5 ♖g8 20.♙f2 with a fight.) 18.♙xf4 ♖g8 19.g5 hxg5 20.hxg5 ♘h7 21.g6 ♖xg6 22.♖h1 with a balanced position.]

17...hxg5 18.♖f1? If White wants to play a slow move then 18.Kb1 is clearly better and more sharp is 18.Nh5!?

18...♖g8 Even stronger is [18...d5! 19.♘d4 (19.exd5 19...♘xd5 20.♘e4 ♘xe3 21.♖xe3 gxf4 The two bishops and the dark squares give Black a huge advantage.) 19...gxf4 20.♙xf4 e5 The complications are in Black's advantage. 21.g5 exf4 22.gxf6 ♙xf6 23.♘gf5 ♘e5 24.♖e2 ♘xd3+ 25.♖xd3 dxe4+]]

19.♔b1

19...gxf4! Throughout the game and especially in this position all of Black's pieces are on the best squares and even the king is safe in the center! That is the reason why the complications are in his favor. Having said that, you still need good calculation to play this move.

20.♙xf4 ♘xg4 21.♙xd6 The only chance.

21...♘de5! 22.♙xc7 ♘xf3 23.♙f4 ♘gh2! What a funny knights' position!

24.♘a5? Losing big material and the game on the spot. [24.♖f2 24...♙h4+; 24.♖h1 is the only move. 24...e5 25.♘f1! exf4 26.♘xh2 ♘e5 with some saving chances, but the two bishops and the strong knight on e5 should prevail.]

24...♘xf1 25.♘xf1 [25.♖xf1 25...e5-+]]

25...♖g4 The last precise move.

26.♙h6 ♙xe4 27.♙xa6 ♙xc2+ 28.♔c1 ♖c5 29.♘b7 ♙xd1+ 30.♔xd1 ♖d5+ 31.♔c1 ♙g5+ 0-1

Endgame section

(15) Nakamura, Hikaru (2802)
- Caruana, Fabiano (2805)

3rd Norway Chess 2015(3),
2015.06.18

GM Arkadij Naiditsch
Best rating: 2737

After a fantastic win over Carlsen in the Berlin endgame, it seems like Caruana can be called the "God of endgames" but in this game he shows us the total opposite. In the current position, we can see that the game should end in a draw. The position is equal, all pawns are equal and there doesn't seem to be much to play for...

30...♔g7 The black king is going towards the center, which is very logical.

31.♖c3 White is preparing to play Rb3 at some point or e3, with the idea of playing a4 later and fix the black pawns.

31...♔f6 32.e3 ♖d6 33.♔f3 White is also bringing his king to the center.

33...♔e5 34.a4 Fixing the pawn structure.

34...♔d5 35.♔e2 White probably wants to put his king to c3 to free his rook, but that is only enough for a draw, not to play for a full point.

35...♖d7 36.♔d2 h6 Black keeps on waiting, which is normal. I guess most of the spectators already fixed this game as a draw.

37.♖c1

37...♔c6?! The first move in the wrong direction. Why move the king away from the center...

38.♔c3 b5?! This is already a very strange move. I can't find any reason for Black to take such drastic measures. [38...♔d5 and I think the position is still just a draw.]

39.axb5+ ♔xb5 40.b3 Now Black has 2 weak pawns on a5 and c5. White could try the idea of bringing the rook to f4 now, by playing Ra1-Ra4-Rf4 and then maybe something with e4, but of course Black still has excellent chances for a draw.

40...g5? This is already a heavy mistake! Why give White the only open file?! It is hard to understand what was going on with Caruana during the last 3-4 moves, since usually the World Nr2 plays excellently in endgames.

41.hxg5 hxg5 42.♖h1! Of course White takes over the h-file. Suddenly Black's position is already very difficult! White is ready to attack all the black pawns and the idea of playing Rh8-Rb8+ and then Kc4 could be very unpleasant for Black. Objectively I would say that Black's position is maybe already lost!

42...♜a7! A great defensive idea by Caruana. Black wants to play a4 at some point, get rid of the weak pawn and later try to get the king back to the kingside.

43.♜h7 White is trying to stop Black from playing a4, but does it really do the job?! [White could also play 43.♜h5 43...f6 44.♜h6 Quite a similar try as in the game... 44...a4! A very strong move. Black should not try to be passive, but rather look for direct counterplay. 45.bxa4+ (45.♜xf6 45...a3) 45...♜xa4 46.♜xf6 ♜a3+ The white king has to move back. 47.♚d2 (The position after 47.♚b2 47...♜xd3 48.♜xf5 ♚b4 is just equal because of the very active black pieces.) 47...♜a2+ 48.♚e1 ♜a1+ Black keeps on checking. 49.♚e2 ♜a2+ 50.♚f1 ♜a1+

51.♚g2 and now that the white king is far away, Black is going for the d3 pawn. 51...♜d1 with very good drawing chances for Black.]

43...f4?! I don't think this is the best try. [Black should still have gone for 43...a4! 44.bxa4+ ♜xa4 45.♜xf7 ♜a3+ and as we saw in the line above, the position is closer to a draw than to a win.]

44.gxf4! The best move in my opinion. [44.exf4 44...gxf4 45.g4 was also possible, but in comparison to the game, White's pawns are not all connected, which might give Black better surviving chances.]

44...gxf4 45.e4 The pawn on f4 will be lost in any case.

45...a4 Better late than never... **46.bxa4+ ♜xa4**

47.♜xf7 Black is in big danger but the fight still goes on.

47...♖a3+ 48.♔d2 ♜a2+ 49.♔e1 ♜a3 is the best try. [In case of 49...♙b4 50.♜xf4 ♙c3 51.♜f3 ♙d4 52.♜e3 White's position seems to be winning because of the Kf2-Kg2 maneuver.]

50.♔e2 ♜a2+ This move doesn't leave Black much hope... [Black could keep a bit more hope after 50...c4 51.dxc4+ ♙xc4 52.♜xf4 ♙d4 but White is winning here too after 53.♜h4 ♜b3 54.♔f1 followed by Kg2-f3-Kg3, with an easy win.]

51.♔f3 ♜d2 Black is hoping to win the d3 pawn, but it just doesn't work.

52.♜d7! Of course defending the d3 pawn.

52...♙c6 53.♜d5 and Black is actually in some sort of zugzwang.

53...♙b6 and the e-pawn is unstoppable. [After 53...♜c2 White is winning with 54.d4! cxd4 55.♜xd4 followed by Rd8-Rf8-Rxf4, with an easily winning position.]

54.e5! ♙c6 55.♜d8 [55.e6 55...♙xd5 56.e7 ♜xd3+ 57.♔e2 was also winning for White.]

55...♙c7 56.♜d6! Putting Black in a similar zugzwang as on the last move. White is of course totally winning. A very unpleasant defeat for Caruana, who collapsed in just 4 moves in a totally equal endgame. However, Nakamura perfectly took his chances and finally got the full point. **1-0**

(16) Hammer, Jon Ludvig (2677) - Vachier Lagrave, Maxime (2723)

Norway Chess,
2015.06.17

GM Csaba Balogh
Best rating: 2672

A very interesting endgame. At first sight White has very good winning chances, because Black is paralyzed by the d7 pawn and the bishop on f1 excellently blocks the two passed pawns on h4 and d4. However it is not easy to find a final break through, since Black always has his resources.

44.♜xd8!? A clever way to promote the pawn. Hammer eliminates the main blockader and promotes with the help of the king. [Another winning attempt is 44.♙b7 but it fails to 44...f5! using the fact that the white king goes too far from the kingside. Black breaks the pawn chain with this sacrifice. 45.gxf5 ♜f8 46.♙c8 ♙a5 47.d8=♚? already loses after 47...♙xd8 48.♜xf8 (48.♙xd8 48...♜xe8+ 49.♙xe8 ♙f6!—+ Black either collects all the pawns and promotes his own and if White protects f5 with the bishop it gives free way to one of the passed pawns. The white king got too far away from the action...) 48...♙xf8 49.♙xd8

49...h5! The doubled h-pawns look completely harmless, but actually the backward one is going to decide the game in Black's favor... 50.♔d7 h3! Black sacrifices one pawn in order to let the other one run... 51.♙xh3 d3 52.♙f1 d2 53.♙e2 h4—+ and the white king is too far to stop the passers. Black soon promotes one of the pawns.]

44...♖xd8 45.♔c7 ♖f8 46.d8=♔ ♖xd8 47.♔xd8

47...h5! A great move and actually the only one which avoids losing! The point is the same as before. Black sacrifices one of his pawns in order to break the pawn chain. [47...f5? with the same idea as in the 44. Kb7 line. Black would like to place his king on the f-file, block the pawns and let his own ones run, but he fails because after 48.♙e7!+— the white f-pawn is going to be fastest!; The breakthrough with 47...h3? makes no

sense, White just takes and stops the other pawn. 48.♙xh3 d3 49.♙f1 d2 50.♙e2+—]

48.gxh5! is also White's only move! [48.g5? might look tempting at first, but it runs into the same problems as in the 44. Kb7 line. Black wins by the same motif... 48...h3! 49.♙xh3 d3 50.♙f1 d2 51.♙e2 h4 52.f5 h3 53.♙e7 h2—+]

48...♙h6 49.♙e7 ♙xh5 50.♙e2+ Otherwise Black goes Kg4, while 50.f5 will happen later in the game.

50...♙h6 [There was nothing wrong with 50...♙g6 Black is threatening with Kf5 or h3, therefore White must play 51.♙d3+ ♙h5 52.♙f5 The only attempt to stop h3 and Kg4, if White does not want to force a repetition with Be2...]

52...h3! leads to the elimination of all the material by force! 53.♙xh3 d3 54.♙f5 d2 55.♙c2 ♙g4 56.f5 d1=♔ 57.♙xd1+ ♙xf5=]

51.♙f1 [51.♙xf7? loses by one tempo after 51...h3 52.f5 h2 53.♙f3 d3 54.f6 d2—+ and Black promotes his pawns before White could go Ke7 and f7-f8Q with check.]

51...♙h5 52.f5 Hammer keeps on playing for a win, but there is simply no way...

52...♙g4 53.f6 h3 54.♙xh3+ [54.♙xf7 also leads to a draw after 54...h2 55.♙g2 d3 56.♙g7 d2 57.f7 d1=♔ 58.f8=♔

h1=♔=]

54...♔xh3 55.♔xf7 d3 56.♔g7 d2 57.f7 d1=♔ 58.f8=♔ The game is drawn. An interesting endgame! The players quickly traded queens to keep only two kings on the board...

58...♔g4+ 59.♔f7 ♔f5+ 60.♔e7 ♔xf8+ 61.♔xf8 1/2-1/2

Chess and the City. Mitropa Cup 2015

WGM Elisabeth Paetz
Best rating: 2493

The Mitropa Cup is a team event (Open and Women) that takes place every year. Compared to the European team championship, it is restricted to 10 countries (Italy, Slovenia, Slovakia, Germany, Austria, Switzerland, Hungary, France, Czech Republic and Croatia) which are all located in the middle of Europe. For me it is the very first time I take part in this event and I feel especially honored to be allowed to play for the men's team. However, it is not the first time in German history that a woman played in the Open competition. Exactly 20 years ago, Ketino Kachiani played her first National Team event for Germany at the Mitropa Cup. Our team composition this year is a mix of youth and experience. The top boards in our team are held by the two "princes", Matthias Bluebaum and Dennis Wagner, followed by IM Andreas Heimann and myself. The women's team only consists of 2 boards and with Sarah Hoolt and Judith Fuchs we have two very experienced players representing our country this year.

After 5 rounds the host team of Austria leads the event with a 100 percent match score, including a sad victory over Germany today. In the women's section the Hungarian team is leading with 9-1 match points.

As for my personal score, I was quite happy until today's game. With 3 out of 5 I am playing more or less according to my rating, but of course I feel a bit upset since I had started with 2.5/3.

This year's Mitropa Cup takes place in Mayrhofen, a small town in the Tyrolean part of Austria, which is surrounded by beautiful mountains and fresh air.

Below you can find some impressions of this beautiful event from this year:

Our match today versus Austria with Bluebaum-Ragger on the top board

Editorial Preface

The main event of the week, the Norway Chess Stavanger 2015, came to an end. The tournament had a lot of surprises, like the first round loss on time of Carlsen against Topalov or the outcome of the game Hammer-Carlsen.

Veselin Topalov, who has recently only played very few tournaments, came clear first with 6.5/9. Anand and Nakamura, who both had a great tournament, shared second place with 6/9. Carlsen only came 8th with 3.5/9, which is clearly his biggest upset in classical chess since he became World Number 1.

In the traditional 50th edition of the Capablanca Memorial nobody could stop Yu Yangyi who finished clear first with 7/10. In second position we find Andreikin and Eljanov, both with 5.5/10.

The B group was won by Kunin with 6/9.

Another few top events are also underway, like the 10th Edmonton International or the Russian higher league.

In a couple of days already the Super tournament in Dortmund and the Super tournament in Biel are going to start.

In the current issue we focus our attention on the Stavanger tournament! Enjoy!

Anand wins the next game with a brilliant combination, which is too hard even for the computers!

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 a6 Vachier Lagrave plays his favorite Sicilian Najdorf variation and Anand replies with one of the most fashionable answer...

6.h3 e6 This probably came as a surprise. The Frenchman usually plays 6...e5, also a few rounds before the current game against Caruana he chose that option.

7.g4

7...h6 The game has transposed now to the Sicilian Keres variation, which was considered to be better for White, but of course the newest computers are showing good and playable options for Black here as well.

8.♕g2 ♗c6 9.♕e3 White usually aims for castling queenside in this line (after Qe2), but Black manages to avoid this idea... [9.♗xc6 9...bxc6 10.e5 seems to create direct problems, but Black has 10...♗d5! and he is fine.]

9...♕e7 10.f4 Intending Qe2 and 0-0-0. [After the direct 10.♖e2 Black quickly comes with his typical counterplay 10...♗xd4 11.♕xd4 e5! This is the reason why White usually starts with 10.f4. 12.♕e3 ♕e6 13.O-O-O ♖c8∞Preparing for the standard Sicilian exchange sacrifice on c3 or just playing Qa5 increasing the attacking chances.]

10...♗d7! This is the point behind Black's play. White does not have enough time for playing Qe2 or Qd2 because of the unpleasant check on h4! White therefore castles kingside, but this gives a different character to the game.

11.O-O We could say, that it is risky to castle this direction after having advanced all the pawns in front of the king, however the black king cannot stay for long in the center, castling queenside is even more dangerous, therefore he will castle kingside as well, but then the advance of the kingside pawns are rather giving attacking potentials, than weakening the king.

11...♗xd4 Black needs to exchange the knights in order to fianchetto his bishop to b7. [If Black starts in the other

move order, 11...O-O Vachier Lagrave most probably wanted to avoid the new direction of some games, which continued with 12.♘ce2!? and White could take back with the knight on d4.]

12. ♖xd4 O-O Black had to waste a tempo on protecting the g7 pawn.

13. ♕d2! Another strong prophylactic move against b5 and White also retreats his queen from the center to leave from all the kind of attacks. Anand probably was already thinking about the sacrifices on h6, which later decided the game on his favor. Now on b5, White could push e5, because he has left from the dxe5 tempo, while the queen was standing on d4.

13... ♖b8 Black is finally able to push b5. All these moves are typical to many Sicilian lines. Another known idea in such positions is to regroup the bishop to d4 by including the Ba7-Ra8 pair of moves, however the bishop stands better now on e3 because it is ready for the sacrifices on h6 and it does not stay in the e5 tempo, after which black could win the dark squares for the minor pieces.

14. ♘e2 b5 15. ♖ad1! Anand brings all his pieces to the game. Who could guess, that this rook on d1 will very soon decide the outcome of this game?!

15... ♖c7 A known idea in the Sicilians, that Black retains his

bishop on c8 to keep his e6 pawn and the d7 knight protected. In case of 15...Bb7, White could either try e5, using that the d7 knight is not protected or to push f5, followed by putting pressure on the e6 pawn with Nf4.

16.f5 White reveals his cards about sacrificing on h6, but Black does not believe in it and completely ignores it. At the beginning correctly...

16... ♘f6 17. ♘g3 White brings another attacker. After taking twice on h6, White might threaten with g5 and Nh5. [The direct 17.♙xh6 only leads to draw 17...gxh6 18.♖xh6 Black has other moves as well, but the most forcing one is 18...♗h7 Black wants to play Bg5, therefore the only move is 19.f6! ♙xf6 20.♖xf6 ♘xf6

21.♖g5+! (Black defends successfully after 21.♖xf6 21...♖c5+ 22.♗h1 ♖e5!) 21...♗h7 22.♖h4+ draw with perpetual check as Kg6? does not work in view of Nf4! 22...♗g7 23.♖g5+=[

17... ♙b7 [Trying to use the x-ray on the g3 knight with 17...d5? runs into 18.e5! ♖xe5 19.♙f4 and the b8 rook falls.]

18. ♗h1 The last preparation to the sacrifice! White leaves from the potential checks on the dark squares. [The immediate 18.♙xh6 shows perfectly, why 18.Kh1 is so useful 18...gxh6 19.♖xh6 White is threatening with g5 and Nh5. The only move is 19...d5! and the brilliant tactics played in the

game only leads to draw now. .. 20.g5 ♖xg3 21.♖d3 Black has some other options too, but the easiest is 21...♗c5+ 22.♔h1 ♜xe4 23.♖xg3 ♜xg3+ 24.♔h2 ♗d6 and White must move into perpetual check... 25.♔g1 ♗c5+ 26.♔h2=]

18...♖bd8? Black still ignores the sacrifice, but this time he should not have done it. His plan was to push d5 and he also left from the motif of e5 Qxe5 Bf4 and the rook is hanging on b8. [Black should have strengthen his kingside with 18...♔h7! when it is not obvious how White should make progress in the attack. On the other hand, Black is coming with Rad8 and d5!]

19.♗xh6! The sacrifice itself suggests itself. White has based all of his moves on this idea, but the follow-up is extremely difficult to find and to calculate beforehand...

19...gxf6 20.♖xh6 d5! Black thought, that the sacrifice is unsound as he has the usual central break and White will have nothing more than perpetual check. However, Anand has prepared a deep surprise...

21.g5!! The second blow, but it all fails without the next move... [Perhaps, Vachier Lagrave has expected 21.e5 21...♖xe5 22.♖g5+ ♔h8 23.♖h4+ when the draw is inevitable with 23...♔g8 (23...♜h7 loses to 24.♖xe7 ♖xg3 25.♖xb7+-) 24.♖g5+=]

21...♖xg3

22.♖d3!! Black is two pieces up, but this intermediate move kills all his hopes. The point is to send the queen into wrong place before taking on f6. On the direct 22.gxf6 Bd6 wins for Black as he mates on h2 and in the same time the queen covers the g7 square...

22...♘h5? Black misses the final point! [The only move was 22...♘xe4! White must continue his extremely powerful play with 23.f6! ♕xf6 (Another key line is 23...♙xg5 24.♙xg5+ ♘xg5 25.fxe7 ♖d7

26.♖g3!! Taking on f8 would remove the king from the danger zone and Black could get strong compensation for the exchange. However now he gets mated... 26...♖xe7 27.♖xg5+ ♔h8 28.♖f6! Driving the king to wrong square to avoid the defense of f5-Rh7... 28...♔h7 29.♖f4! ♔h6 30.♖g3! Temporary retreating but now mate is coming... 30...♔h5 31.♕f3+ ♔h6 32.♖h4#) 24.♕xe4! dxe4 25.♖xg3 ♕g7 26.♙h4 e3+ 27.♔g1 e2 28.♖e1+- Black only has two bishops for the queen, which is clearly not enough compensation.; 22...♙e5 loses to 23.gxf6 ♕xf6 24.♖f4! ♕g7 25.♖g3+- all the heavy pieces are in the attack.]

23.g6!! The only winning move, which was most probably missed by Black! [23.♖xg3 leads to a draw after 23...♘xg3+ 24.♔h2 ♕d6 25.♔g1 ♕c5+=]

23...fxg6 24.fxg6 ♖xf1+ 25.♕xf1 And Black has no defense against the threatening mates after Qh7. He must give up his queen for free...

25...♘f6 [25...♙f4 26.♙h7+ ♔f8 27.♙h8#; 25...♙e5 26.♙h7+ ♔f8 27.♙f7#]

26.♖xg3 The game is over! Black continues resisting for a few more moves.

26...dxe4 27.♕e2 e3+ 28.♔g1 ♕c5 29.♔f1 A beautiful and very long combination by Anand! **1-0**

**(2) Hammer, Jon Ludvig (2677)
- Carlsen, Magnus (2876) [D30]**

3rd Norway Chess 2015(9),
2015.06.25

GM Arkadij Naiditsch
Best rating: 2737

It has been a horrible tournament for Carlsen but after a very bad start Magnus seemed to recover a bit with a few wins, but in the last round turned against him again. We are going to see a game between the World number 1 and his second. Psychologically I can't imagine Hammer's situation... How to play against your boss? Against somebody who you helped become World Champion, accompanied to so many events and who you see is having a horrible event. Anyhow, we are going to see a strange game where Carlsen clearly is out of shape and Hammer keeps taking advantage of his mistakes.

1.d4 d5 2.c4 e6 3.♘f3 a6 Well, what to say about such an opening!? It seems like Carlsen is joking with his second, but it turned out to be a bad idea...

4.♙g5! I think it is a great move! Hammer wants to play a good version of the Queen's Gambit.

4...f6?! This is already more shocking than funny. After such a horrible move White's advantage is very clear.

5.♙d2 I would like to know if Hammer was more laughing or more nervous about the beginning of the game.

5...dxc4 to give the f6 move an idea

6.e3 A good and solid move! [6.e4 would be a bit careless because after 6...♘c6! Black is back in the game.]

6...♘c6 After this move White's advantage is clearly very big. [It was maybe a slightly better try to hold on to the c4 pawn: 6...b5 7.a4 A standard move. 7...♙b7 8.axb5 axb5 9.♖xa8 ♙xa8 10.b3 and White clearly has a safe and nice advantage.]

7.♙xc4 ♙d6 Now we can rly see that because of the big damage done to Black's pawn structure White is doing very well.

8.e4 I don't know if e4 was really needed. [White could have continued with the simple 8.♘c3 8...♘ge7 and going for the bishop pair with 9.♘e4 followed by Nxd6.]

8...♘ge7 9.O-O O-O Black wants to play Kh8 and e5 somewhere and f5 move could also be possible at some point.

10.♖b3 Hammer puts maximum pressure on the e6 pawn.

10...♙h8 After this move Black enters a very unpleasant endgame. [Another try to hold on to the e6 pawn was 10...♖d7 but after the simple 11.a4 avoiding Black's b5, White is clearly much better.]

11.♙xe6 Hammer evaluates the situation correctly.

11...♙xh2+ The only move.

12.♙xh2 [Of course not 12.♘xh2? 12...♘xd4 and Black is winning.]

12...♔d6+ 13.♕h1 ♜xe6 Black won the piece back but the white pawns in the center mean that White is still a lot better.

14.d5 ♜g8 black is trying to remain solid.

15.♔a3! A strong move! Black's only chance to get counterplay is to start something on the kingside because of the missing pawn on the h-file, but since Hammer is forcing the queen exchange now, in the endgame the slightly open position of the white king will not matter any longer.

15...♔xa3 16.♞xa3 ♞a7 Black is forced to go back and hope to be able to play c6 later.

17.♜b4 Hammer continues playing well and solidly! The bishop on b4 is well-placed.

17...♞fe8 18.♞ac1 ♞ac8 Carlsen is still hoping to play c6 somewhere.

19.♞d4 Another white piece is taking a good position.

19...f5 It is maybe the best practical decision to unbalance the position.

20.f3 White continues keeping the strong center under control.

20...fxe4 21.fxe4 ♞g6 Attacking the only weakness of White's position, the e4 pawn.

22.♞f5?! Hammer enters the complications, which was absolutely not needed! [After a simple move like 22.♞fe1 White would keep a decent advantage. The black knight on a7 is in a bad position, the bishop on g8 as well and White keeps the idea of playing Nf5-Bc3 in mind.; But the seemingly logical move 22.♞ce1? would be a mistake because of 22...c5! and Black is back!]

22...♞xe4 23.♜c3 The g7 pawn can't be protected, so Black needs to decide between moving the h-pawn and playing Bxd5.

23...♜xd5?! It is hard to say if this is just a blunder ... [Black would keep fighting after 23...h6 24.♜xg7+ ♔h7 25.♜d4 b6 From a human point of view, Black's position looks very scary, but in fact maybe most of White's advantage has vanished. I guess Carlsen would not lose this position to anybody any longer.]

24.♜xg7+ ♔g8 25.♜d4 Attacking a7 and threatening Nh6 mate.

25...♞xd4 Black is forced to give the exchange.

26.♞xd4 Being an exchange up gives White a close to winning long-term advantage.

26...♜xa2 Well, Carlsen has nothing to lose so of course he takes the a2 pawn is very risky, but in case Black would keep on playing normal moves, White would slowly exchange the pieces and the exchange up would be enough for a full point.

27.b3! A perfect answer! The a2 bishop is going to be taken.

27...♖d8 This move leads to a fast end. [Black could have fought harder after 27...c5 28.♖f2 cxd4 29.♖xc8+ ♘xc8 30.♖xa2 and Black's chances to make a draw are small, but the fight still goes on. 30...♘f8 Setting a little trap... 31.♘c4 (White could fall into the trap after 31.♖d2 31...♘e6 32.♘c2 ♘d6! and the d4 pawn can't be taken because of Ne4!) 31...♘e6 32.g3 followed by Kg2 and slowly White is going to win the d4 pawn and it is going to be almost impossible for Black to keep the h7 and b7 pawns alive. The rook is much stronger in such endgames where the fight is going on on both flanks.]

28.♘e6 ♖d2 29.♖c3 A good move because White just wants to play Rg3 next, but there was another option. [The forced line 29.♖xc7 29...♙xb3 30.♖g7+ ♔h8 31.♖ff7 was not that easy to see, but possible to calculate until the very end. 31...♙xe6 32.♖xh7+ ♔g8 33.♖hg7+ ♔h8 34.♖xb7 with a double attack on the Na7 and g6. White is totally winning.]

29...♖e2 30.♘f4 [30.♖f6! was leading to an even faster win. 30...♘c6 31.♖cf3 and the mate on f8 is unavoidable.]

30...♖b2 Carlsen keeps on looking for practical chances.

31.♘xg6 hxg6 32.♖xc7 Black's position is simply lost.

32...♖xb3 [After 32...♘c6 33.♖xb7 ♖xb3 White can even choose an easy winning way like 34.♖xb3 ♙xb3 35.♖f6 ♘e5 36.♖xa6 and the win would only be a matter of time.]

33.♖d1! Hammer shows no mercy...

33...♘c6 34.♖dd7 and the mate on c8 is unavoidable! Well, what to say after such a game... We rarely see Carlsen not playing at his level, missing a lot of chances and giving so many to his opponents. I am curious to see if Hammer will remain Carlsen's second after beating his boss in the last round! :) **1-0**

Young & Talented

GM Etienne Bacrot

(3) Bluebaum, Matthias (2600) - Bailet, Pierre(2518) [E92]

Mitropa Cup 2015(9.3),
2015.06.22

The German player Matthias Bluebaum is only 18 years old and just crossed the 2600 barrier. He is currently the 13th player in the world under 20 rankings. This game doesn't belong to his best achievements but is very interesting, also thanks to his French opponent.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 5.♘f3 O-O 6.♙e2 e5 7.♙e3 exd4 Black rarely opens the center this way in King's Indian, but here it works thanks to the bishop on e3. 7....Ng4 is the "closed" alternative.

8.♘xd4 ♖e8 9.f3 c6

10.♙f2 A necessary retreat. There is a nasty surprise after the most logical move: [10.♖d2 10...d5 11.exd5 cxd5 12.O-O ♘c6 13.c5 ♗xe3! with great compensation, as in the Karpov-Kasparov World Championship Match 1990.]

10...d5 11.exd5 cxd5 12.O-O ♘c6 13.c5 ♘h5 Very normal other possibilities are 13...Bf8 or 13...Re5.

14.♖d2 ♙e5 15.g3 ♘g7 The knight has done its job of weakening White's king and is back to fight for central squares.

16.♗fd1 ♙f5 Quite a new move. [16...♙e6 was the main theoretical move for a long time.]

17.♗ac1!? Finishing the developpement. The alternatives are: [17.♘db5 is nicely met by 17...d4 18.♘xd4 ♙xd4 19.♙xd4 ♙c2!! An unexpected move which solves all the problems. 20.♖xc2 ♘xd4 21.♖a4 ♘xe2+ 22.♘xe2 ♖g5 Black wins back the pawn and got full equality in Kovalyov-Van Kampen 2014.; 17.♙f1 looks good but Black equalizes after the following forced sequence: 17...♙xd4 18.♙xd4 ♘e6 19.♙f2 d4 20.♘b5 ♘g5 21.♙g2 ♘e5 22.♘xd4 ♖xd4 23.♖xd4 ♘exf3+ 24.♙h1 ♘xd4 25.♙xd4 ♙g4; 17.♘xf5!/? might also be checked by theoretical players. 17...♘xf5 18.f4 Some research is needed to find out if White has the advantage.]

17...♙xd4!? Black needs to play very concretely in this

opening because of his bad pawn structure. He sacrifices his dark squared bishop but somehow frees his pieces.

18. ♖xd4 ♘e6 19. ♙f2 d4 20. ♘b5

20... ♘g5?! Maybe this is not the best move but it is very interesting over the board and other moves lead to slightly worse endgames. [20... ♖d5 21. g4 (21. ♘d6 21... ♘g5∞) 21... ♙xg4 22. fxg4 ♘g5 23. ♖c3! ♖e5 24. ♘xd4 ♘xd4 25. ♙xd4 ♖xe2 26. ♖xe2 ♖xe2 27. ♖e3 ♖c2 28. ♙c3 ♘e6 29. ♖e5 White somehow pushes in this endgame.; 20... d3 21. ♙xd3 ♘g5 22. ♙e2 ♖xd2 23. ♖xd2 ♙d3! 24. ♙xd3! ♘xf3+ 25. ♖g2 ♘xd2 26. ♖d1 ♘e4 27. ♘c7 ♘xf2 28. ♖xf2 and again White has a slightly better endgame.]

21. ♘xd4 ♘xd4 22. ♙xd4 ♖e7 23. ♖f2 [23. h4!? seems to be the best practical decision and now White fights for only two results, win or draw. 23... ♖xe2 is the best defensive option. (23... ♘e6 24. ♙f2 ♘xc5 25. ♙b5 ♖ad8 26. ♖h6 and with two nice bishops White has a clear lead.; 23... ♘h3+ 24. ♖f1+-) 24. ♖xe2 ♖xe2 25. hxg5±]

23... ♖ad8 24. ♙f1 [24. ♙b5 was the last chance to play for an advantage but Black has two moves that lead to a fighting game: 24... ♙e4 (24... ♙d7!? 25. ♖e1 (25. ♙xd7 25... ♖xd7 26. ♖e1 ♘e6∞) 25... ♙xb5! 26. ♖xe7 ♖xe7∞) 25. ♖c3 ♙xf3 26. ♖e1 ♙e4! (26... ♘e4+ 27. ♖xf3!) 27. ♙h8! (27. ♙xe8 27... ♖e6!∞) 27... f6

28. ♙xf6 ♖f7 29. ♙xe8 ♖xe8 with some compensation.]

24... ♙e4! All black pieces are on the best squares and now this move puts great pressure.

25. ♙g2? A bad mistake, missing the tactic. 25. Qe3 or 25. f4 might hold for White.

25... ♙xf3! 26. ♙xf3 ♘xf3 27. ♖xf3 ♖xd4!! 28. ♖xd4 ♖e2+ 29. ♖f4

29... h6! It's funny, but White can't save this.

30. h4 [30. ♖e1 30... g5+ 31. ♖f5 ♖f3+ 32. ♖f4 ♖d5+ 33. ♖g4 h5+! winning big material.]

30... h5 31. ♖g5 ♖e7+?? [31... ♖h7 Taking away the h6 square from White's king simply mates. Black for sure missed one of the two nice tactics and settled for a draw. A lucky escape!]

32.♖e1 (32.♖f1 32...♗e5+! 33.♔f6 ♖f5+ 34.♖xf5 ♕e6+ 35.♔g5
♕xf5#) 32...f6+! 33.♔xf6 ♖f8+ followed by Rf5 mate.]

32. ♖f6 ♕e3+ 33. ♖f4 ♕e7+ 34. ♖f6 ♕e3+ 1/2-1/2

Endgame section

(14) Carlsen, Magnus (2876)
- Nakamura, Hikaru (2802)

Norway Chess,
2015.06.22

GM Csaba Balogh
Best rating: 2672

In the following endgame Nakamura shows the right technique of holding the 4 vs 3 rook endgame when the pawns are on the same side. It is very important that in the earlier stage of the game, he has already built up the best defending pawn formation (h5-g6-f7). White can only make progress by advancing his pawns, but this will lead to the trade of the pawns and all the simplifications brings the draw closer for the defending side.

45...♖b2+ 46.♔f3 ♜b3 Black basically just waits, he has nothing to do. At the same time Nakamura pays attention to preventing the advance of the e-pawn.

47.♖a7 ♜c3 48.♜e7 ♜b3 49.♔g3 Carlsen now tries to bring his king to h4 and later to g5, followed by damaging the pawn structure with g4-f5. Even after this the game was drawn, but it was much easier to prevent all these ideas by attacking the g2 pawn...

49...♜b2! 50.♔f3 White admits that he cannot make progress without pushing g4...

50...♜b3 51.g4 hxg4+ 52.hxg4 There are only 5 pawns on the board, but the main problem for White is still that the advance of his pawns will lead to further exchanges...

52...♜b1 Black could also wait on the 3rd rank, but Nakamura changes his strategy after the g4 move. He is going to harass the white king with checks from behind and attack the g4 pawn, trying to fix the structure.

53.♜d7 ♜f1+ 54.♔e4 ♜g1 55.g5 Another development of the game. After the g5 push, White has only two plans to make progress. The f5 move always leads to further exchanges, therefore Black should not fight against it. The only dangerous plan could be e4-e5-e6 and Black focuses his attention on preventing this idea...

55...♖a1 Black again wants to confuse his opponent in executing his plan by giving checks from the side...

56.♔e5 ♜a3 57.e4 ♜a5+ 58.♔d6 ♜a6+ 59.♔e5 ♜a5+ 60.♜d5 ♜a4 61.♜c5 [61.f5 leads to an immediate draw after 61...gxf5 62.exf5 (62.♔xf5 62...♜a1=) 62...♜g4=]

61...♜a1 62.♜c2 ♜f1 63.♜c7 ♜e1 The game is a dead draw. Both players go around for some time, before Carlsen starts his final winning attempt.

64.♜a7 ♜g1 65.♜a4 ♜f1 66.♜a6 ♜e1 67.♔d4 ♜d1+ 68.♔e3 ♜e1+ 69.♔f3 ♜f1+ 70.♔g3 ♜e1 71.e5 A new change of the structure. White now remains with the hope of pushing e6 when the king is pinned on the 7th rank. Obviously Black has many effective ways to avoid this idea...

71...♜e3+ 72.♔f2 ♜b3 73.♜d6 ♜a3 74.♜d8 ♜c3 75.♔e2 ♜a3 76.♜d3 ♜a1 77.♔e3 ♜e1+ 78.♔d4 ♜f1 79.♔e4 ♜a1 80.♜d7 ♜a4+ [White has no winning chances at all. The following variation shows it well. If Black leaves from the pin with 80...♔g8 White might hope for 81.e6 Of course Black could immediately make a draw with Re1, but let's say he does not have this option and plays 81...fxe6 82.♔e5 This could be White's only hope. He invades with his king along f6, collects the g6 pawn and the g5 pawn gives him a shelter against the checks. However the game is still a draw after

82...♜f1 83.♔f6 ♜xf4+ 84.♔xg6 ♜f8!= In case of the g- and h-pawns, even the passive defense with the rook on the 8th rank yields a safe draw. Black does not even need his e-pawn, that position is an easy theoretical draw. He just moves with his rook along the 8th rank and in case of a check on g7, he goes to h8.]

81.♜d4 ♜a5 82.♜c4 ♔f8 83.♜c8+ ♔g7 84.♜c7 ♔f8 85.♔d4 ♜a4+ 86.♜c4 ♜a5 87.♜c8+ ♔g7 88.e6 The very last try, but of course it cannot lead to anything serious from White's point of view...

88...fxe6 89.♜c5 ♜a7 Black obviously keeps the rooks on the board.

90.♔e5 ♜f7 91.♜c4 ♜f5+ 92.♔xe6 ♔g8 The white king is cut from the f4 pawn and the rook is obliged to protect the f4 pawn. Black only waits with Kg7-g8, therefore the draw is inevitable and even Carlsen admits that he has no more hopes for the win...

93.♜c8+ ♔g7 94.♜c7+ ♔g8 95.♜c8+ ♔g7 We can see that in case of good defense, White has no winning chance in the 4 vs 3 rook endgames. **1/2-1/2**

**(15) Giri, Anish (2773)
- Topalov, Veselin (2798)**3rd Norway Chess 2015(8),
2015.06.24GM Arkadij Naiditsch
Best rating: 2737

This calm-looking endgame is much trickier than it seems. Many young players don't remember the greatest Catalan player of all times, Ulf Anderson, who was famous for his perfect endgame technique and the knight in the current position on d7 could be just like from his games! In fact he was more famous for having similar endgames with the knight on c6 more often.

33.♖b7 A good move! Now the black rook from d8 doesn't have any moves and White might threaten to play Nb8 or Ne5, winning the b5 pawn.

33...♘d6 A logical move, preventing White's knight moves.

34.g4 An interesting moment. White clearly has to start pushing his pawns, but with which one to start?! To play e4 but maybe then Black is able to play e5. Or maybe to play f4 with the idea of playing e4-e5. Giri chooses the g4 move

and actually this looks like a very good choice to me! The black pawns are fixed and White just wants to gain some space during the next moves.

34...h5?! Not the best in my opinion since it is always very dangerous in an endgame to give a pawn for free, even if it weakens the opponent's pawns structure. [34...h6 looks safer. 35.h4 ♖h7 36.h5 and now Black should play the very important

36...g6! 37.♘f6+ ♖g7 38.♘e4 gxh5 39.gxh5 b4 40.♘xd6 ♖xd6 41.♖xb4 ♖d5 and Black's chances to make a draw in this rook endgame are not bad. But again, the position is really unpleasant!]

35.gxh5! A good choice. Of course White doesn't give Black the chance of exchanging pawns so easily, which is always good for the defending side.

35...♖h7 36.b4! Perfect play! Maybe this is the move that Topalov had underestimated.

36...♘xb4 [36...♖h6 37.♘c5 also leads to a very unpleasant endgame with a pawn down for Black.]

37.♘e5 Now the f7 pawn is falling.

37...♖d5 [Of course 37...f6? is not possible since after 38.♘c6 White is winning material.]

38. ♖xf7 ♜xh5 **39.f4** White continues playing a great game! Now the white knight will go to g5 and the e6 and b5 pawns will be under attack.

39...♖g6 A possible move but Black maybe had another chance to fight for an escape. [39...♜d2 but this move is almost impossible to find over the board. 40.♖g5+ ♖g6 41.♖xe6 Black's position looks lost, but after 41...♜h4! it is not that easy for White to prove that the position is winning.]

40.♖e5+ ♖h7 41.♖f7 ♖g6 42.♖e5+ ♖h7 After repeating a couple of times, White of course continues the fight.

43.♖f3

43...♜f5 [After 43...♖g6 44.e4 looks very strong.]

44.♖g5+ ♖h6 45.♖f3 The white pieces are perfectly placed and this is a real problem for Black. If he was in time

to exchange a pawn or maybe enter a rook endgame, the position would most probably be a draw, but it is simply impossible!

45...♜d2 [After 45...e5 46.♖f7+ ♖h7 47.♖xe5 the position is probably lost.]

46.e3 The e6 pawn is going to fall.

46...b4 There is already no way of saving the pawn...

47.♖xe6 ♜h5 Black is trying to get some play. [In case of a passive defense like 47...♜c3 White is winning with 48.e4 ♜h5 49.e5 and the g7 pawn is going to fall.]

48.♖xg7 ♜xh2 49.♖f5+ Now we can evaluate this position as winning for White.

49...♖g6

50.♖e7+ The most human and simple, White is winning the b4 pawn. [50.e4 was good as well.]

50...♖f6 51.♖d5+ ♖e6 52.♖e4 The most simple. The king is a strong piece in an endgame.

52...♜h3 Preventing Nxh4.

53.♜b6+ ♖d7 54.♖d3 The b4 pawn is lost and so are Black's chances to hold a draw.

54...♙c1 55.♖xb4 ♔d6

56.♔d4 and Toplaov resigned without any further fight since White is totally winning. We just witnessed great endgame technique by Giri who used his chances very well and especially the unusual idea of 36.b4! is something we should remember from this game. **1-0**

Chess and the City. Host team wins Mitropa Cup 2015

WGM Elisabeth Paetz

Best rating: 2493

Austria did not only manage to organize a beautiful and professional tournament, their team in the Open section also won the championship convincingly with 15-3 match points. For Austria's highest rated player Markus Ragger it was sort of the first time he was competing in such an event and his team's victory was mainly based on the fact that together with GM David Shengelia they showed clear dominance on the top boards.

Silver went to the young Slovakian team which was able to overtake Germany by winning their last 4 matches.

The third place for Germany is definitively not what we have expected beforehand. However, the whole tournament went a bit unfortunately after the upsetting but well-deserved defeat against the hosts.

In the women's competition it was a similar one-man-show with the Hungarian Ladies. Ticia Gara was the top scorer of their, with an impressive result of 6/6. Second place went to Italy who won most of the Mitropa Cups in previous years. The

well-known trio of Zimina, Sedina and Brunello was however not able to deliver a serious fight for top place this time. Slovakia managed to get another medal (bronze) with their women team and their overall success was maybe based on their captain Eva Repkova - the only female captain in the entire tournament. Tenderness and care are psychological aspects which one may easily underestimate but in their case it clearly paid off!

For the German girls Sarah Hoolt and Judith Fuchs things went less favorably. They lost their Bronze medal in the very last moment by losing a bitter match against Austria II 2-0.

All in all, as already mentioned, for Germany things did not go the way we would have wanted or expected and it is actually hard to say why. On a personal note, it was the very first time I participated in the Mitropa Cup and my personal performance was not such a great support for higher goals. In team events it is however usually the unit of the entire team which makes the difference and somehow we were not able to find our real shape in that event.

The Austrian team (pictures by the Austrian Chess Federation)

Editorial Preface

A lot of big chess events are under way, but let us start with the traditional round robin in Dortmund, the "Dortmunder Schachtage".

After a long time, another women chess player (the previous one was Polgar Judith) finally joined the world's best chess players and this is Hou Yifan. After 5 rounds she has 2 points. She only lost one game to Kramnik and made 4 draws, which is clearly not a bad result!

Nisipeanu and Caruana are sharing the first place with 3.5/5. Then comes Kramnik with 3 points. The last 2 rounds of Dortmund are clearly going to be the very fighting because everything is still possible for the top 3 places in the event.

What is a bit strange for such a top tournament is the very small amount of draws! For example Kramnik has won 3 games and lost 2, but of course this is very good news for the spectators.

Your weekly commentator Arkadij Naiditsch has 2.5/5 points.

In the Chinese Island Hainan a very strong round robin is also under way, with all the best Chinese players and the two foreigners Bruzon and Sasikiran.

The 2nd Porticcio Open in Corsica had 2 winners, Areshchenko and Laznicka, both with the very good result of 7.5/9. From the top French players Fressinet scored 7 points and Bacrot, who lost his last game, only 6.5/9.

In the Russian higher league 3 players came equal first with 6.5/9: Artemiev, Motylev and Bukavshin.

In other news, we are proud to announce that Adrian Mikhalthishin, a Senior FIDE Trainer, joins us with his column "Golden Knowledge".

We would like to warmly welcome Adrian and hope that you will enjoy the exercises from one of the World's best trainers!

Enjoy!

Two best games of the past week

(1) **Nisipeanu, Liviu-Dieter (2654)**
- **So, Wesley (2778) [B23]**

43rd GM 2015(1.4),
2015.06.27

GM Csaba Balogh
Best rating: 2672

Nisipeanu has managed to surprise the extremely well prepared Wesley So with a tricky sideline in the Sicilian defense, which brought him a very nice victory.

1.e4 c5 2.♘c3 d6 3.f4 Not the main line, but if someone plays the Sicilian, that must also know about the sidelines like this. Of course, So was also familiar with the beginning of the theory...

3...g6 4.♗f3 ♟g7 5.♟b5+ [The main move and by far more common is 5.♟c4 but here Black has enough time to arrange the ideal development of his pieces with 5...♗c6 6.d3 e6 7.O-O ♗ge7 and 0-0 next showed by Gelfand and Karjakin in some games.]

5...♟d7 6.♟xd7+ ♚xd7 7.O-O ♗c6 8.d3 e6 In comparison to the lines in the 5. Bc4 variation, White is a tempo ahead in the development (the knight is not yet on e7), which allows him the following option.

9.f5!? ♗ge7 Black wants to play like in the other lines, but he must deal with some unexpected concrete ideas. [I believe, the strongest reply is 9...exf5 (with the bish op on c4 this usually does not work, because of the pressure on the f7 pawn) 10.exf5 O-O-O (10...♚xf5? does not work in view of 11.♗g5!; 10...gxf5?! destroys his own pawn structure. White gets strong compensation after 11.♗h4 ♗ge7 12.♚h5)]

10.fxe6 fxe6 11.♗g5! This is the difference! Black is missing one tempo (not castled yet) and he must face some unexpected problems on the f7 and e6 squares. White is ready to create problems with Qg4, Rf7 and Nf7, Black tries to prevent all these ideas with one move...

11...♗e5? Wesley So probably misses the next tactical blow... [The right move seems to be 11...h6! 12.♗f7 ♚h7! A very concrete line is about to come. The outcome of the f7 knight will decide the game, White either creates decisive threats or it gets trapped... (12...♚f8 13.♗xh6 the knight escapes.) 13.♗b5! White prevents the concrete Bd4 check after which the knight was falling and attacks the d6 in the same time. 13...♗c8 Black protects everything for now, but White creates new threats...

14. ♔g4! The pawn on g6 has become unprotected and White immediately makes use of it. 14... ♖e6! Only move, but now the b5 knight is hanging. White must continue pushing with the most active moves: 15.e5! ♕xb5 16. ♖xd6+ ♖xd6 17.exd6

The knight cannot be saved, because Black loses even more if he drops the g6 pawn with check. The game seems to be over, however Black saves himself with 17... ♕d7! 18.dxe7 ♕d4+! 19. ♕xd4 ♖xd4+ 20. ♖h1 ♖xe7= and the game is balanced!]

12. ♖b5!! This beautiful move was missed or underestimated by So. White starts dancing with his knights and somehow Black is unable to deal with them. The main threat is to take Nxe6 because then none of the knights can be taken because of the other checks the queen with Nc7!

12... ♕xb5 [12...h6? just strengthens the main threat, White wins on the spot after 13. ♖xe6!; A very logical defend would be to evacuate the king from the center. The point is after Nxa7 Kb8 the knight gets trapped, however White has the very strong move at his disposal: 12...O-O-O 13.d4! ♕xb5 (13...cxd4 14. ♖xd4 and the e6 pawn cannot be protected!) 14.dxe5 dxe5 destroys the future of the g7 bishop. White soon wins back the sacrificed pawn he ends up with a winning advantage... (14... ♖xe5 15. ♖f7 wins material. 15... ♖hf8 16. ♖g5+-) 15. ♕g4 ♖hf8 16. ♖e3+-]

13. ♖xe6 White wins back the minor piece, as he is threatening with Nc7 and Nxg7 in the same time.

13... ♕d7 Black has pinned his hopes to this move! He hopes, that the knight on g7 gets trapped and he will have enough time to capture it.

14. ♖xg7 h5 Black had two ideas in mind. He prevents the Bh6 resource of safely guarding the piece and he creates an additional threat of attacking the knight to Rag8 with Rh7. White must continue acting directly! [In case of 14... ♖hg8 15.a4! just like in the game, White sends the queen away from the b2 square in order to protect the knight with Bh6! 15... ♕b6 16.a5 ♕b5 17.c4 ♕c6 (Black cannot keep the pressure on the b2 pawn anymore with 17... ♕b4? 18. ♖a4+- traps the queen.) 18. ♖h6+- without being able to win the knight, Black is just lost.]

15.a4 White wants to develop his c1 bishop and he does want to worry about the fall of his b2 pawn.

15... ♕b6 16.a5 ♕b5 17.c4! The b2 pawn cannot be attacked anymore...

17... ♕c6 [17... ♕b4 18. ♖a4+-]

18.b4!? Stylish move, but it is not the only move to get a decisive advantage. On the other hand it is very logical, White wants to destroy the pawn structure and explode the center, while the black king stands on d7. He either lures a central pawn to b4 after which the knight e5 loses its outpost or he takes on c5 with similar consequences. White believes, that the two moves until Black grabs the knight on g7 will be enough to execute the plans. [18.♕f4!? is also very strong, but the point is different... 18...♖ag8 19.d4! (19.♕xe5? 19...dxe5 20.♖f7 is too slow, Black wins the piece with 20...♖h7) 19...♗xc4 (19...cxd4 20.♖xd4+- The black cannot hold his e5 knight.) 20.d5! ♖b5 21.♗e6+- White not only saves his knight, but he manages to place it on an excellent square from where it completely paralyzes the black pieces.]

18...♖h7 [On 18...cxb4 19.d4 ♗xc4 20.♕g5+- Black quickly collapses.]

19.bxc5 ♖xg7 [19...dxc5 leads again to the opening of the position and a quick defeat after 20.d4!+-]

20.♖f6! This was the key, which had to be foreseen by Nisipeanu before choosing the 18.b4 variation! White puts further pressure on the d6 pawn and Qxc5 cannot be taken as it gives back the piece after d4! Otherwise Black must set all his pieces into passivity to not collapse immediately because of the Rxd6 threat.

20...♗c8 A sad decision. Black preserves his extra piece, but he basically lost his a8 rook and c8 knight... [20...♖xc5+ 21.d4 ♖xc4 22.dxe5+-]

21.d4! Nisipeanu continues playing the most direct and highly energetic moves with which he swaps off his opponent from the board.

21...♗g4 [21...♗xc4 22.♖b3+- is also over, the knight is trapped!; I tried 21...♖xe4 22.dxe5 ♖xe5 but the machine quickly finished me with the following variation: 23.♖a4+ ♔c7 24.♖f3 The bishop is coming soon to the game though f4 or e3. 24...♖xc5+ 25.♕e3 ♖c6 26.♖a3 Black is still a pawn up, but his pieces are totally disorganized. He cannot survive for long... 26...♗e7 27.c5! d5 28.♕f4+ ♔d7 29.♕e5 ♖h7 30.♖f6+- and the game is over.]

22.♖f3 ♕xe4 [Another unsuccessful defensive attempt is 22...dxc5 23.h3! We can see the strength of the white center. The cover all the important squares, therefore Black does not have a good way to save his knight... 23...♖d6 24.hxg4 ♕xd4+ 25.♗e3 ♕xd1+ 26.♖xd1+ Black manages to trade queens, but his king does get out of the danger! 26...♖e6 (26...♖c6 27.♖f6+-) 27.♖f8 Looks like a deadly pin, but Black can still resist with 27...♘b6

28.♗h6! However after this great move, the game turns into a completely winning rook endgame after... 28...♖xf8 29.♗xg7 ♖g8 30.axb6 ♖xg7 31.bxa7 ♖g8 32.♖a1 ♖a8 33.gxh5 gxh5 34.♖f2+-]

23.h3 White wins back the material by trapping the knight and he retains all the previous advantages by keeping all the poor black pieces and the vulnerable king in the center...

23...dxc5 24.dxc5+ ♖e8 [On 24...♖c7 White has different kind of wins, but probably the easiest one is 25.♗f4+ ♘e5 26.♖d5! ♕xd5 27.cxd5 ♖e7 28.♖e1+-]

25.hxg4 ♘e7 White has various ways to win. The rest is just the matter of taste...

26.♖f1 Threatening with Rf8!

26...♖g8 [26...♖d7 27.♗b2 ♖gg8 28.♖e1+-]

27.♗b2 [27.♗g5+- is equally strong.]

27...hxg4 28.♖e1 [Black resigned in view of 28.♖e1 28...♕xe1 29.♕xe1 gxf3 30.♗f6+- A nice win, which was mainly thanked to the one-game opening idea. However if Black reacts correctly it does not bring anything.] **1-0**

(2) So, Wesley(2778)
- Naiditsch, Arkadij(2722) [D37]

43rd GM 2015(3.3),
2015.06.30

GM Arkadij Naiditsch
Best rating: 2737

We are in the 3rd round of the traditional tournament "Dortmunder Schachtage" and as usual the tournament has a great and interesting line-up. For me it was the first game against the very talented young player from Philippines, who changed his federation to American and is already in the Top 10. I have to say that to play against Wesley is everything but pleasant. He bangs the clock, caught non-stop and plays the moves instantly without writing the move of the opponent down. Well, a lot of young players behave very badly at the board these days and I am sure that the incident of Wesley So during the US Championship where he got a 0 for writing strange things on his scoresheet will not be the last time he breaks the ethic chess rules.

1.d4 It is not easy to guess the first move of So, since he plays everything.

1...♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♘bd7 In my first round game against Kramnik I chose to play my favorite 4...c5 Tarash, but I had a strong feeling that something unpleasant was waiting for me there, so I switched to the Queens Gambit.

5.e3 Clearly not the most ambitious but a very possible way of playing. The main at the moment is 5.Bf4.

5...♞e7 There are as well a lot of different possibilities to develop pieces for Black, but I usually like a solid setup in the opening.

6.b3 Now that the bishop can't get to f4 or g5, of course White develops to b2.

6...O-O 7.♞b2 b6 8.♞d3 ♞b7

9.♔c2! A well-known move, but it is still important to know this. White doesn't take too early on cxd5 because of Nxd5 and with the move Qc2 now Nxd5 will not be possible any longer because the h7 pawn is hanging.

9...c5 [To continue with 9...dxc4 10.bxc4 c5 11.d5 usually leads to a better position for White.]

10.cxd5 exd5 I am forced to take exd5 and now my bishop on b7 is a bit "stupid".

11.O-O a6 Before playing 11...a6 I thought for a long time. There are a lot of different setups for the black pieces and I needed to choose one. [If I was Peter Leko I would clearly go for 11...cxd4 12.♘xd4 g6 and try to hold this very safe but clearly worse position.]

12.♞fd1 ♔e8 I wanted to put my bishop on d6, but I need to be careful with White's e4 push first. [12...♞d6 seems premature since after 13.e4! it is clearly White who will benefit from the open center.]

13.♖ac1 ♘d6 14.♙f5 An interesting try. [It would have been more usual for White to play 14.♘e2 14...♚e7 15.♘g3 White wants to enter the f5 square. 15...g6 Of course the a1-h8 diagonal is a bit opened, but Black's position also has its pluses. Things are very complicated here.]

14...♖c8 I continue playing very safe moves and develop my pieces.

15.dxc5 Usually White should not give up the center without a concrete idea, but maybe So was afraid of my c4 push next. [A very typical move for White could have been 15.♚b1 and now I need to decide to play something "normal" like 15...Rc7 or to try and enter the complications with 15...c4 16.bxc4 dxc4 17.e4 (17.d5 17...g6)]

15...bxc5 16.♚d3 So far my opponent was playing very quickly. [16.♙xd7 is of course not dangerous for Black. 16...♚xd7 17.♘a4 d4 (17...♚e7 is good as well.) 18.♙b6 and here comes the very beautiful blow which I saw during the game:

18...♙xh2+! 19.♘xh2 ♚c6 and Black is better.]

16...♖c7 I continue keeping things safe.

17.♘a4 To play with or against hanging central pawns is always a very difficult task. Both sides have a lot of ideas and a lot of tactical motifs which need to always be taken into account.

17...♚e7 I managed to protect my center which is very good news.

18.♚c3 Another move which was played very quickly by So. It is logical to bring the queen to a5, but how to play such a move without spending at least a bit of time calculating the resources of your opponent?! [Maybe White should have continued with a prophylactical move like 18.h3 but I think it is already Black who can hope to get a better position. 18...g6 19.♙xd7 ♘xd7 and I think the position is about dynamically equal.]

18...d4! A very strong move which completely turns the game around.

19.exd4 ♘xf3 I was playing against the weak 1st rank. [19...♞d5 would also lead to a very unclear position. 20.♞e1 ♞d8 21.♞f1 ♞f4 and I was totally unsure during the game about who is actually better here.]

20.♞xf3 cxd4 This was my idea. Of course White has the bishop pair, but the 1st rank is very weak and the knight on a4 is totally out of the game.

21.♞a1? A really shocking reply! [21.g3 would lead to a normal position. 21...♞e5 22.♞g2 ♞xc1 23.♞xc1 g6 24.♞b1 and maybe Black is only a tiny bit better after 24...♞b8 with the idea of putting a lot of pressure on the f2 pawn by playing Ba7. White's problem of the horrible position of the knight on a4 is still unsolved.; Of course White can't exchange the rooks because of the mate: 21.♞xc7 21...♞e1+ 22.♞xe1 ♞xe1#]

21...♞e5 The black pieces keep on coming!

22.♞h3 White's position is already very difficult.

22...g6 23.♞d3 Here because I spent of a lot of thinking between the moves 12-20 I had only 20 minutes left on the clock and So about an hour, but what really surprised me during the game was that he was always playing his move instantly without even writing down my move. Well, in any case it did not go too well for him...

23...♞d5 White is in a huge danger.

24.♞xd4? Another bad move by White... [24.♞f1 24...♞f4 25.♞g3 White's position looks lost, but it is still playable. 25...♞ed3 26.♞f3 with a big advantage for Black, but nothing too dramatic has happened.]

24...♞xd3 Because I didn't have too much time left, I played this move quickly and missed a direct win. [24...♞f4 25.♞h6 and now comes the move that I missed: 25...♞f6!! with the idea of playing Bf8 next, catching the white queen. Just beautiful!]

25.♞xd3 ♞f4 26.♞xa6? and this move just loses on the spot in many different ways. [White's best chance was 26.♞f3 26...♞e2+ 27.♞f1 and now Black has a few options, but the most simple one is 27...♞xd4 28.♞xd4 ♞e5 29.♞e4 ♞xa1 30.♞xe7 ♞c1+ 31.♞e2 ♞xe7+ and White's position should be close to lost with such an open king and the knight on a4.]

26...♞g5 A safe move. [Another easy win was 26...♞e2+ 27.♞f1 ♞xd4 28.♞xd4 ♞c2 and White is totally lost. 29.♞xd6 ♞h4! with the double threat of taking on h2 and f2. The game is over.]

27.g3 [In case of 27.♞f1 27...♞e2+ 28.♞h1 Black is winning after 28...♞xh2! 29.♞xh2 ♞h4#]

27...♘e2+ 28.♔f1

28...♔g4 I had another 5 different moves to end the game as well. My threat is simple, to play Qh3 next.

29.♕e3 ♖xe3 [29...♔f3 was maybe a bit more accurate.]

30.♔a8+ ♔g7 31.♖xd6 [White can't take the rook: 31.fxe3 31...♖c2! All the black pieces are attacking the lonely white king. 32.♔g2 ♔f5+ 33.♔e1 ♕b4+ and Black will mate during the next few moves.]

31...♖e4 Safe and solid. Now the white king is fighting against the whole black army alone!

32.♔g2 ♕f4+ 33.♔g1 ♕h3+ 34.♔g2 ♖c2 The f2 pawn is going to fall.

35.♖f1 ♕f4+ Of course many other options would have been good enough, but this is a pretty one. 36.♔g1

36...♔f3 and after 37.gxf4 I have 37... ♖xf2 38.♖xf2 and ♖e1. I was very happy after the game to beat a Top 10 player with Black with such a nice mating attack. 0-1

GM Csaba Balogh
Best rating: 2672

Black manages to convert his advantage into full point with perfect technique. It is clear, that the connected c- and b-passed pawns supported with the bishop worth more than an exchange. The d-pawn cannot be promoted and it's days are counted, but still the win requires some work...

45...♖d8! Black needs to eliminate the d-pawn and only then he could focus on his own triumphs. [45...♖b8 46.d7 and Black cannot advance his b-pawn...]

46.♖d2 Only move. White indirectly protects his pawn.

46...♔g6! Making use of the drawback of the previous move.

The black king is not cut anymore therefore he quickly brings it to the game. [It is too early to play 46...♖xd6 47.♖xc4! this is the point of 46.Rd2! 47...♖b6 (47...♔xc4 48.♖xd6 is not the same as the game, because the black king is very far from the b-pawn and b2 runs into Rb6. White is suddenly better here.) 48.♖xd3 b2 49.♖d1 b1=♔ 50.♖xb1 ♖xb1+ 51.♔g2=]

47.d7 [A key line is 47.♖c3 White wants to give back the exchange. 47...♔f6! 48.♖cxd3 cxd3 49.♖xd3

49...♖b8! Both sides have a strong passed pawn, but the difference is that the black king is close enough to join to the game and to stop the d-pawn, while the white one is not only too far but also stands on the first rank to make the promotion happen with check... 50.d7 b2 51.♖d1 ♔e7! 52.♔g2 Black must find one more prophylactic move to win the game... 52...♔d8 and Black already prepared to promote his pawn... (52...b1=♔? is too early because of the intermediate move 53.d8=♔+! ♖xd8 54.♖xb1=) 53.♖b1 ♔xd7—+]

47...♔f5! Black wants to play Ke5-d4 after which the pawns are promoting automatically. The only move is to try to give back the exchange...

48. ♖c3

48... ♖xd7! Compared to the position after 46.Rd2, Black already gives up his rook for the c-pawn, because he has brought his king out from the cage and it is ready to support the b-pawn... [48... ♖e5 leads to draw after 49. ♖dxd3 cxd3 50. ♖xd3 b2 51. ♖b3=]

49. ♖xc4 ♗xc4 50. ♖xd7

50... ♖e5! This is the point! Black wants to play Bd5 which is threatening with the b2 win right away and it also opens the path for the king to penetrate along the Kd4-c3...

51. f4+ [51. ♖g2 51... ♗d5 52. ♖d8 ♖d4 Black is ready to push b2... 53. ♖b8 ♖c3—+ and b2 next because Rc8 is met by Bc4!]

51... ♖e4! Of course the most important is to get the bishop

to d5 and to play Kd4 afterwards... [51... ♖xf4 is a blunder, but it also leads to draw after 52. ♖d4+ ♖e3 53. ♖xc4 ♖d3=]

52. ♖g2 ♗d5 53. ♖d6 b2 54. ♖b6 ♖d3+ 55. ♖g3 ♖c3 55...Kc2 leads to the same. Black wants to play Bb3 in both cases, therefore White cannot win any more tempi, he must give up his rook right away.

56. ♖xb2 ♖xb2 57. ♖g4 ♖c3! Black cannot save his h-pawn, but the f7 remains on board. He quickly brings back his king to the kingside to conclude the win...

58. ♖h5 ♗d4 59. ♖xh6 ♖e4 60. ♖g5 f5 [White resigned in view of 60...f5 61.h4 ♗f7 62. ♖f6 ♗h5 63. ♖g5 ♗e8 setting White into zugzwang... 64.h5 ♗xh5 65. ♖xh5 ♖xf4—+] **0-1**

2nd Porticcio Open 2015(6.1),
2015.06.30

GM Arkadij Naiditsch
Best rating: 2737

White has been putting big pressure all game long, but Black managed to escape into this rook endgame a pawn down. If the black pawn from f5 was placed on g6, the position would just be a draw, but because of the weakness of Black's pawn structure, White's chances for a full point are quite realistic.

44...♖c4! A good move. Black forces the white rook to take a very passive position.

45.♖h6 There is no other way to save the h4 pawn. [The position after 45.♖f6 45...♖xh4 46.♖xf5 is just a theoretical draw.]

45...♔g7? Black does not feel the danger. [The idea to save the game is to not let White play f3. 45...♖f4! 46.♔g2 (46.♔f1 46...♔g7 Black just keeps on waiting. 47.♔e2 ♖e4+ 48.♔f3 Now that there is no more f3 threat, Black continues keeping the rook on the 4th rank. 48...♖g4 and White can't improve his

position.) 46...♖g4+! Not giving White a chance of playing f3 again. 47.♔f3 ♖c4 48.♔g3

48...♖g4+! 49.♔h3 ♖f4 and so on. The position is a draw.]

46.f3! Of course Etienne doesn't miss his chance! Now White just wants to bring his king to g3 to free the rook from h6.

46...♖c2 [Black is also losing after 46...f6 47.♖xf6 ♖xh4 48.♖xf5 ♔g6 49.♖d5]

47.♖f6 Forcing the black rook to leave the 2nd rank.

47...♖c4 48.h5 and the white pawns keep on moving.

48...♖c5 [48...f4 doesn't help. 49.h6+ ♔g8 50.♖f5! Defending against Rc5. Now all White needs to do is to play Kg2-Kh3-Kg4 and it is game over.]

49.h6+ ♔g8 50.f4 White is careful until the very end! [Of course not 50.♔g2? 50...f4! and suddenly there is no way to defend the g5 pawn and the position is a draw!]

50...♖a5 Black can't do anything but to keep on waiting.

51.♔f2 ♜b5 52.♔g3 The white king is going to h5.

52...♖a5 53.♔h4 ♜b5 54.♔h5 ♖a5 and here comes the last stage of the winning plan:

55.h7+! White doesn't exchange his pawns, which would be bad, but enters the g6 square with his king!

55...♔xh7 56.♖xf7+ ♔g8 57.♔g6 The game is totally over!

57...♖a6+ 58.♖f6 There is no way for Black to save the f5 pawn.

58...♖a7

59.♖c6 We just saw perfect play from White in this not so simple rook endgame and once again what a great example on how complicated rook endgames are, where a small detail like the position of a pawn on f2 or f3 can decide about the outcome of the game. **1-0**

Golden knowledge. The famous rook trick

GM Adrian Mikhachishin
Best rating: 2551

Rook endgames are most common in chess and every player has to know theoretical basic positions as well as typical plans. In rook endings there are quite a few additional special tactical maneuvers which are frequently misplayed. But we study not just on great examples. Mistakes are extremely instructive too and even the world's greatest and strongest grandmasters are not immune to them.

I) Typical rook tactics

(15) Vyzmanavin, Alexey - Lerner, Konstantin Z

URS-ch51, 1984

74. ♖c2 ♜a3 75. ♖d2?? [Incredible, but it was necessary to go back here! 75. ♖b2= 75... ♜g3 76. ♖c2 ♖d5 77. ♖d2 ♜a3 78. ♖e2 h2 79. ♖f2]

75...h2 76. ♖e2 ♜a1! Forcing the white rook to come to the same rank as the king.

77. ♜xh2 ♜a2+ 0-1

(16) Varga, Zoltan - Groetz, Harald

Austria, 2007

It is very strange that classical knowledge from great players is not studied by all others!

77... ♜b3+ 78. ♖e2?? It is incredible that an experienced GM made such a mistake against a much weaker player! [There were two easy drawish options 78. ♖g2 ; 78. ♖f2 78... ♜h3 79. ♖g2]

78... ♜h3 79. ♖d2 ♜h1 80. ♜xa2 ♜h2+ 0-1

(17) Noritsyn, N. - Babula, V.

Khanty-Mansiysk RUS, 2010

57. ♖g2 ♜b3 58. ♖f2 ♜h3 59. ♖e2?? [Correct was 59. ♖g2 as in the first example 59... ♜b3 60. ♖f2 ♖b6 61. ♜a8 ♖b5 62. ♖e2 ♖b4 63. ♖d2 ♜b2+ 64. ♖c1 ♖b3 65. ♜b8+ ♖a2 66. ♜c8! transposing into a famous draw position.]

59...a2 60. ♖d2 ♜h1 0-1

(18) Fischer, R. - Benko, P.

New York, 1959

58... ♜a3+ [58... ♖d7 59. a7 ♖c7 (59... ♜a3+ 60. ♖b4 ♜a1 61. ♜g8 ♜xa7 62. ♜g7+) 60. ♜g7+]]

59. ♖b6 ♜b3+ 60. ♖c5 ♜a3 61. a7! ♖e6 [Trying to avoid our maneuver 61... ♖d7 62. ♜g8 ♜xa7 63. ♜g7+]]

62. ♜g7 ♜a1 63. ♖c6 ♜a2 64. ♖b7 ♜b2+ 65. ♖c8 ♜a2 66. ♖b8 ♜b2+ 67. ♜b7 ♜h2 68. a8=♜ ♜h8+ 69. ♖a7 1-0

(19) Zhao Xue - Stefanova, Antoaneta

4th WGP 2014, 2014.04.11

With the modern time control of 30 seconds increment big mistakes in the endgames are quite usual.

64. ♜a6 ♜f7+ 65. ♖g6 ♜f1 66. ♜a7+ ♖f8?? [The simple way to draw was 66... ♖e6 67. h6 ♜g1+ 68. ♖h7 ♜g2 69. ♜g7 ♜h2=]

67. ♜a8+ ♖e7 68. h6 ♜g1+ 69. ♖f5 ♜f1+ 70. ♖e5 ♜h1 71. h7! ♜xh7 72. ♜a7+ 1-0

(20) Glavina Rossi, P. - Oms Pallisse, J.

Zaragoza ESP, 2010

Sometimes the idea of this maneuver is conducted on an open file after a few pawn sacrifices.

36.g4+! hxg4 37.fxg4+ ♔xg4 38.h5! ♔g5 39.hxg6 1-0

(21) Shirov, A. - Kramnik, V.

Beograd, 1999

59.♖a8 [Shirov could immediately play 59.b6 59...♖a5+ (59...cxb6 60.a7; 59...c6+ 60.♔e5 ♖a5+ 61.♔f6 ♖xa6 62.b7) 60.♔c4 ♖a4+ 61.♔b5]

59...♖a1 [59...h5 did not help. 60.a7 h4 61.b6]

60.a7 ♖d1+ 61.♔e4 ♖e1+ 62.♔f3 ♖a1 63.b6! Finally!

63...cxb6 64.♖h8 1-0

(22) Martinovic, Sl - Dumpor, A.

Novi Becej, 1986

1...g4! 2.hxg4 Black's idea was to take on f2, then play h4- h3 and after the capture opening the second rank and then play Rh1, completing the maneuver.

2...h3! 3.gxh3! exf2 Mission completed!

4.♖b7+ [4.♔xf2 4...♖h1]

4...♔f6 5.♖b6+ ♔e5 6.♖b5+ ♔d4 7.♔xf2 ♖h1 8.♔g3 b1=♔ 9.♖xb1 ♖xb1 10.♔f4 ♔d5 11.h4 ♖f1+ 12.♔g5 ♔e6 13.♔g6 ♖f6+ [A bit easier win was after 13...♖f4]

14.♔g7 ♖f7+ 15.♔g8 ♖a7! 0-1

(23) Stohl, I. - Korchnoi, V.

Tilburg, 1993

80...♙xf7 [Much more stubborn was 80...♖d8 81.♖h7 ♙f6 82.a7 ♙g6 83.f8=♚! ♖xf8 84.♖b7 ♖a8 85.♙d2 ♙f6 86.♙c3 ♙e6 87.♙c4 ♙d6 88.♙b5+-]

81.♖h8! +- [81.a7? 81...♖d8=]

81...♙g7 [81...♖a3 82.a7 ♖xa7 83.♖h7+]

82.a7 ♙xh8 83.a8=♚+ ♙g7 84.♚b7+ ♙f8 85.♚b4+! ♙g7 86.♚g4+ ♙f6 87.♚f4+ ♙g7 88.♚g5+ ♙h8 89.♚h6+ ♙g8 90.♚g6+ ♙h8 91.♚xd3 ♙g7 92.♚d6 ♙h8 93.♙e2 ♙g7 94.♚e6 ♙h8 95.♙f3 ♙g7 96.♙f4 ♙h8 97.♙g5 ♙g7 98.♚e7+ 1-0

(24) Polugaevsky, L. - Parma, B.

Soviet Union, 1965

Sometimes even on the top level the tragedies and comedies are happening. White's plan is to come to the classical position after opening the seventh rank.

60.a6 ♖a4 61.♖a8+ ♙f7 62.a7 ♖a5 63.h6 and Black resigned as he just saw the forced capture on h6 and the rook check. But in chess capture is not obligatory!!

63...♙g6! [63...gxh6 64.♖h8]

64.♙d4 ♙h7!! and Black could achieve a draw! **1-0**

(25) Bernstein, Ossip - Smyslov, Vassily

Groningen, 1946

59...b2?? Here a young future World champion tries to immediately conduct the maneuver but he falls into a stalemate! [Easy win was after 59...♙e4 60.♖b4+ ♙d5 61.♖xf4 ♖h1 (61...b2 62.♖f1 ♙c4 63.♙d2 ♙b3+-) 62.♖b4 b2+-] **60.♖xb2! ♙g4** [60...♖h2+ 61.♙f3 ♖xb2= Stalemate]

61.♙f1 1/2-1/2

(26) Gunina, Valentina - Ziaziulkina, Nastassia

Rijeka, 2010

Black didn't study her classics obviously!

74...♖h1?? [It was necessary to know Smyslov's mistake we saw earlier! 74...♕e5 75.♖a8 f3]

75.♖xa2! ♖h2+ 76.♕f3 ♖h3+ [Just now Black saw the stalemate after 76...♖xa2]

77.♕g2 ♕g4 78.♖a8 ♖b3 79.♖g8+ ♕f5 80.♖f8+ ♕e4 81.♖e8+ ♕d4 82.♕f2 ♖e3 83.♖d8+ ♕e4 84.♖e8+ ♕d4 1/2-1/2

(27) Volkevich - Fishbein

Moscow, 1958

1...fxg3 2.hxg3?? White intended to win by moving the f-pawn forward but overlooked simple tactics! [Winning was 2.♕xg3 2...♕h7 3.h4! gxh4+ 4.♕h3 and just now is it possible to move the f-pawn to f6.]

2...g4+!! 3.fxg4 and a draw was agreed as White can't reach a main theoretical position. Everybody has to remember that winning are f- and e-pawns, while g- and h-pawns are a draw! This is the rule to remember. **1/2-1/2**

(28) Evelev, A. - Mikljeva, A.

Moscow, 1993

In most practical situations the seventh rank is not available for checks. So it is necessary to open one if it is possible!

1.♕c5? [Chess is timing, as great Robert Fischer used to say. 1.g5! 1...♖a1 2.f5! gxf5 3.g6 sacrificing two pawns to clear the seventh rank! 3...♕f6 4.gxf7 ♕xf7 5.♖h8]

1...♕f6! If the king will be transferred to g7 then our maneuver here is not possible.

2.♕b6 ♖b2+ 3.♕c7 ♖c2+ 4.♕d7 ♖a2 1/2-1/2

(29) Vistaneckis, I. - Sardarov, A.

USSR, 1961

To open the seventh rank now it is necessary to sacrifice three pawns! Just one remark- with the king on g7 it does not work!

1.f5!! exf5 [1...gxf5 2.g6 fxg6 3.♖h8]

2.e6 ♖a4 3.exf7 ♔xf7 4.♖h8 1-0

(30) Kopajev=N

Shakhmaty v SSSR, 1949

The greatest rook endings specialist in history, Nikolay Kopaeve, made a nice study with this idea. He was the real

author of the classical Averbakh manual on rook endgames!

1.♔e7 ♖e3+ 2.♔f6 ♖f3+ 3.♔e6 ♖e3+ [3...♔c6 4.♖a6+! ♔c7 5.♖xa3]

4.♔d5! ♖f3 [Another defense did not work: 4...♖d3+ 5.♔e4 ♖d8 6.♔e5]

5.♖xa3 ♖f1 6.♖a8! ♖xf7 7.♖a7+ 1-0

(31) Vasiukov, Evgeni - Dzindzichashvili, Roman

Baku, 1972

Here this maneuver doesn't win directly but prepares transposing into a winning pawn endgame.

58.♖b6 ♖a2 59.h6 ♖h2 60.h7! ♔f7 61.♖b8 ♖xh7 62.♖b7+ ♔g6 63.♖xh7 ♔xh7 64.♔d2 The pawn ending is winning for White as the black king is too far.

64...♔g6 65.♔xd3 ♔f5 66.♔d4 ♔e6 67.♔c5 ♔d7 68.♔xb5 ♔c7 69.♔a6 1-0

(32) Giri, Anish - Ponomarev, Ruslan

Dortmund SuperGM 39th, 2011.07.28

Now here are a few examples from the practical use from modern players. The players know this maneuver and include it in their plans.

56. ♖f2 ♜a3 57. ♜a7 ♖f8 58. a5 ♖e8 59. a6 ♖f8 60. ♖e2 ♖e8
 [60... ♖g7 61. ♖d2 ♜a4 62. ♖c3 ♜xf4 63. ♜d7 ♜a4 64. a7+- - Black has no moves on the kingside and White's king goes forward.]

61. ♜a8+ ♖d7 62. a7 ♖c6 [Our maneuver was possible after 62... ♖e7 63. f5 gxf5 64. g6 ♖f6 65. gxf7 ♖xf7 66. ♜h8]

63. ♜c8+ ♖b7 64. ♜f8 1-0

(33) Safarli, Eltaj - Nikolaidis, Ioannis

ETCC 2011

57. f4! From this move it is clear what position White is going to enter!

57... ♜d2 58. fxe5 hxe5 59. ♜b8 ♜d3 60. b4 ♜b3 61. b5 ♖f6 62. b6 ♖g6 63. f3! Preventing g5-g4 and after that White will play h3-h4.

63... ♖g7 64. b7 ♜b4 65. h4 g4 66. f4 1-0

(34) Stany, G. - Oleksienko, M.

5th Kolkata Open, 2012.12.13

46... g6 Black's plan is to open the second rank.

47. ♜b6 f5 48. ♜b5 fxe4 49. ♜xe5+ ♖f6 50. ♜b5 e3! 51. fxe3
 [51. ♜b8 51... exf2 52. ♖xf2 ♜h1]

51... ♜h1 0-1

(35) Peralta, Fe - Bukavshin, I.

XXVIII Festival des Jeux 2014, 2014.03.02

52.♖b8! White gets his rook to a8, moves his pawn to a7 and then creates a passed pawn on the f-file. [After 52.g4? 52...♖d3 53.a6 ♖a3! 54.♖b6 ♖xf3 55.♔xd2 ♖g3 Black should be OK.]

52...♖a4 53.♖a8 ♖a2 [Did not work 53...♖a1+ 54.♔xd2 ♖a2+ 55.♔c3 ♖xg2 56.♖g8+]]

54.g4 ♔g5 55.a6 ♔f4 [After 55...♔g6 56.a7 ♔g7 57.f4 ♔h7 White plays 58.f5 followed by g4-g5 and f5-f6.]

56.a7 ♔xf3 57.g5! fxg5 58.♖f8+ ♔g2 59.a8=♔+ ♖xa8 60.♖xa8 g4 61.♔xd2 g3 62.♔e2 ♔h1 63.♖a1+ 1-0

II) Exercises

(36) Smirin, Ilia - Kasparov, Garry

Yerevan, 1996

The World Champion conducts this maneuver easily and quickly:

39...♖a1! 40.♔xe2 a2 41.♔f2 e4 42.h4 e3+ 0-1

(37) Scheichel, Herbert - Sax, Gyula

WchT U26 prel-2 20th, 1974.07.17

59...a2! 60.♔d3 e2+! 61.♔xe2 ♖h1 62.♖xa2 ♖h2+ 0-1

(38) Radziejewicz, I. - Kadziolka, B.

Poland, 2004

1. ♖h7+? [Easily winning was the same trick: 1. ♖h8 1... ♖xb7 2. ♖h7+]

1... ♔d8 2. ♔d3 ♕xd4 3. b8=♚+ ♖xb8 4. ♔xd4 ♖b5

(39) Stevic, Hrvoje - Nishant, Malhotra

16th Dubai Open 2014, 2014.04.07

52. g4! hxg4 [Or 52... ♖a3+ 53. ♔c2 hxg4 54. ♔d2 ♖a4 55. h5+-]

53. ♔e2 ♖a2+ 54. ♔f1 ♖a1+ 55. ♔g2 ♖a3 56. h5

White threatens to play h5-h6 and after ...gxh6, Rh8! Rxa7, Rh7+ is winning. Black has no defense simply.

56... ♖a2+ 57. ♔g3 ♖a3+ 58. ♔xg4 ♖a1 59. h6 1-0

Chess and the City. A dangerous game

WGM Elisabeth Paetz
Best rating: 2493

This being a chess newsletter the reader may reasonably think the headline must refer to some brilliant tactical encounter, or to the time control of the recent Norway Chess... However I must disappoint you, today's topic is politics. Well, more specifically the impact of politics on chess, and namely the cancellation of one of my favorite yearly events, the Greek Chess League. As the most informed readers should already have guessed, the League was cancelled due to the turmoil prompted by the decision to hold a referendum on Sunday... The reader may of course object that the tournament was cancelled due to the hard stance of the IMF, or due to Germany or...well whatever, the League was cancelled and instead of writing to you from the beach in Patras, I'm roasting in Rome with 35 degrees and no air conditioning.

Well, before getting angry letters to the Editor pointing out the hardship of the Greek pensioners, or the historical moment that the whole of Europe is facing, I must state that I am aware of these problems. However, it is my belief that to understand such historical events one must start from an individual, personal, perspective which allows to avoid the all so common mistake to reduce them to numbers or to

some generic tearful description. It is clear to me, from my experiences in the League, that most Greek people are cheerful, lively and hospitable, especially towards foreign visitors and that they are far away from the descriptions of lazy welfare stealers that some press (alas, also German press) has tried to portray. I will never forget my first U-18 World Championship title, which I won in Greece in 2002, and just for this, maybe selfish but all too human memory, I feel very attached to this country. All the same, I don't think that the majority of Greeks perceive the Germans as panzer driving mustached financial vampires...

All in all, I hope that soon the only battles in Greece will be fought on the chess board, and that the political and social situation will return to normal. However, there are some reasons to think that unfortunately the worst has not yet come for Greece. Thus, we as chess players can only hope that the upcoming World Youth Chess Championship, scheduled for October in Porto Carras will take place normally and contribute to set a positive example for all, this will be one of the best chances to teach the outer world that Gens Una Sumus.

Best rating: 2655

1.d4 ♘f6 **2.♟f3** e6 **3.♙g5** [3.g3 3...b5!?!]

3...c5! I like this move. Black immediately fights for the center.

4.e3 [4.c3]

4...♞b6 A development move with tempo.

5.♞c1 [5.♟bd2!? This pawn sacrifice deserves attention.
5...♞xb2 6.♙d3 d5 7.c4 and White has compensation thanks to his better development.]

5...♟c6 **6.c3** ♟e4 **7.♙h4** [7.♙f4]

7...d5 **8.♟bd2**

8...f5!? An important moment in the game. The f7-f5 move supports the knight on e4 but on the other hand the black structure is weaker now. The alternative was [8...♟xd2 9.♞xd2 ♙d6 10.♙d3 O-O 11.♙g3 ♞d8 (11...♙xg3?! gives White the opportunity to get an attack. 12.hxg3 h6 13.g4→) 12.O-O b6 Black's plan is Bb7-Qe7-e5, so White needs to play actively. 13.e4 ♙xg3 (13...cxd4 14.e5 dxc3 15.♞c2 ♙c5 16.♙h7+ ♟h8 17.♙d3 ♟b4 18.♞xc3 ♟xd3 19.♞xd3 a5 with a complex position.) 14.hxg3 cxd4 15.cxd4 dxe4 16.♙xe4 ♙b7 17.♞c2 ♟b4 (17...h6 18.♙xc6 ♞c8 19.♟e5 ♞xd4 20.♞fe1+-) 18.♙h7+ ♟h8 19.♞d2 ♟xh7 20.♞xb4 ♙xf3 21.gxf3 ♞d5 with good chances for Black to make a draw.; 8...♙d6?! 9.♟xe4 dxe4 10.♟d2 f5 11.♟c4 ♞c7 12.♟xd6+ ♞xd6 13.♙g3 ♞e7 14.♙e2 O-O 15.O-O e5 16.dxe5 ♟xe5 17.c4 with Qc3 next. White is clearly better because of the strong dark squared bishop.]

9.♟xe4?! is premature. White should have finished his development first. [9.♙d3 9...♙d6 10.♙g3 ♟xg3 11.hxg3 c4! (11...♞c7 12.dxc5 ♙xc5 13.c4↑ A typical idea.) 12.♙c2 ♞c7 Black takes space and now White is not able to destroy Black's structure because after 13.b3 b5 14.a4 Black has 14...b4!; 9.♙e2 9...♙d6 10.O-O O-O 11.dxc5 ♙xc5 12.♟b3 (12.c4 12...♙xe3!) 12...♙d6 13.c4! and White is slightly better here.]

9...fxe4 **10.♟d2 cxd4** **11.exd4** [11.cxd4 11...♙d7 gives Black a strong initiative on the queenside.]

11...♙d6 **12.♙e2** [12.f3 The idea of this move is to improve the white pieces a bit. 12...O-O! My intuition tells me that development should be decisive. (12...exf3 is worse. 13.♟xf3 O-O 14.♙f2! preventing e5. 14...♞c7 15.♞d2 e5 16.dxe5 ♟xe5 17.♞xd5+ ♟h8 18.O-O-O±) 13.fxe4

13...e5! 14.exd5 exd4 15.dxc6 ♖g4→and the white king is in trouble.]

12...O-O 13.O-O ♜f4 14.♜g3 A logical exchange for White. [14.♞c2? 14...♞c7! with the double threats Bxh2 and Nxd4.]

14...e5 15.dxe5

15...♜xg3! An important move order. Less accurate was [15...♜xe5 16.♜xf4 ♜xf4 17.♜c4 ♞f6 18.♜xe5 ♞xe5 19.♞e3 and without the knights Black has no attack. White can slowly prepare pressure against the d5 pawn, for example with Rd1-Rd2-Bd1-Bb3 etc.]

16.hxg3 ♜xe5 [16...e3 17.♜f3 exf2+ 18.♞xf2 ♜xe5 19.♜d4 ♞xf2 20.♞xf2 with an equal position.]

17.♜b3

17...♜g4! Black is going to win the important g4 square for his knight.

18.♞d1 ♜xe2 19.♞xe2 ♞g6! Black launches a decisive attack!

20.♜d4 ♞ae8! Bringing the last piece into play and not allowing White to play f3. [20...♜g4 was also good enough. 21.f3 exf3 22.♜xf3 (22.gxf3 22...♜e3! 23.♞xe3 ♞xg3+ 24.♞h1 ♞f4—; 22.♞xf3 22...♞fe8!—) 22...♞ae8 23.♞d2 ♜e3 24.♞f2 (24.♞fe1 24...♞xf3—) 24...♞xg3 25.♞e1

25...♜xg2! 26.♞xe8 ♜h4+ 27.♞h1 ♞xe8 28.♞xd5+ ♞h8 29.♞f7 ♞h3+ 30.♞g1 ♜xf3+ 31.♞xf3 ♞c8±]

21.♞b5 [21.♜c2 with the idea of playing 22.Ne3 after 21...Ng4,

but Black has other options to improve his position, for example 21...♖f5! with the idea Rh5-Qh6.]

21...♘g4! 22.f3 ♘e3 23.g4 a6!? We will see the point of this move a bit later. [23...♗xf1 24.♔xd5+ ♕h8 25.♖xf1 exf3 26.gxf3 and thanks to strong knight on d4 White can continue the fight but the position is very hard for him.; 23...h5!?→]

24.♔xb7 exf3 25.♖xf3 ♖xf3 26.gxf3 [26.♗xf3 26...♔xg4 27.♗e1 ♖f8—+]

26...♔d6! —+ Now we understand why Black played 23...a6, the rook is not hanging.

27.♗e2 ♗c4 28.♖e1

28...♔c5+?! The first mistake. Black could simply win after [28...♗e5 29.♗d4 (29.♕g2 29...♗d3—+; 29.♖f1 29...♗d3—+) 29...♗xf3+ 30.♗xf3 ♔g3+—+]

29.♕g2 ♗e3+? looks logical but it is clear that Black overlooked counterplay. The best move in this position was [29...♔d6! 30.♔b4 (30.♔b3 30...♖b8) 30...♗e3+ 31.♕g1 ♔xb4 32.cxb4 ♗c2 33.♕f2 ♗xe1 34.♕xe1 ♖e3 35.♕f2 ♖d3—+]

30.♕h3 ♗c2 [30...♖f8 31.♗d4 ♔d6 32.♖xe3 ♔h6+ 33.♕g2 ♔xe3 34.♔xd5+ ♕h8∞]

31.♖d1 ♖xe2 32.♖xd5↔ and unexpectedly because of the

weak back rank White gets enough counterplay for a draw.

32...♔f8 33.♖f5!

33...♔d8?? An amazing blunder. Black should not lose in one move but play [33...♔e7 34.♔d5+ ♔e6 35.♔d8+ ♔e8 36.♔d5+ repeating moves or 36...♕h8 37.♔d6 ♖e7 (37...♕g8 38.♔d5=) 38.♔f4 ♕g8 39.♔c4+ ♖f7 (39...♕h8 40.♔f4=) 40.♖xf7 ♔xf7 41.♔c8+ ♔f8 42.♔e6+ ♕h8 43.♔e2∞]

34.♔f7+ with mate on f8 to follow. **1-0**

Editorial Preface

And the winner of Dortmunder Schachtage is once again Caruana. The World Nr2 had a bad start with only 0.5/2 but he won the last 5 games and took clear first place with 5.5/7. Wesley So and Nisipeanu finished 2nd and 3rd, both with 4/7.

A very interesting event is still under way at the Chinese Island Hainan, with the best Chinese players participating. We saw many exciting, fighting and fantastic games. Wang Yue leads with a fantastic score of 6.5/8, followed by Ni Hua with 5.5/8 and in 3rd position we find Ding Liren with 5/8. There is still one round to be played.

Another top event is the Dutch Championship with Anish Giri, who started with 2/3.

The 43rd Annual World Open also saw the participation of a lot of Top GMs. The first place was shared by 8 players who all finished on 7/9. Best on tiebreak were Rauf Mamedov, Ilja Smirin and Alexander Ipatov.

That's all for this week's events and we can already look forward to the upcoming Super tournament in Biel which starts on the 20th July.

Until then, enjoy your current issue of Top GMs Secrets Nr176.

Two best games of the past week

(1) Wei, Yi (2724)

- Bruzon Batista, Lazaro (2669)

[B40]

6th Hainan Danzhou GM(2.4),
2015.07.03GM Csaba Balogh
Best rating: 2672

An immortal game was played by the 16-year old Chinese talent, Wei Yi! He crushes his Cuban opponent with some beautiful and shocking sacrifices.

1.e4 c5 2.♘f3 e6 3.♘c3 White chooses this unusual move order before playing the main 3.d4 to avoid some theoretical lines.

3...a6 4.♙e2 ♘c6 Black is ready to play Nd4 in case of 5.0-0, therefore there is no time to waste on opening the center.

5.d4 cxd4 6.♘xd4 ♚c7 We have transposed now to the Sicilian Taimanov variation and soon it turns to the Sheveningen variation...

7.0-0 ♘f6 8.♙e3 ♙e7 9.f4 d6 10.♙h1 0-0 The starting position of the Sheveningen. The old main line used to be the move 11.Qe1, which happened in the game. After some time the 11.a4 alternative has become the most common line and now in the last years the fashion has come back to the old move thanks to the computers, which found some very interesting ideas for White.

11.♙e1 White drops his queen to the kingside to obtain different kind of attacking potentials.

11...♘xd4 12.♙xd4 b5 The point of 11.a4 would have been to prevent this typical idea.

13.♙g3 ♙b7 [On the direct 13...b4 14.e5! is very strong 14...dxe5 15.♙xe5 and the knight is coming to e4!]

14.a3 Black has various of options here. The latest development of the theory gives a first sight mysterious plan and Bruzon follows it...

14...♖ad8 15.♖ae1 White brings all his pieces to the game.

15...♖d7 16.♙d3 ♙d8 A sideline. Black leaves from the e5 dxe5 Bxe5 tempo.

[The most popular move is 16...♖e8 preparing for a

counterplay with e5, however the new idea of the computer 17.a4! seems to create some difficulties for Black. Both players were definitely familiar with the new ideas and Bruzon decided to deviate from this line.]

17. ♖h3! Using the fact, that the queen has gone from c7, when Black could solve his problems with e5 (in the 16...Re8 line)! White has created the threat of e5 dxe5 fxe5 Rxd4 exf6 and Black faces problems on h7 square. Therefore he must ensure the safety of his h7 pawn.

17...g6 18.f5! The standard drawback of the g6 move. White opens the f-file now. With the pawn on g7 this move is usually not dangerous because of the central break with e5 Be3 and d5, but now Bh6 or Bg5 are much stronger.

18...e5 19. ♕e3 ♖e8 We are still following some games, but here comes the novelty. Despite all this could be known from practical games, I believe that Wei Yi finds all the forthcoming brilliant ideas over the board...It is not a home preparation.

20.fxg6 hxg6

21. ♘d5! Wei Yi starts the firework with this move! He has no retreat after this sacrifice, otherwise he is just losing material. He obviously could not calculate all the lines until the end - as it is impossible -, but he had to have the intuition, that he has enough resources to finish the attack after the black king

goes towards the center.

21... ♘xd5 [21... ♕xd5 22.exd5 ♘xd5 is much worse. The bishop on d5 could be a much better defender as it protects the f7. Now the same tactics works quite smoothly 23. ♖xf7! ♕xf7 24. ♖h7+ ♖e6 25. ♕xg6! White creates many different mate threats. The most important ones are Qf7 and Bf5 followed by Qg6 mate. Black should try to cover the squares on the f-file with (25. ♖xg6+? comes to the mind at first to continue the attack with check, but Black is safe after 25... ♘f6!) 25... ♖f8 but it does not help in view of 26. ♖h3+! ♕f6 27. ♕e4+- and Black has no defense against the mates. Qh6, Rf1 or Qf5-Qg6-Qh7 is a forced mate.]

22. ♖xf7!! The point of the previous move! White has deflected the knight from f6 in order to start the hunt of the black king! The only thing which makes the sacrifice easier to execute is the fact, that White always has a draw with perpetual check at his disposal, therefore White can go ahead, calculate the lines when they appear on the board and in the worst case if he does not see anything just make a draw...but of course, the main goal is to mate the black king.

22... ♕xf7 23. ♖h7+ ♖e6 Here is a moment when White could force a draw with 24.Qh3, but Wei Yi thinks much deeper and continues searching for mate.

24.exd5+! White gains back some material and eliminates the knight which could have become an important defender if it returns to f6.

24...♔xd5 Black tries to run away with his king to c6-c7. [24...♙xd5 is similar to the 21...Bxd5 line. White must be precise with 25.♙xg6! (25.♚xg6+? is not enough again 25...♙f6 26.♙f5+ ♔e7 and Black saves himself.) 25...♙xg2+ (25...♚f8 allows forced mate after 26.♚h3+ ♔f6 27.♚f1+ ♔xg6 28.♚h6#) 26.♔xg2 d5 Black opens a free way for his king towards the queenside, but he already gave back too much material and he loses even more after 27.♚f7+ ♔d6 28.♚xe8+--]

25.♙e4+!! Another brilliant sacrifice! White prevents the hide of the black king to c6-c7 and lures it further more to his own camp to catch it with his remaining pieces.

25...♔xe4 Black has no choice, he must continue his journey. [25...♔c4 loses quickly to 26.♚f7+ d5 27.♚f1#]

26.♚f7!! What an amazing follow up! After sacrificing many pieces, White comes up with a silent move! The point is to stop the black king running back the d5-c6-c7 and creates different kind of mate in one threats, such as Qf3 or any bishop move with discovered mate along the g1-a7 diagonal. [However it was even more forcing to play 26.c4!! a computer move, which is extremely hard to find over the board. It has the same idea as the game, White prevents the Kd5-c6-c7 defending plan and his has a special hidden point, which can be seen if Black takes on c4. The point if 26. c4 can be seen after 26...bxc4 (26...♔d3 Black tries to gain some benefits of the c4 move and makes an attempt to hide his king. However it is not succesful. 27.♚xg6+! ♙e4 (27...e4

28.♚g4! White is a rook and a bishop down, but the most important factor is the king on d3, therefore he must

focus on creating new and more threatening mate threats in each move... 28...♔xc4 29.♖c1+ ♔b3 (29...♔d5 30.♕f5#) 30.♕d1+ ♔xb2 31.♖b1+ ♔xa3 32.♕b3#; 27...♔xc4 28.♖c1+ ♔d5 29.♖d1+ ♔c6 30.♕c2#!)

28.♖d1+! ♔c2 29.♕xe4+ White sacrifices even his rook and mates with only two of his pieces. The black ones are still in their initial position and they cannot take part in the defense. 29...♔xd1 30.♕d3+ ♔e1 31.♕d2+ ♔f1 32.♕d1#) 27.♕xg6+ ♔d5 28.♕f7+! ♔e4 (And now after 28...♔c6 29.♕xc4#! is mate, which would not be so with the black pawn on b5! This is the reason of pushing 26.c4.) 29.♕xc4+ ♔f5 30.♖f1+ ♔g6 31.♕f7#; 26.♕xg6+? is too slow, Black runs away with 26...♔d5 27.♕f7+ ♔c6—+; White could win the queen with 26.♕b6+? 26...♔d5 27.♕xd8 ♖exd8—+ but Black already got too much material, after he hides his king in the next 2 moves he is already winning.]

26...♕f6 Only move! [26...♖f8 prevents Qf3, but allows all the bishop moves, for instance 27.♕g1#]

27.♕d2+ ♔d4 28.♕e3+ ♔e4 White again has a draw by perpetual check, but Wei Yi finds a subtle way to play for more!

29.♕b3!! Keeping the cold-blooded style. Black has closed the f-file, successfully excluded the queen from the attack, but as it is the longest ranged piece, it can quickly join back to the haunt of the black king. The new mate in one threat is Qd3. Black has only one move to avoid it.

29...♔f5 30.♖f1+! Of course, White's only chance is to keep the king outside from the camp and try to catch it while it is running through the board.

30...♔g4

31.♕d3! We are already used to this kind of silent moves. Despite the huge material disadvantage, White is not in rush to finish the game, because Black does not have any counterplay, he can only hope for consolidating, but for this he would need much better placed pieces.

31...♙xg2+ Black decides to give back some material and try to bring the queen to the defend along the long diagonal with tempo. [31...♖h5 loses to 32.♙e2+ ♖h4 33.♖f3!! ♙xf3 34.♙xf3+- and Black is unable to defend the mate in one with Qh3!; 31...♖g7 also loses to 32.♙e2+ ♖h4

33.h3!! White always creates new concrete threats. Black has to defend against Qd7 now. 33...♙d7 34.♖h2! Another subtle move! Black has only one move to avoid getting mated with g3! 34...♙xg2 35.♙xg2 White does not have a concrete threat, but still Black has no defense. The f6 is hanging followed by mate on g5 and one possible finish of the game could be 35...♙d8 36.♙f2+ ♖h5 37.♙f3+ ♖h4 38.♖g1+- and Bf2 or Rg4 next wins.]

32.♖xg2 ♙a8+ 33.♖g1 ♙g5 Bruzon continues defend stubbornly, but it does not help this time!

34.♙e2+! [It was still possible to go wrong with the logical 34.♙xg6 Black holds after 34...♖g8!]

34...♖h4 35.♙f2+ ♖h3

36.♙e1! A final blow and a last subtle move! White opens the f-rank in order to allow his rook joining to the mating attack. Rf3 is the threat! [Black resigned in view of 36.♙e1! 36...♖f8 (36...♙a7+ 37.♖h1 ♙a8+ 38.♖f3+ ♖g4 39.♙g2+ ♖h5 40.♖h3+-; 36...e4 defends Rf3, but closes the long diagonal 37.♙g2#) 37.♖xf8 ♙xf8 38.♙g2# What an amazing game by the 16-year old Chinese super talent, Wei Yi!] **1-0**

**(2) Nisipeanu, Liviu-Dieter (2654)
- Caruana, Fabiano (2805) [C52]**

43rd GM 2015(7.1),
2015.07.05

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of Dortmund and Caruana is leading the event with a half point lead over Nisipeanu. Both players were a bit lucky throughout the tournament and both players are very fighting ones. We should not forget that Livu-Dieter, who is now playing for Germany, was European Individual Champion and is capable of beating higher rating players, especially with the white pieces. In the current game, I guess Nisipeanu did not know the line Caruana chose too well. Black equalized quickly, then outplayed him in the endgame and finished the game with a great tactical combination which gave Caruana a totally deserved tournament victory!

1.e4 Nisipeanu plays a lot of different lines in the opening.

1...e5 2.f3 c6 3.f4 And Italian game, which probably means that White was afraid of Caruana's Berlin...

3...f5 4.b4 is not played too often on the top level, but clearly deserves attention.

4...fxb4 5.c3 f5 is quite a rare reply. [Currently the main move is 5...f7]

6.d4 White is trying to open the position as much as possible and this is clearly the idea of the Evans Gambit!

6...d6 Black is trying to keep the e5 pawn alive.

7.f3 [Of course White can't win the piece by playing 7.d5 7...f7 8.f4+ because of 8...c6 and the queen on d8

protects the a5 bishop.]

7...f7 The f7 pawn needs to be protected.

8.dxe5

8...f6! A strong move! Black wants to play Na5 next and take the c4 bishop. [White would get a strong initiative after 8...f6 9.f6 dxe5 10.O-O followed by Rd1 next.]

9.a4 is probably not the best. White's idea is to put pressure on the b6 bishop with the a5 threat somewhere, but it is just a bit slow. [9.f6? looks more interesting. 9...dxe5 (9...f6 10.f7 cxc4 11.fxc4 and White gets some play thanks to his great knight on c4.) 10.f5 with a very unclear position.]

9...f5 Of course Black is going for the c4 bishop.

10.f7 cxc4 11.fxc4 f7 A very solid and good move. In case Black manages to finish his development White's position will simply be worse.

12.f3 Not the best move again. [Maybe White could have continued with 12.a5 12...f5 13.exd6 cxd6 14.f6 with the idea of playing Nb3 next. Of course Black has very comfortable play but the position is probably still around equal.]

12...O-O [Black could also have chosen to play 12...d5 13.exd5 (13.f7 13...f6 and the Nf4 move is a serious threat.)

13...♔xd5 and because of the control of the light squares, his position looks very nice.]

13.0-0 ♖e8 Caruana wants to play Ng6 next.

14.exd6 White is trying to win the d6 pawn, but it is harder than it seems...

14...cxd6 15.♖d1 The d6 pawn can't be protected, but Black has another idea:

15...♔c6! A strong move! Caruana feels that the endgame will be at least equal, not to say better for him...

16.♘bd2 [After 16.♔xc6 16...♘xc6 the d6 pawn still can't be taken because now Rxe4 would win the pawn back.]

16...♙e6! Caruana continues playing a perfect game and sacrifices the d6 pawn to get all his pieces into the game.

17.♔xc6 ♘xc6 18.♙xd6 ♖ad8 The black pieces are dominating the board!

19.♙b4 [19.♙a3 19...♖d3 and White will not be able to hold on for a long time on the d-file or not to lose the c3 pawn.; 19.e5 19...f6! and again the bishop pair will give Black better play, even being a pawn down...]

19...♖d3 Black just wants to double on the d-file.

20.a5 ♙c7

21.♘f1 Nisipeanu decides to give back the extra pawn. [In case White would have tried to hang on to the pawn with 21.♖db1 21...♙f4 22.♘f1 ♙c4 the domination of the black pieces would have made it very hard for White to play on.]

21...♖xd1 22.♖xd1 ♘xa5 So Black has won the pawn back and still has the bishop pair, which means that he is clearly better.

23.♘d4 ♘c4 A solid move. [Black could also have continued with 23...♙d7 24.♘f5 (Of course White can't win a piece by playing 24.♙xa5 24...♙xa5 25.♘b3 ♙g4 26.f3 ♙b6+ because Black is almost winning with the bishop pair and an extra pawn.) 24...♙xf5 25.exf5 ♘c4 26.♖d7 ♖c8 with a clearly better position for Black.]

24.♘xe6 ♖xe6 Black kept his advantage because of the a-pawn, which is ready to move forward.

25.♖d7 ♖c6 Black keeps solid and in case White doesn't do anything special the a5 move will be almost deadly.

26. ♖g3

26...g6 Another very good move by Black, cutting the options of the white knight. [26...a5? would have been a huge mistake since after 27. ♖f5! White is just in time! 27...axb4 28. ♖e7+ ♕f8 29. ♖xc6 bxc6 30. ♖xc7 bxc3 31. ♖xc6 c2 32. ♖xc4 and White is in time to stop the c-pawn.]

27. ♖e2 The white knight is going to d4, but it doesn't help any longer...

27...a5! A great finish to a perfect game by Caruana!

28. ♖d4 [White could have fought longer after 28. ♖e7 28...a4 29. ♖d4 ♖e5 30. ♖xc6 ♖xd7 but the a-pawn gives Black a huge advantage.]

28...axb4 This is a move that Caruana had planned before playing a5. White cannot catch the b-pawn!

29. ♖xc6 b3

30. ♖xc7 [30. ♖e7+ 30... ♕f8 31. ♖xc7 ♖d6 and there is no way to stop Black from playing b2-b1Q.]

30...♖d6 and yet again White is not in time to stop the b-pawn from promoting. A really great win by Caruana in such an important game for the first place! **0-1**

The K-Files.

French 7...cxd4 & Qb6

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) French 7...cxd4 Qb6 [C11]

We are going to have a look at the French Poisoned Pawn line.

1.e4 e6 2.d4 d5 3.♘c3 ♗f6 4.e5 ♘fd7 5.f4 c5 6.♗f3 ♘c6 7.♕e3 This is one of the most important positions for the theory of the French Defense. Of course both sides have enough possibilities to avoid it during previous moves but still the assessment of this line has a critical value. Black has some playable alternatives now (first of all 7...a6 and 7...Be7) but they all seem to lead to rather quiet play with slightly better chances for White. Here we will look at the most direct approach.

7...cxd4 [7...♖b6 8.♗a4 ♖a5+ 9.c3 is a completely different story of course.; 7...♕e7 ; 7...a6]

8.♗xd4 ♖b6!? That's it. This active and provocative move leads to the French Poisoned Pawn line. Its first peak of popularity happened between 1987 and 1995 when it was used by Korchnoi, Ehlvest, Dolmatov, Dreev etc. But then as it happens quite often it disappeared from grandmaster practice with the assessment "too risky". However, for today's

opening theory this assessment means almost nothing and there is no surprise that after Nakamura played it twice in 2011 the variation returned under the spotlight and many new details were found since that moment. Black's idea is fairly simple: he attacks the pawn and increases the pressure on the important point d4. In fact, if White wants to fight for an advantage he has to sacrifice the pawn and take some risks as well. But first we will look at what happens if White doesn't feel this way.

9.a3 White protects the pawn b2 indirectly. This trick is well-known in different opening lines, the first one which comes to mind is the Najdorf Poisoned Pawn. [

a) **9.♕b5?!** is just dubious. True, White played a developing move and protected the pawn but all this means nothing compared to the fact that after the natural answer 9...a6 White will have to give the bishop pair and improve the opponent's pawn structure. 10.♕xc6 (10.♕e2? 10...♖xb2+; 10.♗a4 10...♖a5+ 11.♕d2 ♖c7 12.♕xc6 bxc6 13.O-O c5 14.♗f3 ♖c6 15.c3 a5=+ Thiede - Zinn, Schkopau 1955) 10...bxc6 11.♗a4 (11.♖c1? 11...c5 12.♗b3 d4 13.♗a4 ♖c6--+ Darini - Khodadadi, Kerman 2013) 11...♖a5+ 12.c3 c5 13.♗f3 ♕b7 As it often happens in this line the white knight on a4 is clearly misplaced. 14.♗xc5 This exchange operation is the lesser evil but it doesn't solve all the problems. (14.O-O 14...♕c6 15.b3 ♕xa4 16.bxa4 ♖xc3+

Fecko - Panko, Slovakia 2009) 14...♖xc5 15.b4 ♖a3 16.bxc5 ♕xc5 17.♖d2 ♕xe3 18.♖xe3 ♖c8 19.♖c1 ♕c6=+ White's pawn structure is in ruins. The strong knight on d4 gives him good drawing chances but definitely not more.;

b) 9.♖a4 In a certain sense this move is just a draw offer. 9...♖a5+ 10.♖c3 Now Black can simply repeat the position but if he's not satisfied with a draw and (or) doesn't want to give the opponent a second chance there is a playable alternative (although in my opinion it is not enough to equalize completely): (10.c3?! is not a good idea because after 10...♖xd4 White loses at least a pawn for no real compensation. 11.♕xd4 creates more problems but still doesn't help: (11.b4?! 11...♕xb4 12.♕xd4 (12.cxb4 12...♖xb4+ 13.♕d2 ♖e7 14.♕d3 (14.♖b1 14...♖c6 15.♕b5 O-O ♖ Nassar - Oknayan, Beirut 2014; 14.a3 14...♖f5 15.g3 a5 16.♕d3 Lengyel - Kovacs, Hungary 2004 16...b6 ♖) 14...♖c6 15.O-O b6!? (There is no reason to exchange the Na4: 15...♖c5?! 16.♖xc5 ♖xc5+ 17.♖h1 ♕d7 18.♖c1 ♖Short - Korchnoi, Brussels (blitz) 1987) 16.♖g4 f5 17.♖h5+ ♖f7 18.♖h4 O-O ♖ Rosic - Nikolenko, Pula 1990) 12...♕e7 13.♖b1 (13.♕d3 13...b5 14.♖b2 ♕c5 15.O-O ♖xc3 ♖ Heymann - Stangl, Germany 1999; 13.♖b3 13...b6 14.♖b5 ♖xb5 15.♕xb5 O-O 16.O-O Lebrun - Chaudagne, France 1999 16...♖b8! ♖) 13...O-O 14.♕d3 (Essler - Boehm, Oberhof 2010) and now the typical maneuver 14...♖b8!? 15.O-O ♕d7 16.♖b2 ♖c6 ♖ underlines the fact that there is no compensation at all.) 11...b5 12.♖c5 (12.b4 12...♖xa4+; 12.♕xb5 12...♖xb5+; 12.♕d3 12...bxa4+;) 12...♖xc5!? (As we could see in above-mentioned game Short - Korchnoi the dark-squared bishop is an important piece here. 12...♕xc5 13.b4 ♕xb4 14.cxb4 ♖xb4+ 15.♖d2 ♖xd2+ 16.♖xd2 ♖Domankusic - Opacak, Croatia 2005) 13.b4 ♖c7! (There is no reason to be greedy: 13...♖b6?! 14.a4 bxa4 15.bxc5 ♕xc5 16.♖b1! ♖c7 17.♕b5+ ♕d7 18.♕xd7+

♖xd7 19.♖xa4+ ♖Moller - Thomsen, Copenhagen 2000) 14.♕xc5 (14.bxc5 K. Bodnaruk - D. Mihailov, St Petersburg 2014 14...♕d7 ♖) 14...♕xc5 15.♕xb5+ ♖e7 16.bxc5 ♖xc5=+ Hashemi - Karimi, Rasht 2013 White managed to hold the material balance but clearly not for long.) 10...♕b4 (10...♖b6 = 8...Qb6) 11.♖b3!? (11.♖b5?! 11...a6 12.♖d6+ ♕xd6 13.exd6 ♖b4 ♖ Heinicke - Grube, Dortmund 2001; 11.♖e2 11...O-O 12.a3 ♕xc3+ 13.♖xc3 f6! 14.exf6 ♖xf6! 15.♕e2 ♖? A. Artemiyev - Rybakov, Zhukovsky 2007 15...d4! 16.♕xd4 ♖d8+; 11.♖f2 11...♕xc3 12.bxc3 ♖c5 ♖ Bader - Steyer, Bad Zwesten 2001; 11.♖d2 11...♖c5!? Black can prepare the exchange on c3 at a more convenient moment. 12.♕d3 ♖a4 13.♖b3 ♕xc3 14.♖xa5 ♕xd2+ 15.♕xd2 ♖xa5 16.♕xa5 ♖xb2 17.♕b5+ ♕d7 18.♕xd7+ ♖xd7 19.♖b1 ♖c4 20.♖xb7+ (Jovchev - Panajotov, Sunny Beach 2006) and Black solves all problems with 20...♖c8! 21.♖c7+ ♖b8 22.♖c5 ♖c8 23.♖b5+ ♖b6=) 11...♖c7! The most solid move. (11...♕xc3+ is quite risky. 12.bxc3 ♖xc3+ (More solid is 12...♖c7 13.♕d3 ♖a5 14.♕d4! (Plume - Dzenis, corr. 2013) gives White a comfortable advantage.) 13.♕d2 ♖b2 14.a4! and suddenly the black queen is in danger. 14...♖b6 (14...a6 15.h4 a5 16.c3 b6 17.♖h3 ♖c5 18.♖xc5 bxc5 19.♖b1 ♖a2 20.♕b5 ♕d7 21.♖c1+ ♖ Hauser - Zholob, corr. 2012) 15.♕d3 ♖c4 16.O-O h6 (16...O-O 17.♕xc4 dxc4 18.♕c1 ♖c3 19.♖f3 ♖b4 20.♕a3 ♖b6+ 21.♕c5+ ♖) 17.a5 ♖b8 18.♕xc4 dxc4 19.♕c1 ♖c3 20.♖f3 1-0 Hauser - Hipfl, corr. 2013) 12.♕e2 (12.♕d3 (Slamenik - Carbonell Bofill, corr. 2010) is met by the tactical response 12...d4!? 13.♖xd4 ♖dxe5! 14.♕e2 (14.fxe5 14...♖xe5 15.♖e2 ♖xd4 16.♕xd4 ♖xd4 17.O-O-O ♖f4+ 18.♖b1 O-O ♖; 14.O-O 14...♖xd3 15.♖xd3 O-O=) 14...♖g6 15.O-O O-O=; 12.♕d2 12...a6 13.♖g4 O-O 14.♕d3 Tritschler - Papapostolou, Bad Schussenried 1994 14...♖c5!? 15.♖xc5 ♕xc5 16.O-O-O ♖b4 17.♕e2 b5 ♖) 12...O-O 13.O-O ♕xc3 14.bxc3+= (Sherwood - Wittal, corr. 2006) promises White some advantage since his kingside attack prospects are more important than the

weakened pawn structure.;

c) 9. dcb5 This aggressive move is not dangerous at all. Black has a comfortable choice between dynamic play with mutual chances and a forced draw. 9...a6

Now White must be accurate to force a draw. (After 9... $\text{c5!?$ 10.c3 a6 (10... dxd4 11.cxd4+=; 10...O-O 11.b4 dxd4 12. dxd4 = Nunn - B. Zueger, Thessaloniki 1988) 11.b4! Black has to react properly so 11... dxb4! is necessary and after (the natural 11...axb5?! is only looking for trouble after 12.bxc5 xc5 13. d5! xc3+ 14. d2 b2 15. b1! xa2 16. d6+ f8 17. xb5 with excellent compensation. 17...g6 18.O-O a7+ (18... g7 19.f5! exf5 Tseshkovsky - Dreev, St Peterburg 1993 20. xc6! bxc6 21. c3 (/1) 21... a7+ 22. h1+- V. (4) Harmon-Vellotti, L. (2430)
- Chandra, A. (2495) [A40]US junior championship(1),
2015.07.07

This week's best game of a junior player is clearly Wei Yi-Bruzon which is already analyzed by Csaba. So I found some interesting game from the US Junior Championship. At the time of writing, the 16-year old Chandra Akshat is leading with 2/2.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 The Grunfeld is quite famous among US juniors these days.

4.♘f3 ♗g7 5.♗g5 ♘e4 6.♗h4 6.Bf4 is the main move while 6.cxd5 almost disappeared from practice.

6...♗xc3 7.bxc3 dxc4 8.e3 A few months ago Harmon-Vellotti against Troff tried [8.♖a4+ 8...c6 9.♖xc4 ♖a5 10.e3 ♘a6 11.♖b3 but here it seems Black gets a good endgame after 11...♘c5! 12.♖b4 ♖xb4 13.cxb4 ♘e4 14.♗d3 ♘d6=]

8...b5 9.a4 c6 10.♗e2 I feel this is best move order, but 10.Qb1 and 10.Nd2 also exist.

10...a6 A normal consolidating move. 10....Nd7 might give White extra possibilities.

11.O-O ♗b7?! This move should be delayed, 11....Nd7 is much better. [11...♘d7!? 12.♘d2 O-O!? (12...♗b7 is back to the game all the while avoiding the nasty 12.Qb1!)]

12.♘d2 Missing a good opportunity. [12.♖b1! 12...♖c8 (12...♘d7 13.♗xc4+=) 13.♖b4 f6 (13...O-O 14.♗xe7 ♖e8 15.♗d6+=) 14.♗g3 ♘d7 15.♖fb1 ♘b6 16.♘d2 with very strong compensation for the pawn.]

12...♘d7 13.♗f3 ♖c8 [13...O-O 14.♖b1 ♖b8∞ is an interesting alternative.]

14.♖b1 f6 15.♗g4 Provoking further weaknesses in Black's camp. [15.♖b2 15...O-O 16.♖fb1 might also be good for White.]

15...f5 16.♗f3 is good in case you find the antidote to Black's next move. Somewhat more human is [16.♗e2!? 16...e5 17.♗xc4! bxc4 18.♘xc4 and it is clear that White will get the advantage after this sacrifice.]

16...e5

17. ♖b4?! This move permits Black to regroup. But the good move was extremely difficult to find. [17.axb5! 17...axb5 18. ♘xc4!! You cannot calculate the consequences of such a sacrifice but it looks promising. 18...bxc4 19. ♖b4 ♕f6! (19...♕f8 20. ♖xc4 ♘b6 21. ♖b3 ♘d5 22.c4±) 20. ♕xf6 ♘xf6 21.dxe5 with great compensation.]

17...♕f8 18. ♖b2 ♕d6 It is now clear that Black is better.

19. ♖fb1 [19.e4 19...O-O 20.exf5 gxf5 21. ♕g3 ♖c7=+]

19...e4! 20. ♕e2 ♖b8 21.f3 Trying to open the position is essential since Black is a pawn up!

21...exf3 22. ♕xf3 ♖c7 It is difficult to comment on Black's last moves, they are simply logical and strong.

23.axb5 cxb5 [23...axb5 24. ♖a7 ♘b6 25.h3 O-O 26.e4 White gets counterplay.]

24. ♕xb7 ♖xb7

25. ♖xa6 It is dangerous to give a pawn around the king. White would get better saving chances if he played 25.h3 followed by 26.e4.

25...♕xh2+ 26. ♖h1 O-O 27. ♖a3 I don't know what to suggest... The position is very difficult to play with White, for example: [27. ♘xc4 27...♕g3 28. ♕xg3 ♖xg3 29. ♘d2 ♘f6! 30. ♘f3 ♘e4 with very strong black pieces.]

27...♕g3! 28. ♕xg3 ♖xg3 29. ♘xc4 I would try to go for an endgame even if Black is a clean pawn up. [29. ♖d6!? 29...♖xd6 30. ♖xd6 ♘f6+]]

29...♘f6 30. ♘e5 ♘g4 31. ♘xg4 simply loses but the toughest defense is also not enjoyable: [31. ♘f3 31...♘xe3 32. ♖a2+ ♖g7+ with a pawn up and the attack.]

31...fxg4 32. ♖d6 ♖h4+ 33. ♖h2 ♖f2 34. ♖h6 [34. ♖g1 is not mate but loses too many pawns: 34...♖g3 35. ♖h2 ♖xe3 36. ♖e5 ♖xc3—+]

34...g3! 35. ♖g1 ♖bf7 White resigned in view of Qxg1 or Rf5 with mating threats. Black's play was very neat, with the exception of some imprecisions in the opening. **0-1**

(15) So, Wesley (2778)
- Kramnik, Vladimir (2783)

43rd GM 2015(7.2),
2015.07.05

37th Zurich Christmas 2013(2.1),
2013.12.27

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of Dortmund and Kramnik is fighting for the 2nd place. For most of the game he had a better position, but maybe he played too hastily for a win and got this unpleasant endgame where Black is already in quite some danger to lose.

54...♖d2+ A good move. Black places the rook to a good square. All Black needs to do is to exchange his 3 pawns for the g2 pawn, but this is not that simple to achieve.

55.♕f3 is clearly the best try.

55...a5?! Kramnik misses a forced draw. And even if it looks dangerous from a human point of view, with exact calculation

it is very possible to see it... [55...♕b7 Black gives away the a6 pawn but the c-pawn is becoming very hard to stop. 56.♖xa6 c3 57.♖b4 (57.♖c5+ 57...♕c7 and White can't do anything to stop Black from playing c2 with a draw.) 57...♖d4

58.♖c2 It seems like White managed to bring his knight back home, but it just doesn't help. 58...♖d2 59.♖e3 c2 and the position is a draw.]

56.♖a6+ [56.♖c6+ 56...♕b6 is good for Black.]

56...♕b7 57.♖xa5 ♕b6 The position still looks like a draw, the black pieces are active and the king is getting to help the b5 pawn to move by playing Kc5.

58.♖a2! White is playing great chess, looking for only chances to fight for a win. [58.♖a8 would lead to a draw after 58...♕c5 59.♖a6+ ♕b6]

58...♖d7?! Another inaccurate move by Black... [Kramnik should have moved just one square further... 58...♖d8 59.g4 ♕c5 60.♖a6+ ♕b6 61.g5 c3 and the active c-pawn should secure the drawish outcome.]

59.♖a8! Another very strong move. Now the white rook and knight make it impossible for the black pawns to move forward.

59...♕c5 60.♖c2 The black pawns are stopped.

60...Rc7?! Yet another unlucky move by Kramnik... [Black's chances to make a draw were still good after 60...Rf7+ 61.Ke2 Re7+ 62.Kd2 Rd7+ 63.Kc1 and now that the white king has gone far away, Black should start attacking the g2 pawn: 63...Rg7 64.Ne3 and of course White has some practical chances to win here, but Black's chances are at least not worse to make a draw.]

61.Rf8! And the game is basically over. White's threat of playing Rf5 is deadly...

61...c3 62.Rf5+ Kb6 [62...Kc4 63.Ne3+ Kb4 64.Nd5+ and Black loses his rook because of its unlucky position on c7.]

63.g4 Ka5 64.g5 Ka4 Black simply doesn't have any threats.

65.Ke3 A very safe decision. White also brings his king to help the pieces now that the g-pawn is not in danger to get lost.

65...Rd7 66.g6 b4

67.Rf4 and the b4 pawn is gone...

67...Kb3 68.Nxb4 I guess the only reason Kramnik did not resign here is that he was feeling very angry about misplaying the nice position he had so badly...

68...Re7+ 69.Re4 Rg7 [An easy line to calculate is 69...Re4+ 70.Kxe4 Kxb4 71.Kd3! Kb3 72.g7 c2 73.g8=Q+ and White queens with check.]

70.Rg4 Now the white king will go to h6, so Black is hopeless.

70...Re7+ 71.Kf3 Rg7 72.Nc6 So transfers his knight to d4, which was not really needed but almost any move is already winning.

72...Rg8 73.g7 c2 74.Nd4+ Kc4 75.Nxc2+ Kd5 and of course White is in time to stop the black king from getting to f7.

76.Rg6 followed by Kg4 next. A very sad end of the game for Kramnik, who really had his chances during the middle game and basically lost a drawish endgame. But it is a great example for us on how knight and rook work together to stop the opponent's pawns from running further. **1-0**

**(16) Wang Yue (2716)
- Ding Liren (2749)**Hainan Danzhou GM,
2015.07.06GM Csaba Balogh
Best rating: 2672

In this position, Wang Yue simplifies the game to a very instructive opposite colored bishop endgame. He perfectly foresees and evaluates the consequences .

45. ♖d6+! This forces the exchange of the queen. [45. ♖xb6+ 45... ♗f6 46. ♖xc5 should be also winning, but of course with the queens on board, Black might always hope for salvation. If the bishop endgame is winning, then there is no reason to allow counterchances...]

45... ♗f6 Only chance! [45... ♗f6 loses now to 46. ♖f8+! ♗g7

47. ♗f5! and Black has only two checks and then he gets mated on g6... 47... ♖e1+ 48. ♗f1 ♖e3+ 49. ♗h1+—]

46. ♖xf6+! ♗xf6 **47. ♗f2** At first sight the game is drawn, because the connected passed pawns on the kingside are fixed and perfectly blockaded by the king, while the black bishop could successfully protect the queenside. However, Wang Yue sees the position much more deeply...

47... ♗h4+ Black prepares to defend his b6 pawn from a5 with the bishop. That looks completely safe. [The diagonal is too short if Black wants to do the same from d8-c7. Black quickly gets into zugzwang after 47... ♗g5 48. ♗f3 ♗e7 49. ♗e2 ♗d8 50. ♗e4 ♗f6 51. ♗f3 White does the same preparation like in the game. He settles his bishop to f3 from where it not only blocks the e5 pawn, but also defends the g4. It gives free way to the king to attack the b6... 51... ♗g7 52. ♗d5 ♗f6 53. ♗c6 ♗d8 54. ♗d7 ♗f6 55. ♗c7+— and the pawn is lost.]

48. ♗f3 ♗g5 49. ♗e2! White preserves all his pawns and prepares to centralize his king.

49... ♗e1 50. ♗e4 ♗c3 51. ♗f3 ♗b4 Well, Black believes, that the e5 pawn does not make much difference, which is actually true from the matter of the outcome... [51... ♗d4 52. ♗d5 ♗c3 53. ♗e4! Using the fact, that the g4 pawn cannot be taken because the h-pawn queens. Suddenly Black finds himself

in zugzwang. If the bishop moves and it keeps the e5 pawn protected, Kc6 is going to win the one on b6. He could only play then 53...♔h6 but it loses to 54.♔e6! Threatening with Kf6 and pushing the g-pawn... 54...♔g5

55.h6! is the point and the reason why Black gave up his e5 pawn. Now the bishop cannot take part in stopping the g-pawn... 55...♔xh6 56.♔f6+- and the g-pawn promotes automatically.]

52.♔xe5 The appearance of the e5 pawn does not change the strategy of the defense. The kingside pawns are still blockaded and the b6 pawn can be still defended with Ba5...

52...♗c3+ 53.♔d5 ♗d2 54.♔c6 ♗a5

It looks like the game is drawn, because Black just starts waiting with Kh6-g5 or if the white king approaches the

kingside, it frees the black bishop to move. However here comes the brilliant idea, which was foreseen by Wang Yue before trading the queens...

55.♗d1!! ♔h6 56.b4!! cxb4 [56...♗xb4 57.♔xb6+- is over, since the a-pawn promotes.]

57.♗b3! This is the point! The black bishop is trapped and suddenly Black finds himself in zugzwang! He can only move with his king now, but after...

57...♔g5 58.♔d5 [58.♔d5 Black resigned because the king goes towards f6 and promotes the g-pawn. 58...♔h6 59.♔e6 ♔g5 60.♔e5 At some point Black is forced to sacrifice his b6-pawn to free his bishop, but then 60...b5 61.axb5 and the white king goes back to support the b-pawn. White wins!] **1-0**

Golden knowledge

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

I) Fighting against the queen with the rook

(17) 1

The simplest way in such cases is to transfer the move to the opponent, as he will be in zugzwang. It is something like a queen triangulation, similar to the king triangulation in pawns endings.

1. ♔d5+ The simplest way to win most of this kind of position is to lose a tempo-to give opponent possibility to destroy its coordination of the pieces. Simply-zugzwang.

1... ♕h8 2. ♔h1+ ♕g8 3. ♔h5! ♖a7 4. ♔d5+ ♕h8 5. ♔h1+ ♕g8 6. ♔g1+ 1-0

(18) Svidler - Gelfand

1... ♔c8 2. ♕f7 ♔d8 3. ♖g7+ [We get to the known position after 3. ♕g7 3... ♔e8]

3... ♕f5 4. ♖h7 ♔d7+ 5. ♕g8 ♔e8+ 6. ♕g7 ♕g5 This zugzwang is the simplest way to win, as in the previous example. It is the most instructive method which has to be known and applied on every level. **1-0**

(19) Morozevich, A. - Jakovenko, D.

Pamplona ESP, 2006

104. ♔d4+ [104. ♔e5! Setting Black in zugzwang and keeping control over the important h2 square. 104... ♖f2 105. ♕g3 ♖g2+ 106. ♕h3 is easily winning.]

104...♔g2 105.♚d3 [105.♚e5 Once again, but when in modern games with 30 second increment the player goes in the wrong direction, only the opponent's mistake can help him.]

105...♔g1 106.♚e3+ ♔f1 107.♚c1+ ♔f2 108.♚d2+ ♔g1 109.♚e1+ ♔g2 110.♚g3+ [110.♚e5]

110...♔h1 111.♔f3?? [It was necessary to play 111.♚e5]

111...♖f2+! and the rook becomes untouchable.

112.♔e3 ♖e2+ 113.♔d3 ♖d2+ 114.♔xd2 1/2-1/2

(20) Szablewski, M. - Radjabov, T.

EU-ch U10, 1996

Sometimes the players cannot win with just queen against rook, but even with an additional pawn! The most frequently underestimated defence in all type of queens endings is the stalemate motif.

114.h7?? [114.♚e7 was winning as there is no more stalemate defense.]

114...♖g5+ 115.♔e4 ♖g4+ 116.♔d5 ♖g5+ 117.♔e6 1/2-1/2

(21) Beliavsky, A. - Boersma, P.

Tilburg, 1993

72...♔g8?? A terrible mistake. Much better would be the drawn continuation [72...♖f8]

73.♚h6 1-0

(22) Penrose, J. - Hartston, W.

Great Britain (ch), 1970

1...♔h7? A typical mistake, made in many games. Correct was to keep the opponent's king far from the 7th rank. [1...♖g7!=]

2. ♔f7+— ♚g5 3. ♛f6 ♚g8 4. ♛e6 ♚g5 [4... ♚g7+ 5. ♔f8 ♚g5
6. ♛e7+ ♔h8 7. ♛f7!+—]

5. ♔f8 h5 6. ♛f7+ ♔h6 7. ♛f6+ ♚g6 8. ♛f4+ ♔h7 9. ♛e5!
♔h6 10. ♔f7 h4 11. ♛e4! 1-0

(23) Jaszczuk, B. - Gniot, T.

Szczecin, 1949

1. ♔h3?? [1. ♔h1! In such cases it is necessary to use self-stalemate motifs.]

1... ♛d2 2. ♚g4 ♛d7 3. ♔h4 ♛d3 4. ♚g5 ♛d8 5. ♔h5 ♛d4
6. ♚g6 ♛e3 7. ♔g4 ♛e4+ 8. ♔h5 ♛e8 9. ♔h6 ♛e5 10. ♚g5
♛h2+ 11. ♔g6 ♛h7+ 12. ♔f6 ♛e4 13. ♚g6 ♛f4+ 14. ♔e6
♛f7+ 0-1

(24) Stefansson, H. - Bjarnason, S.

ISL-ch, 2002.08.29

The position is drawn since the king is cut off.

57. ♛c8+ ♔h7 58. h4 ♚g6 59. ♛f5 ♔g7 60. ♔h3 ♚g1 61. ♛c5
♚g6 62. ♛e5+ ♔g8 63. ♛f5 ♚g7 64. ♛e5 ♔h7 65. ♛e4+
♔h8 66. ♔h2 ♔g8 67. ♛e6+ ♔h7 68. ♔h3 ♚g8 1/2-1/2

(25)

In many cases the only way to win is to find a favorable transposition into a pawn ending.

1... ♔f7 [Does not help 1... ♔h7 2. ♔f4 ♚f6 3. ♔e5 ♚h6 4. ♛e6!!
♔h8 5. ♔d6]

2. ♛d8 ♚f6 [2... ♚h3 3. f6 is winning.]

3. ♛xf6+! gxf6+ 4. ♔h6

(26) Pismenny, A. - Shwarz, B.

Moscov, 1968

Here is the same main (and only!) idea to win this endgame: to transpose into a winning pawn ending.

1. ♔f6!! ♕f8 2. ♔d8 [It is strange that the well-known ENCYCLOPEDIA OF CHESS ENDGAMES does not show the following mate: 2. ♔h8+ 2... ♕e7 3. ♔d8#]

2... ♕g8 3. ♕d7 ♖e1 4. g6 1-0

(27) Timman, J. - Nunn, J.

Wijk aan Zee , 1982

Here we see another very important practical ending.

68... ♔e4 69. ♕a2?? [According to the analysis of Grigorjev from 1917, correct is 69. ♖a3=]

69... a3 70. ♕b1 [70. ♖b3+ did not help: 70... ♕c4 71. ♕b1 a2+]

70... ♔e1+ 71. ♕a2 ♖c1 72. ♖b3+ ♕a4 0-1

(28) Rogulj, B. - Andres, M.

Jugoslavija , 1968

1. ♖f3? [The correct defense is 1. ♖a3! As it was stated before it is necessary to stop a4-a3. 1... ♔f6+ 2. ♕a2 ♖h6 3. ♕b2! ♔h1 4. ♖d3 ♖a8 5. ♖a3!=]

1... a3+! 2. ♕a2 ♖c4+ 3. ♖b3+ ♕a4 4. ♕a1 a2 [Wrong was 4... ♖xc2 because of the classical stalemate defence, which has to be known by every player: 5. ♖xa3+ ♕b4 6. ♖b3+ ♕c4 7. ♖b4+ ♕d3 8. ♖b3+ ♕d2 9. ♖b2]

5. ♖b2 ♖f1+ 6. ♕xa2 ♖c1! Once again the winning method is through zugzwang. **0-1**

(29) Akopian, V. - Djukic, Z.

Niska Banja , 1991

When the exact position is not reached there are very interesting and instructive options to prevent it.

1. ♖h4!! []+- [1. ♖xf4? 1... ♖a6=]

1... ♖g3 [1... ♖g7 2. ♖g5+ ♖f8 3. ♖d8+ ♖g7 4. ♖d4+! ♖g8 5. ♖d6 ♖a6+ (5... ♖e3 6. ♖xf4 ♖e6+ 7. ♖d7+-) 6. ♖d7 ♖g6 7. ♖d5! ♖g7 (7... ♖g3 8. ♖e7! ♖e3+ 9. ♖f6 ♖e6+ 10. ♖xe6 fxe6 11. ♖xe6+-) 8. ♖e5+ ♖g8 (8... ♖h7 9. ♖xf4 ♖xg2 10. ♖e7+-) 9. ♖e7! ♖xg2 10. ♖b8+-]

7... ♖g7 8. ♖f6 1-0

(30) Kotov, Al - Pachman, L.

Moscow-Prague, 1946

79...h4?? [The correct theoretical way would be 79... ♖c2! 80. ♖h1 ♖d2 (Even now some players managed to make mistakes: 80...h4? 81. ♖xh4 ♖f2

82. ♖g4+!! (or Jana Krivec way: 82. ♖f4 82... ♖xg3 83. ♖f5+ ♖g6 84. ♖f6+) 81. ♖g1 ♖e2 82. ♖h1 h4! 83. ♖xh4 ♖f1+ 84. ♖h2 ♖f2+ 85. ♖h3 ♖g1 is winning.]

80. ♖xh4 ♖f3 81. ♖h2 ♖d1+ 82. ♖g2 ♖d5+ 83. ♖f2 ♖d2+ 84. ♖g1 ♖e1+ 85. ♖g2 ♖e2+ 86. ♖g1 ♖f3 87. ♖f2 ♖d1+ 88. ♖g2 ♖e1 89. ♖f4 ♖e2+ 1/2-1/2

(31) Zaric, V. - Feher, S.

Yugoslavia, 1994

66. ♔f7 ♚h1?? [66... ♚g5+!! Sometimes people know, sometimes not!]

67. ♕g5? [Better was 67. ♔f2 67... ♕g7 68. ♔a7+]

67... ♚g1+ 68. ♕h6 ♚h1+ 69. ♕xg6 ♚g1+ 70. ♕h5 ♚h1+ 71. ♕g4 ♚g1+ 72. ♕h3 ♚h1+ 73. ♕g2 ♚g1+ 1/2-1/2

(32) Averbakh, Y. - Bondarevsky, I.

URS-ch16, 1948

60... ♕e6? [It was necessary to immediately attack the

opponent's king: 60... ♔g6+ 61. ♕h2 ♔f5 62. ♕g3 ♔e5+ 63. ♕f3 (or 63. ♕h3 63... ♔g5 64. ♚g4 ♔f5 65. ♕g3 h5 66. ♚h4 ♔g5+ 67. ♕h3 ♔g1 68. ♚xh5+ ♕e4 is winning.) 63... ♔g5 64. ♚h3 ♕d4 65. ♚g3 ♔d5+ 66. ♕e2 ♔h1 and the h7 pawn will come like an express.]

61. ♚h3 ♔e4+ 62. ♕h2 ♕f6 63. ♚e3 ♔d5 64. ♚g3 h5 65. ♚e3 ♕g5 66. ♚g3+ ♕f4 67. ♚e3 h4 68. ♚h3 ♔b7 and we once again have the Grigorjev position.

69. ♚e3 ♕g4 70. ♚h3 ♔b1 71. ♕g2 ♔h7 72. ♕h2 ♔c7+ 73. ♕g2 ♔c2 74. ♚e3 1/2-1/2

(33) Kuzmin, G. - Polugaevsky, L.

USSR , 1975

Now let us check how top players transpose into this concrete ending:

42... ♚a6!! 43. ♕xb8? [43. ♔e7!± was still keeping the advantage.]

43... ♚xb8 44. ♔xb8 gxf5 45. ♔xe5+ ♕g8 46. ♔b8+ [46. ♔xf5 leads to a dead draw after 46... ♚e6+]

46... ♕g7 47. ♔b2+ ♕g8 48. gxf5 and now we have the position from the Grigorjev analysis.

48...♖e6+ 49.♔f3 ♕h7 50.♔g4 ♖h6 51.♔g5 ♖e6 52.♜h2
♖h6 53.♜f4 ♕g7 54.♜xf7+ 1/2-1/2

II) Fighting against the queen with minor pieces

(34) 3

Here is one of the most important fortressess. The black pieces maintain an unbreakable zone around the king.

(35) 4

Two bishops don't allow the opponent's queen to mate.

(36) 2

Two knights, when placed close to the own king, also keep a draw.

1. ♔d1 ♘d2+ 2. ♔e2 ♘b3 3. ♔e1+ ♔c4 4. ♔h4+ ♔c3 5. ♔f6+ ♘d4+ 6. ♔f2 ♘d5 1/2-1/2

Chess and the City.

A look says more than a thousand words...

WGM Elisabeth Paetz

Picture taken from the official website of the French Chess Federation

Being a captain of a women team brings not only a huge responsibility, but also requires steady nerves, a thick skin and, most importantly, the ability to stay calm whatever happens, whenever needed. Obviously, these traits are not given by birth, and usually it takes ages, sometimes a lifetime of practice to acquire them. Thus, unsurprisingly, most wise men throw in the towel much earlier, and these are the ones I would call clever...

On the other hand, the "tough - believers", who we can unceremoniously call the masochists, see a life goal in leading a women team. From my own experience of being a national team member for more than a decade, after every team event the tough-believers experience real physical consequences (increased hair loss and quicker aging in general...), and on top of that they always need some extra vacations or, in the worst scenario, some psychological support. I guess this is well-known to all chess players and should not come as a surprise to those who have witnessed or played in team events which include a women section.

But let us take a practical example, which can illustrate the physical suffering of these poor idealistic creatures...What do we see in this picture? Yep, on the surface we can spot that it is a women's match between former World Champion Alexandra Kosteniuk and myself. However, this is not really relevant here and should not be the focus of the reader's attention. The crucial part here is the facial expressions. But to fully understand the pain of the poor bystanders I must give you some information about the importance of the particular match shown in the picture. My team "Philidor Mulhouse" was down 2-1 against the team of "Clichy" and in case I could manage to win the game we would level the score, and, more importantly, proceed to the final of the Top 12 French Women's Team Championship. This is because the win on the top board would also count as a tie-break according to the French regulation.

Now, strengthened by this knowledge, we can finally understand the drama that is unfolding. First we can name our Team Captain "Jiji" alias GM Jean Noel Riff (the guy in the black Nike polo), who does not seem too confident about the actual outcome of the game. This or he was chewing a lemon. Since he is only in his mid 30s he still has plenty of time to

realize how hard the job that he has chosen is. Somewhere behind him, in the red shirt, is GM Pavel Tregubov, seriously worried and looking dangerously close to a heart attack. Apparently, even an experienced team captain like Pavel has not yet learnt the hard lesson that women teams must be only met for cocktails and not for training them...

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘c6 5.♗c3 [In this move order White had the additional opportunity to play a Maroczy structure. 5.c4]

5...♗f6 6.♕c4 [Nowdays a more popular weapon against the Rauser is 6.♕g5]

6...♞b6 A very concrete move. White needs to decide what to do with the knight. The alternativewas [6...e6 7.♕e3 and White can play a very sharp line called Velimirovich Attack, with Qe2-0-0-g4.]

7.♗b3 [7.♗db5 7...a6 8.♕e3 ♞a5 9.♗d4 e6 10.O-O ♕e7 11.♕b3 (11.f4 11...O-O and White anyway has to lose time for Bb3. 12.f5?? ♞c5 13.♕b3 e5--+) 11...O-O 12.f4 ♕d7 13.f5 A

typical plan to activate the bishop on b3. 13...♗xd4 14.♕xd4 exf5 15.exf5 ♕c6 16.♞d3 ♞ae8 with the idea to exchange the strong bishop on d4 after Nd7-Bf6 or Bd8-Bb6. This line doesn't bring White any advantage.; 7.♕e3 7...♞xb2 8.♗db5 ♞b4 9.♞e2 ♞a5 10.♕d2 ♞d8 11.♗d5 ♗xd5 12.exd5 ♗e5 and White doesn't have full compensation for the pawn.; 7.♗xc6 7...bxc6 8.O-O should not be dangerous since Black can develop the pieces over g6-Bg7 or e6-Be7.]

7...e6 8.♕e3 Black lost time for Qb6-Qc7, but in exchange the white knight is not placed on the central d4 square.

8...♞c7 9.f4 a6 White is preparing to put pressure on the kingside and Black does the same on the queenside.

10.♕d3 b5 11.a3 [11.♞f3 11...b4 12.♗e2 (12.♗a4 12...♞b8) 12...♕b7 13.c4 bxc3 wasn't necessary. 14.♗xc3 ♕e7 15.O-O ♗b4 (15...O-O 16.♞ac1) 16.♕b1 d5! and Black takes the initiative.]

11...♕e7 12.♞f3 ♕b7

13.O-O [13.g4 13...d5 (13...b4 14.axb4 ♗xb4 15.g5 ♗d7 and because the white king looks weak, Black is fine.) 14.exd5 exd5 15.♗d4 (15.g5 15...d4!) 15...O-O and Black will get counterplay on the e4 square. 16.g5 ♗xd4 17.♕xd4 ♗e4 and even if Black lost the pawn he would have compensation because of the weak white king.]

13...♖c8 14.♗ae1 [14.♖g3 14...g6 15.♗ae1 (15.f5 15...gxf5 16.exf5 ♗g8 and White has problems with the g2 square.) 15...h5↔Black can keep his king in the center and I have no idea how to break his position. One of Black's ideas could be to play h4-h3 to weaken the h1-a8 diagonal.]

14...O-O [14...h5!? with the same idea as in the previous comment.]

15.♖h3 After Black castled, White has more attacking ideas...

15...b4

16.♘d5!? An interesting idea. Kupreichik going to play in Tal style! [16.axb4 16...♙xb4↔and Black will eliminate the important bishop on d3.]

16...exd5 17.exd5 ♘b8 The best answer because Black is going to support the knight on f6 after Nbd7.

18.♙d4 g6 [18...h6? 19.♙xf6 ♙xf6 20.♖f5+↔]

19.♗f3 A logical move. White activates the rook.

19...♙xd5 20.♗fe3 ♙d8

21.♖h4 With the trap that now Black is not able to move the knight from f6 because of the well-known tactical motif Qxh7! and Rh3-Rh8 mate. [21.♖h6 21...♘c6! An important move. Black needs to hurry with taking out the strong bishop on d4. 22.♙xf6 ♙xf6 23.♗h3 ♗fe8↔+ and with the bishop on f6 Black is safe.]

21...♘bd7 [21...♘h5 22.♖xh5!+↔]

22.♖h6 ♖b7 23.♗g3

23...♘c5? A mistake! Black should quickly eliminate the d4 bishop. [23...♙b6! 24.♙xg6 (24.f5 24...♘e5 Controlling the g6 square!) 24...♙xd4+ 25.♘xd4 fxg6 26.♗xg6+ hxg6 27.♖xg6+ ♙h8 28.♖h6+ White has no bishop on d4 and Black is able to play the simple 28...♘h7↔+]

24.♘xc5 dxc5 [24...♗xc5 25.f5! ♗c7 Trying to protect the

position over the 7th rank. 26.♔h4 ♖e7 27.♗f1 ♖e5! Closing the dangerous diagonal. 28.fxg6 fxg6 29.♙xg6 ♖h8 and Black should hold the position.]

25.f5

25...cxd4?? The decisive mistake! Black could hold the position after the logical [25...♖c7! 26.fxg6 fxg6 27.♙xc5 ♙e7 (27...♗g7!? 28.♙xf8 ♖xf8∞) 28.♗xg6+ (28.♗xe7 28...♗xe7 29.♙xg6 ♖e1+ 30.♖f2 ♖g4+ 31.♖xe1 ♖xh6 32.♙h5+ ♗g7 33.♗xg7+ ♖xg7 34.♙xf8+ ♖xf8 35.axb4 ♙xg2—+) 28...hxg6 29.♗xg6+ ♖h8 30.♗h6+ ♖g8=]

Editorial Preface

The main event of the week is clearly the match between Russia and China, with both a men's and women's match. Both teams are young, fighting and very much want to win this prestigious match.

After 3 rounds, the Chinese men have a slight advantage and in the ladies match the Russians are in the lead for the moment.

Another interesting match, which also takes place in China, is being played between Ding Liren (the Chinese super star) and Boris Gelfand. Here the first 2 games ended in a draw.

In Warsaw the very strong Najdorf Memorial, an open tournament, is underway and in Georgia the 10th Nana Aleksandria Cup is being played.

Next week the super tournament in Biel starts and we will be focusing our attention on this event in the next newsletter.

For now we wish hope you enjoy this week's issue!

Two best games of the past week

(1) Matlakov, Maxim (2691)
- Lu, Shanglei (2595) [D30]

China-Russia Match 2015(1.3),
2015.07.15

GM Arkadij Naiditsch
Best rating: 2737

The match between China and Russia is always very interesting one. Despite both being young teams that show great fighting games, they have completely different styles of play. The Russians usually play positionally and have big theoretical knowledge, while the Chinese have a much more tactical style, fighting until the very end and with sometimes rare opening setups. In the current game Matlakov demonstrates amazing positional play which gives him a full point in just 30 moves-which is a very rare thing against a Chinese opponent...

1.d4 It is a bit strange, but most of the young Russian players start their games with 1.d4.

1...d5 2.c4 e6 3.♘f3 ♘f6 4.g3 We have a Catalan.

4...g6 A very rare set up, but it is not that stupid.

5.♗g2 ♗g7 Black's idea in this line is to put maximum pressure on the d4 pawn.

6.O-O O-O 7.♖c2 A very nice move in my opinion. White is preparing to play Rd1 to fix the only problematic piece in his position.

7...♘c6 It is written in every book that you should not put your knight in front of the c-pawn, but in the current situation Black is planning to put his knight on e7.

8.♞d1 a5 Black is planning to play Ne7-b6 and get the bishop to a6.

9.a3 A very solid reply. [Another idea of Black could have been visible after 9.♘e5 9...♘b4! It is quite rare to put the knight on b4, but in this case Black is aiming for fast play in the center. 10.♞b3 c5 11.dxc5 ♞c7 With an unclear position.]

9...♘e7 [If Black tried to fix White's pawn structure with 9...a4 10.♘e5 looks very strong now.]

10.♘c3 This is clearly the best position for the white knight.

10...b6 [It is very dangerous for Black to take the pawn on c4: 10...dxc4 11.e4 and both black knights are badly placed.]

11.♗f4 White had many other interesting setups, as for example to play Bg5 with the idea of the e4 push or to put the knight on e5. In my opinion this 5...g6 setup at least looks a bit strange for Black.

11...♗b7 A logical move but it leads to a clearly worse position. Maybe Black should have tried 11...dxc4 to at least change the course of the game.

12.cxd5! A very smart move!

12...exd5 [In case of 12...fxd5 13.dxd5 dxd5 it is usually great for Black to exchange one pair of knights, but now White is in time to get a better position with 14.g5! winning an important tempo to play e4 next and Black is not in time with Rc8-c5.]

13.Rac1 Now we are in a more or less typical position, where White is clearly better because of the bad position of the black bishop on b7 and the weakness of the c6 square, which will be visible very soon. Usually in such structures it is much better for Black to have the bishop on e6 and the pawn on b7.

13...Ne8 14.b4 Very standard play by Matlakov but White also had another very interesting option: [14.Qb3 The goal is simply to put maximum pressure on d5 and wait for a good moment to play Nb5 or Na4-Nc5. 14...Nd6 In case Black doesn't play Nd6, then why was Ne8 needed... 15.gxd6 cxd6 16.Ne1 With the idea of playing Nd3-Nf4. It is going to be very hard for Black to defend the d5 pawn, so White clearly has a big advantage.]

14...axb4 15.axb4 Qd7 A very dangerous move, as now White often has Ne5 with tempo. [Another option for Black was to play 15...Nd6 16.gxd6 Qxd6 This looks very dangerous for Black, but maybe it was the best chance to play on.

17.Nb5 Qxb4 18.Qxc7 Qa6 19.Rb1 The lines are quite forced here. 19...Qa5 20.Nd6 Qxe2 21.Qxe7 Qxd1 22.Rxd1 and of course White is much better here, but Black might have some chances for a draw.]

16.Qb3 Another very solid move. The queen takes a nice position on b3.

16...h6 Black can't do much anyway and Lu is preparing to play g5 at some point.

17.Ne5 Qe6 Whites position is great, but how to break through?!

18.b5 Now things are getting forced. [A good option was to play 18.h4 stopping g5 and intending to play b5 next, with full domination.]

18...g5 is Black's only chance to break free. [18...Nd6 19.Nc6 gives White a nice advantage.]

19.gd2 Nd6 Now the white bishop on d2 is not so well placed.

20.Nc6 Qxc6 Black should not give up the bishop pair... [It was more logical to play 20...Nxc6 21.bxc6 Qxc6 22.gxd5 (22.Nxd5 22...Qa4) 22...gxd5 23.Qxd5 b5 Whites position looks better, but I am not sure if the advantage is so significant.]

21.bxc6 ♖a5? This is already a clear mistake. [21...♗xd4 Black had to go for a worse endgame after 22.♘xd5 ♘xd5 23.♙xd5 ♙xd5 24.♗xd5 ♖fd8 and of course White is clearly better, but Black's position remains very solid and hard to break.]

22.e3 Now White is of course not giving Black another chance to get the d4 pawn.

22...♖fa8

23.♘b1! A great move! White wants to activate the d2 bishop over b4.

23...♖5a6 24.♗b4 Suddenly Black's position is almost lost! White wants to play Nc3 next and win the d5 pawn.

24...♘df5 In a bad position there are no good moves, but Lu chooses a painful death... [24...♗f8 would have been a bit more stubborn. 25.♘c3 ♘e4 26.♘xe4 dxe4 But here as well White can choose between an endgame with a pawn up and a simple crush in the center with 27.d5 and Black's position is very bad.]

25.♘c3 The white knight is going to b5.

25...♖d8 26.♘b5 ♖c8 The c7 pawn is protected, but it doesn't solve all of Black's problems.

27.♗h3! The winning move! There is no protection against Bxe7 any longer.

27...h5 All the moves were losing at this stage.

28.♗xe7 g4 29.♗f1 Preparing Nxc7.

29...♘xe7 30.♘xc7 followed by Bxa6. A really nice game by Matlakov who played safe and good moves, which brought him a winning position. **1-0**

Najdorf Mem Open A 2015(4.2),
2015.07.13

GM Csaba Balogh
Best rating: 2672

A very sharp Sicilian game. White seemed to have the advantage and the upper hand, but with a great intuitive sacrifice in the middlegame, Black managed to take over the initiative and turned the game in his favor.

1.e4 c5 2.♘f3 ♘c6 3.d4 cxd4 4.♗xd4 ♕b6 The Grivas variation. It is not so common on the highest level, but in open tournaments it is always popular to lead the game onto some less explored, sharp territories.

5.♘b3 ♗f6 6.♗c3 e6

7.♕e2 Volokitin chooses the most interesting setup as usual with opposite side castling.

7...♗b4 8.♗d2 O-O 9.a3 ♗xc3 A rare and in my opinion dubious move. [Black should rather go for the main line with 9...♗e7 when the lines continue with 10.e5 (10.O-O-O 10...d5) 10...♗d5 11.♗xd5 exd5 followed by d6, getting rid of the doubled pawns.]

10.♗xc3 e5 11.O-O-O

11...a5 This is the new direction. There were some fresh games with it, but it should not be good for Black. He gave up the bishop pair, created many holes in his camp (b5, d6) and the position of his pieces, especially the undeveloped c8 bishop, does not justify all these weaknesses.

12.g4 The standard attacking method. Both sides start advancing their pawns in front of the opponent's king. [12.f4

also looks very promising at first sight, trying to open the long diagonal and damage the pawn structure after taking on f6, however Black has the following unexpected blow: 12...d5! using the fact that after Bg4 White does not have f4 anymore. 13.♗xd5 ♗xd5 14.exd5 ♗d4 15.♕xe5 ♗xb3+ 16.cxb3 f6 With mutual chances.]

12...d6 13.g5 ♘e8 14.f4 Volokitin is a dynamic player and he wants to squeeze the black pieces completely with f5, while taking on f4 just temporarily wins a pawn, but it opens the diagonal of the c3 bishop and vacates the d4 square for the knight. [However the computer recommends 14.♖g1 14...♙e6 15.♚e3! ♚xe3+ 16.fxe3 with a clear advantage in the endgame. The black queenside is vulnerable while the doubled e-pawns cannot be attacked, they rather control the important central squares.]

14...♙e6! Black could not allow closing all his pieces with f5. [14...exf4 15.♚f3 ♚e3+ 16.♚xe3 fxe3 17.♖g1! followed by winning back the pawn with Rg3, with a clear advantage in the endgame.; If Black includes 14...a4 15.♘d2 before grabbing the pawn on f4 to avoid the knight going to d4 15...exf4 suddenly the knight appears on other good squares: 16.♘c4 ♚c7 17.♚f2 and the plan is Nb6-d5, or after taking on f4, Ne3-d5!]

15.f5! A pawn sacrifice for the superior structure!

15...♙xb3 16.cxb3 ♖c8! Black feels that his best chance is to stay active! It is more important than grabbing pawns. [16...♚xb3 is met by 17.♚b5! ♚xb5 18.♙xb5 and despite the extra pawn, the endgame is terrible for Black. White can strengthen his position however he wants and at the same time Black cannot move with his pieces.]

17.♚c4? This is the mistake which leads to the turn of the game... [17.♚b5 should have been played. White was probably afraid of 17...♚xb5 18.♙xb5 ♘d4 but he keeps an advantage after 19.♙d7! ♖c7 20.♙xe8 ♖xe8 21.♙b1 ♘xb3 22.♖xd6+=; If Black leaves from the Nd4 threat with 17.♙b1 17...♚xb3 is stronger as Qb5 does not work anymore because the d1 rook has to be protected.]

17...d5!! It is possible to miss such moves! Black frees his position and he is ready to bring his knight to the excellent outpost on d6!

18.exd5 [18.♖xd5? drops an exchange after 18...♙e7!; 18.♚xd5? is strongly met by 18...♖d8 19.♚c4 ♖xd1+ 20.♙xd1 ♘d6! 21.♚d3 ♖d8 and suddenly all the black pieces are extremely actively placed, while the white ones have completely lost their coordination.]

18...♘d6 19.♚e2 [19.♚d3 does not allow Nd4 with tempo, but moves into 19...♘b4! 20.axb4 axb4 and after taking on c3, the opening files in front of the white king will decide the game. We can clearly see now the difference between the great knight on d6 and the poor bishop on f1!]

19...♘d4 20.♚xe5

20...♖xc3+!! This kind of sacrifices belong to such combinations, which cannot be calculated until the end, but Black must feel intuitively that after damaging the queenside structure he must have enough compensation against the king with such knights and heavy pieces. Black also prevented the potential mate on g7.

21.bxc3 ♜xb3+ 22.♔c2 ♜e8! Everything comes with tempo! All the white pieces are undeveloped.

23.♞f4 ♜e4 24.♞g3 ♜e3 25.♞f4 Black has played a perfect game since the pawn sacrifice with 17...d5. He also feels correctly that he must have more than a repetition with Re4-e3, but he fails to find the right way of strengthening the attack.

25...♜e4 [25...♞c5! was the strongest move, but Black should have foreseen some deep ideas before making this move... 26.♜d3 ♜f3!! This is the key! Black drives his rook to a protected square before taking on a3! (26...♞xa3 looks strong with the idea of Qa2 mate, but White has 27.♜b1!+- and suddenly all the black pieces are hanging.) 27.♞e5 (27.♞xf3 27...♜d4+-+ wins.) 27...♞xa3 28.♜b1 ♜c5! and the e3 rook is not hanging anymore, so the attack breaks through... 29.♞xd6 ♞a4+! 30.♔c1 ♜xd3+ 31.♔d2 ♞a2+ 32.♔d1 ♜f2+ 33.♔e1 ♜e3+ 34.♔f1 ♞e2+ 35.♔g1 ♜h3#]

26.♞g3 ♜a4!? Black correctly avoids the repetition!

27.♜e1? White tries to use the weak back rank with Qxd6, but Black is coming first... [The machine shows a miraculous survival after 27.♞g1! 27...♜c5 28.♜b1 ♞c7 29.♜b5! ♜xb5 30.♜xb5 ♜xa3 31.♞e3! Both sides need to play precisely, otherwise they get into trouble... 31...♜e4! 32.♔b2! ♞xc3+ 33.♞xc3 ♜xc3 34.♜e1 ♜c5 35.♜xe4 ♜xb5+ 36.♔c3 ♔f8 37.d6 ♜d5 38.♜e7 ♜xd6 39.♜xb7 After dozens of only moves for both sides, we have reached an endgame with an extra pawn for Black, but the activity of the white rook and pawns should enable him to hold the draw comfortably.]

27...♜xa3! 28.♞xd6 ♜a2+ 29.♔b1 [Perhaps White initially wanted to play 29.♔d3 but he missed

29...♜c1+! deflecting the rook! 30.♜xc1 (30.♔c4 30...♜a4+ 31.♞b4 ♜xb4+ 32.cxb4 ♞xb4#) 30...♞xd6+-; 29.♔d1 29...♜d2#]

29...♞d2+! A great finish, which leads to a forced mate!

30.♔xa2 ♜b3+ 31.♔a1 ♜xc3+ 32.♔a2 ♜c2+ [White resigned in view of the mate in the next move: 32...♜c2+ 33.♔a3 (33.♔a1 33...♞b3#) 33...♜b3# White is two rooks up, but the mate takes it all!] **0-1**

The K-Files. Breaking the Symmetry II - 5.e3 dxc4

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

(3) Breaking the Symmetry II - 5.e3 dxc4 [D71]

1.d4 ♘f6 2.c4 g6 3.g3 c6 4.♗g2 d5 5.e3 dxc4 Black accepts the gambit pawn and it's not easy for White to win it back.

6.♗e2 This is Kramnik's move, Now White is always ready to meet black bishop on e6 with Nf4. [However it might happen that the alternative 6.♗d2 invented by Edouard in August 2014 is the most critical line 6...♗e6 since knight can't jump to f4 yet (

a) 6...c5 Black gives a tempo but pretends to clear the matters in the centre as soon as possible, 7.♗xc4 (7.♗gf3

7...♗c6 8.♗xc4 ♗e6 (8...cxd4 is the playable alternative 9.♗xd4 ♗xd4 10.exd4 ♗g7 11.O-O O-O) 9.♖a4 ♗g7 10.♗fe5 ♗d5 11.♗xc6 bxc6 12.O-O Edouard - Gledura, Hastings 2015, and now 12...♗d7!? 13.dxc5 ♗xc5 14.♖c2 ♗xg2 15.♖xg2 ♖d3 16.♖xd3 ♗xd3 17.e4 O-O-O= would allow Black to defend his queenside weaknesses with the king,) 7...cxd4 8.exd4 ♗g7 9.♗e2 O-O 10.O-O ♗c6 11.d5+= with the typical Gruenfeld structure and some edge for White;

b) 6...b5 7.♗e2 White intends to open c-file with b2-b3 and obtain the good compensation for a pawn, 7...♗d5 (after 7...♗g7 8.b3 cxb3 9.axb3 ♖White's play is easy) 8.O-O a5 (8...♗g7 9.b3 c3 10.♗e4 b4 11.a3 ♖a5 12.♖b1) 9.e4 ♗b6 10.b3 cxb3 11.axb3 ♗g7 Dvirnyy - Salgado Lopez, Jerusalem 2015 12.♗f3!? O-O 13.♗f4) 12.♗f3!? O-O 13.♗f4) 12.♗f3!? O-O 13.♗f4)

7.♗e2 ♗h6 prevented. This manoeuvre is known from some Gruenfeld-Bg5 lines, 8.♖c2 b5 9.O-O O-O 10.b3 cxb3 11.axb3 a5 12.♗f3!? (12.e4 allowed Black to solve queenside development problem 12...♗a6! 13.♖xc6 ♗d7 14.♖c2 ♗b4 15.♖b1 ♖c8 16.♗f3 ♗xc1 17.♖xc1 ♖xc1+ 18.♗xc1 ♖c7= Mamedyarov - Navara, Reykjavik 2015) 12...♗f5 (12...♗d5 13.♗d2 ♖ Black knight is still sleeping on b8,) 13.♖d1 ♗e4 14.♗c3 ♗d5 15.♖c2)

6...♗bd7!? The most accurate move order. Black plans to defend the gambit pawn with the knight avoiding weakening b7-b5, [

A) 6...♗d5?! 7.O-O b5 looks suspicious because of 8.a4! ♗b7 (8...b4 9.e4 ♗c7 10.♗e3 ♗a6 11.♗d2±) 9.b3 cxb3 10.axb5 cxb5 11.♖xb3 ♖d7 (11...a6 12.♗ec3 e6 13.♗xd5 ♗xd5 14.♗xd5 ♖xd5 15.♖xd5 exd5 16.♗c3±) 12.♗bc3 ♗xc3 13.♗xc3 ♗xg2 14.♖xg2 a6 15.♗xb5 ♗g7 16.♗c3± Navara - Hammer, Tromsø 2013;

B) Immediate 6...b5 is more logical but after 7.O-O (7.a4

7...b4 8.a5 ♖a6∞) 7...a5 (7...♙g7 8.a4 b4 9.a5+=; 7...♙b7 8.a4 b4 9.♗d2 ♙a6 10.e4∞; 7...♙a6 8.b3∞) 8.b3 cxb3 9.axb3∞ White has full compensation for a pawn;

C) After 6...e5 7.O-O (7.dxe5?! 7...♙xd1+ 8.♙xd1 ♗g4±) 7...exd4 8.♗xd4∞ white are pieces only become more active;

D) 6...♙g7 This was Gelfand's choice in the very first game with 5.e3 6.Ne2, 7.O-O Allows Black to return to the plan with Nb8-d7-b6 (7.♗a3!? is more precise 7...e5 8.♗xc4 exd4 9.♗xd4 O-O 10.O-O ♙e7 (10...♗bd7 11.b3 ♗b6 12.♙a3 ♗xc4 13.bxc4+=) 11.b3 ♗d8 12.♙a3 c5 13.♙e1 ♗a6 14.♙a5 ♗d5 15.♗ad1 ♙g4 16.♗f5 ♙xf5 17.♗xd5 ♗xd5 18.♙xd5+= Greenfeld - Semprun Martinez, London 2014 White's pieces are more active.) 7...O-O (7...♗bd7!? - 6...Nbd7) 8.♗a3 (The other way to attack the pawn 8.♗d2 after 8...b5 only brings White the additional problems 9.a4 (The standard 9.b3 9...cxb3 10.axb3∞ gives White certain compensation., of course.) 9...♗d5 10.axb5 cxb5 11.♗c3 ♙b7 12.♙f3 (12.♗xb5?! 12...♗xe3! 13.fxe3 ♙xg2 14.♙xg2 ♙d5+ 15.♙f3 ♙xb5 16.♗xc4 (16.♙xa8 16...♗c6 17.♗xa7 ♗xa8 18.♗xa8+ ♙f8 19.♗f3 f6=+) 16...♗d7+= Michalik - E. Hansen, Dubai 2014) 12...e6 13.♗xb5 ♙c6 14.♗a3 ♗b6=) 8...♗bd7 (8...♙e6 9.♙c2+=) 9.♗xc4 Now e5 is under firm control. 9...♗b6 (9...♗d5?! makes things only worse 10.b3 a5 Kukhmazov - Vastrukhin, Voronezh 2014 11.e4 ♗5b6 12.♗e3 e5 13.♙b2± Black knights are obviously misplaced now.) 10.b3!? so this developing move is preferable in my opinion (the retreat 10.♗a5 allows Black to prepare freeing e7-e5 10...♙c7 (The other method 10...♗bd7 11.b4 e5 12.♙b2 ♙e7 13.b5 cxb5 14.♙b3 b4 Gajewski - Aabling Thomsen, Reykjavik 2013 15.a3!+= doesn't bring the desired results as White is far ahead in development.) 11.b4 (11.♙c2 11...e5 12.♙d2 ♗e8∞) 11...e5 12.dxe5 ♙xe5 13.♗d4 so it's better to start the action on the kingside immediately 13...h5!± (the solid 13...♗e4 14.♙c2 ♗e8 15.♗b1 (15.♙a3 Kramnik -

Gelfand, London 2013 15...h5!± M. Krasenkow) 15...♗d5 16.a3 ♙e7 17.♙b2 h5 18.♗bd1 ♗df6 (18...h4? 19.♗dxc6+-) 19.f3 ♗g5 20.e4+= Edouard - Petr, Tromso 2014 gave White some advantage)) 10...♗e8 (After 10...c5?! 11.♙a3 cxd4 12.♗xd4 ♗xc4 13.bxc4 ♙c7 14.♗c1 a6 15.c5 ♗d8 16.c6± Ding Liren - Ganguly, Doha 2014 Black's position is close to collapse.) 11.e4!? (Otherwise Black is doing fine 11.♙b2 11...♗xc4 12.bxc4 e5=; 11.♙a3 11...♗xc4 12.bxc4 e5 13.d5 cxd5 14.cxd5 Zoler - Roiz, Legnica 2013 14...e4±) 11...♗xc4 12.bxc4 e5 (After 12...c5?! 13.e5 ♗d7 14.f4 ♗b6 15.dxc5 ♗xc4 16.♙xd8 ♗xd8 17.♗b1± White's pressure is increasing) 13.d5+= The strong pawn centre gives White some advantage.]

7.O-O [After 7.♗a3 7...♗b6 8.O-O (as 8.♙c2 doesn't work because of 8...e5!? 9.dxe5 ♗g4±) 8...♙g7 it's just move transposition]

7...♙g7 This is a critical position (or at least one of them). White has a choice and it's still hard to say which way he would go.

8.a4 [After 8.♗a3 8...♗b6 9.♙c2 O-O if White wants to play for advantage he must play in gambit style 10.e4 (in case of 10.♗xc4 10...♙f5 11.♙c3 ♗fd5 12.♙b3 ♙e6 13.♗xb6 ♗f4 14.♙d1 ♗xe2+ 15.♙xe2 axb6= Black has absolutely no problem) 10...♙e6!? (10...♗e8 is weaker: 11.♗xc4 ♙g4 12.♗a5!

♖d6 13.♚d1+= Potkin - Timman, Wijk aan Zee (B) 2015) 11.♚d1 (11.♗f4?! 11...♚xd4 12.♗xe6 fxe6 13.♚d1 ♚c5=+) 11...♚c8 (11...♗h5∞) 12.♗f4 ♚d8 13.♚e2 ♗e8 14.♗e3 ♗d6∞ White certainly has some pressure for the pawn but it's quite hard to break through.; The situation is about the same (compensation for the pawn) after 8.♚c2 8...♗b6 9.e4 O-O (9...e5 is quite risky: 10.dxe5 ♗g4 (after 10...♚d3? 11.exf6!! ♚xc2 12.fxg7 ♚g8 13.♗bc3+- Black queen is trapped: Rd1-d2 or Rd1 Nd4) 11.♚d1 ♚e7 12.f4 f6 13.exf6 ♗xf6 14.e5 ♗f5 15.♚c3 ♚c5+ Ding Liren - Sethuraman, Hyderabad 2015 16.♚d4! ♗xe5 17.fxe5 ♗xe5 18.♗e3+=) 10.♚d1∞]

8...a5 9.♗a3 ♗b6 10.♚c2 O-O 11.e4 ♗e8 [When the moves a4 a5 are included White doesn't have to meet 11...♗e6 with prophylactical Rd1 12.♗f4! ♗c8 (12...♚xd4 13.♗e3 ♚d8 14.♗xe6 fxe6 15.♚ad1 ♚c7 16.♗xc4 ♗xc4 17.♚xc4 ♚c8 18.♗h3±) 13.♚d1 ♗e8 14.♗e3 ♗d6 15.b3!? cxb3 16.♚xb3∞]

12.♗xc4 ♗g4!? But here we see the drawback of including a4 a5. In the similar position without them (see 8.Na3 Potkin - Timman, Wijk aan Zee (B) 2015) there was a great square a5 for white knight. Now it's not available. [12...♗xc4 was played before 13.♚xc4 e5 Yuffa - Sarana, Taganrog 2014, but after the correct answer 14.dxe5! ♗xe5 15.♗e3 ♗xb2 16.♚ad1 ♚c7 17.♗c5± White could reach the clear advantage.]

13.♗e3 [13.f3 13...♗xc4 14.♚xc4 ♗e6 15.♚d3 ♗d6∞ with good counterplay]

13...♗xc4 14.♚xc4 ♗xe2 15.♚xe2 ♗xd4 16.♚fd1 e5 [Black also has more complicated opportunity 16...c5 17.e5 ♗g7 18.♚ac1 ♗e6 19.♗h6 ♚e8 20.♗xb7 ♚b8 21.♗c6 ♚xb2 22.♚c2 ♚b6∞]

17.♗xd4 exd4 18.♚c4 ♗g7 19.♗h3 ♚e7 20.♚xd4 ♚fd8 21.♚ad1 ♚xd4 22.♚xd4 ♚e8 23.f3 ♗e6 24.♗xe6 ♚xe6=
The chances are equal.

SOME CONCLUSIONS Of course the plan with e3 is no refutation of Symmetrical Gruenfeld. But it's completely playable and leads to quite fresh unexplored positions. If Black doesn't accept the gambit his position is fairly solid but still a bit worse, If Black accepts the pawn White must be ready to play in gambit style but he has the good positional basis for it. The most critical line which we will probably see in top games in the future seems to be 5... dxc4 6.Nd2!?

US junior championship(8),
2015.07.14

I will again comment on a game of the new US junior champion, who was the early leader last week. Here in round 8 both players were sharing first place with 5.5/7, while Jeffery Xiong was half a point behind them.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.d3 b5 7.♙b3 d6 8.a3 O-O 9.♘c3 This line is very fashionable in the Spanish at the moment.

9...♗b8 Wesley So introduced this Breyer style move in January.

10.♗e2!? A natural novelty. Caruana tried 10.a4 with no success and Anand played a very famous game with 10.Ng5 against So in Shamkir, where Black was definitely ready for it.

10...♗bd7 11.♗g3 ♙b7 I don't think this is the best reaction. I feel that [11...♗c5 12.♙a2 ♙e6 13.♙xe6 ♗xe6 14.c3 c5 15.d4] is the critical position to assess after 10.Ne2.]

12.♖e1 A strange move. I would go for the bishop with 12.Nf5, with a slight advantage.

12...♖e8 13.c3

13...♙f8 An interesting pawn sacrifice. Also playable is [13...h6 14.d4! ♙f8 15.♙c2 c5 16.d5 c4 with an usual Spanish structure.]

14.♗g5!? is the only way to play for an advantage.

14...d5 15.exd5 ♗c5 Of course the pawn is untouchable: [15...♙xd5 16.♙xd5 ♗xd5 17.♙h5+-]

16.c4 c6 The alternative is to first take the bishop: [16...♗xb3 17.♙xb3 c6 18.dxc6 ♙xc6 19.♙c2 (19.cxb5 19...♙d5 20.♙a4?! axb5 21.♙xb5?? ♖a5 and the queen is trapped!) 19...♙d7 with an unclear position.]

17. dxc6 ♟xc6

18. ♟c2 A very passive move, but White has to cope with the defense of the backward pawn. [18. ♟a2!? to keep an eye on f7 is nicely met by 18...b4! 19.d4 (19.axb4 19...♟xd3 20.c5 ♜a7=+) 19...b3∞with an unbalanced position.]

18...h6 19. ♟f3 [19.cxb5 was a much safer move. 19...♟xb5 20. ♟5e4 ♜c8 Black should have enough play to equalize.]

19...e4? Black was probably counting on 20.dxe4 bxc4 and missed White's easy next move. After [19...bxc4 20.dxc4 ♜c7 with the idea Rad8-e4 Black has full compensation.]

20.cxb5! += exf3 [20...axb5 21.dxe4 White is simply a clean pawn up but Black would have better saving chances than in the game.]

21.bxc6 ♜xe1+ 22. ♜xe1 fxg2?! [22...♜c8 to eliminate White's strong pawn was the only move.]

23. ♟e3± White's king is very safe and the conversion of the material advantage is easy.

23...♟g4 Not the best move but it is always difficult to play bad positions.

24.d4! White is not afraid of walking up with the king.

24...♜h4 25. ♜xg2 ♟e6 26. ♟f5 ♜e8 [26...♜xh2+ 27. ♟f3 ♟xe3 28. ♜xe3 ♟g5+ 29. ♟e2 and the checks stop! 29...♟d6 30. ♜h1 ♜g2 31. ♟e4+- The endgame will be quite difficult for Black!]

27. ♟xg4 The most easy move, after which White is completely winning.

27...♜xg4 28. ♜d1 ♟f4+ 29. ♟h1 ♜h4 30. ♜f3 ♟d3 31. ♟f5 ♜d8 32. ♜g1 ♟h7 33. ♟xh6 ♜xe3 34.fxe3 After this fine win, Chandra managed to win a difficult last game with Black to become the new US under 20 champion. Xiong took silver and Shen bronze. 1-0

Best rating: 2672

A very instructive pawn endgame. The principle says that in pawn endgames the distant passed pawns play an extremely important role and usually the side that has them has the advantage. This is the case in our example as well. The white king is forced to go far away towards the a6 pawn and at the same time Black could try to gain some benefits on the kingside.

55...♔g8! It is clear that Black must collect the pawns with his king, therefore he goes around with his king despite it costing some time...

56.h4! The only move! [56.♔b3 56...♔f7 57.♔b4 ♔f6 58.♔a5 ♔g5 wins easily. The white king is too far away from the action... 59.h3 ♔h4 60.♔xa6 ♔xh3--+]]

56...♔f7 57.g5 White tries to force some exchanges, which would lead him closer to the draw. If Black takes on g5, White takes back, followed by f6, securing the draw. Black must keep all his pawns on the board to continue playing for the win!

57...h5! 58.♔c3 ♔e7 59.♔b4 Sooner or later White must go in this direction. If he waits on c4-d4, Black lures the king away with a5 anyway...

59...♔d6 60.♔a5 ♔e5 61.f6 Otherwise Black takes all the pawns.

61...gxf6 62.g6 [62.gxf6 loses by just one tempo: 62...♔xf6 63.♔xa6 ♔f5 64.♔b5 ♔g4 65.♔c4 ♔xh4 66.♔d3 ♔g3 67.♔e2 ♔g2! and the white king does not get into the corner to secure the draw. He should have reached the f1 square.]

62...♔e6! Black comes back with his king and collects the g6 pawn. He soon ends up with an extra pawn, but it still remains very instructive!

63.♔xa6 ♔e7 64.♔b5 ♔f8 65.♔c5 ♔g7 66.♔d5 ♔xg6

67.♔e4! These positions are very tricky and easy to misevaluate. Black is winning here, but it requires good technique. The key is the mutual zugzwang position when the kings are on f7 and on f5. Black must transfer his king to e6 in order to be able to push f5 (the direct f5 is met by Ke5 with an immediate draw). However he must exclude the f7 square from his way, he must only go there if White plays Kf5. [67.♔e6 leads to the mutual zugzwang position more quickly. 67...♔g7 68.♔f5 ♔f7 later transposes to the game...]

67...♔g7! Not the shortest, but the right path towards e6.

68.♔f4

68...♔f8! After Black found the deep ideas in this simple looking endgame he executes the plan correctly. [68...♔f7 69.♔f5 forces the king to go back to g7 with repetition.]

69.♔e4 ♔e7 70.♔f5 [70.♔f4 is already met by 70...♔e6 71.♔e4 f5+ 72.♔f4 ♔f6—+ followed by Ke5, f4, etc, with an automatic win.]

70...♔f7! Here we are! The mutual zugzwang, but White is on move, therefore Black reaches the e6 square next move with his king. If it was his move Ke7 would allow Kg6.

71.♔e4 ♔e6 72.♔f4

72...f5! It is already possible to advance the extra pawn, because collecting the h5 pawn takes too much time.

73.♔g5 ♔e5 74.♔xh5 ♔f6! The most principled win, squeezing the white king to the corner. This makes the pawn race more easily winning for Black. [However 74...f4 75.♔g4 ♔e4 also wins despite the pawns promoting at the same time... 76.h5 f3 77.h6 f2 78.h7 f1=♔ 79.h8=♔ ♔g2+!—+ and Black wins the queen next move with a check on the h-file.]

75.♔h6 f4 76.h5 f3 77.♔h7 f2 78.h6 ♔f7 79.♔h8 f1=♔ 80.h7 ♔a1# 0-1

**(16) Gelfand, Boris (2751)
- Ding, Liren (2749)**

Ding Liren - Gelfand 2015(1),
2015.07.16

GM Arkadij Naiditsch
Best rating: 2737

This is the first game of the match between Gelfand and the only 21-year old Ding Liren. After very sharp play in the first half of the game, where Ding Liren chose his favorite KID, the game finally led to this opposite colored bishop endgame, which is definitely a draw, but the defense is much more difficult than it looks like. Let's take a look at how things will develop.

52.g4?! A very risky move which needs very precise calculation. [White could have continued with a passive defense after 52.♕f3 52...♖g5 but now Black will try to play h5 and then g5-g4 at some moment. White's plan should be to keep on waiting and to try to prevent Black's main plan. The exchange of rooks would of course lead to an immediate draw, but in apractical game is it very unpleasant to defend such an endgame because Black can keep on playing practically

forever with no risk and White will be forced to defend precisely for a long time to sign the draw.]

52...f4 Of course Black doesn't exchange the pawns, since every exchange is good for the defending side.

53.g5+ ♖g7 The black king has been hunted back, but the g5 pawn is now a potential target and the passed f-pawn could also become dangerous.

54.♖d2 What else to do?! [54.♕g4 54...f3! and it is not easy to see how White can stop the f-pawn from moving.]

54...♖h1! A very nice move. Black is attacking the h3 pawn and at the same time threatening to play Be1 and win the a5 rook.

55.♖b5 ♕e1+ Before taking the h3 pawn, Ding Liren repeats the moves.

56.♖d1 ♕f2+ 57.♖d2 ♖xh3 So Black is already two pawns up and the g5 pawn remains a potential target. The only minus of Black's position is the king on g7.

58.♕c4 White wants to play Rb8 next, with the threat of Rg8 mate.

58...♕h4 Not the best move. [58...♖f8! seems stronger, with the idea of playing Ke7-Kd6, which would solve the only problem of Black's position. 59.♖b7

59...h4! and White can't play 60.♖xh7? because after 60...♗e1+ Black wins the rook and with it the game.]

59.♖c2! Great defense by Gelfand, who makes things as difficult as he can for Black. Now Rb7 is already a serious threat.

59...h5 This move almost leads to a forced draw. [Black could have tried to play a funny position after 59...♗xg5 60.♖xg5 h5 The black pawns look very dangerous. 61.♖d2 White needs to hurry back. 61...♖h6 and Black would keep some winning chances, although the position should be a draw with a good play by White.]

60.♖b7+ Now the f-pawn is falling.

60...♖f8 [60...♖h8 61.♖b8+ ♖g7 62.♖b7+ does not improve things much for Black.]

61.♖f7+ ♖e8 62.♖xf4 ♗xg5 If Black could remain two pawns up he would just be winning, but the problem is that the g6 pawn cannot be protected.

63.♖f1 White wants to play Bf7 next and Black can't do anything about it.

63...♖h2+ 64.♖b3 The safest square for the white king.

64...♖e7 Black couldn't stop Bf7 or Bd3...

65.♗d3 and the g6 pawn is gone.

65...h4 66.♗xg6 Now all White needs to do to secure the draw is to exchange his bishop against the h-pawn and this is easy, but to defend the position R+B vs R is not that easy and Black would keep some practical chances for a full point.

66...♖e2 67.♖f3 Not giving Black any chances of playing h3-h2.

67...♖e3+ and Ding gives up the fight for a full point. Personally I think it is a bit too early even if the position is of course a draw. Black could have played on for a while by first bringing the bishop to g3 and then trying to somehow get to play Rh2 and h3 in a good moment. White would still need to be careful. So, we saw a fighting draw in an interesting opposite colored bishop endgame where White first played very riskily with g4 and then Black did not use all his winning chances. **1/2-1/2**

Golden knowledge. QUEEN against PIECES

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

As we know, an extremely instructive method of studying endgames is to analyze the mistakes of the greats of the game. Why is this instructive? In the middle game, in a normal position there are usually a few playable moves, which it is possible to rank from the strongest until the fifth strongest. Or in modern, computer slang, from 0.60 until 0.10 let's say. In endgames we usually have two options: a correct and a wrong one. And this can explain a huge quantity of mistakes in modern practice, even on the highest level. The path is narrow in endgames and sometimes even top players can slip, especially with the modern time control with increments. Such time pressure demands better (or I can even say more automatic) endgame knowledge.

Every player must know basic endgame positions and needs to have knowledge of methods used in endgames.

Queen against pieces endgames have a few important theoretical positions in which it is important to have the correct knowledge.

(17) Djingirova, E.-Dworakowska, J.

Istanbul TUR, 2003

In some cases the rook can be supported by the pawn, which is in reality a passed pawn. If the pawn runs for promotion, then it can be done very quickly. The king also has to be as close as possible to the rook and the pawn..

90. ♖f8? [90.g6 was correct- the function of the passed pawn is to go forward!]

90... ♔g4 91.g6 ♚h2+ 92. ♔g7 ♚g5 93. ♖g8 ♚c7+ 94. ♔h8 ♔h6 95.g7 ♚f7 0-1

(18) Zuidema, C.-Hort, V.

Oerebro, 1966

93.♔g5? [93.♖f6 was threatening to come to f7 and then to push the pawn.]

93...♖d4 94.♖f6 ♖e3+ 95.♔f5 ♔h4 96.♖e6 ♖g5+ 97.♔e4 ♔g4 98.♔d4 ♔f3 99.♔c4 ♖f5 100.♖c6 ♖e5 101.♔b4 ♔e3 102.♖c3+ ♔d2 103.♖c6 ♔d3 104.♔a4 ♖d5 105.♖b6 ♔c3
Very instructive technique of pushing both white pieces far away from the pawn! **0-1**

(19) Jaffe, C.-Chajes, O.

Karlsbad, 1911

75.♖d8?? [75.♔b7 was enough for a draw: 75...♖b5+ 76.♔c7 ♖a6 77.♖d6+ ♔e5 78.♔d7]

75...♖b4+ 76.♔c7 ♖a5+ 77.♔c8 ♖a7 78.♖d1 ♖a4 79.♖c1 ♔d6 80.♔b7 ♖b5+ 81.♔c8 ♖a6+ 82.♔b8 ♖b6+ 83.♔a8 ♔c7 0-1

(20) Tukmakov, V.-Ornstein, A.

Thessaloniki (ol) , 1984

59.♔d3? Now the black king comes to its pawns and saves the draw. The only possibility was [59.♖b7! 59...♖c5 60.♔d3 ♖e5 61.♔c3 trying to keep both pawns under control and not allowing the opponent's king to come to help the most dangerous one.]

59...♔d5! = 60.♖b7+ ♔c5 61.♖c7+ ♔b4 62.♖xd6+ ♔b3 63.♖a6 ♔b4 64.♖a1 ♖c8 65.♖e1+ ♔a4 66.♔d4 ♖c4+ 67.♔d5 ♖c8 This is a theoretical draw since the white king can't help attacking the black pawn.

68.♖e7 ♖c4 69.♖a7+ ♔b4 70.♖a6 ♖c5+ 71.♔d4 ♖c4+ 72.♔d5 ♖c5+ 73.♔d6 ♖c4 74.♔d7 ♖c1 75.♖d6+ ♔a4 76.♖f4+ ♖c4 77.♖f1 ♔b4 78.♖a1 ♖c5 79.♖b2+ ♔a4 80.♖a1+ ♔b4 81.♖e1+ ♔a4 82.♖d1+ ♔a5 83.♖a1+ ♔b4 84.♖b2+ ♔a4 1/2-1/2

(21) Galkin, A.-Timofeev, A.

Russia, 2005

51. ♖f5? [It was necessary to come closer to the pawn with the king. With the g- or b-pawns it is a draw not only with the pawn on the second or third rank, but even with the pawn on the fourth rank, when a normally placed king and rook secure the draw. 51. ♖f2 51... ♜d1 52. ♖g3 ♜g1+ 53. ♖h3! ♜e3+ 54. ♖h4 ♜f2+ 55. ♖h3]

51... ♜h1! 52. ♖f2 ♜h2+ 53. ♖f3 ♜h3+ 54. ♖f2 Because Qe3 mate would follow after Kf4 White has to give up his only hope, the g4 pawn...

54... ♜xg4 55. ♖f3 ♖e4 56. ♖e3+ ♖f4 57. ♖d3 ♜h4+ 58. ♖e2 ♜h2+ 59. ♖d1 ♜b2 60. ♖e1 ♜c2 61. ♖d2 ♜c1+ 62. ♖e2 ♖e4 63. ♖d8 ♜c4+ 64. ♖d1 ♜a4+ 65. ♖e2 ♜b5+ 66. ♖d1 ♖e3 67. ♖c2 ♜c6+ 68. ♖d1 ♜b6 69. ♖c8 ♜b1+ 0-1

(22) Gelfand, B.-Ivanchuk, V.

Belgrade Investbank, 1995

77... ♖e6? [The right move was 77... ♖g4!? 78. ♜f6 ♖d5+ 79. ♖e3 ♖d4=]

(9...♕f5? 10.♜g8+!=) 10.♜g5 ♖f4 11.♕g6 ♖f7+ 12.♕h6 ♖f6+ 13.♜g6 ♖e5!-+ (.)]

2...♖f7+ 3.♕h6 [3.♕h8 3...♖f5-+]

3...♖f5 [3...♕f5 doesn't lead anywhere: 4.♜g5+ ♕f6 5.♜g6+]

4.♜g1 ♖f8+

[Now simpler was the difficult move 4...♖h3! (/ Kf5) 5.♜g5 ♖h4 6.♜g6 ♕f5-+]

5.♕h7 ♖f7+ 6.♕h6 ♖d5 7.♜g6 [7.♜f1+ 7...♕g4 8.♜g1+ ♕h4-+]

7...♖e5!? [Similar as to what was written before, there was an easy way here with 7...♖h1! / Kf5-+]

8...Rg8 9...Kh7 [9...Rg6? 9...Kh8# #]

9...Rf7+ 10...Kh6 Rf6+ [Of course not falling for the stalemate! 10...Rxf8? =]

11...Kh7 Kh5? [Once again easier was 11...Rf5+ 12...Kh6 Kh3! -+]

12...Rg1? [Now White could have activated her passed pawn: 12.h6! 12...Re7+ 13.Rg7 Re4 14.Rg8 Kh6+ 15.Kh8 Kh4 16.Kh7! = (16.h7? 16...Rd4! -+)]

12...Rf7+ 13...Kh6 Rf8+? [13...Rb7! was the difficult move that was winning here. 14.Rg5+ (14.Rf1+ 14...Kg4 15.Rg1+ Kh4 -+) 14...Kf4! 15.Rg6 Rh1! / Kf5 -+]

14...Kh7 Re7+? [14...Rf7+ 15.Kh6 Rb7! -+ 16.Rf1+ Kg4 17.Rg1+ Kh4 it is the point, as the queen controls the h1 square.]

15...Kh6?? [To a drawish set up leads 15...Rg7 / h6=]

15...Re3+ This example shows how difficult for both sides it is to play these endings with rook and passed pawn. **0-1**

(25) Dimitrov, V.-Lautier, J.

Adelaide, 1988

Here is very instructive endgame on how to get a winning position against rook and pawn.

48...Ra7! 49...Ka2 [49...b1 did not help: 49...b4! 50.axb4 Rh7+!! (50...axb4 51.Re4+! Kh3 52.Rd4+=) 51.Ka2 axb4 52.Rxb4 Kh2 -+]

49...b4! 50.axb4 axb4+ 51.Kb3 bxc3 52.Kxc3 [52.bxc3 would lead to a theoretically lost position.]

52...Rc5+ 53.Rc4 Re3+ 54.Kb4 Kh2 The white king is in the front of its own pawn. The only chance to draw would be to try to play b4 and to move the pawn forward like in Tukmakov-Ornstein.

55.Rc3 Rb6+ 56.Ka3 Ra6+ 57.Kb3 Ra5 58.Rc2+ Kh1 59.Rc3 Kh2 60.Rc2+ Kh1 61.Rc3 Ra6! (.)

62.Kb4 Ra2! This move forces the pawn to move forward.

63.b3 ♖a6 64.♞c4 ♔d2 65.♞c5 ♖b6+ 66.♞b5 ♖d4+ 67.♔a5 ♖a7+! 68.♔b4 ♔c2! Now the king finally comes from behind.

69.♔c4 ♔b2 70.♔d5 [70.♔b4 70...♞c7-+]

70...♞c7! 71.♞b4 ♔a2! 72.♞b5 ♔a3 0-1

Chess and the City. The unbearable lightness of aging

WGM Elisabeth Paehtz

Best rating: 2493

Turning thirty this January was not a particularly shocking experience for me. I celebrated, enjoyed nice food, pretended to be a bit upset (you are supposed to show some melancholy for the lost youth on such occasions), got cheered up by friends who pretended to believe that I was a bit upset, and that was it. Just a nice party and life goes on, after all at thirty you are by no means old, and libraries are full of books explaining how life starts at 50-60 or some even more daring numbers. That's what I thought, until last week began. Yes, last week changed my life perspective and in particular my perspective on age. And the worst part is that nothing astonishing happened, nothing tragic or catastrophic, it all started with an innocent looking invitation. I approached a 15-year old friend of mine and asked her, "I have some time to spend in Rome, would you like to come and visit me, you could see the city and we could hang around together, do some sports, shopping etc." Imagine my surprise when shopping turned into exhausting marathons, hanging out together meant walking for 8 hours a day under the burning sun and "some sports" meant following a schedule that would have been more appropriate for Olympic athletes.

Well, at least that's how it felt to me, but not to my young friend who was always full of energy and ready for more walks, more exercises, more stairs. Since she is not the secret daughter of Usain Bolt and, as far as I know, does not plan to join the SAS, it can only mean one thing: I'm old. Well, at least compared to her. I guess it's not rocket science to understand that 15 years of difference matter, but to FEEL it...to feel it brings disappointment to a higher level. Now, the last part of the article should be devoted to the explanation of the benefits of being 15 years older, for example I should convince the readers that I have become wiser with time. But that would be an outright lie, and I try to not lie too often to you. Thus I will simply close the article with a picture of me as a kid, a rather lame choice, but then maybe this is the main advantage of being older, I have my own newsletter and I can fill it as I like! :)

Clash of the Titans

(35) Petrosian, Tigran V
- Suetin, Alexey S [E94]

GM Kamil Miton
Best rating: 2655

1.c4 ♖f6 **2.♗c3** g6 **3.e4** d6 [3...e5!? 4.♗f3 ♗c6 5.d4 exd4 6.♗xd4 ♕g7 7.♗c2! (7.♕e3 7...♗g4 with the same idea as in the Maroczy. 8.♖xg4 ♗xd4 9.♖d1 c5 with his strong knight on d4 Black cannot be worse.) 7...O-O 8.♕e2 ♖e8 9.f3 White keeps an advantage thanks to his space advantage. Black is not able to execute his main plan with c6-d5.]

4.d4 ♕g7 **5.♕e2** O-O **6.♗f3** [6.♕g5 is the Averbakh line.]

6...e5 **7.d5** This line is called after Petrosian. Nowadays more popular is [7.O-O 7...♗c6 8.d5 ♗e7 White has a few plans here but the basic one is to advance the pawns on the queenside. Of course Black's main idea is to play f7-f5.]

7...♗bd7 **8.O-O** ♗c5 **9.♖c2** a5 Securing the knight on c5.

10.♕g5 A typical move in many KID lines. White provokes h6, which can be a weakness.

10...h6 **11.♕e3** ♗fd7 [11...♗g4 This move looks more active. 12.♕xc5 (12.♕d2 12...f5↗ with Nf6 next and the important e4 square is not well controlled by White.) 12...dxc5 13.h3 ♗f6 14.♗xe5 ♗xd5 15.cxd5 ♕xe5 16.f4 ♕d4+ 17.♖h1 With a complex position where it seems that with the strong bishop Black should be fine, but on the other hand White has strong central pawns.]

12.♗d2 f5 **13.exf5** [13.f3 13...f4 (13...♕f6!? 14.♕xh6 ♖f7 and the h-file can be useful for the attack!) 14.♕f2 ♕f6 It is a typical idea to exchange the limited bishop. 15.♖h1 (15.b3 15...♕h4 16.a3 ♕xf2+ 17.♖xf2 ♗f6 18.b4 ♗a6 19.♖b2 c5 20.dxc6 bxc6 and Black is fine.) 15...♕h4 16.♕g1 ♕g3 (16...♗f6 17.b3 ♗h5 18.♖fb1 and now the following knight sacrifice is dangerous: 18...♗g3+ 19.hxg3 ♕xg3 20.♗f1!) 17.b3 ♖h4 18.a3 ♗f6 19.b4 ♗h5 20.♖fc1 axb4 21.axb4 ♖xa1 22.♖xa1 ♗a6 White can't play 23.♖b1?

because of 23...♗xb4! 24.♖xb4 ♕xh2 25.♕xh2 ♗g3+ 26.♖g1 ♗xe2+ 27.♗xe2 ♖e1+ 28.♗f1 ♖xb4—+]

13...gxf5 **14.f4** White also could try [14.f3 14...♗f6 to improve his pieces with Bd7-Qe7-Rae8 etc. (14...♖h4 15.♗b5 Xc7) 15.a3 (15.♗b3 15...b6=) 15...a4 16.♕xc5 dxc5 17.♗xa4 b6 18.♗c3 ♗e8! With great compensation.]

14...exf4 Black wants to control the useful e5 square for his knight. [14...e4 also leads to unclear play. 15.♔h1 ♘f6 16.b3 (16.♙d4? with the idea Nd1-Ne3, but it loses to 16...♘xd5 17.♙xg7 ♘b4+) 16...♙d7 17.a3 ♘e8 18.b4 ♙f6 Black is on time with his counterplay. 19.♖ac1 axb4 20.axb4 ♘a4=]

15.♙xf4 [15.♖xf4 15...♘e5 16.♖af1 ♙e7 and the rooks don't do anything on the f-file.]

15...♘e5 16.♖ae1 ♙d7 17.♘f3 ♙f6 18.♙d2 Both players improve their pieces.

18...♖ae8?! looks logical but is not accurate. Black could reduce the material after [18...♘xf3+ 19.♖xf3 (19.♙xf3 19...♙d4+ 20.♔h1 ♙xd2 21.♙xd2 ♘d3 (21...♖ae8=) 22.♖e7 ♘e5) 19...♘e4 (19...♙d4+ 20.♙xd4 ♙xd4+ 21.♔f1) 20.♙c2 ♖ae8 looks fine for Black.]

19.♘xe5! It is time to change the structure a bit.

19...dxe5 20.♙e3 b6 My first intuition told me that thanks to the well-placed pieces and central pawns Black should be completely fine here, but after thinking about it a bit longer I realized it is not easy to find a plan. In case Black moves one of the pawns then the f4 or e4 square will be weak! White can improve his position by creating pressure against the f5 pawn.

21.♙h5 ♖e7 22.♙d1 White could also keep the bishop on h5

to paralyze the black rooks. [22.♔h1 22...♙d6 23.♖e2 ♔h8 24.♖ef2+=]

22...♙d6 23.♙c2 ♖ef7 [23...e4 24.♖f2 ♙e5 25.g3 ♖f6 26.♖ef1 with Ne2-Nf4 next, but Black could try h5-h4.]

24.♔h1 ♖a8 And indeed, Black has no idea what to do.

25.♖e2 ♙f8 26.♖ef2 True to his style, Petrosian placed all his pieces perfectly.

26...♘b7

27.♙e2! The queen is going to h5.

27...♘d6 28.c5 bxc5 29.♙xc5 ♖b8 30.b3 ♙c8 [30...e4 31.♙e3 a4 32.♘e2 (32.bxa4 32...♘c4!) 32...axb3 33.♙xb3 The knight is going to e6. Black's position is very difficult.]

31.♙h5 ♙a6

32.g4! It is time to crush Black's position!

32...f4 33.♖e1 It looks like Petrosian sometimes tried to be too accurate! :) He takes control of the e4 square instead of mating with [33.g5! 33...e4 (33...♖f5 34.♙xf5 ♜xf5 35.♖g1; 33...hgx5 34.♙g6 ♖f6 35.♖h7+ ♙f8 36.♜e4+-) 34.gxh6 (34.♜xe4± is simpler to see.) 34...♙xc3 35.♖g6+ ♙h8 36.♙xd6 ♖xd6 37.♖xf7 ♖f8 38.♖xf8+ ♖xf8 39.♖xf4 ♖d6 40.♙xe4 With a winning position, but of course it was not possible to see this line during the game.]

33...♖c8 34.♙xd6? More accurate was [34.♖g6 34...♙xg4 35.♖xe5 f3 36.♖h7+ ♙f8 37.♙g6 and Black will not survive.; 34.♖g1 is also good, with g5 next.]

34...cxd6 [34...♙xg4 35.♙h7+ (35.♖g6 35...cxd6 36.♜e4 ♙f5 37.♖xf7+ ♙xf7 38.♜xd6+ ♙f6 39.♜xc8 ♖xc8 40.♙xf5 ♙xf5 and it looks like Black is better here!) 35...♙h7 36.♖xf7 cxd6 37.♜e4 ♖b7 38.♜f6+ ♙h8 39.♖e8+ ♖xe8 40.♜xe8 ♙f8 With a good position for Black.]

35.♙g6 [35.♜e4 35...♙xg4 (35...♙e8) 36.♖xf7+ ♙xf7 37.♜xd6+ ♙f6 38.♜xc8 ♖xc8 39.♙e4

39...♙f8! Activating the bishop and stopping the pawn. (39...♙f5 40.♖d2 ♙xe4+ 41.♖xe4 ♙f5 42.♖c4 ♖d8 43.d6 e4 44.♖d5+-) 40.♖g2 ♙f5 41.♙xf5 ♙xf5 42.♖g8 ♖b8! Preventing d6. Black has good practical counterplay.]

35...♖f8 36.♜e4 f3? I suppose that both players were in time

trouble here. Suetin was probably afraid to open the g-file but he should have taken the pawn on g4! [36...♙xg4 37.♖h4 f3 38.♜xd6 (38.♖g1 38...♖f4-) 38...♖d7 39.♜c4 ♖f4 and I don't know who is better here.]

Editorial Preface

A lot of action on the chess board could be witnessed during the past week, but let us start with the finished events:

The match between Boris Gelfand and Ding Liren in China ended in a deserved 3-1 victory for the Chinese superstar.

The friendly match between China and Russian ended in a 14-11 victory in the men's section and a dominant 15-10 score in the women's, both in favor of the Chinese. The Chinese also won the blitz leg.

After a clear domination by the Chinese players in team events in the past years the question is coming up if some other team will able to compete against the Chinese machine in the next Olympiad in Baku!

The traditional Najdorf Memorial was won by Igor Kovalenko with a fantastic score of 8/9.

The Dutch National Championship was "as usual" won by Giri with 5.5/7.

Currently the super tournament of Biel is under way with a lot of decisive games and great fighting chess! If you have some free time, don't miss the games!

As usual, the current issue of Top GM Secrets brings you very colorful chess material from the recent top events combined with many other interesting sections. Enjoy!

Two best games of the past week

(1) **Matlakov, Maxim (2691)**
- **Wei, Yi (2724) [D85]**

China-Russia Match 2015(5.3),
2015.07.20

GM Arkadij Naiditsch
Best rating: 2737

We will see another great game by Matlakov, where he crushes the lately so strong playing Wei Yi. After the opening White manages to quickly put a lot of pressure on Black's position and later on to totally dominate the game, even making Black resign in a position with equal material. A very nice game to watch. Enjoy!

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 This time the game enters the very main Gruenfeld.

4.cxd5 ♘xd5 5.e4 ♘xc3 6.bxc3 ♘g7 7.♔a4+ This is a relatively rare line, the very main being 7.Nf3.

7...♔d7 The main idea of 7.Qa4 is to avoid the c5 push for a couple of moves, which White needs to complete his development.

8.♘b5 Of course not exchanging the queens! If the queens are gone from the board, Black usually has an excellent endgame.

8...c6 9.♘e2 O-O Black wants to play c5.

10.♔a3 and White is preventing it.

10...b6 Yet again preparing the c5 push.

11.♘f3

11...♘b7 Maybe Wei Yi didn't choose the best move order. [To me it seems like Black is fine after 11...c5 12.O-O (12.d5 12...e6 Here we have a position which is close to the game but in a much better version for Black.) 12...cxd4 13.cxd4 ♘b7 and I believe the position is a very fighting one, but should be close to equal.]

12.O-O c5 So Black finally pushes c5, but White has an excellent counter measure up his sleeve...

13.d5! Perfect play! The black bishop on b7 is getting blocked now and the knight from b8 is having serious trouble getting into the game.

13...e6 14.♘e3 Another good move, preparing to play Rad1, bringing the last piece into the action.

14...exd5 15.♔ad1

15...d4?! In my opinion this is at least a very risky decision. [I think Black could have continued with 15...♔d6 16.exd5 ♘d7 and this quite typical position should be evaluated as minimally better for White.]

16.cxd4 ♙xe4 17.dxc5 Now that the center is fully opened it is extremely important that White's development is much better than Black's one, so White has some time to create a few threats- and this is what Matlakov is going to do...

17...♚b7 This is probably the best position for the black queen.

18.♖fe1! A silent but very unpleasant move for Black! White does not hurry to force things immediately, but is threatening to play Ng5 now, after which Bxg2 will not be possible any longer because of f3, and the rook on e1 could often be a useful piece. [18.♖d6 was another nice possibility.]

18...♞d7 The knight is finally out.

19.♙a6! Another great move by White to destabilize the position of the black pieces.

19...♚c7 [Not better is 19...♚c6 20.♖d6 ♚c7 21.c6 and White is clearly better.]

20.♙b5 Using the fact that Black can't take the c5 pawn.

20...♞f6 [20...♞xc5? loses a piece after 21.♙xc5 bxc5

22.♖xe4; Black could also have tried a tricky move like 20...♙f5 21.c6 but here White is also clearly better after 21...a6 22.♙a4 b5 23.cxd7 bxa4 24.♖d2 and the d7 pawn gives White a big plus.]

21.♙d4 Black is suddenly in big trouble!

21...♙f5 What else to do?! To play 21...Bxf3 22. Qxf3 and give White the bishop pair and a strong c-pawn is a very unpleasant option...

22.c6 It is very nice to see how the white pieces are dominating the center.

22...a6 23.♙e5 A nice "zwischenzug" which allows White not to worry about the c6 pawn.

23...♚c8 24.♙a4 b5 25.♙b3

25...a5 Wei Yi is still hoping to escape by creating some threats on the queenside. [25...♚xc6 26.♖d6 and the f6 knight is gone.]

26.♚b2! Another safe and strong move by White!

26...a4 [26...♞h5 would lead to a total domination of the white pieces: 27.♙xg7 ♞xg7 28.♖e7 a4 29.♙d5 with a winning position for White.]

27.♙xf6 ♙xf6 28.♚xf6 axb3 29.axb3 ♙c2 Black is

equalizing the material, but not saving the game. The white queen and knight make for an excellent combination to mate the black king...

30. ♖d7 ♗xb3

31.h4! Maxim shows no mercy. The simple threat of playing h5-h6 is deadly.

31...♖a6 32.♗e5 The c6 pawn is saved and Black is completely paralyzed. A really beautiful positional win by White and another example of how dangerous it is to play without the center and with a worse development, especially when the position is very opened. **1-0**

(2) Rapport, Richard (2671) - Adams, Michael (2740) [C36]

48th Biel GM 2015(2.1),
2015.07.21

GM Csaba Balogh
Best rating: 2672

Richard Rapport continues playing in his highly entertaining style- even against the World's best players. Adams takes up the challenge and they play a very interesting game...

1.e4 e5 2.f4 The King's Gambit! We can say that we had to wait for 2 moves for the first sacrifice, but of course this opening must be taken very seriously, as World Champions have employed it successfully in the past.

2...exf4 3.♗f3 d5 Black has many options, but this is given as an easy equalizer by the theory.

4.exd5 ♗f6 5.♗e2 This already had to come as a surprise for Black and must have been a home preparation by White! The two main moves are Bb5 and Bc4.

5...♗xd5 6.c4 White wants to build a huge center with c4-d4 and later win back the material with Bxf4. If he manages to do all this he will reach a stable advantage.

6...♗e7 Black had many other options at his disposal. Adams wants to retain his extra pawn by driving his knight to g6.

7.♗c3 This is the official novelty. 7.d4 was played in all the games before. It could still be a transposition if White plays d4 next, but Rapport had something else in mind (or in his preparation).

7...♖g6

8.h4!? Wow! I am not so sure about the objective strength of this move. Of course it is nice to send back the knight with h5, however Black also has his answers and later this move could rather be a weakening, as it might be difficult to hide the white king.

8...♗e7 The most natural reply. Developing and giving the knight a good square to go to after h5. [The alternative was the simple 8...h5!? preventing h5 and consolidating the nice g4 square for the bishop.]

9.h5 ♖h4 10.♗d5! At least White is very consequent! He does not count the pawns, but he rather aims for active piece play and quick development.

10...♗c6! Adams also knows that developing his minor pieces is more important than grabbing some pawns... [10...♗xg2+ is met by 11.♗f2 ♖h4 12.d4 and the g2 pawn does not count that much now.]

11.d4

11...♗xg2+! The huge difference to the previous line is that Black can favorably exchange some pieces one3!

12.♗f1! Rapport feels the dynamism very well! [12.♗f2 is more logical, but less strong because after 12...♗e3! 13.♗xe3 fxe3+ 14.♗xe3 Black has a free move to play 14...♗f6! and now the d5 move can be met by Ne5! Black is a pawn up and he has nothing direct to fear.]

12...♗e3+ 13.♗xe3 fxe3 14.d5! It is clear that without the e5 square Black must do something artificial, but of course he will still be a pawn up even after White takes on e3!

14...♗b4 15.a3 ♗a6 The knight is temporarily on the edge of the board, but it might quickly come back through c5!

16.♗xe3 White has achieved some compensation. He has some lead in development, his pieces are standing well and he is ready to explode the kingside with h6. However a pawn is a pawn and Black has no structural weaknesses.

16...0-0

17. ♖c2! White keeps an eye on the h7 square. If it was his move he would play Bd3 and suddenly it is not easy to deal with the h7 pawn. g6 opens the h-file and provokes dangerous sacrifices on g6. h6 again fixes the pawn structure and White might have very dangerous attacking ideas connected with Rg1-Bxh6 or Bd4. The third reply would be f5, but this is very bad positionally as it locks his own pieces, especially the bishop on c8, and gives up the e6 square. Therefore Adams decides to prevent this Bd3 idea with a developing move.

17... ♘g4 A very natural move, but it also has the drawback that Rapport immediately points out with his next moves...

18.h6! g6

19. ♖c3! ♘f6 [19...f6 is very ugly, but Black should have

played like this. Qd7 and Rae8 are coming next.]

20. ♘d4! This is the point and suddenly White creates threats on the g7 square. The only natural move of taking on d4 does not work because after Qxd4 the g4 bishop falls.

20... ♘e7! Cold-blooded and strong, but of course it allows a repetition unless Black wants to play on with 19...f6.

21.c5 Rapport likes playing with the initiative, refuses the repetition and takes further ground in the center. In the meantime he completely excludes the a6 knight from the game. The drawback is that the d5 pawn loses its stability. [However it was stronger to bring the rook into the game with 21. ♖e1! 21... ♖e8 (21... ♖d7 22. ♘g2 threatens with Ne5! It is not easy to suggest a good move for Black.) 22. ♘e5! ♘xe2+ 23. ♖xe2

with very strong compensation for the pawn. The problem is that Black could neutralize the g7 square with Bf8, but it leaves the f6 square unprotected after Ng4!]

21... ♖e8! Calm defense again! Black wants to put his bishop on f8 to not worry about the g7 mate anymore and he also activates his rook. [21... ♖xd5 was bad in view of 22. ♘f2! with the threat of Qg7 mate and after 22...f6 23. ♘c4! wins the queen.]

22.c6 ♘f8!? Black opens the e-file for the rook. He is ready to take on d5 after which the sacrifices on e2 might already work. After the the white king is naked, crushing sacrifices around it should not be such a big surprise. [The machine suggests and likes Black after 22...b5!? with the idea of 23.♘xb5 ♖xd5 counter-attacking the f3 knight.]

23.cxb7 ♖b8 24.♘xa6 Taking the knight "for free", but this is objectively a mistake. [White should have played 24.♘g7! after which the repetition is forced. 24...♘c5 (24...♘d6? 25.♘xa6 already wins a piece for nothing.) 25.♘d4 (25.♘xa6? 25...♖xd5 is still too strong.) 25...♘f8=]

24...♖xd5 25.♔f2 [25.♘e2 is strongly met by 25...♖xe2! 26.♔xe2 ♘xf3+ 27.♖xf3 ♖xd4 Black is an exchange down, but he is going to have 2 pawns for it after taking one of the b-pawns. 28.♖ab1 ♖b6!± with Rxb7 next. Black overtakes the initiative since his king is already safe and the f8 bishop protects everything, while the white one in the center of the board will get under the attack of the heavy pieces.]

25...♘xf3 26.♘c4

26...♖e2+?! Very pretty, but wrong! This move leads to a forced repetition. [Black could maintain his advantage after 26...♖e4! 27.♖ae1 ♖f4 The only move to avoid big problems is 28.♘xf7+! ♖xf7 29.♖xf3 but Black ends up with an extra

pawn after 29...♖xe1 30.♖xe1 c5 31.♘e3 ♖xb7± The win is still doubtful because White is active and he might transpose to a drawish rook endgame, but of course the extra pawn will guarantee a long suffering for White.]

27.♘xe2 ♘xh1

28.♖xh1! Deflecting the queen from the d4 bishop. Perhaps Adams missed or underestimated these exchange sacrifices, which seem completely unsound at first sight, but together with the following move they are very strong!

28...♖xh1 29.♖xc7! White creates the threats of Qe5 and the rook is also under attack! Suddenly it is Black who needs to find the right moves to force a draw!

29...♖h4+! [29...♖xb7 is met by 30.♖e5! f6 31.♘c4+ ♖f7 32.♖e6→and it is clear that something has gone wrong for Black.; 29...♖e8 is bad in view of 30.b8=♖ and the two queens protect everything. Black does not even have a perpetual check. 30...♖h4+ 31.♔f1 ♖h1+ 32.♘g1+--]

30.♔f1! [White also cannot play for more with 30.♔g2 30.Ke3 drops the h6 pawn with check... 30...♖e4+! 31.♘f3 ♖xb7! and White does not have Qe5!]

30...♖h1+ 31.♔f2 ♖h4+ 32.♔f1 ♖h1+ 33.♔f2 A great fighting game that was not without mistakes, but of course in such a sharp position it is impossible to play perfectly. **1/2-1/2**

Young & Talented

GM Etienne Bacrot

Best rating: 2749

(3) Salem, AR. (2615)

- Duda, Jan Krzysztof (2632) [E18]

Martuni(6),
2015.07.17

Duda just won the Lake Sevan tournament in Armenia. The 17-year old Polish grandmaster, 7th on the FIDE list under 20, is on a rush after winning 22 rating points in the French league in June. Here he wins against the best UAE player.

1.d4 ♘f6 **2.c4** e6 **3.** ♘f3 b6 **4.g3** ♙b7 **5.** ♙g2 ♙e7 With Black Duda usually chooses slow openings, on this day the Queen's Indian.

6. ♘c3 ♘e4 **7.** ♙d2 ♙f6 **8.O-O** O-O **9.** ♘e5 ♘xc3 **10.** ♙xc3 ♙xg2 **11.** ♙xg2 c5 **12.dxc5** bxc5 **13.** ♙d6 ♙e7!? This is quite a dangerous choice in this very important theoretical position. 13...Qb6 is the usual move.

14. ♙d3

14...f6 Damaging the structure a bit, but Black needs to chase the knight from e5. [14...d6 15. ♙f3 ♘d7 16. ♘c6 ♙e8 17. ♙fd1+=]

15. ♙f3 Very tempting but not the best. White might be slightly better after the simple 15.Nf3.

15... ♙c7 **16. ♙xa8!?** is logical after White's 15th move but 16.Nd3 was still a better move.

16... ♘c6 **17. ♙xf8+**

17... ♙xf8 At first I thought that White should be better but it is difficult to make the two rooks work together and the white king is also a bit weak, so Black quickly uses his queen's strength.

18. ♘xc6 looks good but Black's next move proves to be very strong. [18. ♘f3 18...d5 19.e3 looks good but after (19.cxd5 19...exd5 20.e3 ♙e7 and Black is better.) 19...dxc4! White has some problems on the light squares, for example: 20. ♘d2 ♙d7 21. ♙fd1 ♙d5+ 22. ♙g1 h5! with unclear play.]

18... ♙xc6+ **19.f3** is unfortunately forced, since after [19. ♙g1 19... ♙e4! 20. ♙fd1 d6 Black wins a pawn without opening the lines.]

19... ♙a6! **20.b3 d5!** I tried hard to find a convenient defense for White but the position is very tough.

21.e3 It is understandable that White wants to prevent d4, but this move also weakens his king. The alternatives were [21.♖fd1 21...d4! (21...dxc4 22.♔f1 should be fine for White.) 22.♘d2 e5 23.e4 Avoiding the e4 break. 23...♘d6 followed by Bc7-a5 and White might hold the position, or not!; 21.cxd5 is strongly met by the following forced line: 21...♙xe2+ 22.♖f2 ♙e3 23.♘d2 ♙d4 24.♖e1 exd5 25.♖e8 ♔f7! 26.♖d8 c4! 27.bxc4 ♘c5! 28.♘e1 ♙xc4+]]

21...dxc4 22.♔f2 ♙a3 is maybe the best move again. Black simply improves all his pieces and maintains White's rooks in defense. [22...e5!? is also a possibility in order to have the e4 break at some point.]

23.♖fb1 ♘d6

24.♔e1 An ugly move but what to do!

24...h5 I like such moves, improving the position when your opponent has no good ideas.

25.♔d2 ♙a6 White protected the bishop to threaten bxc4 and managed to push back the queen but now his king is in the center.

26.♖d1 ♘c7 27.♔c2 It was not better to go back to the kingside: [

27.♔e1 27...♙b7 28.♔e2 ♙b5 29.bxc4 ♙xc4+ 30.♖d3 h4!—+]]

27...cxb3+? The first inaccurate move after the opening! Some more slow moves to improve the position would have done the job. [27...♔h7!? works because White cannot play actively: 28.♖d7 ♘d6! 29.♘xf6 cxb3+ 30.axb3 ♙e2+ and the white king has no safe place. 31.♔b1 ♙d1+ 32.♔b2 ♘e5+! 33.♘e5 ♙xd7 is one of the winning lines.]

28.axb3 ♙e2+ 29.♖d2 ♙xf3 30.♖xa7 White finally gets some activity!

30...♔e4+

31.♖d3?? [White almost had the draw: 31.♔b2 31...♗e5 (31...♖c6 32.♖a4 and it would be difficult to improve the position for Black.) 32.♖dd7! ♗xc3+ 33.♔xc3 ♖xe3+ 34.♔c4=]

31...c4! A very strong move. The black bishop joins the attack and White cannot connect the rooks on the 7th rank.

32.bxc4 ♗b6! 33.♖d7 White's pieces are uncoordinated and his position is lost. [33.♖e7 33...e5 34.♔d2 ♔h7!—+; 33.♖a4 33...♗xe3—+]

33...♖xc4 34.♔d1 e5 35.♗d2 ♔h7 36.♔e1 ♖e4 37.♔d1 ♗d4 38.♖7xd4 exd4 39.♖xd4 ♖f3+ 40.♔c2 ♖e2 One more pawn is doomed, so White resigned. After this nice game Duda finished with 3 draws to take clear first place in this strong young GM tournament. **0-1**

GM Csaba Balogh
Best rating: 2672

At first sight it looks like White is in big trouble because he is an exchange down and his king is under a mating attack. The question is if the d6 pawn gives him enough counterplay to save the game or not?! I guess both players were already in time trouble, but White still manages to find a beautiful way for salvation.

48. ♖a8+! [The immediate 48.d7 loses to 48... ♜f2+ 49. ♔g5 (49. ♔xh5 49... ♜xh2+ 50. ♔g5 (50. ♔h4 50... g6+ 51. ♔g5 ♜c5+-- and the bishop falls with mate.)

50... ♜c5+!! deflects the bishop and forces mate: 51. ♔xc5 ♜h6+ 52. ♔f5 ♜f6#) 49... ♜d2+! and compared to the game the f6 square is not free for the king, which means the loss of the d7 pawn... 50. ♔h4 ♜xh2+ 51. ♔g5 ♜d2+ 52. ♔h4 ♜xd7--]

48... ♔h7 49. ♜e4+! White provokes g6, which becomes a very important factor in the later stage of the game!

49... g6

50.d7! It is a kind of all or nothing move. It is impossible to foresee all the consequences, but at the same time White had to go all in and pin all his hopes to this move, because it is clear that with such a king he cannot survive for long, he must create some direct threats. White wants to promote his queen, therefore Black also has no time to waste...

50...♔f2+ 51.♔g5 ♕d2+ 52.♔f6! We can see the point of forcing the g6 move now!

52...♖c6+!? A very nice idea indeed, but unfortunately it does not help. The rook cannot be taken because of mate in one. [The other winning attempt is 52...♔xd7 53.♔xf7 Qxg6 threatens with mate now... 53...♔d3! (Surprisingly 53...♖c6? loses because suddenly the black king becomes the one who gets mated after 54.♔e5!+-) 54.♔xd3 ♖xd3 55.gxh5 ♖xf3+ 56.♔e6 gxh5 57.h4! ♔g6 58.♔d5! ♔f5 59.♔d4!= We have reached a famous theoretical draw. The point is that Black cannot cut the white king with one more line which would be essential for the win. White just waits with Bd8-e7-g5 and if he can, he plays Ke3. The winning method would be to sacrifice the rook for the h4 pawn, but he needs two moves for this (Rh3 and Kg4), but it allows Ke4 and in case of Rxh4 Bxh4 Kxh4 Kf3 the game is drawn because the white king is in time to squeeze his opponent to the h-file. By being cut with one more file, this would already work for Black.]

53.♔xf7 [53.♔xc6? 53...♔f4# is a nice motif!]

53...♔a2+ [53...♔xd7? loses again to 54.♔e5!+-]

54.♔e8 [54.♔f8? 54...♔g8# is another pretty mate!]

54...♔g8+ 55.♔f8 ♖e6+ White lost his queen and it seems like the game is over. However, there can be miracles in chess...

56.♔xe6! ♔xe6+ 57.♔e7 Despite being a queen up, Black cannot win. The pawn on d7 is too strong.

57...♔g8+ [The only winning attempt is 57...♔c6 but White locks the king into the corner with 58.g5! ♔g8 (58...h4 59.♔f6 ♔g8 60.♔e7= forces Black to give a perpetual.) 59.h4 ♔b5 60.♔f6= and again Ke7 is coming next and Black cannot do anything better than draw with his extraqueen!]

58.♔f8 ♔e6+ 59.♔e7 ♔g8+ 60.♔f8 ♔e6+ 1/2-1/2

**(15) Navara, David (2724)
- Rapport, Richard (2671)**48th Biel GM 2015(3.3),
2015.07.22GM Arkadij Naiditsch
Best rating: 2737

We are in a very interesting endgame which appeared after a fighting game where White was a bit better throughout the game, but then it got extremely complicated. Right now White is a clear pawn up, but the a-pawn is very dangerous and the bishop pair also gives Black good chances to be perfectly fine. The position is very sharp.

34...♖g8 Good and logical! The black rook is getting into the game- attacking the g2 pawn and wanting to play Rg6 with an unpleasant attack on the passed f6 pawn.

35.g3 Not the best move. [The position would remain more playable after 35.♖f3 35...♖g6 36.♕e5 a3 37.f7 and Black is probably better, but the position remains practically unclear.]

35...♕c5+ Not a bad move, but why not win the f6 pawn?! [35...♖g6 was very logical. 36.♕e5 and here comes the difference to the aforementioned line: 36...♖g5! 37.♕f4

♖f5 and the f6 pawn is gone, leaving Black with a heavy advantage.]

36.♕e3 ♕d6 [It would be wrong for Black to play 36...♕xe3+?! 37.♖xe3 ♖xg3+ 38.♖e2 and the position is probably a draw because of White's next moves, c4 and Rf1.]

37.c4 ♕c6 [Of course Black can't take the g3 pawn: 37...♕xg3+? 38.♖e2 ♕c6 39.♖g1 and it is already White who is winning.]

38.♖e2 White can't keep the g3 pawn alive. [After 38.♕f4 38...e5 39.♕e3 Black is winning the f6 pawn with 39...♖g6]

38...a3? Black should have cared more about winning some material... [The simple 38...♖xg3 would keep Black's position clearly better.]

39.f7 Now the f-pawn is becoming dangerous.

39...♖xg3 Black continues playing very riskily without any reason. [After 39...♖f8 40.♖f1 a2 41.♕d4 White would keep good drawing chances.]

40.♖e4! Navara manages the time trouble perfectly and now it is already Black who should be careful.

40...♖g2+ This is quite a mistake even it is hard to blame Rapport for being in time trouble on the 40th move. [Black had to find a very difficult way to a draw: 40...♕xe4 41.♖xd6

♖f3 42.♜xe6 Black's position looks lost but in fact it is a draw!
42...♜xf7 43.♜xe4 a2 44.♙d4

44...♜h7 and strangely although he is a clear piece up White cannot convert his advantage because of Black's threat of playing Rh1 or winning the c4 pawn.]

41.♙f1 Now Black will be an exchange down.

41...♙f8 The only move.

42.♙xg2 ♙xe4+ Black still keeps some hopes for a draw because of the strong a-pawn and in case he would manage to win the f7 pawn it would be very unclear if the position is winning or a draw.

43.♙g3 White wants to play Bd4 and Kf4.

43...e5! An excellent move!

44.♙g5 Threatening to play Rd8.

44...a2 45.♙f6 White is winning the e5 pawn and at the same time he wants to protect the a1-h8 diagonal.

45...♙d3? and this is the losing move. [Black could have tried to save the game after 45...c5! 46.♙xe5 ♙c2! chasing the white rook from the d-file to play Kd7 next. 47.♜c1 ♙g6 48.♜f1 ♙d7 and Black has excellent drawing chances.]

46.♙xe5 Now the game is over...

46...♙xc4 The threat of playing Rd8 is deadly.

47.♙f6 a1=♚

48.♜d8+ followed by Bxa1 and White is winning. The conclusion of this very interesting endgame is that the bishop pair has huge power and even after blundering on the moves 38-40 Black maintained very good drawing chances. He just should have fought a bit harder! **1-0**

Golden knowledge. QUEEN ENDINGS - passed pawn problem

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

Queen endings are not like other endgames - here we don't have precise basic positions, except in situations with queen against pawns. But there are still a few important factors, like the role of the passed pawn, the position of the queen, the activity and safety of the king, as well as different tactical motifs, as queens are terribly powerful pieces. We will see what the importance of each characteristic is.

(16) Boruchovsky, A. - Sanal, V.

European U18, 2015

We have a classical endgame with a distant passed pawn,

where Black's main task is to force the opponent's queen into a passive position on e1.

46. ♖d4+ Other tries for perpetual don't work here: [46. ♖b7+ 46... ♜e8 47. ♖b8+ ♜f7 48. ♖b7+ ♜f6; 46. ♖e1 46... ♜e4 47. g3 f4 48. gxf4 ♜d3 49. f3 ♜xf3 50. b4 ♜e6 51. b5 ♜f5 52. ♜h2 ♜e3 53. b6 ♜g4 54. b7 ♜h3+ 55. ♜g1 ♜g3+ 56. ♜xg3+ ♜xg3 57. b8=♜ e1=♜#]

46... ♜d6 47. ♜g7+ ♜e7 48. ♜d4+ ♜e6 49. ♜c4+ ♜f6 50. ♜c3+ ♜f7 [It is not too late to fall for the following simple trap: 50... ♜e5?? 51. ♜xe5+ ♜xe5 52. f4+! ♜d4 (52... ♜xf4 53. ♜f2 e1=♜+ 54. ♜xe1 ♜e3 55. b3 (55. b4 55... ♜d4 56. ♜f2 ♜c4 57. ♜e3 ♜xb4 58. ♜f4 ♜c5 59. ♜g5 ♜d6 (59... ♜d4 60. ♜h6 ♜e3 61. ♜xh7 ♜f2 62. ♜xg6 ♜xg2 63. ♜xf5) 60. ♜h6 ♜e6 61. ♜xh7 ♜f7 62. g3 ♜f6 63. ♜g8 g5 64. h5)) 53. ♜f2 ♜d3 54. ♜e1]

51. ♜c4+ White still tries to provoke his opponent. A primitive blockade of the pawn would be simply and slowly refuted: [51. ♜e1 51... ♜e4 52. g3 f4 53. gxf4 ♜d3 54. f3 ♜xf3]

51... ♜g7 52. ♜c3+ [The other check is not better: 52. ♜d4+ 52... ♜h6 53. ♜f4+ g5 54. hxg5+ ♜g6]

52... ♜h6 53. ♜e1

53... ♜e4 54. g3 ♜h5 55. ♜h2 h6 Black wants to secure his

king against some mating ideas like Qe1-c1-g5. [Black could also have won after 55...♖d3 56.♖c1 h6 57.b3 ♖d1 58.♖e3 e1=♖]

56.b4 ♖d3 57.♖h1 ♖c3! A very instructive example where the difference of activity of both queens is remarkable. **0-1**

(17) Romanishin, O.-Karpov, A.

Moscow, 1983

45...♖b5!! In this Soviet Championship I was one of Anatoly Karpov's trainers. This extremely strong move was found after many hours of analysis! [45...♖d4 was wrong in light of 46.♖f5+ ♔g8 (46...♔h6 47.♖xf7) 47.♖c8+]

46.♖e4+ [46.♖xf7 immediately loses to 46...d2—+ 47.♖f3 ♖b1]

46...♔h6 47.♖d4 ♖c6+ 48.♔g3 ♖c7+! [48...♖c2? was premature: 49.♖d7 d2 50.♖xf7 ♖c3+ 51.♔h2 ♖e5+ 52.♔g2]

49.♔g2 ♖c2 50.♖e4 [Now the previous defensive idea does not work: 50.♖d5 50...d2 51.♖xf7 ♖c6+ 52.♔g3 ♔h7—+]

50...♖c3 51.♖d5 [51.h4 According to Karpov, this desperate counter attack would not save the game: 51...gxh4 52.♖f5 g6 (52...♖c6+ 53.f3 ♖g6 54.♖d5 f5 55.♔h3) 53.♖xf7 ♖c6+ 54.♔h2 (54.f3 54...♔g5 55.♔h3 ♖d6 56.f4+ ♖xf4 57.♖e7+

♔h6 58.♖xh4+ ♔g7 59.♖e7+ ♖f7—+) 54...♔g5—+; Or 51.♖e3 51...♖c6+ 52.♖f3 ♖d7 53.♖d1 d2 54.f3 ♖d3]

51...d2 52.♖xf7 ♖c6+ 53.f3 [After 53.♔h2 Black needs to find the following precise win: 53...♔h7! 54.♖f5+ ♖g6 55.♖d7 ♖c2 56.♖e8 (56.♖f7 56...♖c8 57.♖d5 ♖c7+ 58.♔g2 ♖c2 59.♖f7 ♖c6+—+) 56...♖c7+ 57.♔g2 g6—+]

53...♔h7 54.♖b3 ♖d6 55.♖c2+ ♔h6 56.♖d1 The white queen is finally limited to a poor defensive position and Karpov easily improves his position.

56...♖d3 57.♔f2 ♔g6 58.♔g2 ♔f7 59.♔f2 ♔f8 [As in the previous game, it is necessary to simply be careful and not to allow some stupid check. 59...♔e6 60.♖e2+]

60.♔g2 ♔e7 61.♔f2 ♔d6 62.♔g2 ♔c5 White cannot stop the black king from coming to b2 and then Qd3-c2 finally

clears the way for the passed pawn. Great technique! **0-1**

(18) Mikhalechishin, A. - Gufeld, E.

Nikolaev, 1981

46.g6+! Using a tactical motif to open the black king and create different perpetual possibilities.

46...♔g7 [46...♔xg6 47.♚g5+ ♔h7 48.♚h5+ ♔g7 49.♚g5+ ♔f8 50.♚d8+ was one of such cases.]

47.gxf7 ♚e2+ 48.♔c1 ♔xf7 49.h5! White pushes his passed pawn as quickly as possible. He is ready to exchange his h-pawn against Black's b-pawn. Endings with a central pawn are not dangerous for the defending side as his king is close to the pawn.

49...♚c4+ 50.♔d2 ♚c6

51.♚h8! It is necessary to try and push the pawn anyway.

51...♚d5+ 52.♔c3 ♚c4+ 53.♔b2 ♚d4+ 54.♔b3 ♚a4+ 55.♔b2 ♚b4+ 56.♔a2 ♚d2+ 57.♔b3 ♚d3+ 58.♔b4 [58.♔b2 was possible, but White tries to attack the b5 pawn.]

58...♚c4+ 59.♔a5 ♚a4+ 60.♔b6 b4 61.h6 and Black can't play for a win as the white pawn is much more advanced. **1/2-1/2**

(19) Gutman, L. - Bellon Lopez, J.

Bruxelles II, 1987

In many cases the queen can attack the opponent's king non-stop:

7.♔g3 ♚g5+ 8.♔f3 ♚f5+ 9.♔e2 [White cannot avoid the perpetual even with three extra pawns: 9.♔g2 9...♚g4+ 10.♔h1 ♚e4+ 11.♔g1 ♚xb4= (11...♚g4+=)]

9...♚e4+ 10.♔d2 ♚xb4+ 11.♔e3 ♚xa4 1/2-1/2

(20) Gulko, B. - Gurevich, D.

USA, 1994

Even with equal pawns there is some difference. There are pawns which are supported much better by the king and queen on their way to glory.

51. ♖c5! ♜e6 52. b6 ♜e4+ 53. ♜c4 ♜b1+ 54. ♖c5 White's plan is to come forward with the king and then try and promote the pawn.

54... ♜f5+ 55. ♜d5 ♜c8+ 56. ♖b5 ♜e8+ 57. ♖a6 ♜a4+ 58. ♖b7 f6? The black king is relatively safe from the opponent's queen's checks, so it was necessary to simply keep the position, with some chances for a perpetual.

59. ♖b8 ♜f4+ [59... ♜e8+ was met by 60. ♖c7]

60. ♖c8 ♜c1+ 61. ♖d8 ♜f4

62. b7 The next step is achieved!

62... ♜b8+ 63. ♖d7 ♜g6 64. ♜e4+ ♜g5 65. ♜e3+ ♜g4 66. ♜d4+ ♜g5 67. ♜c5+ 1-0

(21) Dlugy, Maxim - Benjamin, Joel

USA, 1988

62. ♜d3 ♜g7 63. ♖c5 ♜a5+ 64. ♖c6 The king comes closer to his passed pawn, which is the best strategy in queen endings.

64... ♖h6 65. ♜b5 ♜c3+ 66. ♜c5 ♜f6+ 67. ♜d6 ♜f5 68. a7 ♜e4+ 69. ♖c7 ♜c4+ 70. ♖d8 ♜g8+

71. ♖e7! ♜a8 [71... ♜g7+ did not help: 72. ♖e8 ♜xa7 73. ♜f8+

♔g7 (73...♔h7 74.♚f7+) 74.♚xg7+ ♔xg7 75.♔e7 ♔h7 76.♔f7 ♔h6 77.♔g8 g5 78.f5]

72.♚d4 ♚b7+ 73.♚d7 ♚b4+ 74.♔f7 ♚c4+ 75.♔f8 ♚c5+ 76.♔g8 1-0

(22) Maroczy, G.-Betbeder Matibet, L.

Hamburg ol (Men), 1930

Here we will see how to create a passed pawn by exploiting a pawn majority on one flank.

23.♔c2 ♚a6 24.a4 ♚b7 25.♔b3 h5 26.♚d6 ♚f7 27.♔a3 ♔b7 28.h4 a5 29.b4 axb4+ 30.cxb4 ♚g6 31.♚d7+ ♔b8 32.♚d3 ♚f6 33.♔b3 ♚a1

34.a5! In order to create a passed pawn, the help of the queen is needed!

34...bxa5 35.♚b5+ ♔c8 36.♚c6+ ♔b8 37.♚b6+ ♔c8 38.♚xe6+ ♔d8 39.♚d5+ ♔e7 40.bxa5 ♚b1+ 41.♔a4 Now starts the second part of the plan- the king comes to help his pawn.

41...g6 42.a6 ♚a1+ 43.♔b5 ♚b2+ 44.♔c6 ♚f6+ 45.♔c7 ♚c3+ 46.♚c6 ♚e3 47.♔c8 1-0

Chess and the City. Are marriages among professional chess players healthy?

WGM Elisabeth Paehtz

Best rating: 2493

To marry someone from the same "field" always bears a certain risk. At chess this may even lead to terrible arguments, as compared to other sports there is no separation of sexes in most of the tournaments. Therefore the chance of actually facing your own husband or wife at the chess board during a tournament is not too low. The key question in that moment however is how to handle such a fate once it happens?

Most married couples I know would likely agree on a quick draw and solve that "issue" peacefully. But what if the difference of both partners is more than just a couple of rating points? And how are you going to prepare against each other when sharing a double room during the tournament?! Blackmailing him with sexual refusal is among those alternatives some women may funnily consider. But honestly the situation is much trickier than one may expect here.

I remember a hilarious article from Alina l'Ami about her experience playing her husband GM Erwin l'Ami at an open tournament not too long ago. In their case the rating difference is over 200 rating points, which naturally causes

some nasty side effects such as losing a couple of rating points and maybe dropping an important half a point for the overall result.

The good news about their story is that even though Erwin eventually dared to kick his dearest wife over the board they are still happily married.

Fortunately for me I only once had the "pleasure" of facing a "GM-boyfriend" during a round robin tournament in Germany. The awful discussions and fights it caused made me rather believe that marriages among two professional chess players of similar strength or let's say a rating difference not higher than 100 points for sure cannot be totally healthy. As for my part, I never wanted to have a repetition of that period even though eventually he believed to be "merciful" by offering a draw.

One of the main things I learned from that experience is that objectivity in that moment is out of the topic. Higher rated husbands automatically believe that being stronger or higher rated is a 100 percent safe bet. Unfortunately playing each other is just one of many problems professional chess couples have to deal with during their active times. Who would watch the kids and who is allowed to play is just another topic to mention here.

In any case there is quite a long list of happily married and strong chess players nowadays, which eventually makes me believe that there is no clear answer to the head line topic. It all actually just depends.

To finish this topic of, let me give you the top three of the strongest chess couples of today's chess society:

- 1: Grischuk - Zhukova
- 2: Peter Heine Nielsen - Victoria Cmilyte
- 3: Fressinet - Skripchenko

1.g3 d5 2.♘f3 g6!? One of many setups for Black. Nowadays the most popular is [2...c6 3.♗g2 ♗g4]

3.♗g2 ♗g7 4.O-O [4.d4 4...♘f6 5.O-O O-O 6.c4 leads to the Gruenfeld.]

4...e5 5.d3 ♘e7 6.♘bd2 O-O 7.e4

7...d4!? Black decided to close the center immediately. The alternative was [7...♘bc6 Now if White plays 8.Re1 then d4 seems to be strong because the rook is placed on e1. 8.exd5 (8.c3 8...a5 is typical to avoid b4.) 8...♘xd5 9.♘c4 h6 10.♖e1 ♖e8 11.♗d2 ♗f5!? with the idea of pushing e4 at some moment. The position is equal.]

8.a4 f6 Black is preparing Be6. Also interesting- with the same idea- was [8...h6 9.♘h4 (9.♘e1 9...♘bc6 10.f4 f5! and the black

pieces are better placed for this fight.) 9...♘bc6 (9...g5 doesn't work here because the b7 pawn is hanging. 10.♘f5 ♘xf5 11.exf5 ♗xf5 12.♗xb7 ♘d7 13.♗g2 White is better, but taking the rook looked dangerous.) 10.f4 exf4 11.gxf4 g5! (11...f5∞) 12.fxg5 hxg5 13.♘f5 Both sides trol important squares. White keeps a strong knight on f5 but Black is going to create a blockade on e5 and f4. 13...♘g6 14.♘f3 g4↗]

9.♘h4 ♗e6 10.f4 ♘d7

11.f5!? Another plan also deserves attention: [11.♘hf3! 11...♖h8 (11...h6 12.f5!? A typical pawn sacrifice. 12...gxf5 13.♘h4 fxe4 14.dxe4 (14.♗xe4 There is no time for a blockade because of 14...f5↗) ; 11...♗h6 12.♘c4→) 12.fxe5 ♘xe5! (12...fxe5 13.♘g5 ♗g8 14.♗h3 with Ne6 next.) 13.♘xe5 fxe5 14.♘f3 h6 and only Black can be better thanks to his space advantage.]

11...♗f7 12.fxg6 [12.g4 12...♗h6! A strong strategic move. If Black manages to exchange the limited bishop then his position will be very good.]

12...hgx6 13.♗h3 White activates his bishop. [13.♘df3!? with the idea of playing g4-g5.]

13...♘c5 [13...♗h6! 14.♗xd7 (14.♖g4! → 14...♗e8) 14...♖xd7 15.♖xf6 ♗e3+ 16.♖h1 g5 17.♘f5 ♘xf5 18.♖xf5 ♗e6 19.g4 ♗xf5 20.exf5

20...fxg5! Otherwise White will block the position after Ne4 and get the advantage. 21.fxg5 f7 Now Black will be able to break the position after e4. 22.fxg5 c6+ 23.g1 h8!—+]

14.b4 e6 15.c4 g5

16.fxg5! This move was not forced, but the idea is very concrete. [16.fg2 16...fxc4 (16...a6 17.fxe5!; 16...e6 17.b5 with Ba3 next.) 17.dxc4 d7 18.fxd3 and White should be better because of the weak light squares.; 16.fg4!?]

16...fxg5 17.f3 fxc4 18.dxc4 f6 19.f2 g7

20.fxe1! This shows the deep understanding of Botvinnik. For him it was more important to improve the knight (Nd3-Nc5-Ne6) than to allow Black to get rid of the limited bishop. [20.fxg5 20...fxg5 21.fxg5 c6 22.fxd8 (22.fxd2 22...a5) 22...fxd8 23.fxf8 (More accurate is 23.fab1) 23...fxf8 24.fb1 There is an interesting variation after 24...a5 (24...f3! 25.f1 f3 26.a5 f4) 25.bxa5 fxa5 26.f5 fxc4 27.fxb7 f3 (27...f7? 28.f6) 28.fxc7+ f6 29.a5 g5 30.f5 (30.g4 30...f3 31.fg2 (31.a6 31...fxh3 32.a7 f3 33.fxc6+ (33.h3 33...f1+ 34.fh2 f1—+) 33...f7 34.fxc7+ f6 35.fxc6+ f7 36.fxc7+ f6

37.fxc6+ f7!—+ and there is no perpetual check.) 31...f4 32.a6 fxg4 33.a7 fxg2+ 34.fh1 f2 35.h3 f1+ 36.fh2 f1—+ 30...fxf5 31.exf5 fxf5 32.a6 e4 33.a7 fa5 34.h4 gxh4 35.gxh4 d3 36.cxd3 exd3 37.f2 d2 38.f2 fa2=; 20.a5!]

20...a5 Black is trying to get control of the dark squares.

21.♖d3 b6 Preventing Nc5.

22.c5 ♜c6 [22...axb4 23.♞xb4 ♜a5 24.♞ab1±]

23.b5 ♜b4 24.♜xb4 axb4 25.cxb6 [25.♞xb4 25...♙e7]

25...cxb6 26.♞xb4 Black is looking for drawing chances in an opposite colored bishops position.

26...♙e7 In my opinion the idea to create counterplay over the c-file looks interesting. [26...♞a7 with Rc7 next.; 26...♞c7]

27.♞c4 ♙c5 28.♙g2 ♞d6 29.♙e6 White improves his bishop.

29...♞xf1 30.♞xf1 ♞f8 31.♞xf8 ♞xf8 32.♞d5 ♙h6 33.♙g4 ♞d6 [33...d3 34.♞xd3 ♞f2+ 35.♙h3± and the white king is safe.]

34.♙f3 ♙g7 35.♞xd6 [35.♙e2?! 35...♞xd5 36.exd5 e4!=]

35...♙xd6

36.♙e2! and because of the weak pawn on g6 White is winning in this endgame.

36...♙b4 37.♙d3 ♙f6 38.♙c4 ♙e1 39.♙d5 ♙b4 40.♙d7 ♙e1 41.♙e8 ♙c3 [41...g4 42.♙d7+-; 41...♙d2 Let's analyze

this endgame a bit. It looks like Black managed to defend all the weak pawns at the same time. I suppose that the main winning idea is to sacrifice the bishop. 42.♙c6 ♙a5 43.♙c7 ♙g7 The only move. 44.♙d6 ♙f6 (44...♙c3 45.♙e6+-)

45.♙xg6! This is the point! 45...♙xg6 46.♙xe5 ♙c3 47.♙d5 ♙f7 48.♙c6 (48.h4 48...g4 with Be1 next.) 48...♙a5 49.♙d7 with the idea to promote the e-pawn. 49...♙f6 50.♙d6 ♙b4+ 51.♙d5 ♙c3 52.e5+ ♙e7 53.h4 g4 54.h5 ♙d2 55.a5! Editorial Preface

The Biel super tournament came to an end. It was a great and fighting event, with a lot of very interesting fights until the very end.

The winner is Maxime Vachier-Lagrave with 6.5/10. Second place goes to Wojtaszek with 6/10 and places 3-4 were shared by Adams and Navara.

The tournament was a big disaster for Rapport, who finished on a very poor 2/10.

In the open section Sutovsky came first with 7.5/9, while second place was shared by 6 people, the best of whom on tiebreak was Solak and 3rd position went to Bok.

The Leiden Open was won by David Howell with a fantastic 8.5/9.

In the Politiken Cup everything is still unclear after 8 rounds, but the best players are leading.

An interesting match is going on in China, once again between the Russians and the Chinese in a knock-out system, where if one player wins, he stays against the next opponent. At the moment Karjakin is crushing the Chinese men, as he won 3 matches in a row, so there are only two Chinese left against the full Russian team.

We hope you enjoy issue Nr 179!

Best game of the past week

(1) Vachier Lagrave, Maxime (2731)
- Adams, Michael (2740) [C89]

48th Biel GM 2015(8),
2015.07.28

GM Csaba Balogh
Best rating: 2672

An important theoretical battle in the Marshall defense. Vachier-Lagrave manages to get the advantage of the two bishops, which he manages to convert into a full point.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1
The old main line with 6.Re1 has started to come back into fashion because there were already too many games for the 6.d3 line and people know which directions to choose against it.

6...b5 7.♙b3 O-O 8.c3 d5 The Marshall Gambit. The main reason why White started to play 6.d3.

9.exd5 ♘xd5 10.♘xe5 ♘xe5 11.♖xe5 c6 12.d3 The alternative and the old main line is 12. d4.

12...♙d6 13.♖e1 ♙f5 14.♙f3 ♙h4 [Carlsen probably wanted

to avoid the theoretical discussions and played the rare
14...♙g6 15.♙xd5 cxd5 16.♙f4 d4 17.cxd4 ♙b4 18.♘c3 ♙xd4
19.♙e5 ♙d7

It looks like a typical compensation with the two bishops, however Anand found the brilliant 20.♘d5!! f6 (With the idea of 20...♙xe1 21.♘f6+! gxf6 22.♙xf6+-) 21.♘xb4 fxe5 22.♙d5+ ♙xd5 23.♘xd5 ♙xd3 24.♖xe5± With a healthy extra pawn for White in the Anand-Carlsen, Shamkir 2015 game.]

15.g3 ♙h3

16.♙e3 This is the new development of the theory! White gives back the material advantage, but he quickly finishes the development and aims for a positional advantage. [Most of the games continue with 16.♙xd5 16...cxd5 17.♙xd5 ♖ad8 18.♙g2 ♙xg2+ 19.♙xg2 ♙xd3 and this endgame is considered to be a relatively easy draw despite the pawn down.]

16...♙xd3 17.♘d2 ♚f5 18.♙d4 ♖ae8 The new move! [Adams himself as White had a game for this position. That game also continued with 18...♖fe8 19.a4 h6 20.♙g2 ♚xf3+ 21.♙xf3 just like our game. The difference of having the a8 rook on e8 will be seen in the following move...]

19.♙g2 h6 20.a4 ♚xf3+ 21.♙xf3 ♖e6!? This is the point of playing Rae8. First of all Black now takes back on e6 with check and also after axb5 his rook is not pinned on the a-file.

22.axb5 axb5 23.♙g2 White prepares to take on e6 followed by Ra6 and he leaves from the check after fxe6! [An important line is 23.♖xe6 23...fxe6+ 24.♙g2 c5! 25.♖a6 ♖d8! and Black holds his central pawns and pieces together and closes the light squared bishop with c4 next move.]

23...♖fe8 [Black could now play 23...♖xe1 24.♖xe1 and in the endgame it is definitely more useful to have the king on g2 rather than on f3, but White keeps some initiative after playing Ne4 next move.]

24.♖xe6 ♖xe6 25.c4! The only way to activate the knight now. More and more pieces are getting traded off, but the game still goes on and Black still needs to solve some problems.

25...bxc4 26.♘xc4 ♙e4+? A very strange check after which Black loses the two bishops and ends up in an inferior endgame. [Black should have saved his bishop with 26...♙c7 and the game should soon end in a draw.]

27.f3 ♙d3 28.♘xd6 ♖xd6 Of course the material is very limited, but still the bishop pair is the bishop pair. We already know from Karpov's games that this kind of advantage might become very unpleasant. Black is threatening with Nf4, therefore White removes his king from the check.

29.♙f2! += There is no concrete way of forcing further exchanges, which means that White will be able to create new threats and torture Black in the long term.

29...♖d7 30.♖a3! White is threatening to win a piece after taking on d5 and on d3. He is asking the bishop to choose a diagonal. Its ideal place would be on d5, but of course it requires very long maneuvering. Black would like to ensure the safety of the c6 pawn by putting his bishop to b5, therefore removing it on the b1-h7 diagonal is also not principled.

30...♘c7 [30...♙b5?? allows an unexpected forced mate after 31.♖a8+ ♙h7 32.♙c2+ g6 33.♖h8#]

31.♙e3 ♘d5 32.♙c5! Of course White does not want to repeat, he can play for a win without risking anything. In an open position, the two bishops can always avoid exchanges and force repetitions.

32...f6 Black wants to give his king some air and bring it to f7. Later it gets stuck because of this move, but it is not easy to suggest something, White keeps the initiative of the two bishops in any case.

33.♙a4 ♙b5 34.♙c2! The c6 pawn is safe now, but the b5 bishop got a bit out of the game. White focuses his pieces on the kingside.

34...♖c7 [It was logical to play 34...♔f7 to avoid Bg6, but White retains his advantage after 35.♕f5 ♖b7 Black needs to avoid a check on the 7th rank. (35...♖c7? nicely loses to 36.♕d6 ♖b7 37.♕c8! The rook loses all its squares on the 7th rank, so it is forced to give free way to the white one... 37...♖b6 38.♖a7+ ♔g8 (38...♔g6 39.♕f8+-) 39.♕e6+ ♔h8 40.♕f8+-) 36.♕c8 ♖c7 37.♖a8 The threat is Bd6. It is getting more and more unpleasant.]

35.♕g6! ♖a6 Adams wanted to avoid the penetration on the a-file with Ra7, but this also sends the knight out of the game. [35...♖d2+ 36.♔e1 ♖e2+ (36...♖xb2? 37.♖a7+- wins because of the weak back rank.) 37.♔d1 ♖a6 38.♕d6 ♖xh2 39.♖e3 creates new problems.]

36.♖e3! The a-file is finally closed but there are other opened files, which the white rook is ready to occupy and create threats on the back rank. Suddenly both black minor pieces are getting out of the game.

36...♖d8 37.♕e7 ♖c8 38.b4 White lays a trap and Adams falls into it. This move provokes c5, which seemingly leads to the complete elimination of the queenside, which would definitely bring Black closer to the draw. However this move loses concretely... [White could have also squeezed with 38.h4!? 38...♖c7 Black quickly brings back his knight to the

center, but it is strongly met by 39.♕d6! ♖d5 40.♖a3!± Black successfully controls the e7 square and the invading along the e-file, but now again White returns to the a-file! It is extremely unpleasant to defend such a position!]

38...c5 [38...♖c7 39.♕d6 ♖d5 40.♖a3± also looks terrible. White invades on a7 and advances all his pawns on the queenside. Black can only sit and wait.]

39.♕f5! Black suddenly has problems with the c5 pawn.

39...♖c6 [The other option 39...♖c7 also loses after 40.♕d6! ♖c6 41.♖e8+ ♔f7 42.♖f8# What an unusual mate!]

40.♕d7! White wins material and the game is over!

40...cxb4 [40...♖b6 41.bxc5+-]

41.♕xc6 ♕xc6 42.♖e6 Black resigned! An excellent job by the two bishops. **1-0**

Young & Talented

GM Etienne Bacrot

Best rating: 2749

(2) Wagner, Dennis (2569)

- Brkic, Ante (2607) [E04]

48th Biel Master Open(6.9),
2015.07.25

1.d4 The 18-year old Dennis Wagner is number 18 in the world under 20 standings. He just finished the Biel open by sharing a very honorable 2-7th place and continues improving his rating. Here is a very clean game he won mid tournament.

1...♖f6 2.c4 e6 3.♘f3 d5 4.g3 dxc4 5.♙g2 ♙b4+ 6.♙d2 a5

7.a3!? This is a new way to counter the rare line Black employed against the Catalan.

7...♙xd2+ [7...♙e7 8.♙a4+ ♙d7 9.♙xc4 should be slightly better for White, as the a5 pawn is oddly placed.]

8.♘bd2 b5 9.b3 White is in no rush of winning back the sacrificed pawn and simply continues with his development.

9...cxb3 10.♙xb3 c6 The position becomes a bit cramped after this but the alternative is also not great: [10...♙a6 11.O-O O-O 12.♙b2 ♘bd7 13.♘e5! After this important move the tactics work for White. 13...♘xe5 14.♙xa8 ♘d3 15.♙c3! ♘xf2 16.♙g2±]

11.O-O O-O 12.♖fc1 ♙b7

13.♙b2 This position occurs for the 4th time and after this game the score is 4-0!

13...♘a6? N It seems clear that Black was surprised in the opening and doesn't choose the best defense. [13...♘bd7 14.♘e1! e5! (14...♘b6 15.♙xc6 ♙xc6 16.♖xc6 ♖b8 17.♙xb5 ♙xd4 18.♘b3 and White will win the a5 pawn. Giri-Fridman 2015.)]

14.♘e5 Logical and strong. The c6 pawn falls and it is difficult for Black to save his queenside.

14...♘d5 15.♘xc6 ♙xc6 16.♖xc6 b4 [16...♙b8 17.♘b3 ♘ac7 18.e4 ♘e7 19.♖c2± White has the c-file and a strong outpost for the knight on c5, so defense is very difficult.]

17. axb4 ♖axb4

18. ♖c5 Increasing the pressure. The knights are not very stable with the weakness on a5 and the possible e4 push.

18...a4 19. ♖c4 ♖a5? It was about time to say goodbye to the a-pawn by playing 19...Rb8 and trying to regroup. Now White wins big material by force. [19...♖b8 20. ♖a3]

20. e4! ♖d3 [20...a3 21. ♖b3 ♖fb8 22. exd5 ♖xd5 23. ♖c2 Black has no compensation for the piece.]

21. ♖c2 ♖5b4 [21...♖3b4 22. ♖b1+-]

22. ♖c3 e5 23. ♖f1! Simply grabbing the material.

23...exd4 24. ♖xd4 ♖ad8 [24...♖fd8 was just a little more testing: 25. ♖xd3 ♖xd4 26. ♖xd4 ♖d8 27. ♖xa4! ♖xd4 28. ♖xa5 g6 29. ♖c4 ♖xd2 30. ♖a7 with an easy win.]

25. ♖xd3 A strong move following a strong opening brings Wagner a nice point against his solid Croatian opponent. **1-0**

Endgame section

(13) Hillarp Persson, Tiger (2563)
- Ragger, Markus (2688)

Politiken Cup,
2015.07.28

GM Csaba Balogh
Best rating: 2672

We might think that pawn endgames are very easy, but as we will see they are difficult even for good grandmasters. It is clear that Black has the upper hand in this position because his king is more active, but the question is if it is enough to win the game?! White only waits with Kg1-f1 and Black has different attempts to seize the initiative...

41...f5 This move perfectly serves all attempts of making progress. Sooner or later Black had to play this move.

42.♔g1 g4 [Running to the queenside with 42...♔f4 also fails because White is in time to block the king with 43.♔f2 ♔e5 44.♔e3 ♔d5 45.♔d3 f4 White gets into zugzwang, but the good position of the f3 pawn prevents the black's king penetration back on the kingside. 46.♔c3!=; 42...f4 43.♔f1

♔h2 brings nothing because White simply waits with 44.♔f2 ♔h1 45.♔f1=]

43.fxg4

43...♔xg4 This is in general the winning method. Black temporarily gives up the activity of his king, but thanks to a zugzwang, it soon goes back to g3, followed by advancing the f-pawn, which opens the path towards the a3-b4 pawns... [43...fxg4 44.♔f1 ♔h2?? with the idea of pushing g3, but of course White plays 45.♔f2! first and suddenly Black is in trouble.]

44.♔f2 f4 [White resigned here! An amazing story, because the game is drawn! Hillarp Persson was sure that Black plays Kg3 and f3 and collects the a3-b4 pawns with his king, but he forgot about a saving motif! 44...f4 45.♔g1 ♔g3 (Keeping the queenside pawns on the board also fails because after 45...♔f5 46.♔f2 ♔e4 47.♔e2 ♔d4 48.♔f3 Black must turn back with 48...♔e5= (Because White wins the pawn race after 48...♔c3?? 49.♔xf4 ♔b3 50.g4 ♔xa3 51.g5+-)) 46.♔f1 f3 47.gxf3 ♔xf3 48.♔e1 ♔e3 49.♔d1 ♔d3

It seems to be over, but actually White saves the game with 50.a4!! using the fact that the number of the a-pawns does not matter if the white king reaches the corner. 50...bxa4 (50...♔c3 51.axb5 axb5 52.♔c1 ♔xb4 53.♔b2!= White holds the opposition and the draw!) 51.♔c1 ♔c3 52.♔b1 ♔xb4 53.♔a2=] **0-1**

(14) Eljanov, Pavel (2723)
- Wojtaszek, Radoslaw (2733)

48th Biel GM 2015(8.1),
 2015.07.28

GM Arkadij Naiditsch
 Best rating: 2737

White was pushing all game long and it seemed like the win could be very close. White's king position on g5 is fantastic and the idea of getting the rook to f6 could end the game at any moment. But Black still has some drawing chances because of the equality of the material.

64.♖f1?! Quite an inaccuracy, even if it is a very logical move. [64.♖dc1! was the winning move. 64...cxb4 (64...♖xc1 leads to a hopeless endgame. 65.♖xc1 cxb4 66.♗xb5 axb5 67.♖c5 followed by Rxb5 and Black can simply resign.) 65.♖xc3 bxc3 and now White had to see the very strong 66.♖c1! Black can't protect the c3 pawn. 66...♗d4 (66...♗xd6 67.exd6 ♖d7 68.♖xc3 ♖xd6 69.♖c7+ followed by Kxg6 and White is winning.; 66...♖c7? 67.♗e8+) 67.♖xc3 ♗c6 Now it is easy to see that White is much better, but how to end the game?! 68.h5! Protecting the e5 pawn through tactics. The white king will

penetrate to f6. 68...gxh5 69.gxh5 ♖xe5 70.h6+ ♔h7 71.♔f6 and White is winning material.]

64...♗d4 Black takes his chance!

65.bxc5 The right move. [65.♖f6 would lead to a very complicated position. 65...♗f3+ 66.♖xf3 ♖xf3 67.bxc5 ♖e3 and it is hard to say who is better here.]

65...♖xc5

66.♖be1?! and again White misses the best continuation. [66.♗e8+! This beautiful move would lead to a winning position. 66...♔g8 (66...♖xe8 loses to 67.♖xb7+ ♔g8 68.♖ff7 and White will mate in the next couple of moves.) 67.♔h6!! The king is the strongest piece in endgames! :) 67...♖xe8 68.♖xb7 and although he's a piece up, Black can't hold the position. The threat of playing ♖ff7 is deadly. White is winning here.]

66...♗c6 The e5 pawn is falling.

67.h5 White's last hope is the h-pawn.

67...gxh5 Of course Black is trying to simplify the position as much as possible.

68.gxh5 ♗xe5 The position remains very tactical. The black king is in big danger.

69.h6+ Winning the f6 square for the white king.

69...♔h7 70.♔f6 [70.♖xe5 is not enough for the win since after 70...♖xe5+ 71.♔f6 Black is in time to take the last pawn. 71...♖xa5 72.♔xe7 ♔xh6 73.♔f6 There is still some mating net around the black king, but he escapes.]

73...♔h5! and we are looking at a theoretically drawn endgame.]

70...♗c6 The only move yet again. [70...♗g6? 71.♗e4! and the threat of playing Ng5 next is deadly.]

71.♖c1 [Now it is already not enough for White to play 71.♗e4 71...♖xa5 (71...♖h5 would lead to a very dangerous position. 72.♗g5+ ♔xh6 73.♖g1! and because the a5 pawn is still there, White keeps some winning chances.) 72.♗g5+ and 72...♖xg5! 73.♔xg5 e5! With the threat of playing e4 and Re5. White is better but Black's chances to draw are good.]

71...♖xa5 Black takes the last white pawn.

72.♖g1 Eljanov is trying all his chances. [72.♖xc6 72...bxc6 73.♔xe7 ♔xh6 would also lead to a draw.]

72...♖h5 Simple and logical. If Black is able to win the h6 pawn, the position will definitely be a draw.

73. ♖xc6

73...♔d7! The only move. [73...bxc6? was not enough for a draw since after 74. ♕xe7 ♖xh6 although the h6 pawn is gone, the black king remains in the mating net. 75. ♖f7 ♖h3 76. ♗e4 Followed by Nf6 with mate during the next moves.]

74. ♖c8 [White is not winning after 74. ♕xe6 74...bxc6 75. ♕xd7 ♖xh6 76. ♕e7 and Black is in time with 76...♖g6! Freeing the black king from the h-file.]

74...♖xh6+ 75. ♕e5 If White could keep both rooks on the board, the position might be winning, but it is impossible.

75...♖g7! The best move, leaving White no choice but to exchange one pair of rooks.

76. ♖xg7+ [76. ♖e1 would lead to more or less the same: 76...♖h5+ 77. ♕xe6 ♖h6+ 78. ♕d5 ♖g5+ 79. ♖e5 ♖xe5+ 80. ♕xe5 and the position is a draw.]

76...♕xg7 77. ♖c7+ ♕g6

78. ♖xb7 White will slowly win all the black pawns, but it does not matter any longer. The defence with R+N vs R is quite simple and Wojtaszek masters it easily. The rest of the game needs no comments, it is just a good example for those who need to repeat how to hold such a theoretically drawn position.

78...♖h1 79. ♖e7 ♖e1+ 80. ♗e4 a5 81. ♖xe6+ ♕f7 82. ♖a6 a4 83. ♖xa4 ♕e7 84. ♖a7+ ♕e8 85. ♕d5 ♕f8 86. ♖b7 ♕e8 87. ♗d6+ ♕f8 88. ♗f5 ♖e2 89. ♕d6 ♖e1 90. ♗g7 ♖d1+ 91. ♕e6 ♖e1+ 92. ♕f6 ♖f1+ 93. ♗f5 ♕e8 94. ♖a7 ♕d8 95. ♕e6 ♖e1+ 96. ♕d5 ♖d1+ 97. ♗d4 ♕e8 98. ♖h7 ♕f8 99. ♕e5 ♖e1+ 100. ♕f6 ♖f1+ 101. ♗f5 ♕e8 1/2-1/2

Golden knowledge

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

(15) Mikhalchishin, A.-Gufeld, E.

Nikolaev, 1981

As it was mentioned in the previous part, the main task in queen endings is to create a passed pawn. An own passed pawn can compensate huge material deficits.

46.g6+! Exploiting tactics to open the black king and to create different possibilities for a perpetual.

46...♔g7 [46...♔xg6 47.♚g5+ ♔h7 48.♚h5+ ♔g7 49.♚g5+ ♔f8 50.♚d8+ was one of such cases.]

47.gxf7 ♚e2+ 48.♔c1 ♔xf7 49.h5! White pushes his passed pawn as fast as possible. He is ready to exchange his h-pawn

for Black's b-pawn. Endings with central pawn are not dangerous for the defending side as his king is close to the pawn.

49...♚c4+ 50.♔d2 ♚c6

51.♚h8! It is necessary to try and push the pawn anyway.

51...♚d5+ 52.♔c3 ♚c4+ 53.♔b2 ♚d4+ 54.♔b3 ♚a4+ 55.♔b2 ♚b4+ 56.♔a2 ♚d2+ 57.♔b3 ♚d3+ 58.♔b4 [58.♔b2 was possible, but White tries to attack the b5 pawn.]

58...♚c4+ 59.♔a5 ♚a4+ 60.♔b6 ♚b4 61.h6 and Black can't play for win as the white pawn is much more advanced.
1/2-1/2

(16) Topalov, V.-Anand, V.

San Luis, 2005

72...♔e6 [Despite White's material advantage, Black could defend this position. 72...♚d6+! 73.♚xd6+ ♔xd6 74.h7 b1=♚ 75.h8=♚ ♚g1+ 76.♔f3 ♚d1+!! (76...♚xg5 77.♚d4+ ♔c6 78.♚c4+ ♔b6 79.♚f7!+-) 77.♔f4 ♚d2+ 78.♔f5 ♚d3+=]

73.♚xb2 [73.♚c4+ 73...♔d7 74.♚d5+ (74.♚b5+ 74...♔e7 75.♚e5+ ♔d7 76.h7 b1=♚ 77.h8=♚ ♚g1+ 78.♔f4 ♚xf2+ 79.♔g4 ♚g2+ 80.♔f4 ♚f2+=) 74...♚d6+=]

73...♚xg5+ 74.♔f3 ♚h5+ 75.♔e4 ♚f5+? [The correct application of the mechanism was 75...♚g6+ 76.♔f4 ♚xh6+=]

76.♔e3 ♚g5+? [Once again, it was better to play 76...♚h3+! 77.♔d4 ♚g4+ 78.♔d3 ♚f5+]

77.f4+- ♚g3+ 78.♔e4 ♚e1+ 79.♔f3 ♚f1+ 80.♔g3 ♚g1+ 81.♚g2 ♚b1! 82.♚c6+ ♔f7 83.♚d7+ ♔f6 84.♚g7+ ♔e6 85.♚e5+ [Here it was possible to transpose to a theoretical position: 85.f5+! +- 85...♚xf5△ 86.h7 ♚d3+ 87.♔h4]

85...♔f7 86.♚h5+ ♔f6 87.♚g5+ ♔f7 88.♚h5+ ♔f6 89.♚h4+ ♔f7 90.h7? [Now White falls under the mechanism of perpetual. He should have played 90.♚g4! 90...♚e1+ 91.♔g2 ♚c3 92.♚f5+ ♔g8 93.♔f2!]

90...♚e1+! 91.♔g4 ♚d1+= 92.♔g5 ♚d8+ 93.♔h5 ♚d5+! 94.♚g5 ♚h1+ 95.♚h4 ♚d5+ 96.♔g4 ♚d1+ 97.♔g3 ♚e1+ 1/2-1/2

(17) Mikhalchishin, A.-Cvetkovic, S.

Trnava II, 1988

1.h6!! The main task at the moment is to expose the opponent's king.

1...♚c4+ [After 1...♚xh6 2.♚c8+ ♔h7 3.♚xc6± the pawns are becoming unstoppable.]

2.♔f3 ♚xa6 [Slightly better would be 2...♚xb4 3.hxg7+ ♔xg7 4.♚d7+ ♔g6 5.♚xc6±]

3.e5!! Another blow with the same idea- to open the king or to create an own strong passed pawn on the e-file. [3.♚g6 3...♚d3+ 4.♔g2 ♚d7 5.hxg7+ ♚xg7 6.♚xg7+ ♔xg7 7.f4 ♔f7=]

3...♚a3+ [or 3...gxh6 4.♚xf6+ ♔h7 5.♚f5+ ♔g7 6.♚d7+ ♔g6 7.e6+-]

4.♔g2 ♚xb4 5.exf6! gxh6 6.♚c8+ ♔h7 7.♚d7+ ♔g6 8.♚g7+ ♔h5 9.f7 [9.f7 9...♚e4+ 10.♔h2 ♚f4+ 11.♔g1 ♚c1+ 12.♔g2+-] **1-0**

(18) Shneider, A.-Agzamov, G.

URS-ch FL, 1982

42. ♖b4 g5 43. ♖b5 ♕f4+ 44. g3 ♖d2+ 45. ♔h3 b2 46. f4 gxf4 47. ♖g5+ ♔f8 48. ♖c5+ ♔e8 As always in such cases, the king has to join the own passed pawn. The journey seems to be long and impossible, but it almost always works in the end!

49. ♖e5+ ♔d7 50. ♖h5 ♔c7 51. ♖c5+ ♔b7 52. ♖b5+ ♔a7 53. ♖c5+ ♔a6 54. ♖c6+ ♔a5 55. ♖c5+ ♔a6 56. ♖c6+ ♔a5 57. ♖c5+ ♔a4 58. ♖c4+ ♔a3 59. ♖a6+ ♔b3

Mission practically completed!

60. ♖b7+ ♖b4 61. ♖xf7+ ♔a3 62. ♖a7+ ♖a4 63. ♖c5+ ♔a2 64. ♖d5+ ♖b3 0-1

(19) Hoi, C.-Mikhalchishin, A.

Budapest, 1989

40. ♖g8+ ♔h6 41. ♔h2 [Wrong was 41. ♖h8+ 41... ♔g5 42. ♖g7+ ♔f4 and the white pawns are in danger.]

41... ♖xe4 42. ♖d8 ♖c6 43. ♖f8+ ♔g6 44. ♖g8+ ♔h6 45. ♖h8+ ♔g6 46. ♖g8+ ♔f5 As it was said before, the main plan in such positions is to come with the king to the own passed pawn.

47. ♖g7 ♔e5 48. ♖e7+ ♔d4 49. ♖d8+ ♔e3 50. ♖e7+ ♔f2 51. ♖a7+ ♔f1 52. ♖g1+ ♔e2 There are no more checks and it is now possible to advance the c-pawn.

53. ♖d4 c2 54. ♖g4+ ♔d2 55. ♖d4+ ♔e2 56. ♖g4+ ♔d3 57. ♖g3+ ♔d2 58. ♖f4+ ♔c3 It is not so easy, but it is still necessary to go around.

59. ♖c1 ♖d6+ 60. ♔h3 ♖d3+ 61. g3 ♖d7+ 62. g4

62...♔d4! A very strong centralizing move of the queen.

63.♔g3 ♕e5+ 64.♔h3 a5 65.a4 [White had no useful moves, for example 65.♔g2 65...♔d3 66.♕f1+ ♕e2+ 67.♕xe2+ ♔xe2 was also losing.]

65...♔b3 66.♔g2 ♕b2 67.♕e3+ ♔a2 0-1

(20) Taimanov, M.-Gligoric, S.

Santa Fe, 1960

White's passed pawn is clearly more dangerous than Black's, plus White's queen is much better placed in the center. It is necessary to first stop Black's planned check on c2.

50.♕d3 ♔f6 [50...♕g7 51.a4± ♕b2+ 52.♔h3 ♕f6 leads nowhere.]

51.♕xd5± ♕c2+ 52.♔h3 ♕c1? [Bad was 52...♕c8+? 53.♔h4!; It was necessary to at least try and create some threats with 52...g5!±]

53.♕d4+ ♔e6 [53...♔f7 54.♕f4+--]

54.♕e4+ ♔d7 55.♔h4! The king is ready to penetrate Black's position.

55...♕d2 56.♕e5! This pawn sacrifice prepares the king breakthrough. [Of course not 56.a4? 56...♕h2+]

56...♕xa2 57.♔g5 ♕f2 58.♕f4 ♕b6 59.♕f7+ ♔c8 60.♕xg6+— ♕d8+ [Or 60...♕e3+ 61.♔xh5 ♕xf3+ 62.♕g4+]

61.♔xh5 ♕d5+ 62.♔h4 ♔b8 [It was not possible to get one pawn back, because of the pawn ending: 62...♕xf3 63.♕g4+--]

63.♕g5 ♕d1 64.♕f4+ ♔a7 65.♕e3+ ♔a6 66.g4 ♕d6 67.f4 ♕h6+ 68.♔g3 ♔b5 69.♕d3+ ♔a4 70.g5 1-0

(21) Nikolic, Pr-Seirawan, Y.

Wijk aan Zee, 1995

48...d4? It looks like it is the natural move to push this passed pawn, but the black king is not very well placed, so it was necessary to try and weaken the white pawn defense. And

to centralize the own queen, which was enough to save the game. [48...♖d3 49.b5 ♖e4+ 50.♔h2 d4 51.b6 d3=]

49.b5 d3 50.♖d6+ f6? [Better was 50...♔g7 51.♖d4+ ♔g6 52.b6± ♖e2△(52...♖c2△? 53.♖e4+) 53.♖c4! but White still keeps winning chances, as the black pawn and queen are not well coordinated.]

51.♖d5 ♖e2 52.♖g8+ ♔f5 53.♖c4! ♖c2 [The pawn endgame is lost: 53...♖e4+ 54.♖xe4+ ♔xe4 55.♔f1 ♔d4 56.♔e1+—]

54.♖d5+! +— ♔g6 55.b6 ♖b1 [After 55...d2 56.♖g8+ ♔h5 (56...♔f5 57.♖h7+) 57.♔h3! the black king is in a mating net.]

56.b7 d2 57.♖g8+ ♔h5 58.♖f7+ ♔g5 59.f4+! ♔g4 60.♖e6+ ♔h5 61.b8=♖! 1-0

(22) Romanishin, O.-Akopian, V.

Linares , 1996

52...♖d2 [In such cases it is premature to push the pawn: 52...d2? 53.♖b5+ ♖d3 54.♖e5+ ♔d1 55.♖a1+ ♔c2 56.♖a2+ ♔c3 (56...♔c1 57.♖a1+ ♖b1 58.♖c3+ ♔d1 59.♖f3+=) 57.♖a3+ ♔d4 58.♖a7+= With a perpetual.]

53.♖f6! [The best square for the queen. Other moves were much weaker: 53.♖e5+ 53...♔d1+—+; 53.♖b7 53...♔e3+—+]

53...♔d1+ The best move, as others were giving White good drawing chances. [53...♔e1+ 54.♔g1 ♖e3+ 55.♔g2 ♖e2+ 56.♔g1 d2 57.♖a1+! d1=♔ (57...d1=♖ 58.♖a5+=) 58.♖a5+ ♖d2 59.♖xd2+ ♔xd2 60.h4!≠; 53...♔e3+ 54.♔g1 ♖d1+ 55.♔g2 ♖e2+ 56.♔g1 ♖f3! 57.♖xg5+ ♔e2 58.♖b5 ♖xg3+—+]

54.♔f1 ♖e1+ 55.♔g2 ♖e4+ 56.♔f2 ♔c2 57.♖f7! [Weaker was 57.♖a6 57...♖e2+ 58.♔g1 ♖f3—+]

57...♖d4+ 58.♔g2 ♖e4+ [Once more premature was 58...d2 59.♖f5+! ♖d3 60.♖c5+ ♖c3 61.♖f5+ ♔c1 62.♖xg5=]

59.♔f2 ♖e2+ 60.♔g1 ♖e3+ 61.♔g2 ♔d1 62.♖b3+ ♔e2 63.♖b2+ ♖d2 64.♖d4? [A strange move, as it was possible to obtain the previous position after 64.♖f6 This just shows that the defense is extremely difficult.]

64...♔d1+ 65.♔g1 ♖e1+ 66.♔g2 ♖e2+ 67.♔g1 ♖f3! 68.♖e5

68...g4!! [It is funny, but pushing the passed pawn was wrong again: 68...d2? 69.♖xg5 ♖e4 (69...♔e2 70.♖b5+ ♖d3 71.♖h5+=) 70.♔f2 ♖e2+ 71.♔g1 ♔e1 72.♖f4!≠]

69.hxg4 d2⊖ 70.g5 ♔c2 71.♖c5+ ♖c3 72.♖f5+ ♔b2 73.♖f2 ♔b1 74.♖f5+ ♖c2 0-1

(23) Mikhalchishin, A.-Aronian, L.

Calvia , 2004

53...♞c4! Black has to try and push his own pawns as fast as possible. White can try to create some threats against the black king, but Black's play is far more real.

54.♞g6 a2 55.♞e8+ ♔h7 56.g5 [It was not possible to get a perpetual: 56.♞g6+ 56...♔h8 57.♞e8+ ♞g8—+]

56...♞g8 [Simpler was 56...hxg5!—+]

57.♞a4

57...♔h8! A good prophylactic move to avoid any check from c2.

58.gxh6 c2! 59.♞a3 ♔h7! Preparing the exit of the queen to c4.

60.♞c3 g6! A small tactical idea.

61.♔f2 ♔xh6 62.hxg6 ♞g7 63.♞c5 The last try to create some threats, but they are easily refuted.

63...♞f6 64.g7 ♔xg7 65.♞c7+ ♔h6 0-1

(24) Alekhine, A.-Reshevsky, S.

AVRO, 1938

It is not always possible to win simply- in many cases the weaker side can block the passed pawn.

44.♞a2 ♔g8 45.a4 ♞c6 46.a5 ♞a6 47.g4 g5 48.♔f2 ♞d6 49.♔f1 ♞a6+ 50.♔g2 ♔g7 51.♞b2+ ♔g8 52.♞b8+ ♔g7 53.♞e5+ ♔g8 54.♔f2 ♞a7+ 55.♔e2 ♞a6+ 56.♔d2

56...♞c4! It is very important to activate the black queen

since now there are threats of perpetual.

Chess and the City. On the trail of Emanuel Lasker

WGM Elisabeth Paehtz

Best rating: 2493

In 1891 the upcoming World Champion Emanuel Lasker left for England because in that country it was possible to make a living from chess. In those times London counted as the chess capital in the world. Nowadays it is actually possible to make a living from chess even in non-chess-enthusiastic countries such as Germany, but Azerbaijan will surely be an improvement...

Why do I actually write this? Our strongest German player of all times, Arkadij Naiditsch, recently became a member of the Azeri National team. He was the only German ever to reach 2700+ and also the key player for winning the first Gold Medal at the European Team Championship in Porto Carras in 2011 since 1939.

Azerbaijan, as a member of the former USSR, is quite a chess loving country nowadays, especially with a sponsor like "Socar Energy", a company which is one of the most potent chess sponsors worldwide.

Picture by Fiona Steil-Antoni

Just like Lasker, Arkadij was never really in good terms with the German chess federation and eventually decided to leave us for a better perspective of his chess career, which certainly awaits him in a country like Azerbaijan.

After one of the most famous Azeri players, Vugar Gashimov, sadly passed away in 2014, the Azeri team was certainly weakened and this may just be one of the reasons for hunting a world class player such as Arkadij Naiditsch, who recently managed to beat the World Champion Magnus Carlsen twice. Another reason is certainly the fact that the next Chess Olympiad will be staged in Baku in 2016.

Rumor also has it that the initial idea of the Azeris was to hire world number two Fabiano Caruana, who however decided to play for the USA, where he spent most of his childhood.

Last but not least Emanuel Lasker became World Champion three years after he left Germany for London. So let's see what happens to Arkadij in 2018 - which will funnily also be the 150 birthday of Emanuel Lasker.

Best rating: 2655

1.♘f3 ♘f6 2.c4 e6 3.d4 d5 4.e3 A rare and quiet move. More popular are moves like [4.♘c3 ; and 4.g3]

4...♘c6 This is not a perfect place for the knight. Black had better plans, connected with c7-c5.

5.♘c3 [5.b3!? with the plan Bb2-Nbd2-Bd3-O-O etc.]

5...♗b4 The position transposes to a structure from the Ragozin Qa4+ line where White didn't lose time for Qa4-Qc2. [5...♗d6!? This is the only way to fight for the center. 6.cxd5 (6.♗e2 6...dxc4 7.♗xc4 O-O 8.O-O e5 and now Black is fine.) 6...exd5 7.♗d3 O-O (7...♗g4 8.♖b3) 8.O-O ♘e7 9.♖c2 Temporarily preventing Bf5.

9...a6 10.b3 g6 11.♗b2 ♗f5 12.♘e2 ♖e8 13.♘g3 ♗xd3 14.♖xd3 and without the light squared bishops the position should be equal.]

6.♗d2 [6.a3!? 6...♗xc3+ 7.bxc3 ♘a5! Otherwise White would play cxd5 and c4 next, with two bishops and a strong center. 8.cxd5 exd5 9.♗d3 O-O 10.♘e5 (10.O-O 10...♗g4 with the idea Bh5-Bg6.) 10...c5 11.O-O ♖e8 12.a4∞]

6...O-O 7.a3 ♗xc3 8.♗xc3 ♘e4 9.♖c2

9...a5 A typical move to prevent b4, taking space and preparing for the bishop to develop on a6. The alternative was more solid but a bit passive: [9...♘xc3 10.♖xc3 ♘e7 Improving the bad knight is obligatory. 11.♖c1! (11.♗d3 11...b6 12.e4 (12.O-O 12...dxc4 13.♗xc4 ♗b7=) 12...c5!? 13.dxc5 dxc4 14.♗xc4 bxc5 15.O-O ♗b7 and the black structure should be not a big problem, so the position is close to equal.) 11...dxc4 (11...b6 12.c5!?↑) 12.♖xc4 c6 13.♗d3 b6 14.O-O ♗b7 15.♗e4 ♖d6 16.♘e5 and White keeps some pressure.]

10.b3 b6 11.♗b2 White lost some time but saved the bishop.

11...♗a6 [11...♗b7 12.♗d3 ♘e7 13.O-O h6 14.b4 With a clear advantage for White.]

12.♗d3 f5 13.♖c1 ♖c8 14.O-O

14...Rf6! The rook joins the attack and protects the knight on c6. It looks to me like this is the only plan which can create some practical problems, otherwise White's position will be much better from a strategical point of view.

15...Rfd1 [15...cxd3 16...Rxd3 exd5 (16...Rxd5 17...Rc4 and after the queens exchange White will keep a stable advantage thanks to the pressure over the c-file and the weak e5 square.) 17...dxe5 18.dxe5 Rf6 19.f3 (19.b4 19...axb4 20.axb4 c6 21.f3 (21.b5 21...c5 22.Rcd1 Rf6 23.Rxd5+ Rf8 24.h3 Rg6 25.e6 Rg5 26.g4) 21...Rf6 22.h3 (22.fxe4 22...Rf6 23.Rf2 fxe4) 22...d3 23.Rfd1 Rf6 24.Ra3 Rf6 25.Rd6 and because the black pieces are badly placed White has good compensation.) 19...dxc5 20.Rxf5 dxb3 21.Rcd1 (21.e6!?) 21...c6 22.Rc2 dxc5 23.e4]]

15...Rf6 16...Rf1 White's idea is put the bishop on g2 to stop the attack.

16...g5! [16...d3 17...d1 It is important for White to keep the knight.; 16...d1 17.g3 (17...d1 17...d3 18.f3 Rf6 19.h3 dxe5 20.dxe5 Rg3 21.fxe4 Rf6 22.Rf3) 17...Rf6 and Black is looking for his chances over the light squares, for example with a4 or dxc4 and Bb7 next.]

17.cxd5

17...g4? Following the plan but too optimistic... Interesting variations could happen after [17...Rxf1! 18.Rxc6 (18.Rxf1 18...exd5 19.dxe5 dxe5 20.dxe5 g4! (20...c6 21.f3; 20...Rf6 21.Rc6) 21.f3 gxf3 22.gxf3 Rg6 23.fxe4 Rg5 24.exd5 Rg1+ 25.Rf2 Rg2+ 26.Rf1=) 18...Rf6 19.Rf6 (19.d1 19...dxf2! 20.dxf2 dxd1 21.Rxd1 Rf6 22.Rf6 exd5) 19...g4 20.Rg1 gxf3+ 21.Rxf3+ Rf7 22.dxe6+ Rf6 23.Rb7 Rf6 24.Rxc7+ Rxc7 25.Rxc7+ Rf7 26.Rc4+ Rf6 27.Rc7+]

18.Rxa6 gxf3 19.gxf3 [19.g3 19...exd5 20.Rxc8 Rxc8 White has a material advantage but his pieces are very limited and Black has a strong attack. 21.Rd3 Rf8 22.Rb5 Rf8! 23.Rxd5 Rf6!! 24.Rf6 Rf5+ 25.Rf1 Rf6+ and the knight on c6 controls the e5 and d8 squares.]

19...Rf6 20.Rf1? White is going to escape with the king but more easily winning was [20.Rf1! 20...Rf6 21.Rf1+ Rf8 22.Rf2+ and the white king is safe!]

20...Rf6 21.fxe4 A logical decision but maybe not the best. White had a difficult choice as to which piece to take. [21.Rxc8 21...Rf6 (21...Rf6 22.Rf2+ 23.Rf2 d3 dxe5+ 24.dxe5 dxc5+ 25.Rf4 Rf6 26.Rd4 Rxc2+ 27.Rxc2+) 22.Rf6+ Rf8 23.Rf2 Rf6 24.Rf3 Rxc2 25.Rxc2 Rf6 26.dxc6 d3 27.Rf4 dxd1 28.Rxd1 and again White has too many pieces.]

21...♖f8 The rook comes into play.

22.e5? White wants to avoid opening the f-file but more accurate was [22.♖d2! A very hard move to find for a human being. 22...fxe4 (22...f4 23.f3! This is the point of putting the rook on d2. 23...♖h3 24.♖h2 ♖xf3+ 25.♔e2 fxe3 (25...♖xe3+ 26.♔f1 ♖f3+ and now it is possible to play 27.♖f2+—) 26.♖xc6 ♖g3 27.♖xe6+ ♖8f7 28.♖c8+ ♖f8 29.♖xc7 ♖f2+ 30.♔d3+—; 22...♖g2+ 23.♔e1 ♖h1+ (23...fxe4 24.♔f1 ♖h1 25.♖c4+— White is on time.) 24.♔e2 fxe4 25.♖xh1 ♖xf2+ 26.♔e1 ♖xd2 27.♖xd2 ♖xh1+ 28.♔f1+—) 23.♖xe4 exd5

24.♖xd5+! ♖xd5 25.♔c4 ♖e7 26.e4!+—; 22.♔e1]

22...f4

23.e4?? It looks logical not to open the f-file but this move is already a big mistake. [23.♖xc6 23...♖h5! and the white

king will not escape. Black is winning! 24.♖xe6+ ♔h8 25.♔e1 ♖f3—; 23.♔e2! was the last call for escape. 23...♖xf2+ (23...fxe3 24.♖xc6+—) 24.♔xf2 fxe3+ 25.♔e2 ♖f2+ 26.♔d3 ♖b4+! 27.axb4 ♖g6+ 28.♔c3 ♖xc2+ 29.♖xc2 axb4+ 30.♔xb4 ♖xc2 31.♖g1+ ♔f8! With a complex position. White must be careful because his pieces are not coordinated.]

23...f3 24.♔e1

24...♖g1+?? This huge mistake changed the result of the game! Black should not lose control over the d2 square because White doesn't have any useful move anyway. For example [24...exd5 25.♔f1 (25.exd5 25...♖e7+—) 25...♖g1+— Threatening Qxf1.]

25.♔d2 ♖xf2+ 26.♔c3 The king has escaped and the knight is hanging, so White is winning now.

26...♖g3 [26...♖h4]

27.♖d3+— exd5 28.♖g1! Forcing the exchange of the active rook.

28...♖g2 29.♖xg2 ♖xg2 30.♖f1! Another exchange, which is the most practical way to convert a winning position.

30...dxe4 31.♖xg2+ fxg2 32.♖g1 ♖f2 33.♔c4+ ♔f8 34.♔d5 ♖f3+ 35.♔c4 b5+ 36.♔c5 ♖e7 37.♖xg2 ♖xd5 38.♔xd5 ♖xb3 39.♔xe4 b4 40.axb4 axb4 1-0

Editorial Preface

A lot of opens have been taking place, but the strongest one was probably the Politiken Cup. After a big fight and a strangely quiet and peaceful last round, a total of 10 players shared first place. The best on tiebreak was Markus Ragger, followed by Nisipeanu and Hammer.

Another big open is under way in Vlissingen, but here just 7 rounds out of 9 have been played and all the favorites are on the top, so the last 2 rounds will be decisive.

The Turkish league is also under way, with top players like So, Mamedyarov and Harikrishna are taking part.

In the British Chess Championship where David Howell was the clear favorite, after 10 out of 11 rounds four people are in the lead: Howell, Pert, Gormally and Hawkins. It is going to be a very exciting last round!

Very soon we will be able to watch the extremely strong Russian Super Final amongst men and women.

We hope you enjoy the games and articles from the current issue!

Two best games of the past week

(1) Williams, Simon K(2426)
- Howell, David W L(2698) [E11]

102nd ch-GBR 2015(4.3),
2015.07.30

GM Arkadij Naiditsch
Best rating: 2737

We should not look at the rating of Simon Williams, who is a much stronger player than he often shows. Simon is famous for his ultra aggressive style and a lot of great victories with bright combinations. I still remember his fantastic win over Boris Gelfand with the black pieces in the Stonewall. In the current game, it seemed like Simon was once again going to crush a much higher rated opponent, but things went differently. In a very promising position White just wanted to play too prettily, which led to the loss of more and more material and finally resignation. A sad end to a very beautiful game.

1.d4 ♘f6 2.c4 e6 3.♘f3 ♙b4+ I like to play 3...Bb4 as well

4.♗bd2 Another option is 4.Bd2, which seems to be considered the main move.

4...b6 5.g3 [Black's idea is visible after 5.a3 5...♙xd2+ 6.♙xd2 ♙b7 White has the bishop pair, but Black is very solid with a great bishop on b7. It is a slightly passive line but for those who don't like forced lines and like to keep the game calm, this is clearly not a bad choice.]

5...♙b7 6.♙g2 0-0 7.0-0 White is trying to save a tempo on playing a3.

7...a5 The main move. Black is waiting for a3 to take on d2, while a5 is clearly a useful move.

8.♘b1!? I like this move, even if I would probably never play it. Usually White continues with 8.Qc2. The idea of the move in the game is simple, to get the knight to a much better square on c3 and there is also the direct threat to play c5 and catch the bishop on b4.

8...♙e7 A logical move. [White's idea is visible after 8...h6 9.c5! a4 The only move to save the bishop. 10.a3 and White wins the a4 pawn.]

9.♙e1 White continues keeping his ideas "uncovered", which is smart! [9.♘c3 doesn't lead anywhere since after 9...♗e4! the exchange of the knights is very important for Black here. He should never allow White to play d5 or e4.]

9...♙c8 This move is a bit too deep for me... [9...♗a6 looks much more natural.]

10.d5! A very strong move! White sacrifices a pawn -which is quite typical in this kind of structures- but this move still clearly came as a surprise for Black.

10...exd5 Black needs to take the pawn because if he doesn't, White will play e4.

11.cxd5 With which piece to take now?!

11...♙xd5 [It would make no difference to play 11...♘xd5 12.e4 ♘f6 since we are back to the position of the game.]

12.e4 Of course!

12...♙xe4?! and what Howell does here is just incredibly risky to say the least! [Black should have continued with 12...♙b7 13.e5 ♘d5 and of course Black's position looks very risky, but White still needs to prove that there is some compensation for the pawn. 14.♘g5! A strong move! White is going for the black king. 14...♙b4 (14...♙xg5 15.♙xg5 ♘b4 and now White has the very strong 16.♙f6! and Black is in big danger.) 15.♘e4 ♘a6 With a very fighting position.]

13.♖xe4 Not a bad move, but there was no need for it at all. [After the simpler 13.♘c3 13...d5 14.♘xe4 dxe4 15.♘g5 White wins back the e4 pawn and clearly has more than just compensation.]

13...♙xe4 14.♙d5 The rook on a8 is hanging.

14...♙xg3 15.hxg3 So Black has 3 pawns and a rook for White's 3 pieces, an interesting constellation. White's idea is clear, to get the pieces in the attack on the black king, while Black should try to reach a solid position or even an endgame in the best case.

15...c6 Howell black the Bg2, which is logical.

16.♙h5 d5

17.♙h3 I am not sure if this move was really needed. [White could also have continued with 17.♘c3 17...♘d7 18.♘d4 followed by Nf5, with very unclear play.]

17...♙b7 The black queen has a passive position on b7, but it will still play a very important role.

18.♙f5?! Now White is trying to rush things... [The position would still have been unclear after 18.♘c3]

18...g6 The only move.

19.♙h6 White wants to play Ng5 next.

19...♖e8! A very strong defensive move! Black's idea is to play Bf8 next, chasing the white queen away from h6. [Of course not 19...gxf5?? 20.♘g5 ♙xg5 21.♙xg5+ ♔h8 22.♙f6+ ♔g8 23.♙h6 and Black cannot avoid being mated on g7.]

20. ♖g5? This is already a self-destruction. White had to move his bishop back.

20... ♗xg5 21. ♗xg5 Maybe Simon missed Black's next move...

21... f6! The queen from b7 controls the 7th rank, which gives White no mating chances. The game is basically over.

22. ♗xg6 [22. ♗xf6 doesn't help either since after 22... ♔f7 White is losing another piece.]

22... ♖e1+ It is difficult to attack with the knight on b1 and rook on a1.

23. ♔g2 fxg5 A very safe move. White has no threats.

24. ♖d2 To die with a smile is Williams' choice here...

24... ♖xa1 All Black needs to do now is to bring the a8 rook into the game.

25. ♗f5 ♖a6 26. ♖f3 ♔g7 White simply has no threats...

27. ♔xc6

27... ♖f8 Well, what to say about such a spectacular game where Black just won by taking all the material for free. It is a big pity for White not to have used his chances and of course we need to give Howell credit for staying cool and playing very rational moves. **0-1**

(2) Karjakin, Sergey(2753) - Ni Hua(2703) [C42]

CHN-RUS Super Go 2015(3.1),
2015.07.31

GM Csaba Balogh
Best rating: 2672

Ni Hua introduced a strong novelty in the opening, equalized completely, but he failed to find the right follow-up and ended up in trouble.

1.e4 e5 2.♘f3 ♘f6 The rock-solid Petroff defense still comes back to the practice from time to time, even on the highest level. It got a bit forgotten since Kramnik and Gelfand stopped playing it.

3.♗xe5 d6 4.♘f3 ♗xe4 5.d4 The main line, however recently 5.Nc3 was played more often.

5...d5 6.♘d3 ♗c6 7.O-O ♘e7 8.♗c3 A tricky sideline. Black must know exactly how to react, otherwise he might quickly get into a difficult situation. [The huge main line goes with 8.c4 8...♗b4 9.♘e2 O-O 10.♗c3 ♘f5 11.a3 ♗xc3 12.bxc3 ♗c6 13.♞e1 ♞e8 14.cxd5 ♞xd5 15.♘f4 ♞ac8 We can call this the starting position of this line, with thousands of games.]

8...♘f5 9.♞e1 ♗xc3 10.bxc3 ♘xd3 11.♞xd3 O-O

12.♞e2!? A useful and waiting move at the same time! The general idea is to fight for the e-file by doubling the rooks on it. White wants to develop the bishop to f4, followed by Rae1. The most natural moves to counter this are running into problems... [On the direct 12.♘f4 Black equalizes with 12...♘d6! 13.♗g5 g6 14.♞h3 h5 and Black is safe.]

12...a6! As we will see in the 12...Re8 line, the control of the b5 square is very important. [On 12...♞e8 13.♘f4! White intends to play Rae1. If Black moves away with his bishop, the c7 pawn falls after taking on e8. 13...♘d6 This thematic move it is met by 14.♞xe8+ ♞xe8 15.♘xd6 cxd6 16.♞b5!+= with a double attack on b7 and d5.; After 12...♘d6 to anticipate Bf4, White has 13.♗g5! g6 14.♞h3 h5

15.g4! This is the point! In comparison to the 12.Bf4 line, the bishop is not hanging on f4 and White is not forced to trade pieces. Now the attack is getting very dangerous. 15...♘e7 is strongly met by 16.♞h4!→]

13.♘f4 ♞d7 14.♞ae1

14...Rae8! This is the new idea, which seems to solve the opening problems! Instead of Bd6, which never works tactically somehow, Black wants to fight for the e-file with Bd8. It protects the c7 pawn and prevents Ng5 at the same time. To get rid of some heavy pieces is more important than to trade the dark squared bishops.

15.c4 Karjakin admits that he cannot gain any concrete benefits, therefore he also gets rid of his long-term structural weakness on c3.

15...dxc4 16.♟xc4 ♘d6? The most natural move, but this causes all the further problems. White gets the advantage with some very concrete and direct moves. [There was nothing wrong with 16...♘d8 ; However probably the strongest was 16...b5! 17.♟d3 h6! neutralizing the g5 square first and trading the bishops on d6 next move. White cannot make use of the tempo as d5 with the idea of Ne5 allows Nb4 and the d5 pawn falls. (17...♘d6? did not work immediately because of 18.♞g5! g6 19.♞e4 with problems on the f6 square.) 18.c3 ♘d6=]

17.♞xe8 ♞xe8 18.♞xe8+ ♟xe8 19.♞xd6 cxd6 Black was probably satisfied with the outcome and he expected a quick draw, but unpleasant surprises are awaiting him.

20.d5! If the back rank was opened with h6, all would be perfectly fine, but now Black's choices are limited.

20...♞e7 [20...♞e5 21.♞xe5 Black cannot recapture with the queen and otherwise the d-pawn gets too strong... 21...dxe5 22.d6+-]

21.♟c7! Somehow the white back rank seems to be equally weak, but the f3 knight covers the e1 mate and Black has no access to the other squares.

21...♞xd5 22.♟xb7 White wins the a6 pawn. [22.♟xd6 22...♞c3= was equal.]

22...♞c3 23.♟xa6 White ended up with an extra pawn, but to convert it still requires good technique.

23...♟b8 24.g3! White has done the last step by opening the back rank before realizing his advantage.

24...h6 The long awaited move, Black also had to open the back rank.

25.a4! An excellent technical move! Karjakin correctly evaluates that the advance of the a-pawn is more important than the saving the extra pawn! [White could have saved the c2 pawn with 25.♔g2 but then Black blocks the a-pawn with 25...♚b4! and making progress is a much more difficult task than in the game.]

25...♚b1+ 26.♔g2 ♚xc2 The material is balanced again, but the difference between the two passed pawns (a4 and d6) decides the outcome. Black has no chance to compete with his d6 pawn, so his only hope lays in some kind of attack against the king and the f2 pawn. However White has enough resources to defend against it.

27.♚c8+! It is very useful to pin the knight before advancing the pawn, because Black must lose an important tempo on moving with the queen.

27...♔h7 28.a5 ♚b2 [Black cannot try to stop the pawn with 28...♚d3 29.a6 ♘b5 since White simply promotes it after 30.♚b7+–]

29.♚c6! An important prophylactic move to anticipate Black's counter ideas... [Black saves himself after the hasty 29.a6? 29...♘d1! 30.♚f5+ ♔g8= and White should give perpetual check with Qc8 because if he defends his f2 pawn by removing his f3 knight, that allows Ne3!]

29...d5 [Now on 29...♘d1 30.♚b6! is a perfect square for the queen. It protects the king and supports the a-pawn at the same time. 30...♚e2 31.a6 ♘xf2]

32.♘g1! An important intermediate move to avoid the technical problems! White gets the f7 pawn, after which the win is already out of question... 32...♚a2 33.♚xf2 ♚xa6 34.♚xf7!+– was the point behind 32.Ng1!]

30.♚b6 ♚a2 [Somewhat more tenacious was 30...♚b5 White has other winning moves as well, but the following line demonstrates well, why they say that knight endgames are similar to pawn endgames in the evaluation. 31.♚xb5 ♘xb5 White has the distant passed pawn, therefore he has the winning chances... 32.♘e5 ♔g8 33.♘c6 ♘c7 34.♔f3 ♔f8 35.♔e3 ♔e8 36.♔d4 ♔d7 37.♔c5!+– and Nb4 next wins.]

31.a6 ♘e4 32.a7 The pawn is only one square away from promotion. White cannot support it with the queen, because it must stay with the f2 pawn, but the knight on f3 is free to do anything. **32...g5 33.♘e5 ♔g7 34.♘d3** The f2 pawn is protected, so White can play Qb7 next.

34...d4 35.♚xd4+ ♘f6 36.♘c5 [Black resigned in view of 36.♘c5 36...♚xa7 (36...♔g6 37.♘e4+–) 37.♘e6+! fxe6 38.♚xa7+– Black made only one mistake with 16...Bd6, but it was enough to lose the game.] **1-0**

Politiken Cup 2015(3.8),
2015.07.26

The 19-year old Daniel Naroditsky from America is 10th in the FIDE juniors list. Here are two fine games he won at the Politiken Cup.

1.e4 c5 2.♘f3 ♘c6 3.♙b5 e6 4.0-0

4...♗a5 This funny try will be refuted that day. [4...♗ge7 is the usual move in the Rossolimo.]

5.d4 a6 6.♙e2 cxd4 7.♗xd4 ♖c7 8.c4! The strong key move.

8...♗xc4 If he doesn't play this, Black will simply have a bad version of the Hedgehog.

9.♙xc4 Normal play for development. The slow move also would have given an advantage [9.♖c2 9...b5 10.a4 ♙c5 11.axb5 ♙xd4 12.♖xc4 ♖xc4 13.♙xc4 a5 14.♖d1 With a clearly a better endgame.]

9...♖xc4

10.♗c3± ♙b4 Let's have a look at other defensive tries: [10...♖c7 Getting back with the queen is losing because of the following typical sacrifice: 11.♖e1! ♙e7 12.♗f5! exf5 13.♗d5 and there is no defense.; 10...♗f6 11.♙f4 followed by Rc1 is also hopeless.]

11.♙e3 The d4 knight should be defended!

11...♙xc3 12.♖c1 ♖xa2 [12...♖c7 13.♖xc3 ♖d8 was a more solid option but it is understandable that Black takes material in a bad position.]

13.♖xc3 ♖a5

14. ♖g4 Provoking more weaknesses on the kingside.

14... ♗e5 15. f4 [15. ♘f3 is a more trivial win: 15...h5 16. ♘xe5 hxe4 17. ♘c4 Black can't avoid huge material losses. 17... ♘e7 18. ♘b6 ♖b8 19. ♕f4+-]

15...h5 16. ♗f3 ♗a5 17. ♖fc1 [17. ♗g3 Attacking g7 is also fine. 17...g6 18. f5+-]

17... ♘e7 18. ♖c5 ♗d8 19. ♖xh5 Taking back a pawn and opening new lines for the attack.

19... ♖g8 20. ♖h7 b6 21. ♗g3 ♖f8

22. f5! +- Black cannot survive with all those pieces on the last rank.

22... ♕b7 23. fxe6 dxe6 24. ♖f1 ♗d7 25. ♗e5 ♘g6 26. ♘xe6+ ♖e7 27. ♕g5+ With mate to follow soon. 1-0

- Naroditsky, Daniel (2622) [C84]

Politiken Cup 2015(4.6),
2015.07.27

1.e4 e5 2. ♘f3 ♘c6 3. ♕b5 a6 4. ♕a4 ♘f6 5.O-O ♕e7 6.d3 b5 7. ♕b3 d6 8.a3 O-O 9. ♘c3 ♘b8 10. ♘g5 We had the interesting 10.Ne2 in a previous column from the game Shen-Chandra. Here White plays like Anand.

10...h6 A good improvement! It is clear that the American juniors are doing a good job in the openings. [10... ♘c6 11. ♕a2 ♘d4 12. ♘e2 ♘xe2+ 13. ♗xe2 h6 14.f4 Anand-So Shamkir 2015.]

11.f4 [11. ♘h3 with a later f4 is also a possibility, but I don't think it can bring an advantage.]

11...hxe4! [11...exf4 seems good but White has the strong move 12. ♘f3! g5 13.h4 ♕g4 14.hxe4 hxe4 15.g3! The black king will soon be in trouble. 15... ♘c6 16.gxf4 ♘d4 17. ♕e3 With a crazy position which should be in White's favor.]

12.fxe4 ♘g4! [12... ♕g4 runs into a mating attack: 13. ♗e1 ♘fd7 14. ♗h4 ♕e6 15. ♖f3±]

13...f5? Not the best move after Black's strong opening play. [13.h3 is the most obvious move. Black equalizes comfortably after 13...g5 14.hxg4 gxc1 15.fxc1 e6!=; 13.f2 Defending g5 before catching the g4 knight. But Black has a fine defense: 13...c6 14.h3 d7 15.hxg4 c5 16.a2 e6 and Black will get his knight to e6 and win back the pawn.; 13.g6 is met by counterblow 13...d5! 14.d4! fxg6 With crazy complications.]

13...fx5 14.exf5 g5 15.f5 g4 16.fxc1 17.fxc1 looks tempting but White is not fast enough to get enough compensation.

16...d7 17.f1 c6 [17...f6 is the most obvious move, but maybe Black didn't want to allow 18.f4 d7 19.f6!?]

18.f3 f6

19.f4? Now it is all easy. White should have tried [19.g5 19...d5 20.g3 e8 21.f5 f6 22.d1 (22.f3 22...h6)]

19...b6+ 20.h1 d4 21.g5 g4 22.d2 d5—+ Black easily converted his big material advantage.

23.d1 e4 24.e3 f4 25.g3 f5 26.f4 d4 27.f1 e3 28.f1 f8 29.g2 ad8 30.h3 d5 31.xd5 xd5 32.g4 f6 33.f3 c5 34.c3 e2 35.g3 dxc3 36.bxc3 xc3 37.e4 c1 0-1

Endgame section

(15) Ding Liren (2749)
- Karjakin, Sergey (2753)

CHN-RUS Super Go,
2015.07.30

GM Csaba Balogh
Best rating: 2672

This game is from the Armageddon part of the match, when White starts the game with more time, but Black only needs a draw to go through to the next round. Probably both players were very short on time. I don't want to criticize anyone because of the following endgame, it is just very interesting to analyze it in detail. White is a pawn up, but Black wants to restore the material balance with Rg4.

60. ♖c7+?! A mistake, although the game remains winning. [White should have played 60.b5! ignoring the g5 pawn. It leads to a very easy win: 60... ♖g4+ (60... ♖b1 61.b6 ♖b5

Black temporarily prevents the advance of the b-pawn and stops Ke5, but White easily sets him into zugzwang with 62. ♖d6! and if the rook moves, Ke5 wins, while after 62... ♔g7 63. ♖d7+!+- Black does not have Ke6 anymore and now b7 followed by Rc7-c8 wins.) 61. ♔e5 ♖xg5 62. ♔d6+- and White automatically promotes his b-pawn.]

60... ♔e6 Black suddenly threatens to mate in one move on g4!

61. ♖c6+ Ding Liren zes that he was winning after 60.b5. He tries to repeat moves, but Karjakin finds a clever way to retain more drawing chances!

61... ♔d5! Seemingly giving up the g6 pawn is equal to resignation, but Black gets his counterchances.

62. ♖c5+? A blunder which could have cost the full point. [It is interesting to analyze what happens after 62. ♖xg6! 62... ♖g2! (62... ♖f1? fails to 63. ♔g3!+- and the white king escapes from the cage.)

63.f3! The first key move! White gives free way to the g-pawn. (63.gxf5 only leads to a draw after 63...xf2+ 64.g4 g2+ Black gives checks until the king comes back to the 3rd rank and then he takes the e3 pawn with check. 65.h4 h2+ 66.g3 e2 and the e-pawn gives Black enough counterplay to save the game.) 63...xf2+ 64.g3 f1 (If Black goes for the second pawn with 64...f3+ 65.h4 xe3 he gives too much time to advance the g-pawn. It is important that Black must lose another tempo to go behind it, but it turns out to be too much... 66.g6 e1 67.g7 h1+ (67...g1 loses to 68.f5+! e6 69.g5!+-) 68.g5 g1+ 69.h6+- Rg6 is threatening with promoting the pawn and Rxg7 Kxg7 also wins for White!) 65.g6 e5 (65...g1+ 66.f4+- f1+ 67.g5+-)

66.g2! A very important intermediate move and actually the only winning one! White prevents Rg1 with tempo!

66...xf6 (66...c1 67.g7! c8 68.f8+-) 67.xf1 xg6 68.b5+- and the king is not in the square of the b-pawn.]

62...e6? [Suddenly Black was winning after 62...d6! because of the mate threat on g4! White has only one move to avoid it, but it leads to a lost endgame... 63.f3 f1! 64.g3 xf3+ 65.h4 xe3+- and the connected passed pawns decide the outcome.]

63.f3 White should have played 63.Rc6 again, but it is already a draw by threefold repetition, which is equal to losing in the armageddon game.

63...exf3 [Black could have won with 63...f1!+-]

64.xf3 fxg5 Black won back the pawn and the game is drawn. The b-pawn is not advanced far enough to gain any benefits from it.

65.f1 Going behind the passed pawn is a good strategy in general, but it does not help now.

65...g4 66.f1 d6 67.b5 c7 68.b6+ b7= White cannot make progress, the rest is easy...

69.f5 e4 70.f2 e6 71.f4 e4+ 72.g5 xe3 73.xg6 e6+ 74.xf5 xb6 75.xb6+ xb6 1/2-1/2

**(16) Gormally, Daniel W (2484)
- Hawkins, Jonathan (2554)**102nd ch-GBR 2015(6.2),
2015.08.01GM Arkadij Naiditsch
Best rating: 2737

Gormally was playing a very nice positional game, where the knight was dominating the bishop. In the current position, White is still much better. As we know, queen+knight is a great combination for making threats and the bishop on f6 has no real potential. But still, the material is equal, which of course makes the win quite difficult.

51. ♖g4+! A good move! White is correctly aiming for an endgame, where the knight will dominate the bishop.

51... ♕f8 52. ♖h6 Threatening Qg8.

52... ♕e8 Black has no choice.

53. ♖g8+ ♕e7 54. ♖f5+ Bringing back the knight before exchanging the queens with tempo.

54... ♕d7 55. ♖xe8+ [White would also have kept a clear advantage after 55. ♖g4]

55... ♕xe8 56. ♕e2 Another very solid and good move. [White could also have tried to play 56. ♖d6+ but now Black has 56... ♕d7! and taking on f7 is not possible, but luckily White has another plan: 57. ♖c4 (57. ♖xf7 57... ♕e6 58. ♖h6 ♕g5 59. ♖f5 ♕c1 and White is losing the b2 pawn, which gives Black a draw.) 57... ♕e6 58. ♖a5 and White is winning the b3 pawn again.]

56... ♕g5 This move loses a pawn, but Black didn't have anything better, as in case of passive play White would just go for Kd3-Kc4 and Kxb3.

57. ♖d6+ Now this is already the right choice. White is winning a pawn.

57... ♕e7 Black is fighting! [57... ♕d7 was losing on the spot: 58. ♖xf7 ♕c1 59. ♖xe5+ ♕e6 60. ♖c4 White is in time to collect the two black pawns and protect b2.]

58. ♖b7 ♕c1 Black needs to go for the b2 pawn.

59. ♖xc5 ♕xb2 60. c4 A very solid move. But why not 60. Kd3?! The answer is, Gormally's idea is to get his king to f5, which is clearly its best place, and then slowly take the other two black pawns.

60... ♕a3 61. ♖xb3

61...♔d6?! Black doesn't feel what is soon going to happen... [61...♔e6! was the only way to fight on. Black is threatening to play f5 and exchange one pawn, which could be very important in the fight for a draw. 62.♔f3 f5 and now White has a great maneuver which ends the game: 63.exf5+ ♔xf5 64.♞d2! The white knight is going to take a superior position on e4, from where he controls both flanks and helps playing c5 and g5. Black can't save the game any longer.]

62.♔f3 The white king is going to f5.

62...♞b4 63.♞c1 Bringing the knight to d3 was not needed, but isn't bad either.

63...♔e6 64.♞d3 ♞e7

65.g4?? After such a great game, what a terrible mistake! [White was easily winning after 65.♔g4 since now the black king can never move away from e6. 65...♞f8 66.c5 ♞e7 67.c6 ♞d6 and here comes the killer move: 68.♞b2! ♞c5 69.♞c4 White is totally dominating the position and has a lot of different ways to end the game.]

65...f6 Right now White's hopes can only be on the queenside because the kingside is blocked, which gives Black a chance to bring his king from e6 to c6.

66.c5 Played too quickly again. White should have brought his king to d3 first and get the knight somewhere to f5, keeping good practical chances to play a very long game where the opponent can make a mistake.

66...♞d8? And Black returns the favor... [Hawkins should have played 66...♔d7 with the very simple idea of playing Kc6 and Bxc5 with a draw. 67.g5 fxg5 68.♞xe5+ ♔e6 69.♞d3 ♞d8 Black starts to keep on waiting. 70.♔g4 ♞e7 and I don't see how White can win this position.]

67.♔e2 White tries to bring his king to c4.

67...♞a5? This is the final mistake. [Black could have fought much harder after 67...♔d7! 68.♞b4 This is already the only move to avoid an instant draw. (68.♔d2 68...♔c6 69.♔c3 and Black reaches a draw with 69...♔b5 since White can't improve his position any longer.) 68...♞e7 69.c6+ ♔d6 70.♔d3 and White is probably still winning, but things are far from clear.]

68.♞c1! Now it is all over since the white king reaches c4.

68...♔d7 69.♔d3 ♔c6

70.♔c4 Now all White needs to do is to get his knight to b4, then put his king to d5 and it is done.

70...♙c7 71.♞d3 ♙d8 72.♞b4+ followed by Kd5, with a totally winning position. We just saw an interesting endgame and domination of a knight over the bishop. And once again, even in a winning position it is never too late to slip and lose half a point... **1-0**

Golden knowledge

GM Adrian Mikhachishin
FIDE Trainers Commission Chairman

(17) Lomineishvili, Maia(2364)-Galliamova, Alisa(2478)

ewcc-2015, 2015

Endgames are still a very big problem, even for top women players.

79.c7?? It is incredible, but the position that will appear now is drawn despite White's two extra pawns. There were a few easy ways for the win, but the move in the game seemed to be the simplest! [79.g5 ; 79.♔h5 79...♚h1+ 80.♔g5 ♚c1 81.c7 ♚c5+ 82.♔h4 ♚c3 83.g5]

79...♔f7 80.♖h7+ ♔g6 81.♖d7 ♖c3!

This cutting king move obviously underlines the helpless position of White's rook.

82.♖e7 ♔f6 83.♖h7 ♔g6 84.♖d7 ♔f6 85.♖d6+ ♔g7 86.♖d7+ ♔f6 87.g5+ ♔g6 88.♖d6+ ♔g7 89.♖d7+ ♔g6 90.♔g4 ♖c4+ 91.♔f3 ♔xg5 92.♔e3 ♔f6 93.♔d3 ♔e6 94.♖h7 ♖c1 95.♔d4 ♔d6 96.♔e4 1/2-1/2

(18) Ovod, Evgenija(2320)-Galliamova, Alisa(2478)

ewcc-2015, 2015

It is very difficult to believe that White lost this position with two extra pawns! Alisa was very lucky in this tournament.

61.♔d5 [61.e6 61...♔f8 62.♖g4 ♔e7 63.♖xg7+ ♔xd6 64.♖xb7 ♔xe6 65.♖xb4 with a very simple win.]

61...♖xb3 62.♖d8+ ♔f7 63.♔c6 [A very instructive line is 63.e6+ 63...♔e7 64.♖g8 ♔f6 (64...♖b5+ 65.♔c4) 65.♖f8+ ♔g6 66.♖g4+ ♔h7 67.d4 ♖c3 68.♖e4 ♖b5+ 69.♔d6 ♖b6+ 70.♔e5 ♖b7 71.d5 b3 72.♖f1 b2 73.♖h4+ ♔g8 74.♖f8+! ♔xf8 75.♖h8+ ♔e7 76.d6#]

63...♖e7 64.♖f4+ ♔g6 65.d4 [More precise was 65.♔d6 65...♖b7 66.♖g4+ ♔h7 67.d4]

65...♖c3+ 66.♔d6 ♖a7 67.♖b8 b3 68.♖b6 ♔g5 69.♖f8 [Better was 69.♖f1]

69...♖d3 70.h4+? [Now winning was 70.♖b4 70...b2 71.♖xb2 ♖xd4+ 72.♔c6 ♖c4+ 73.♔d5 ♖g4 74.♖e2]

70...♔xh4 71.d5 ♖a5 The white pawns are in danger now.

72.♔e7 ♖dxd5 73.♖f4+ [The best chance for a draw with a pawn down(!) was 73.e6]

73...♔g5 74.♖fb4 ♖xe5+ 75.♔f7 ♖a7+ 76.♔f8

76...♖c5! Suddenly mating threats appear.

77.♖b8 ♔h5 78.♖xb3 g5 The white king is terribly placed, so there is no real stopping the black pawn!

79.♖b1 g4 80.♖h1+ ♔g5 81.♔g8 ♖ac7 82.♖b3 ♖d5 83.♖b8

88. ♖g8 ♜cd7 89. ♜hg6 ♔h1 90. ♜h6+ ♜h2 91. ♜xh2+ ♔xh2

96.♙d3 ♙e8 97.e6 With zugzwang! **1-0**

(21) Savina, Anastasia(2417)-Gvetadze, Sofio(2319)

Chakvi, 2015

83...♙f8? [This is a very instructive endgame on the theme of why it is not recommended to defend passively. [It was obligatory to remove as many pawns as possible from the dark squares: 83...♖f7 84.♖c4 (84.♖e4 84...g6 85.♙e3 ♙f8 86.♙f4 ♖f6=) 84...g6 85.♖b5 gxh5 86.gxh5 ♙g5 87.♖c6 ♖e7 88.♙c3 ♙h4 89.♙d2 ♙g5 90.♙b4 ♙f4 91.♙a3 ♖f6 92.♙xd6 ♙d2 93.♙c7 ♙b4 94.♙b6 ♖g5 95.♙c5 ♙d2 96.d6 ♖xh5 97.d7 ♙g5 98.♖c7 ♖g6 99.♖c8 h5 100.♙b6 h4 101.♙d8 ♙xd8 102.♖xd8 h3=]

84.♖c4 ♖d7 [Now it was already too late for the same plan: 84...♖f7 85.♖b5 g6 86.♖c6 gxh5 87.gxh5 ♖e7 88.♙b2 ♖f7 89.♙a3 ♖f6 90.♙xd6 ♙g7 91.♙c5 ♖f5 92.d6 ♖g4 93.d7 ♙f6 94.♖c7 ♖xh5 95.♖c8 ♖g4 96.♙b6 h5 97.♙d8 ♙c3 98.♙e7 ♙a5 99.♙d6 and there is no defense against Bg7.]

85.♖b5 ♖c7 86.♖a6 ♖c8 87.♖b6 ♖d7 88.♖b7

88...♔e8 [Black is in zugzwang and the following pawn sacrifice does not help: 88...♗e7 89.♗xg7 ♗g5 90.♗c3 ♗e3 and the winning plan is that White's king returns to the kingside. 91.♔a6 ♗g5 92.♔b5 92...♔e7 93.♔c4 ♔f7 (93...♗f6 94.♗xf6+ ♔xf6 95.♔b5+—) 94.♔d3 ♗f4 95.♔e4 ♗g5 96.♗d4 ♗e7 97.♗e3 ♗f8 98.♔f5 ♗g7 99.♗d2 ♗f8 100.♗f4+—]

89.♔c6 ♔f7 [No big difference is 89...♔d8 90.♗b6+ ♔e8 91.♗c7 ♗e7 92.♗xd6 ♗h4 93.♗c7]

90.♔d7 g6 [Now the activation with 90...♗e7 is too late: 91.♗xg7 ♗g5 92.♗b2 ♗f4 93.♗a3 ♔f6 94.♗xd6+—]

91.hxg6+ ♔xg6 92.♔e8 ♗g7 93.♗xg7 ♔xg7 94.♔e7 ♔g6 95.♔xd6 ♔g5 96.♔e5 ♔xg4 97.d6 h5 98.d7 h4 99.d8=♔h3 100.♔d1+ ♔g3 101.♔h1 1-0

(22) Daulyte, Deimante(2402)-Sviridova, Vlada(2087)

Chakvi, 2015

Of course in some games high technique was demonstrated too.

49...♗b1! Creating a weakness before giving the decisive check. [The immediate 49...♗e4+? only leads to a draw after 50.♗xe4 ♔xe4 51.♔xg3 ♔d4 52.♔f4 a5 53.♔f5 ♔c3 54.♔e4 ♔b2 55.♔d5 ♔xa2 56.♔c6 ♔xb3 57.♔xb6 a4 58.c5=]

50.a3 ♗e4+ Now this transposition into a pawn ending is the quickest win. [50...♗a2 51.b4 ♗xc4 52.a4 ♗d3 53.♔g1 ♗e4 54.♗c8 a5 wins too, but takes longer.]

51.♗xe4 ♔xe4 52.b4 [52.♔xg3 does not help either, as it is met by 52...♔d4 (52...♔d3? 53.♔f4 ♔c3 54.♔e5 ♔xb3 55.♔d5 ♔xa3 56.c5 bxc5 57.♔xc5 a5 58.♔c4=) 53.♔f4 a5! 54.b4 axb4 55.axb4 ♔xc4+—]

52...♔d4 53.c5 bxc5 54.bxc5 ♔xc5 55.♔xg3 ♔b5 56.♔f3

56...♔a4! [A mistake was still possible: 56...a5?? 57.♔e2 ♔a4 58.♔d2 ♔xa3 59.♔c3 and the white king is in time!]

57.♔e3 ♔xa3 58.♔d4 ♔b3 59.♔d3 a5 60.♔d2 ♔b2 0-1

(23) Stefanova, Antoaneta(2512)-Sviridova, Vlada(2087)

ewcc-2015, 2015

44.♖c5+ [Simpler was 44.a5 44...♔g4 45.a6 ♔xg3 46.♖b8 ♔xh4 47.♖b7 ♖d1 48.♖xa7 and White is a pawn down, but her pawns are much more advanced!]

44...♔e4 45.♔b4 f6 46.♔a5 [Now the following direct line just leads to a draw: 46.a5 46...♔f3 47.♖c3+ ♔g4 48.b6 axb6 49.axb6 g5 50.♔c5 gxh4 51.gxh4 f5 52.♔c6 ♖d8 53.b7 ♔xh4 54.♔b6 ♖b8]

46...♔f3 47.♖c3+ ♔g4 48.♔a6 g5 This counterattack allows Black to save the game.

49.hxg5 fxg5 50.a5 h4 51.gxh4 gxh4 52.b6 axb6 53.axb6 h3 54.b7 ♖xb7 55.♔xb7 h2 56.♖c1 ♔g3 57.♔c6 ♔g2 58.♔d5 1/2-1/2

(24) Zaksaitė, Salomeja(2203)-Daulyte, Deimante(2402)

ewcc-2015, 2015

47.b6? [It was much better to prevent the activation of the black king with 47.♔d3 47...♔xb5 48.♖e6 ♖d8+ 49.♔e3 ♔c4 50.♖xe5 h4 51.♖g5]

47...♔b5 48.♖e6 ♖xb6 49.♖xe5+ ♔c4 50.♖xh5 ♖g6 51.g4 ♔d4 52.e5 ♖c6+ 53.♔d2 g6 54.♖g5 ♔e4! White has two extra pawns, but Black's king activity and the strange white rook allow a draw here.

55.h4 ♖d4 [More logical was 55...♖a6 56.h5 gxh5 57.gxh5 ♖f4 58.♖g6 ♖a2+ 59.♖d3 ♖xe5]

56.♖d1 ♖e4 57.♖e2 ♖c2+ 58.♖d1 ♖c6 59.♖d2 ♖d4 60.h5 gxh5 61.gxh5 ♖e6 62.♖g6 ♖xe5 63.♖xe6+ ♖xe6 1/2-1/2

(25) Khomeriki, Nino(2228)-Gavasheli, Ana(2122)

ewcc-2015, 2015

It is difficult not to win with such a material advantage...

62.h6 ♖xb5 63.e5+ ♖f7 64.e6+ [64.♖h5 64...♖c7 65.e6+ ♖f6 66.e7 ♖e8 67.♖d5+ ♖f7 68.h7 ♖g7 69.h8=♖+ ♖xh8 70.♖g6 a3 71.♖b4 ♖d6 72.f4 b5 73.f5]

64...♖g8 65.♖d5 [A classical mating attack was possible

here: 65.♖g5 65...a3 66.♖g6 a2 67.e7 ♖d6 68.h7+ ♖h8 69.e8=♖+ ♖xe8 70.♖h6 a1=♖ 71.♖g6#]

65...a3 66.♖b4 [Or 66.e7 66...♖d6 67.♖c3 ♖h7 68.♖g5]

66...♖c7 67.♖f5? [Why not 67.e7]

67...♖h7 68.f4 ♖xh6 69.♖e5 ♖g7 70.f5

70...♖e8! Now the pawns are equal and the white ones are blocked!

71.♖a2 b5 72.♖b4 ♖f6 73.♖d6 ♖f8 74.♖c5 ♖e8 75.♖xb5 ♖d6+ 76.♖c6 ♖xf5 77.♖d7 ♖e7 78.♖a2 ♖f5 1/2-1/2

(26) Ozturk, Kubra(2235)-Gaboyan, Susanna(2153)

ewcc-2015, 2015

57.♖e7? White overlooked a simple exchanging maneuver...

[White has the bishop pair, a huge space advantage and slowly winning was 57. ♖c5 57... ♜b7 58. ♙d6 a3 59. ♙d5+ ♜c8 60. ♙f4 ♜d8 61. ♙c1]

57... ♜d8! One of the bishops is exchanged and now it is an easy draw.

58. ♖e5 ♜xe6 59. ♖xe6 ♙d7+ 60. ♖f6 a3 [60... ♜c6]

61. ♙xa3 ♜d8 62. ♖g6 ♜e8 63. f6 ♙e6 64. ♖xh5 ♜f7

White has two extra pawns, but with opposite colored bishops it is a dead draw!

65. ♜g5 ♙b3 66. h5 1/2-1/2

(27) Santeramo, Alessia(2118)-Folkova, Martina(2134)

Chakvi, 2015

This position demands simple but automatic knowledge and a technical performance from both sides.

68. ♜g6 [A classical winning line here was 68. ♜d8+ 68... ♙g8 69. h6 ♜h7 70. ♜d7+ ♜h8 (70... ♖xh6 71. ♜d1) 71. ♜g6 ♙b3 72. h7]

68... ♙b1+ 69. ♜h6 ♙a2? [The only way for a draw was to escape from the corner with 69... ♜g8 70. ♜g7+ ♜f8]

70. ♜b7 ♙c4 71. ♜b8+ ♙g8 72. ♜g5 ♜h7 73. ♜b7+ ♜h8 74. h6 ♙c4 [74... ♙h7 did not help: 75. ♜b8+ ♙g8 76. ♜f6 ♜h7 77. ♜b7+ ♜h8 78. ♜g6]

75. h7 ♙d5 76. ♜c7 ♙f7 77. ♜h6 ♙e8 78. ♜b7 1-0

(28) Osmanodja, Filiz(2352)-Khurtsilava, Inga(2212)

ewcc-2015, 2015

55...g5! Black starts creating an unbreakable fortress.

56. ♜e2 ♜c4! Now is following the correct transfer of the rook to the important f4 square, from where it will put strong pressure on the f3 pawn.

57. ♜ee3 ♜b4 58. ♜a6 ♜f4 59. ♜b6 ♜c4 60. ♜b8 ♜f4 61. ♜c8 ♜d4 62. ♜c7 ♜d1? It was necessary to stick to the f3 pawn.

[62...♖f4]

63.♖d7 ♖d4 64.♖d6+ ♔g7 65.♖e5! White starts an attack and Black destroyed his own fortress!

65...f6 66.♖e7+ ♔g6 67.♖dd7 f5 68.♖d6+ ♗e6 69.♖dxe6#
What a disaster! **1-0**

Chess and the City. Where does the buck stop?

WGM Elisabeth Paehtz
Best rating: 2493

The former US President Truman used to keep the phrase "the buck stops here" on his desk to signify that he took final responsibility for his decisions. However, in recent events at the European Women's Chess Championship it is difficult to understand where the buck actually stopped.

It has been more than a few months, and this topic might have gone into hibernation for most of us - except for the Romanian WGM Mihaela Sandu. But before digging into the details, let me give you an overview of the actual event.

This year's European Women's Championship was held in Chakvi, Georgia, and was indeed a special one. We may even claim that it made history, not only for the outstanding performance of its winner Natalia Zhukova from Ukraine, but rather for the incidents which overshadowed the tournament. "Gens Una Sumus" is the FIDE slogan which embraces our chess community. We are indeed a family, but sometimes perhaps a dysfunctional one...

Despite not being personally involved in the quarrel, I would like to try and summarize the events for the chess community without judging the parties involved, leaving this burden to the readers instead.

Before the start of the tournament I was told that the chief

arbiter requested a 15 minutes delay of live transmission, which the organizers eventually did not approve. They probably did not believe in any problems, which is logical if we consider that we have never heard of any scandals in women's competitions before. Delaying live games also seems to require more sophisticated software, which the organizers considered important.

The whole story became an issue after 5 rounds when Mihaela Sandu, rated 2300, was the sole leader with a 100 percent score. A couple of players then went to the arbiter and ECU president Azmaiparashvili and asked for cautious measures. Remembering the recent cheating scandals in India and Dubai, one may not be surprised that some players start getting paranoid if someone unexpectedly shows up with 5/5. In round 6 the live transmission of the game between Sandu and the Georgian player Batsiashvili was interrupted during the first 3 hours of play until the organizers were able to fix this "obvious technical problem of transmission". Funnily enough there was indeed a technical problem, but on board 2 between Savina and Gyria. In that game the arbiter tried to fix the cables after each move, whereas the first board game remained totally neglected despite its "transmission problems". I suppose that the game on board one was interrupted on purpose until the organizers realized that Sandu was simply playing a good game.

In a later interview the Vice-European Champion Nino Batsiashvili even stated that she was informed prior to her game that the live transmission would be stopped!

<http://chess-news.ru/node/19194>

Eventually Sandu lost that game and some players may have seen this result as evidence which worsened the whole situation. In round 7 Sandu was paired against Stefanova and the latter approached Azmaiparashvili to ask for a

general delay of 15 minutes for the rest of the tournament. For Stefanova it was most important to end the paranoia. According to her, Azmai promised to take steps in that direction by either delaying all the games or stopping the broadcast of that particular one. However nothing was changed and Azmai later claimed that he never promised anything.

Round 8 was what we may call the crucial one as it changed the fate of the entire tournament. Before that round there was a free day and Natalia Zhukova, the next opponent of Sandu, tried to convince both the arbiter and Azmai to implement the delay. As we know, the arbiter wanted this procedure before the beginning of the event, but nobody could ever have imagined the devastating outcome of not doing so.

Azmai denied the request of Zhukova and informed her that he would not do anything without official documents, which for the Ukrainian eventually meant composing two letters. The second letter was for her a sort of insurance in case the request to delay the transmission would once again be denied. Two letters were written, signatures collected, and eventually handed to the chief arbiter. The organizers and the arbiter decided to display those letters at the hotel lobby before the start of round 8, as well as informing all players about them. The chief arbiter announced that the first letter was approved and all the games from round 8 onwards would start with a delay of 15 minutes, while the second letter was not accepted by the organization. It was not hard for Mihalea to understand that both letters were probably connected to her performance, and, as I was told, she saw them for the first time after that particular round.

After that Sandu lost all her remaining games and this is where we now stand! But there is one question which remains: Where does the buck stop?

As a player myself, I can empathize with all the parties

involved, but I would also certainly have lost all my remaining games if I had been the target of that letter. The whole situation was very unfortunate and went beyond certain limits, especially taking into account how long we have all known each other in the beautiful world of chess.

Until today I have not heard of any official statement neither from ECU nor the anti-cheating-commission at FIDE. I remember of course that I mentioned this incident in one of my previous newsletters during the actual event; however I decided to give it another shot, as this case cannot be considered closed yet.

Editorial Preface

The main event of the week is clearly the Russian Chess Championship. After 6 rounds there are 3 leaders: Vitiugov, Tomashevsky and very surprisingly the young Artemiev. These three players all have 4/6. In the women's section Goryachkina and Kosteniuk are leading with 4.5/6.

In the mini match out of 4 games between Li Chao and Leko in Leko's hometown Szeged, the first game ended in a draw.

There is also a surprising leader in the French Championship (that takes place without the participation of Fressinet and Vachier-Lagrave) and this is Jean-Marc Degraeve with 4.5/6.

The Turkish team Championship is still under way, with 2 rounds to go (out of a total of 13 rounds).

Already very soon we can expect the publication of the pairings for the World Cup in Baku, which starts on the 11th September. It seems like almost every top player in the world is going to participate in this event and the fight will be extremely tough for the 2 golden tickets which qualify to the Candidates tournament.

That's it from the main events of the current week. Enjoy the material and the analyses from the recent tournaments!

Two best games of the past week

(1) So, Wesley (2779)
- Volkov, Sergey (2589) [C11]

TCh-TUR Super League 2015(2.1),
2015.08.05

GM Csaba Balogh
Best rating: 2672

It is quite unusual that a top player appears in a league, but a Turkish team invited Wesley So to show his class. He beats his experienced GM opponent in style.

1.e4 e6 Volkov only plays the French defense, so it is not so difficult to prepare against him.

2.d4 d5 3.♘c3 ♘f6 4.e5 Wesley So follows a good practical strategy, that he goes for the recently most popular and sharpest line, where a dubious old line might be refuted with the strongest computer analysis.

4...♗fd7 5.f4 c5 6.♗f3 ♗c6 7.♕e3 The initial position of this line. Black has various options here. Volkov chooses one of the main lines.

7...a6 7... cxd4, 7...Qb6 and 7...Be7 are the alternatives.

8.♖d2 b5 9.dxc5 [9.a3 is the other option.; A well-known mistake is 9.O-O-O? because Black closes the queenside with 9...c4 and launches a terrible attack with b4!]

9...♕xc5

10.♕d3! The new direction! All the top players are going for this line recently. White plays for the ideal arrangement of the pieces with Ne2-d4. [The old theory went with 10.♕xc5 10...♗xc5 11.♖f2 ♖b6 12.♕d3 b4! 13.♗e2 a5 followed by Ba6, trading the bad french bishop. Hundreds of games have been played, but the latest theory considers it to be equal.]

10...♖b6 [The tactical justification of the line is 10...d4 11.♗xd4! ♗xd4 12.♗e4! and Black is in trouble.]

11.♕f2! White wants to keep the option of castling kingside, which would not be possible after taking on c5.

11...♕b7 [11...b4 12.♗a4 ♕xf2+ 13.♖xf2 ♖xf2+ 14.♗xf2+= White opens the queenside with Rhc1 and c3 and the endgame with the d4 square is typically better for him.]

12.O-O ♖c8 13.♖ae1 White activates his last unemployed piece! At the same time he protects the e5 pawn and prepares for an attack with f5!

13...g6 This is the novelty. Hardly a prepared one. The move itself is logical, an attempt to avoid f5, but it runs into tactical problems.

14.f5!! A beautiful move! The breakthrough is coming anyway! The black king stands in the center, therefore White opens the files in front of it even at the cost of a piece! An important detail is that Black has just played Rc8, which prevents him from castling queenside, which could solve his problems after accepting the sacrifice on f5.

14...gxf5 15.♙xf5! ♙xf2+ [Black cannot accept the piece, because the attack becomes too strong after 15...exf5 16.e6! (16.♘xd5 looks even stronger, however Black has the brilliant

16...♘d4!! with the idea of 17.♘xb6? ♘xf3+ 18.gxf3 ♖g8+ 19.♔h1 ♙xf3#) 16...♘f6 (16...fxe6 is even worse, Black loses after 17.♖xe6+ ♔d8 18.♗g5+ ♔c7 19.♘xd5+- wins the queen.) 17.♘xd5 ♙xf2+ 18.♖xf2 ♘xd5 19.exf7+ ♔xf7 20.♗xd5+- White is crushing!]

16.♖xf2 ♘a5 Black tries to strengthen his d5 square against the potential knight sacrifices.

17.♗h6! After White has found 14.f5, the moves are already suggesting themselves. White does not count the hanging piece, but focuses all his forces on the attack!

17...d4 [17...exf5 18.e6!+- is still devastating!]

18.♘e4 exf5 Black knows that he cannot survive, so he tries his best practical chance to accept the material and hope for a blunder after which he might preserve it in the future. However Wesley So leads the attack precisely and collects the full point. [18...♙xe4 19.♙xe4+- is also hopeless. Ng5 or Qg7 is coming next.]

19.♘d6+ ♔d8 [19...♔e7 20.♗g5+ ♔f8 21.♗xf5+- is also over.]

20.♘xf7+ ♔c7 Black wants to run away, but he misses one move to get to b8-a8.

21.e6! Attacking the knight and creating the more important threat of Qf4 against which Black has no adequate defense!

21...♙xf3 22.♗f4+ ♔b7 23.exd7+- Black resigned as all his pieces are hanging. White takes on f3 with check and then grabs one of the rooks, followed by promoting his d-pawn soon. **1-0**

Best rating: 2737

We are going to watch a fantastic game, with a lot sacrifices, great positional play and very precise defence by Black. What is also worth mentioning is that the game is just perfect. Both player played it extremely well, having full control over the situation and making the right decisions in very complicated positions!

1.d4 e6 The move order in the game is not important, as the game anyway gets back into the main line of Nimzovich. Sometimes Black starts with 1...e6 on 1.d4, but only in case he feels well-prepared in the French, which could appear after 2.e4. In this is the case, Lysyj even wrote a book on the French defence.

2.c4 f6 3.f3 c3 b4 4.e3 is one of the oldest and still most popular lines.

4...O-O 5.f3 d5 6.f3 c5 7.O-O This is the very main position and now Black has a wide range of continuations.

7...cxd4 has clearly been the most popular line lately. [For a long time the most played was 7...c6 8.a3 fxc3 9.bxc3 dxc4 10.fxc4 c7 which is still not out of fashion and we can find games of for example Topalov in it.]

8.exd4 dxc4 9.fxc4 b6 Black's idea is simple, to quickly get the bishop to b7 and later on put maximum pressure on the d4 pawn.

10.fg5 fb7

11.f5 is one of the most aggressive continuations. The game is getting very sharp now.

11...h6 It is usually a good idea for Black to include the h6-Bh4 moves before doing something, to secure the king's position a bit more.

12.fh4 fd7 Black is immediately fighting against the knight on e5, which is clearly the best thing to do.

13.fxf7!? This is the beginning of a very interesting position. [Of course it is not dangerous for Black to play 13.fxd7 13...fxd7 14.fxf6 gxf6 since in such structures only White is at risk of getting a worse position.]

13...xf7 is clearly the most principled move. [After 13...xf7 14.fxe6 we have a position which is difficult to evaluate, but White should not be worse. The 2 pawns for the 2 pieces vs rook should give White an edge, but on the other hand Black's pieces are very well placed and could compensate the slight material disadvantage.]

14.fxe6+ White continues with the sacrifices, but it is already needed.

14...xe6 15.b3+ f5 The only move yet again.

16.c2+ e6 [Of course Black can't counter with 16...e4

17. ♖xe4 ♖xe4 since White is winning the queen after 18. ♕xd8]

17. ♖b3+ ♔f5 18. ♖c2+ ♔e6 After repeating the moves twice, White continues to play for a win.

19. ♖g6!? A very cool move! White is 2 pieces down but the black king is in big danger. The direct threat is Rfe1 and after Kd6 White would have Bg3.

19... ♕xc3! The strongest response. Black not only exchanges a piece- which is great as he is 2 pieces up and has an open king- but also protects for a second time the e1 square. [Let us take a look at an example line: 19... ♕d5 20. ♖fe1+ ♔d6 and now White catches the black king on d6 and doesn't give a chance to escape with Kc6-Kb7: 21. ♖ac1!? With a lot of different mating threats.]

20. bxc3 and now Black really has a very wide range of moves, because it seems like White doesn't have any direct threats.

20... ♖e8! Another excellent decision by Lysyj. [20... ♕e4? 21. ♖fe1 and Black loses a full piece after 21... ♔d6 22. ♖xe4 With a strong attack.; The game could also be very interesting after 20... ♔d6 21. ♕g3+ ♔c6 and now White has the very strong 22.d5+! ♔c5 (22... ♕xd5 23. ♖f5+ leads to mate: 23... ♔c6 24. ♖e6+ ♔b5 25. a4+ ♔a5 26. ♖c4)

23.c4!! To find such an amazing move is extremely hard over the board. The idea is to force the black king to take the c4 pawn, after which the c-file opens. 23...b5 24. ♖ab1 and it seems that White's attack is deadly! What a crazy position!]

21. ♖fe1+ ♔d5 The right move. [21... ♔d6 was losing as after 22. ♖g3+ the queen is getting back into the game. 22... ♔c6 23.d5+ ♔c5 24.c4 and White will mate soon.]

22. c4+ White needs to do something fast!

22... ♔c6 The best move once again. [White is mating after 22... ♕xc4 23. ♖c2+ ♔d5 24. ♖f5+]

23. ♖g3! An excellent move. White continues threatening to play d5 and now another idea is to just give a check on f3 at some point. [23. ♖xg7 is almost losing for White. 23... ♕a6! Freeing the b7 square for the king. 24.d5+ ♔c7 and although

Black remains with a big material advantage, things are still not that clear.]

23...♖xe1+ Probably the only move again. [23...♘a6 was losing on the spot: 24.♚f3+! ♔c7 25.♙g3+ ♔c8 26.♚xa8+]

24.♖xe1 What a shocking position. White just has 3 pieces left on the board and he is 2 pieces down- but still things are very unclear! This is a very rare case in chess.

24...♚g8 The only move. White threatened to mate in one by playing Re6.

25.♖c1 A very strange move, but maybe the best one! White wants to play d5. [25.d5+ was losing: 25...♘xd5 26.cxd5+ ♚xd5; 25.♚f3+ didn't work either: 25...♔c7 26.♙g3+ ♔c8 27.♚f4 ♚d8; But maybe an interesting choice was 25.♙xf6 25...♘xf6 26.♖e7 and it seems that the game would end in a draw after 26...♖c8 27.♚f3+ ♔d6 28.♚a3+ ♔c6 29.♚f3+ What a beautiful perpetual check !]

25...♘c5! Perfect play! [25...♘a6 would still lead to a dangerous position. 26.♚f3+ ♔d6 27.♖e1! Cutting the king's escape route.]

26.dxc5

26...♚e6 Another only move. [White is winning after 26...bxc5? 27.♚f3+ This line is very forced. 27...♔c7 28.♙g3+

♔c8 29.♚f5+ ♘d7 30.♚f4 ♚d8 31.♖e1 With the deadly threat of playing Re8. The game is over.]

27.♚xg7 Why not take a pawn if possible. Now White already has 3 pawns for the piece and his attack is still alive.

27...♘d7 Black is trying to consolidate.

28.♙g3 Defending against the Rg8 idea and at the same time putting the black king under pressure.

28...♖g8 The black pieces are finally out.

29.♚c3 White wants to play Re1 next. [29.♚b2 would lead to a very interesting position. 29...♘a6 30.cxb6 axb6 and it is very hard to tell who is better here, but maybe Bukavshin thought that it could become a bit dangerous with Black somehow going for the g2 pawn with h5 or playing Bb7 and Qc6.]

29...♘xc5 30.♖e1 Can Black stabilize the position to get the full point?

30...♚f5 [After 30...♚f7 31.♚d4! looks very strong and Black already needs to give the exchange in order to avoid being worse. 31...♖xg3 32.hxg3 and I think White is clearly better here.]

31.♖e7 Threatening mate on c7.

31... ♔b1+ **32.** ♖e1 ♗f5 **33.** ♖e7 A repetition of moves!

33... ♔b1+ [The last chance for Black was to play 33... ♘d7 and it is really difficult to say who is better here... The black king is really dangerously placed but it is also hard for White to find a way to continue the attack. It is a very complicated position!]

34. ♖e1 Why do such great fighting games usually end with a "boring" draw?! :) **1/2-1/2**

White was better all game long and now we are in a double knight endgame where he is a pawn up. Usually knight endgames should be evaluated similarly to pawn endgames, so an extra pawn normally gives a very good chance to win the game. In the current position however, things are far from easy. Black wants to exchange the pawns and the double knights are giving to him some extra chances for escape because in case of a blank board it is not possible to mate the black king with just 2 knights.

41. ♖d2 Black would play d5 next anyway, so White is bringing the knight a bit closer to the center.

41...d5 Of course ! Exchanges of pawns is what is needed!

42.b5 A logical move as the white pawn will probably be better placed on b5 than on b4 for the future.

42...♔e6 The black king is getting closer to the center and maybe Black wants to play g4 next.

43.exd5+ ♜bxd5+ A very strange response in my opinion. [I think it was more logical to play 43...♔xd5 with the easy plan of playing Kc5 next. 44.♜c6 Attacking the e5 pawn. 44...♜bd7 and Black continues threatening to play Kc5. Of course the position remains very complicated, but I think Black's chances to make a draw are reasonable.]

44.♔f2 [White could have tried to go into a different direction: 44.♔d3 but Black would do the same thing- try to exchange all the pawns. 44...g4 45.fxg4 ♜xg4 46.h4 ♜f2+ 47.♔e2 ♜g4 and it is not easy for White to improve.]

44...g4?! Black rushes things too much. [Maybe it was better to play 44...♜b6 with the same idea as before, to bring the king to c5. 45.♜ac4 ♜xc4 46.♜xc4 ♔d5 47.♜e3+ ♔c5 and Black has good drawing chances.]

45.♜ac4 The knight from a5 is finally back in the game.

45...gxf3 46.♔xf3 All black needs to do is to take White's 3 pawns, but that is a very difficult task.

46...♜d7 47.♜e4 The white knights are perfectly placed.

47...♖e7 Black is looking for some play.

48.♗c3?! There was no reason at all to let the black knight out to d4. [48.♗e3! would paralyze the black pieces. Now White would have all the time in the world to create another passed pawn on the kingside.]

48...♗f5 The knight is back in the game.

49.g4? This is a very serious mistake. The idea to create a passed h-pawn is correct, but right now it just doesn't work! [White should have continued with 49.b6 49...♗d4+ 50.♖f2 with good winning chances.]

49...♗d4+ [After 49...hxg4+ 50.♖xg4 ♗f6+ White has the strong 51.♖g5!]

50.♖g3 hxg4 51.♖xg4

51...♗f6+ Suddenly the passively placed black pieces are in perfect harmony.

52.♖g3 ♗f5+? and Black gives back the favor, probably based on a miscalculation of the following long line: [52...♗d5 The beginning of a forced line. 53.♗xd5 ♖xd5 54.b6 (Not better is 54.♗a3 54...♖c5 55.h4 e4 56.♖f4 and Black makes an easy draw with 56...e3 57.♖xe3 ♗f5+ followed by Nxh4.) 54...♖xc4 55.b7 To make the following calculation is not that simple, but possible... 55...♗c6 56.h4 e4 57.h5 e3 58.h6 e2

59.♖f2 ♖d3

60.b8=♖ ♗xb8 61.♖e1 ♗c6 62.h7 ♗d4 63.h8=♖ ♗c2+ and Black is just in time!]

53.♖g2 e4 Black's chances for a draw are still very good. Give up one knight for the b-pawn and one for the h-pawn and it is done! :)

54.b6 White pushes the passed pawn, but that probably just makes things easier for Black. [White had a tricky move like 54.h3!? to prevent Black from playing Ng4 in the future. 54...♖d7 55.♖f2 followed by Ne3 somewhere, with still some practical chances of winning the game.]

54...♖d7 Now the black king is getting very close.

55.♗a5 The only move to avoid Kc6.

55...♔c8 A very safe move with the threat of playing Nd7 next.

56.♘b5 White doesn't have anything better.

56...♞d7 57.♞a7+ [57.b7+ 57...♔b8 followed by Nc5 and Nxb7 with a draw.]

57...♔b8 58.♞7c6+ ♔c8 59.♞a7+ ♔b8 60.♞7c6+ and White finds no way to improve the position- and there was indeed no way to improve it already! Well, this was an endgame with a lot of mistakes but we had to admit that the starting position was very complicated. **1/2-1/2**

**(14) Karjakin, Sergey (2753)
- Khismatullin, Denis (2642)**

Russian Championship,
2015.08.09

GM Csaba Balogh
Best rating: 2672

A very interesting question is as to how one would evaluate the following endgame. It is clear that the pieces with the pawns are stronger than the queen, but the question is, if Black is able to create any counterplay, does he have realistic drawing chances after the pawn gets advanced? White must advance his pawns sooner or later to make progress, but then the white king gets exposed and Black will have more checks- but will it be enough to save the game?! After all, I came to the conclusion that White is winning. Karjakin realizes his advantage with perfect technique. He has all the time to prepare for any kind of progress and Black cannot fight against the pawns in the long term... Let's see how it looks like in practice.

54...♔c2 55.♞d3 ♔c6+ 56.♔g1 White does not want to move his f-pawn yet, because it allows checks on the 2nd rank. He rather moves his h-pawn and hides his king on g2 or h2 according to the circumstances.

56...♔e4 57.h3 ♔e7 58.♖e3! It is time to regroup the pieces. The knight could support the pawns better and at the same time give the king shelter against the checks.

58...♔d5 59.♘e1! The knight should be somewhere around the king!

59...♔d1 60.♔h2 ♔b1 61.♔g2 ♔g6+ 62.♖g3 ♔e4+ 63.♘f3! In the last 5 moves, the only change that White has made in his position is to drive the knight from d3 to f3. However this seemingly irrelevant transfer allows many new plans for White! In the next few moves it all becomes clear.

63...♔f8 64.♖g4! ♔f5 65.♔g3! We can see now the excellent position of the f3 knight. Black cannot even give a check and White is ready to advance his h-pawn.

65...♔b1 66.h4 ♔h7 Black prevents the further advance of the h-pawn. White does not want to touch his e-pawn either, therefore a new regrouping of his pieces is needed in order to make progress.

67.♖f4+ ♔e8 68.♖f6! ♔g8+

69.♘g5! White keeps everything protected. Only the e5 pawn is "alone", but it is also indirectly protected by Re6.

69...♔b3+ 70.♔g4 ♔d5 [Black quickly runs out of checks after 70...♔d1+ 71.f3 ♔g1+ 72.♔h5+- which is similar to the game.]

71.♖e6+ ♔f8

72.♔h5! Suddenly the white king goes to g6 or h6 and it will not only be protected from the checks, but also creates different kind of mating nets, such as Kg6, Nh7 and Re8 mate.

72...♔d4 73.f4! Bringing another defender against the checks! The pawn cannot be taken because of Rf6!

73...♔d1+ 74.♔g6 White threatens to play Nh7 and Re8 now. The only way to prevent it is to pin the knight.

74...♔g4 75.h5 It is clear that the game is over. White only needs to be careful to avoid stalemate ideas.

75...♔g1 76.h6 ♔g2 77.♖f6+! After White sends the king to the e-file, he has no more hopes for stalemate. [Black resigned in view of 77.♖f6+ 77...♔e7 78.h7 ♔h2 79.♔g7+— It was instructive how hopeless Black was with his queen!] **1-0**

Golden knowledge

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

(15) Ex-1

A break is one of the most important methods in endgames. Sometimes there is no other possibility to create a passed pawn, so it is necessary to sacrifice. This method is used mostly in pawn endings, but we want to show that it is also frequently used in other types of endgames.

1...a3! The simplest break! With the help of this pawn sacrifice, Black clears the way for his own c-pawn, which becomes unstoppable.

2.bxa3 c3 0-1

(16) EX-2

This is the oldest example of direct pawns break. We must mention that if it was Black's move, 1..g6 would stop this dangerous maneuver.

1.g6! hxg6 2.f6! gxf6 3.h6 1-0

(17) EX-3

1.h6! Here we have a preparation for the break since it is necessary to control the f6 square longer.

1...♔e6 2.g6! 1-0

(18) EX-4

1...c4! 2.dxc4 [Things are simple after 2.bxc4 2...a4]
2...a4 3.bxa4 b3! 4.cxb3 d3 0-1

(19) EX-5

1...c3! 2.bxc3 b3! We can call this a long break or delayed break.

3.axb3 a3 0-1

(20) EX-6

1.f5!! exf5 [Another kind of break works after 1...♔b5 2.f6 gxf6 3.exf6 ♔c6 4.h5 gxh5 5.g6 fxg6 6.f7]

2.h5! gxh5 3.g6! fxg6 4.e6 Finally everything was sacrificed, but the last pawn is on its way to the top. **1-0**

(21) Awerbah, Y.-Bebchuk, E.

Moscow, 1961

1.e4 ♔c6 2.e5! Black has a dangerous passed pawn so White has to try and create a passed pawn immediately.

2...fxe5 3.g5 hxg5 [3...♔d7 doesn't help since after 4.f6 ♔e6 5.fxg7 ♔f7 6.gxh6 b5 7.♔e4 b4 8.♔d3 the white king successfully wins both black pawns.]

4.f6 gxf6 5.h5 White gave all his pawns, but the last one is unstoppable. **1-0**

(22) Cekro, E.-Arhangelsky, B.

Esent, 2002

1.g3? [1.f4 1...g4 2.♔d3 was correct.]

1...g4! 2.gxh4 gxh3 3.♔f3 f4!

Creating a typical box for the opponent's king.

4.h5 ♕e5 Now the king stops White's pawn and it is time to resign. **0-1**

(23) Welling-Eingorn

Bad Wiesee, 2006

1...g5?? This typical mistake happened in hundreds of games on different levels. Here the strong GM Eingorn did not know the typical blow and a very unpleasant break reverts the evaluation of the position.

2.g4!! hxg4 [2...gxh4 makes no big difference. 3.gxh5 ♕e6 (3...f5 4.h6 ♕f6 5.e5+ ♕g6 6.e6 and White is winning.) 4.♔f4 ♕f7 5.♔g4 and losing the h4 pawn means the end for Black.]

3.h5 f5 4.h6 f4+ 5.♔f2 ♕f6 6.e5+! With the same idea as before: the black king can't fight with two such powerful pawns.

6...♕g6 7.e6 1-0

(24) Camacho, G.-Hernandez, A.

Cuba, 1995

This case seems to be much more complicated, but the win is very similar.

1.g4!! fxg4 [1...gxf4 2.gxf5+—]

2.f5 dxc5+ [Other options don't help: 2...♔f6 3.cxd6 cxd6 4.b5+—; 2...g3 3.♔e3 g4 4.c6 h5 5.b5 h4 6.♔e2!+—]

3.bxc5 g3 4.♔e3 g4

5.c6!! [Just not 5.d6+? 5...cxd6 6.c6 d5!=]

5...h5 6.f6+ ♕xf6 7.d6 1-0

(25) Koch, Ju-De Dovitiis, A.

Argentina , 2005

A slightly similar position to the previous one, but here Black prevents the break in a very technical way.

1...♔d6! [1...g5? 2.g4!! hxg4 (2...gxh4 3.gxh5 h3 4.♔f2 f5 5.h6 ♔f6 6.exf5+—) 3.h5 ♔e6 (3...f5 4.h6 f4+ 5.♔f2 ♔f6 6.e5+ ♔g6 7.e6+—) 4.♔f2 ♔f7 5.♔g3 ♔g7 6.♔xg4 ♔h6 7.c5! (7.♔f5 7...♔xh5 8.♔xf6 g4 9.e5 g3 10.e6 g2 11.e7 g1=♔ 12.e8=♔+ ♔h4 13.♔h8+ ♔g3 14.♔g7+ ♔f2 15.♔xg1+ ♔xg1 16.♔e5 ♔f2 17.♔d6 ♔e3=) 7...b5 (7...bxc5 8.c4 ♔g7 9.e5! fxe5 10.♔xg5+—) 8.♔f5 ♔xh5 9.♔xf6 g4 10.e5 g3 11.e6 g2 12.e7 g1=♔ 13.e8=♔+ ♔h4 14.♔h8+ ♔g3 15.♔g7+ ♔f2 16.♔xg1+ ♔xg1 17.♔e5 ♔f2 18.♔d6 ♔e3 19.♔xc6+—]

2.♔d4? [It was possible to keep the balance with 2.♔e2 2...♔e6 3.♔f2! (3.♔f3 3...g5 4.♔e2 gxh4 5.gxh4 ♔e5 6.♔e3 f5 7.exf5 ♔xf5 8.♔f3 c5) 3...g5 (3...b5 4.cxb5 cxb5 5.♔e3 ♔e5 6.♔f3 g5 7.♔e3 gxh4 8.gxh4)]

2...g5 3.c5+ bxc5+ 4.♔d3 [Or 4.♔c4 4...♔e5 5.♔xc5 gxh4 6.gxh4 ♔xe4 7.♔xc6 f5 8.♔d6 f4+—]

4...♔e5 5.♔c4 gxh4 6.gxh4 ♔xe4 7.♔xc5 f5—+

(26) Bronstein, D.

Shakhmaty Moskva, 1967

1. ♖b2 f5 2. ♖c3 h5 3. ♖d3! h4 4. f4! g4 5. ♖e2 g3 [5... ♖d7 6. hxg4 fxg4 7. f5]

6. e4! This break has the idea to create two passed pawns with a bigger distance between them than the black pair!

6... fxe4 7. f5 1-0

(27) Kupreichik, V.-Marjanovic, S.

USSR - Jugoslavija , 1979

40... ♖c6 41. g5 White has a dangerous pawn majority on this flank.

41... hxg5 [41... ♖xc5 42. f6 gxf6 43. gxh6 and the h-pawn will promote.]

42. f6! gxf6 43. h5 and once the h-pawn is unstoppable. It cost a few pawns, but it paid in the end. 1-0

(28) Baramidze, D.-Khamrakulov, I.

Dresden, 2008

39.a3 a4 [Or 39...♔e6 40.b4 axb4 (40...♔xf6 41.c5 bxc5 42.bxa5 ♔e6 43.a6) 41.axb4 ♔xf6 42.♔e2 ♔e6 43.♔f3 ♔f6 44.♔g4 ♔g6 45.♔h4 ♔f6 46.♔h5]

40.b4! axb3 41.a4! White doesn't care about the material, his idea is to create two passed pawns.

41...h5

42.c5! Now White creates two very distant passed pawns. The Russians call them in a funny way: TROUSERS!

42...bxc5 43.a5 h4 44.f7 ♔e7 45.f8=♔+ ♔xf8 46.a6 and the pawn promotes with check. **1-0**

(29) Mamedyarov, S.-Sokolov, I.

Essent

This is a much more complicated case because Black has his own dangerous passed pawn.

1.f5! b3 2.♔c3 gxf5 [After 2...♔d5 3.e6 fxe6 4.fxg6 ♔e5 5.h5 the white king starts to capture the black pawns and Black can't do anything about it.]

3.gxf5 ♔d5 4.e6! fxe6 5.f6! gxf6 6.h5! and with the sacrifice White managed to block the opponent's king's way to h8! **1-0**

(30) Guliev, S.-Tukmakov, V.

Nikolaev, 1993

33.♔e3? [Chess is all about timing, as used to say the great Robert Fischer. It is useful to improve the position of the king, but it is even more important to use the power and dynamism of the passed pawns. 33.a4! 33...♔d6 34.a5 c4 35.a6! ♔c5 36.d6 ♔xd6 37.b6+--]

33...♔d6 34.♔e4 c4 35.a4 c3 36.♔d3 ♔xd5 37.♔xc3 ♔c5 Black will use the e5 pawn to deflect the opponent's king and will win both pawns on the queenside, creating new a passed pawn on the a-file. **0-1**

(31) Chatalbashev, B.-Tratar, M.

20th TCh-CRO 1b, 2011

It is necessary to play a decisive move immediately here!

55.g5!! [55.♔h7? 55...♕f7 56.♔h8 ♕f8= and; 55.♕f5 55...♕f7 56.f4 exf4 57.♕xf4 ♕e6 58.♕f3 ♕e5 59.♕e3= are indeed dead draws.]

55...fxg5?! [55...hxg5!? is more complicated: 56.h6 The breakthrough continues. 56...gxh6 57.♕xf6 ♕e8 58.♕g6! (Of course not 58.♕xe5? 58...h5 59.♕f5 h4 60.♕g4 ♕e7 61.f4 gxf4 62.♕xh4 ♕d6 63.♕g4 ♕c5 64.♕xf4 ♕xb6=) 58...♕d7 (58...♕e7 59.♕xh6 ♕f6 60.♕h5+-) 59.♕xh6 ♕c6 60.♕xg5 ♕xb6 61.♕f5 ♕c5 62.♕xe5 b5 63.♕f4!? is more logical than the other winning option. (63.f4?! 63...b4 64.f5 b3 65.f6 b2 66.f7 b1=♔ 67.f8=♔+ ♕c4 68.♔d6 mates in 52 moves according to the tablebase.) 63...♕d4 (63...b4 64.♕e3 ♕c4 65.♕d2+-) 64.e5 ♕d5 65.♕f5 b4 66.e6 ♕d6 (66...b3 67.e7 b2 68.e8=♔ b1=♔+ 69.♔e4+-) 67.♕f6 b3 68.e7 b2 69.e8=♔ b1=♔ 70.♔e7+ ♕d5 71.♔e5+ ♕c6 72.♔e4+-]

56.♕f5 ♕f7 57.♕xe5

57...g6 [57...♕e7 does not help either: 58.♕f5 ♕f7 59.e5 ♕e7 60.♕g6 ♕e6 61.♕xg7 ♕xe5 62.♕xh6 ♕f6 63.♕h7 ♕f7 64.h6+-]

58.hxg6+ ♕xg6 59.♕d6 ♕f7 [59...h5 60.e5 h4 61.e6 h3 62.e7 ♕f7 63.♕d7 h2 64.e8=♔+-]

60.e5 1-0

(32) Vilela De Acuna, J.-Garcia Palermo, C.

Bayamo, 1983

1...c5! 2.h4 [2.dxc5 2...bxc5+-; 2.♕g4 2...c4 3.♕f4 b5 4.e4 b4!+-]

2...♕d6! [Wrong was 2...c4? 3.e4 b5 (3...dxe4? 4.♕xe4 b5 5.d5+ ♕d6 6.♕d4+-) 4.e5! b4 5.♕e3 c3 6.♕d3! cxb2 7.♕c2 bxa3 8.♕b1 ♕d7 9.♕c2 ♕c6 10.♕b1 ♕b6 11.♕c2 ♕b5 12.♕b1 ♕c4 13.♕c2!=]

3.♔f3 c4! 4.♔f4 [Other options are not better: 4.e4 4...dxe4+ 5.♔xe4 b5 6.d5 b4! 7.axb4 c3 8.♔d3 cxb2 9.♔c2 a3—+; 4.♔e2 4...♔e6—+]]

4...b5 5.e4 dxe4 6.♔xe4 b4 7.axb4 c3 8.♔d3 cxb2 9.♔c2 a3 10.b5 ♔d5! [10...♔d5 11.♔b1 (11.b6 11...♔c6—+) 11...♔c4! 12.b6 ♔b3—+] **0-1**

(33) Shirov, A.-Akopian, V.

Oakham YM, 1992

53...♕xf3? is the wrong transposition into a pawn endgame as Black overlooked the break... [After 53...♔e6 Black still had drawing chances.]

54.♔xf3 h2 55.♔g2 ♔xe4 56.c5 ♔d5 [56...bxc5 Ftacnik 57.a5 ♔d5 (57...c4 58.b6+—) 58.a6! c4 59.b6 c3 60.bxa7 h1=♔+ 61.♔xh1 c2 62.a8=♔+—]]

57.c6 ♔d6 58.♔xh2 ♔c7 59.♔g3 ♔d6 60.♔f4 ♔e6 61.♔e4 ♔d6 62.♔f5 1-0

(34) Tzermiadianos, A.-Iuldachev, S.

Al ain, 2012

34.♔e2?? White did not see the break in the pawn ending, but it was not so easy to find the best way to keep the balance here. [34.♕e4]

34...♖xf3 35.♔xf3 b5! This is the move White missed when playing 34.Be2??.

36.♔e4 bxa4 37.♔d3 axb4 38.cxb4 ♔b6 0-1

Chess and the City. Li La Lueneburg

WGM Elisabeth Paehtz
Best rating: 2493

Finally the time has come to play again. In less than two days a rather huge open tournament is going to start in the small but very beautiful town of Lueneburg.

The tournament will consists of 4 events, two round robin tournaments (IM and GM) in the morning and two open tournaments (A and B) in the afternoon. I will participate in the GM round robin event where I hypothetically get the chance to achieve a GM norm. The average of my tournament will be about 2450 and the two strongest participants are GM Ovsejevitch Sergei and IM Andreas Heimann. The latter just recently played with me at the Mitropa Cup in Austria where he was the top scorer of our team. With a rating of over 2550 he is not only likely to be the strongest IM in Germany but also the hottest candidate for a GM norm.

Lueneburg is famous for its beautiful half timbered houses...

Besides that I hardly remember a chess event in Germany (except of course the German National Women Championship) where so many national women players take part. With Sarah Hoolt, Judith Fuchs, Melanie Ohme and myself we have almost the entire national team playing. However, we are funnily divided among 3 events. Melanie will participate in the IM round robin tournament whereas Judith and Sarah will go for the A-open in the afternoon.

Some players, who cannot get enough, will play the round robin as well as the open in the afternoon, but I am not ambitious enough or simply too lazy for such things...

... and its old and historical city center along the river "Ilmenau"

Clash of the Titans

(35) Chigorin, Mikhail
- Tarrasch, Siegbert [C00]

St Petersburg m(4), 1893

GM Kamil Miton
Best rating: 2655
& GM J.K Duda

1.e4 e6 2.♖e2!? This was Chigorin's pattern, discovered by himself. The main idea behind this move is to forbid d5.

2...c5 3.g3 ♘c6 4.♘f3 ♕e7!? This is an interesting try to play d5 and later recapture with the pawn.

5.♗g2 [5.e5!/? is an interesting way to disturb Black's development, but inconsistent with the way of thinking of the old masters. 5...f6 (5...d6 6.exd6 ♖xd6 7.♗g2 ♘f6 8.O-O O-O 9.♘a3+= The queen stands poorly on d6 because of Nc4 or Bf4.) 6.♗g2 fxe5 7.♘xe5 ♘d4 8.♖h5+ g6 9.♖d1 (9.♘g6 9...♘f6) 9...d6 10.♘c4 ♗f6!/? (10...♘f6 11.O-O e5 (11...O-O 12.c3 ♘f5 13.d4 cxd4 14.cxd4+=) 12.♘e3 (12.♘c3 12...♗g4 13.f3 ♗e6 14.d3 O-O 15.f4 e4) 12...O-O 13.♘c3 ♖h8 14.♘cd5 ♘xd5 15.♘xd5 ♗g5 16.b4!) 11.O-O ♘e7 12.♘c3 d5 13.♘e3 O-O∞]

5...d5 6.d3 [6.e5 6...♘h6! and the knight finds its own home.; 6.exd5 6...exd5 The queen on e2 stands badly because it is hard to play d4 any longer.]

6...♘f6 7.O-O O-O

8.♘c3?! Personally I don't like this move: the knight has no clear future and it freezes White's potential counterplay on the queenside. We cannot criticize Chigorin though: the game was played in the late years of the XIX century, and chess was not as developed as today. On the other hand his plan is quite simple: he wanted to develop the pieces as soon as possible and just see what happens. [8.e5 8...♘d7 9.c4 is the modern way: let's check some variations which we had a look at without an engine: 9...b6 10.cxd5 (10.♘c3 10...d4 11.♘e4 ♗b7 12.♗f4 ♖c7 13.♖fe1 (13.♘f6+ 13...gxf6 14.exf6 ♗d6 15.♘xd4 ♘xf6 16.♘b5 ♗xf4 17.♘xc7 ♗xc7+ Three pieces seem to be much stronger than the white queen.) 13...♘cxe5 14.♘xe5 ♘xe5 15.♘d2 (15.♘xc5!/? 15...bxc5 16.♗xe5 ♖d7 17.♖g4 g6=) 15...♗xg2 16.♗xe5 ♖c6 17.♖g4 f6 18.f3 ♗xf3 19.♘xf3 fxe5 20.♘xe5 ♖d6+= and the white knight cannot compensate for the missing pawn.) 10...exd5 11.♘c3 d4 12.♘d5 ♗b7 13.e6 Here some crazy variations appear: 13...fxe6 (13...♘f6?! 14.♘g5 ♘xd5 15.exf7+ ♖h8 (15...♖xf7 16.♘xf7 ♖xf7 17.♖h5+-) 16.♘h7 ♖xf7 17.♖e6 (17.♖h5 17...g6 18.♘g5+ gxh5 19.♘xf7+ ♖g7 20.♘xd8 ♖xd8+ 17...♖xh7 18.♗xd5 ♖f6 19.♖h3+ ♖h6 20.♗e4+-) 14.♘f4! (14.♖xe6+ 14...♖h8 15.♗f4 (15.♘xd4?? 15...♘xd4 16.♖xe7 ♗xd5 17.♖xd8 ♘e2+-) 15...♗f6=) 14...♖e8 15.♘xe6 ♗f6 seems to be better. (15...♗d6?! 16.♘fg5 h6 (16...♘f6 17.♖e1

and the rook is lost.) 17. ♖d5 ♘a5 (17... ♖h8 18. ♘xf8!+—) 18. ♘xg7+ (18. ♘c7+!? 18... ♖xd5 19. ♘xe8 ♖xe8 20. ♘e4 c4 with some practical compensation.) 18... ♖xg7 19. ♘e6+ ♖h8 20. ♖xb7 ♘xb7 21. ♖xh6 ♖f7 22. ♖ae1→) 16. ♖e1 ♖f7 17. ♘fg5 ♖e7 (17... ♖xg5 18. ♘xg5 ♖e7 19. ♖d5+ ♖h8 20. ♘f7+ ♖xf7 21. ♖xf7 ♖xe2 22. ♖xe2 ♘ce5 23. ♖f4!± The rook is coming to the 7th rank.) 18. ♖d5 ♖h8 19. ♖e4 (19. ♖g4!?) 19... ♘f8 20. ♖f4↑ with complex play.]

8...a6 is quite slow, but planned: Black wants to invade the queenside with a pawn phalanx. [8... ♘d4 9. ♘xd4 cxd4 10. ♘d1 dxe4 11. dxe4 e5]

9. ♖g5!? This move shows Chigorin's skills: he is provoking Black to play h6 in order to use it as a weakening after a potential g4-g5. It seems unreal, but the game shows that at this time everything could happen! ;-)

9...h6 10. ♖f4 b5 11. ♖fe1 d4 [11... ♖b7 was also possible, to keep the center tense. 12. exd5 ♘xd5 (12... exd5 13. d4 c4 (13... cxd4 14. ♘xd4) 14. ♖ad1) 13. ♘xd5 ♖xd5!? 14. ♘e5 ♖xg2+! (14... ♘d4)]

12. ♘d1 Now the knight is really passive, but it's quite likely it will come to play via f2.

12... ♘d7 Black is gaining space.

13. ♖h1 ♖e8 [13... ♖b7 14. ♘g1! ♖h8 15. ♖d2 f5 16. f4]

14. ♖g1 Chigorin's plan is quite clear now. He wants to attack on the kingside, like Steinitz before him. It's obvious that Black's counterattack will come quicker, as he is better prepared, but on the other hand White's attack is more dangerous, because it is targeted on the black king.

14...e5 [14... ♖b7 with idea to be flexible. 15. g4 e5 16. ♖g3 g5!?± and White has no attack anymore.]

15. ♖d2 ♘f8 16. ♘e1 Although the white pieces occupy the two last lines, this setup isn't senseless as he wants to attack with the pawns. Now Tarrash makes some mistakes and loses several tempi:

16... ♘e6?! 17. f4 ♖b7 18. f5 ♘g5 19. ♘f2 ♖c8 20. ♖h5 [20. h4 20... ♘h7 21. ♘f3 looks more natural, but what does White want to do in the future?]

20... ♘h7 [20... c4 is maybe more precise.]

21. ♘f3 c4 22. ♖f1!? The Russian corrects the worst piece - the light squared bishop. Now he is ready to push the g-pawn forward.

22... cxd3 [22... ♖b4 is a classical attempt to exchange the bad bishop, but Black can play this anytime.]

23. cxd3 [23. ♖xd3! Finally the bad bishop has its own function and the c-file is covered. I think in this case White's attack would be crushing.]

23... ♘g5 [23... ♖b4]

24. ♖xg5!? A dynamic move. White gives his excellent bishop in order to get some tempi to prepare the attack. Now the game sharpens.

24... ♖xg5 25. ♘g4 ♖f8 [25... ♖e3! 26. ♖g2 f6 was the way to block White's attack. Now it becomes very strong.]

26.♟e2 ♟f6?! According to the computer this is a blunder. Black loses too much time. On the other hand it is hard to suggest anything better, but the computer prefers Rc7. [26...♟e3]

27.h4?! Too slow. White had better to play [27.♞af1! to improve his last piece. Black is already in deep trouble: 27...♟b4 28.♟xf6 (28.a3!?) 28...gxf6 (28...♞xf6 29.g4 and Black is about to lose.) 29.♞xh6+ ♟e7 30.♞d2 ♞d6 31.♟d1! and White has an overwhelming advantage, for example after 31...♟xa2 32.♟b3 ♟b4 33.g4→]

27...♞d6 [27...♟b4! With counterplay!]

28.♟f2?! Again too slow. White could attack instantly: [28.♟xf6 28...♞xf6 29.g4 ♞d6 30.g5 and it is hard to believe that Black can escape from this terrible position.]

28...♟e7!? Good defence! Black is using the fact that the king on h1 and bishop on b7 are on the same diagonal. [28...♟d8 is the main computer defence, although after 29.♞af1 f6 30.♟xh6 White grabs a pawn for nothing.]

29.♞af1? [29.♟xf6! is the correct move order to get the queen to f6. Once again White's attack is very strong now. 29...♞xf6 30.♞af1 (30.♟g4?? 30...♞xf5!) 30...♟g8 31.g4! (31.♟g4?! 31...♞d6 32.f6?? g6→) 31...♞d6 32.g5→]

29...♟g8! ♢ Now Black overtakes the initiative. On the kingside White's attack has been burst, and on the other side Black is dominating.

30.♟d1 Chigorin is improving his bishop, but in fact it is only temporary.

30...♞c7 31.♟b3 ♞ec8 32.♟f2 ♟d8 33.♞e2 a5 34.♟f3 a4 35.♟d1 Did I not say it?!

35...♟c6 [35...♞c1 36.g4 For the computer everything it is clear, but for a human it is not. White has some counterplay which might be very dangerous in the nearest future. Now both sides are regrouping their forces.]

36.g4 f6 37.♟h3 ♟e8 38.♞h2 [38.g5!?

38...♟f7 39.a3 ♟b3 40.♟f2 [40.g5!?

40...♟xd1 41.♟xd1 ♞c2 42.♞g3 b4 43.axb4 ♞a6 [43...♞xb4!?

44.♟f2 [44.g5 The computer thinks it is better to give up the d3 pawn rather than this one on b2, as the a-pawn might be very dangerous.]

44...♞xb2 45.g5 hxg5 46.hxg5 ♞cc2 47.♟g4 Now White has plenty of counterplay and I think it is harder to play this position with Black, even though he has a small edge.

47...♔d6? [47...fxg5! is the computer's suggestion, although it looks rather shaky. In my own opinion the most logical attempt is to play for my own asset;; 47...a3!? White has to play very creatively to hold the balance: 48.b5! with the idea to disrupt the communication in the black camp. 48...♖xb5 Not the only move, but a quite logical one. 49.♔h4 ♜bb2 50.♔h8! fxg5 51.f6 ♜xf6 52.♜xf6 gxf6 53.♖xg5 fxg5 54.♜d2+!! It is very important to switch Black's rooks off from play for a moment. 54...♔e8 (54...♔e7?? 55.♔g7+! ♔d6 56.♔g6+ ♔c5 57.♔xa6+--) 55.♔xg8+ ♔d7 56.♖f7+ ♔c6 57.♖f6+ ♔b7 58.♔d5+! (58.♖xa6? 58...♖c1+ 59.♔g2 ♖xd2+ 60.♔g3 ♖xd3+ 61.♔g4 ♔xa6--) 58...♖c6 (58...♔c6!?) 59.♔d7+ ♖c7 60.♔d5+ ♔c6!? is the last try to win the game, but an unsuccessful one: 61.♖xc6 ♖xc6 62.♜c4 a2 63.♜a5+ ♔b6 64.♔xc6+ ♔xa5 65.♔c5+ ♔a4 66.♔c4+ ♔a3 67.♔a6+ ♔b4 68.♔c4+= and it is a perpetual. I guess even today's top grandmasters would have problems to find all the moves on either side. That is a computer!!!]

48.gxf6 ♜xf6 49.♔h3! A very strong move! White is improving the position of his queen.

49...a3 50.♜xf6 ♔xf6 51.♖g6 a2! Both players have been playing their best chess. This is the critical moment of the game.

52.♖xf6?? Aaouhhh!!! The most natural move in the position, but what a blunder it is. Now White is dead lost. [52.♜g5!! An amazing move, missed by both players!! White doesn't take the poor black lady and instead improves his own knight! The computer thinks it is equal here, but everything could happen between these players: 52...♔e8! (52...♔e7) 53.♖xf6 gxf6 54.♔h7 ♜e7 55.♔h8+ ♔d7 56.♜f7! (56.♜e6 only leads to a draw: 56...♖c8! 57.♔xf6 ♖b1 58.♜c5+ ♖xc5 59.♔e6+ ♔e8 60.♔xa2 ♖xf1+ 61.♔g2 ♖cc1 62.♔e6=) 56...♔c7! 57.b5 ♔b6 and according to the computer it is level. What an incredible position!]

52...gxf6—+ Now White is lost, because the black king is sheltered enough and the rooks and the a-pawn are too powerful.

53.♖d1 ♖b1 54.♔f1 ♖cb2 55.♜d2!? The last try, but it is not enough.

55...♖xd1 56.♔xd1 ♖xd2 57.♔c1 [57.♔a1 57...♖c2!? 58.b5 ♔e7 59.b6 ♔d6 60.b7 ♔c7 and White is out of good moves.]

57...♖xd3! 58.♔g2 ♖c3 59.♔a1 ♖c2+ 60.♔f3 d3 61.♔d1 ♖b2 62.♔a4 d2 White resigns. What a fighting game! 0-1

Editorial Preface

A spectacular week of chess is behind us, but let us start with the main events:

The new and fully deserved Russian Champion is Evgeny Tomashevsky who showed great play and finished on 7.5/11. Second place went to Karjakin who was not doing too much himself, but happily accepted the presents and scored 7/11. 3rd place went to Vitiugov with 6.5/11.

In the women's section the new Russian super talent- the only 16-year old Goryachkina- dominated the event with 8/11, while 2nd and 3rd places were shared by Kosteniuk and Bodnaruk with 7/11.

Christian Bauer is the new French Champion. He won a very dramatic tiebreak match against Gharamian as they had both finished on 7.5/11. The big favourite of the tournament Etienne Bacrot took the 3rd position with 7/11.

In the women's section nobody could stop Almira Skripchenko, who scored a fantastic 9/11.

The matches against the Chinese players are always tough and Leko had to experience it once again. His match out of 6 games ended with 4 draws and 2 wins for Li Chao.

In another 6 games match between Ragger and Mamedyarov, after 3 games the score is 2.5-0.5 for Mamedyarov, which is clearly not a surprise.

In the Spanish team Championship the team of Solvay (with Harikrishna, Abdihan, Ganguly...) finished clear first.

Already very soon we can be very excited about the start of the 3rd Sinquefeld Cup, with all the leading top chess players including Carlsen, Nakamura, Caruana etc...

Until then, enjoy the current issue of your weekly chess magazine.

Best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

(1) Mamedyarov, Shakhriyar (2735) - Ragger, Markus (2694) [C69]

Mamedyarov vs Ragger(1),
2015.08.17

GM Arkadij Naiditsch
Best rating: 2737

We are in the first round of the match organised in Vienna between Mamedyarov and Markus Ragger, the Austrian Number 1. With 2694 ELO, Ragger is at his peak and is clearly motivated to break the 2700 ELO barrier. But on the other hand to play a much more experienced and probably stronger opponent is never easy. In the current game Mamedyarov, who usually plays very sharply, is going for an endgame which seems to be very close to equal. With one inaccurate move Ragger blunders a very beautiful break which is perfectly executed by White. A nice game to watch!

1.e4 Usually Mamedyarov prefers to start with 1.d4.

1...e5 2.♘f3 ♘c6 3.♙b5 a6 No Berlin...

4.♙xc6 The exchange Spanish is not played that often on the top level, but clearly deserves attention.

4...dxc6 5.O-O f6 An old fashioned move, but a very solid one. [At the moment Black more often plays 5...♞f6 6.d4 exd4 7.♙g5 ♞d6 8.♘xd4 with complex positions.]

6.d4 exd4 [6...♙g4 is the other main line.]

7.♘xd4 c5

8.♘b3 This is quite a rare move and for a good reason... White did not show any good results in it. [8.♘e2 This line which is often played by Mamedyarov's compatriot Radjabov leads to a similar idea as in the game. 8...♞xd1 9.♞xd1 ♙d7 10.♙e3 O-O-O 11.♘bc3 b6 12.a4 but Black also seems to be doing fine here after 12...♞e8 13.♞d2 ♙c6 14.♞ad1 ♘e7 and the position is very complex.]

8...♞xd1 9.♞xd1 ♙g4! A good move. Black provokes White into playing f3 to make a weakness for later and this will happen when Black can play c4-Bc5 and the king on g1 is pinned.

10.f3 ♙e6?! A very strange decision in my opinion. The main line continues with Bd7, which Ragger has already played and I think it should clearly be the best for Black. [10...♙d7 11.♙f4 O-O-O 12.♘c3 c4 13.♘a5 ♙c5+ Now we can see how useful the Bg4 move was. 14.♙h1 b5 15.♘d5 ♘e7 16.♙xc7 ♘xd5 17.♙xd8 ♘e3 18.♘b7 ♘xd1 19.♘xc5 ♘f2+ 20.♙g1 ♘xe4 21.fxe4 ♞xd8 with an equal endgame in Guseinov-Ragger 2013.]

11.♘c3 White gives Black the chance to play Bd6. [Another interesting option could have been 11.♙f4 not giving Black the chance to castle queenside and at the same time attacking the c7 pawn. 11...c4 12.♘d4 (12.♘a5 doesn't work because of

12...b6! 13.♖c6 ♗c5+ 14.♔f1 ♗d7 15.♗d4 O-O-O and Black is perfectly fine.) 12...O-O-O 13.♗c3 ♗c5 14.♗e3 Now it seems like Black needs to give up the bishop. 14...♗xd4 (In case of 14...♗f7 15.♗f5! ♗xe3+ 16.♗xe3 White manages to exchange the dark bishops and reaches a slightly better endgame.) 15.♔xd4 ♔xd4 16.♗xd4 ♗e7 17.♔f2 and because of the better pawn structure White should be a little bit better here even if it is of course not much.]

11...♗d6 12.♗e3 b6 Black wants to castle queenside with a good position. In this type of endgame it is very important for White to exchange one bishop.

13.a4! A good choice and actually the only one logical move, since after any other passive move Black would castle queenside.

13...a5 Ragger is going for a slightly worse endgame. [More fighting was 13...O-O-O 14.a5 ♔b7 (Black would need to suffer for a draw after 14...♗xb3 15.cxb3 b5 16.♔ac1 and the c5 pawn is weak.) 15.e5! This beautiful move probably gives White some edge at the end of a long forced line: 15...♗e7 16.♔xd8 ♗xd8 17.♗xc5 ♗xb3 18.♗f8! A difficult move to find! 18...♗h6 19.♗xg7 ♔g8 20.♗xh6 and White is probably better.]

14.♗b5 The d6 bishop has to be taken.

14...O-O-O 15.♗xd6+ [Mamedyarov probably didn't like

15.♔d2 15...♗e7 and Black keeps the bishops.]

15...cxd6 16.♗d2 A very logical move again. White wants to choose between playing c4 next or maybe try the plan with c3-b4 or maybe just play Nf1, double on the d-file and then play Ne3. [16.♗f4 16...d5]

16...d5?! In my opinion this is a serious mistake, probably based on White's 18th move, which Ragger clearly missed. [16...♗e7 looks very solid and now Black really wants to play d5. 17.c4 f5 This position might be a bit better for White, but in case of good defense Black should be able to hold this endgame.]

17.exd5 ♗xd5? This is already a serious blunder... [17...♔xd5 would lead to an unpleasant position. 18.♔e1 ♗f7 and maybe White can just continue with 19.♗f4 wanting to play Nc4 or Ne4. Black's position is very dangerous, but not lost.]

18.b4!! What a beautiful push! Suddenly Black's position is falling apart.

18...axb4 Black doesn't have a choice.

19.a5 bxa5 and this move probably just loses. [Tougher would have been 19...♗e7 20.axb6 ♗c6 21.♗xc5 and the endgame is very difficult to save for Black, but the opposite colored bishops give him some theoretical chances for a draw.]

20. ♖xc5 The black knight can't reach the nice c6 square any longer.

20... ♗h6 21. ♖xa5 ♖he8 Another unlucky move by Ragger who seems to be very nervous. Usually the Austrian Number 1 is a very safe player. [21... ♖b7 would lead to more of a fight. 22. ♖xb4 ♖d5 But we have to admit that in the long run this position should also be lost...]

22. ♖b6! Not missing the tactical blow.

22... ♖d6 [Ragger had probably missed that after 22... ♖d7 White anyway has 23. ♗c4! ♖xc4 24. ♖c5+ ♖b7 25. ♖xd7+ ♖xb6 26. ♖xc4 with a winning position.]

23. ♗c4 There is already nothing left to do for Black...

23... ♖xc4 [23... ♖c6 24. ♖a8+ also wins on the spot.]

24. ♖xd6 ♖e1+ 25. ♖f2 ♖e2+ 26. ♖g3 and of course Black's position is just hopeless. A very nice win by White even if Black made it too easy... Anyhow, Mamedyarov gave us a good lecture on that we should never relax too early, as the blow can come at any moment! **1-0**

(2) Vitiugov, Nikita (2719) - Dubov, Daniil (2654) [D17]

68th ch-RUS 2015(9),
2015.08.18

GM Csaba Balogh
Best rating: 2672

We are facing a great fighting game with many unusual and beautiful tactical motifs.

1.d4 d5 2.c4 c6 3. ♗f3 ♗f6 4. ♗c3 dxc4 The initial position of the Slav defense.

5.a4 ♖f5 6. ♗e5 ♗bd7 7. ♗xc4 ♗b6 8. ♗e5 a5 Black has many other theoretical lines at his disposal. I personally also like to employ this opening. It has both many sharp and many positional lines, depending on how White plays now.

9.g3 ♗fd7 Quite a rare move, but it has been tried recently by some very strong grandmasters. In general the exchange of the active knight on e5 is good for Black and a standard idea in this opening. [The main line goes with 9...e6 10. ♖g2 ♖b4 11.O-O O-O 12.e3 h6 with a complex fight with all the pieces on the board.]

10. ♗xd7 ♗xd7 However this is more or less new. Black would like to free his position with e5. However it could not come as a surprise to Vitiugov, because Dubov played exactly the same two days earlier against Tomashevsky and he equalized very easily. [Most of the games continue with 10... ♖xd7 11.e4 ♖h3 12. ♖xh3 ♖xh3 13. ♖b3 ♖a6 with an unusual game. White cannot castle kingside, but he ties up the black pieces on the b6 square. Black tries to untie them with e6-Bb4, but White also has many resources.]

11.e4 [That game continued with 11.♘g2 11...e5 12.d5 ♘c5! 13.O-O O-O Black sacrifices a pawn for activity. 14.♗e4 Tomashevsky decided to avoid the complications but it led to quick simplifications... (If White accepts the pawn with 14.dxc6 14...bxc6 15.♘xc6 ♖c8 16.♘g2 ♗b6 all the black pieces are standing perfectly. It is very important to mention the pawn structure on the queenside. If the white pawn was on a2, then I am not sure if the compensation would be satisfactory. However now the structure is fixed, the one pawn on a5 blocks the two white ones and Black has an extremely useful outpost on b4, which could be used by the bishop.) 14...♘xe4 15.♘xe4 ♗f6 16.♘g5 cxd5 17.♘xf6 ♖xf6 18.♖xd5 ♗e7 19.♖ac1 b6 20.♖fd1 ♖ad8 and the players agreed a draw soon in Tomashevsky-Dubov, Chita 2015.]

11...♘g6 12.f4 White prevents the e5 break and intends to obtain a powerful center.

12...e6 13.♘g2 ♘b4 14.O-O White already threatens to trap the bishop with f5.

14...f6! This is the novelty. Most probably a prepared one as it is given as the best by the computers. A typical move of the variation. The g6 bishop often gets out of the game while now Black wants to bring it back to f7 and the other point is to support the e5 break.

15.♘e3 O-O Black finishes the development and slowly prepares for the e5 break. White directly tries to gain some benefits before Black can execute his plans.

16.♗a2 ♘e7 17.♖b3 A double attack on e6 and b7. It looks very strong as it wins a pawn, however Black gets compensation...

17...♘f7 It is clear that the e6 pawn is more important than the one on b7. Also the queen on b7 gets into tactical motifs. There is no concrete way to trap it, but still it gets into the danger zone.

18.♖xb7 c5 This central blow mainly aims to get the c5 square for the minor pieces. Black also threatens to restore the material balance with Rb8-b2 as the c6 pawn is not hanging anymore.

19.e5 [The alternative was 19.d5 but then Black replies with 19...♖b8 20.♖a6 exd5 21.exd5 ♖xb2 and White cannot trap the bishop with d6, because the a2 knight is hanging. Black could play Re8 next, freeing the f8 square for the bishop.]

19...♖b8 20.♔a7! It is important to control the c5 square, otherwise White can quickly get into trouble. The bishop on g2 works well now on the long diagonal, White does not need to worry about trapping the queen. [20.♔a6 is strongly met by 20...cxd4 21.♙xd4 ♘c5! and losing the dark squared bishop creates huge problems for White. 22.♔c4 ♘b3 23.♖ad1 ♘xd4 24.♖xd4 ♔b6 25.♙h1 ♖fc8 26.♔d3 ♔xb2—+ Black wins the a2 knight in this more or less forced line.]

20...cxd4 21.♙xd4 The best chance to fight for an advantage. [White would like to bring back his queen to consolidate his position, but it does not work concretely because Black wins back the sacrificed pawn with 21.♔xd4 21...fxe5 22.fxe5 ♙c5 23.♔c3 ♙xe3+ 24.♔xe3 ♖xb2 and Black is fine.]

21...fxe5 22.fxe5 White seems to have full control over the position. He is a pawn up, his bishops control all the important squares on the queenside. He is threatening g with Rad1, creating decisive threats against the d7 knight. However Black comes up with unexpected tactical resources and creates enough counterplay to save the game!

22...♖xb2! The first tactical blow! The rook cannot be taken because Bc5 wins the queen.

23.♖fd1 Of course it would be better to place the other rook on d1, but it has to protect the a2 knight. White is already

threatening to take the rook because after Bc5 Qxc5 the d8 queen is also hanging, leaving White with an extra piece after the simplifications. White also plans to play Be3 and the d7 knight is in trouble because of the pin on the d-file. [23.♙xb2? 23...♙c5+; 23.♙c6 also looked strong, but Black saves himself with another unexpected tactical blow:

23...♙c5!! 24.♙xc5 ♘xc5 25.♔xc5 ♔d2 26.♖f2 White seems to defend everything, but Black wins back the piece with 26...♔xf2+! 27.♔xf2 ♖xf2 28.♙xf2 ♙e8+! 29.♙f3 ♙h5 and Black is better.]

23...♖xg2+! Another great shot! White destroys the main defender of the king, however his pieces seemingly do not stay actively enough to guarantee compensation. However, chess is strange and the attack starts to roll!

24. ♖xg2 ♕h5! 25. ♕e3 It seems to be over! White gives up his rook, but the d7 knight cannot be defended afterwards... [25. ♖d3? allows 25... ♖xe5!; 25. ♖f1 is beautifully refuted by 25... ♖xe5! 26. ♕xe5 (26. ♖xf8+ 26... ♕xf8 27. ♕xe5 ♖d5+ 28. ♖h3 ♖f3! will be the same as the 26. Bxe5 line.) 26... ♖d5+ 27. ♖h3

Kg1 was losing to Bc5, but now the king gets into mating net after 27... ♖e4! and White gets mated. 28. ♖xf8+ ♕xf8 29. ♕f4 ♕f3! Threatening with Qf5 after controlling the g2 square 30. ♖xa5 ♕g2+ 31. ♖g4 ♕e7—+ and Qf3 or Qe2 is going to be mate soon.]

25... ♕xd1 26. ♖xd1

26... ♖c8! Black sacrifices a piece again, but he activates his queen to create counterplay.

27. ♖xd7 ♖c2+ White does not have an adequate response here. Black always has something.

28. ♖g1 [28. ♖d2 is met by 28... ♖e4+ 29. ♖g1 ♖d8! 30. ♖xd8+ (30. ♕d4 30... ♕c5!) 30... ♕xd8 31. ♖xd8+ ♖f7 White is temporarily doing well materially, but his pieces are disorganized. The queen dominates the board and gives Black the initiative!; 28. ♖h3 28... ♖f5+]

28... ♕g5! The final blow, another piece sacrifice! White must agree to a draw by allowing perpetual check.

29. ♕xg5 [29. ♕a7 29... ♖xa2 wins back the piece and protects the e6 pawn at the same time.; 29. ♖xe6+? leaves the d1 rook unprotected. White is in trouble after 29... ♖h8]

29... ♖f2+ 30. ♖h1 ♖f3+ 31. ♖g1 ♖f2+ 32. ♖h1 ♖f3+ 33. ♖g1 A nice save by Black! A good example on how if we stay tactically sharp we can save difficult positions! **1/2-1/2**

(13) Li Chao (2748)
- Peter Leko (2714)

Leko - Li Chao(5),
2015.08.19

GM Arkadij Naiditsch
Best rating: 2737

We are in the 5th game of the match and Li Chao is leading 3-1 with only 2 rounds to go, so Leko needs a win. Both players didn't have much time on the clock and what we are going to see during the next moves is one of the most exciting endgames I have ever seen! There are mistakes on both sides- yes, but the endgame is extremely complex and hard to calculate until the end. Enjoy the show!

61. ♖e5? This is clearly a mistake based on miscalculation... [White absolutely needs to stop the a-pawn from moving, so the very logical solution would have been to play 61. ♖d2! 61... a3 62. ♖a2 and the danger of playing f8Q keeps White's chances for a full point alive.; Not a bad move, but a bit too early would be 61. f8=♚ 61... ♖xf8 62. ♗xf8 ♖xf8 The black

knight has a great position on d4 and keeps things together. 63. ♖a3 It seems like the a4 pawn is not that easy to defend, but Black has 63... ♗b5! and White can't take on a4 because of Nc3+ so he needs to go back. 64. ♖a1 with a very complex position, but I think that White doesn't risk much here.]

61... a3! Of course! The black pawn has to run!

62. ♖c3 Li Chao continues what he started, and this is to go for the c5 pawn.

62... a2 63. ♖cxc5+ ♗b6 64. ♖c1 The c5 pawn is gone, but the a2 pawn is almost a queen!

64... ♗b3! Simple and good!

65. ♖e1

65... ♗d2+ Leko plays the best move again. [65... a1=♚ 66. ♖xa1 ♗xa1 67. ♖e6+ ♗c5 68. ♖xg6 followed by f8Q after which White would easily win the h5 pawn and thus lead the game to an easy draw.]

66. ♗e3 The king has no other square...

66... ♗c4+?! Although very tempting, this is not the best move. [Black could have won the game with 66... ♗b1! and the threat of a1Q is deadly. 67. ♖e6+ ♗b5 The black king is going to a3 to escape from the checks. 68. ♖e7 ♗a4 (Of course not falling into the trap: 68... a1=♚?? 69. ♖xb1+! ♚xb1 70. ♖b7+=)]

69.f8=♔ ♖xf8 70.♘xf8 a1=♔ with an easily winning position for Black.]

67.♔f2 ♘xe5 68.fxe5 Black seems to be completely winning, but in fact things are not simple at all! The white threat of playing e5-e6-e7 gives good drawing chances.

68...♖h8?! This move already leads to a forced draw... [Black could still have won the game with 68...a1=♔ 69.♖xa1 ♖xa1 70.e6 (White is not in time with 70.f8=♔ 70...♖xf8+ 71.♘xf8 g5! It is extremely important for Black to keep the pawns. 72.♘h7 g4 73.♘f6 ♖a5! The only winning move! 74.♘h5 ♖xe5 75.♘f4 ♔c6 with an easily winning endgame.) 70...♖a7! Not an easy move to find in time trouble... 71.f8=♔ ♖xf8+ 72.♘xf8 g5 73.♘d7+ ♔c6 and Black is winning.]

69.♘f6! The right choice. Now things are very forced.

69...a1=♔ Leko already didn't have a choice.

70.♖xa1 ♖xa1 71.e6 The white pawns are running!

71...♖a7 This is the only way to stop e7, but it doesn't help.

72.e7! Of course!

72...♖xe7 73.♘d5+ ♔c5

74.♘xe7 The difference to the other lines is that Black can't save the g-pawn any longer.

74...♖f8 75.♘xg6 ♖xf7+ 76.♘f4 To make a draw White needs to get the h5 pawn and he is in time for that!

76...♔d4 77.♔g2 The h5 pawn is hanging and if Black would protect it with a move like Rf5, White would just go Kh3-Kh4 and Nxh5. The position is a draw!

77...h4 78.♘e6+ The most simple, but White also had other moves.

78...♔e3 79.gxh4 The last black pawn is gone, so the position is an easy draw.

79...♖f6 80.♘g5 ♔f4 81.♔f2 ♖h6 82.♘f3 ♖a6 83.♘d2 ♖a3 84.♔e2 ♖h3 85.h5 ♖xh5

86.♔d3 To defend rook vs knight is really not difficult and the last 10 moves don't need any comments...

86...♖d5+ 87.♔c3 ♜d8 88.♘c4 ♔e4 89.♘d2+ ♔e3 90.♘c4+ ♔e2 91.♘b6 ♔e3 92.♘c4+ ♔e4 93.♘d2+ ♔d5 94.♔d3 ♜h8 95.♔e3 ♜h3+ 96.♘f3 ♜xf3+ 97.♔xf3 ♔e5 A tragic end of the game for Peter Leko who was so close to get the full point, but how beautifully Li Chao saved the game with the two passed pawns was really great to watch! **1/2-1/2**

GM Csaba Balogh
Best rating: 2672

This is a very interesting rook endgame to study. White is a pawn up and he is going to win another one, because with his last move (Kg5-f5) he set Black into zugzwang. If he moves with his rook the g4 pawn is en prise, since e4 will not be hanging anymore, while if the king moves e5 falls. Despite this fact, Black has a huge triumph on a2, which compensates for the material deficit.

71...♔c5! Black must support his a2 pawn with his king. He gives up all his pawns on the kingside and a very interesting race starts with the many pawns against the rook.

72.♔xe5 ♔c4 73.♔f5 ♔b3

74.e5 White decided not to waste time on collecting the last remaining black pawn on the kingside and pushes his passed pawn instead. [However it is interesting to analyse 74.♔xg4!? 74...♚xe4+ 75.f4 ♔b2 76.♚xa2+ (It would definitely be useful to lure the black king one square away to a1 instead of a2, but in this case Black does not need to promote his pawn at once, but could play 76.♚f1 76...♚c4!= forcing a draw by repetition with Rc1 next move. Rf2 would be the only mov, but Black then plays Rc2.) 76...♔xa2 77.h4 The black rook alone cannot stop the pawns, he must hurry back with his king. 77...♔b3 78.h5 ♔c4 79.h6

We have reached the critical position. Black needs to find the only move to save the game. The key is if the h-pawn reaches the 7th rank, Black loses his counterplay with his rook. Therefore the only move is 79...♚e8! (79...♔d5? loses because

of 80.h7 ♚e8 81.♔f5! shouldering the black king to net get closer towards the pawns. 81...♔d6 82.g4 ♔e7 83.♔g6+- and White wins.) 80.♔h5 ♚h8! This is the point! Black keeps the h-pawn on the 6th rank and wins time to get his king closer! (80...♔d5? loses again to 81.h7! ♔e6 82.♔g6+- followed by advancing the g- and f-pawns.) 81.g4 (81.♔g6 drops the g-pawn. 81...♚g8+=) 81...♔d5 82.g5 (82.♔g6 82...♚g8+= The checks force the king to go back to h5.) 82...♔e6 83.g6 (83.♔g6 83...♚g8+=) 83...♔f6 The black king arrived just in time. White cannot advance both of his pawns, because the g7 square is under control. 84.f5 Trying to lure the king with a sacrifice, but of course Black does not need to take it... 84...♚c8 85.h7 ♔g7 86.♔g5 ♚c5= 87.♔g4=]

74...♔b2 75.♚e1 a1=♚ [There was no time for the trick we have seen in the 74.Kxg4 line: 75...♚c4? because the white pawn is far enough advanced as well: 76.e6! ♚c1 77.♚xc1 ♔xc1 78.e7+-]

76.♚xa1

76...♚xa1! Leaving the g4 pawn unprotected, but it is more important to have the king a square closer to the pawns. One tempo could be decisive in such endgames!

77.♔xg4 [77.e6 does not change the outcome. 77...♔c3 78.e7 ♚e1 79.♔f6 ♚e2 This is the simplest draw. (However

79...♔d4 also holds very instructively: 80.♕f7 ♔d5 81.e8=♖
♖xe8 82.♕xe8

82...♕e6!= A very nice motif! The black king squeezes his opposition to the 8th rank and White cannot create a passed pawn despite being two pawns up.) 80.♕f7 ♖xf2+=]

77...♕c3 78.f4 ♔d4 There is no time to waste, Black must rush back with his king!

79.h4 ♔d5 80.♕f5 White tries to prevent Ke6. [80.h5 also leads to a draw after 80...♕e6 81.♕g5 ♖a8 although White has to fight for it with 82.f5+! ♕xe5 83.♕g6 ♖g8+ 84.♕f7 ♖xg3 85.h6=]

80...♖a8! Black wants to send away the king from f5 to have Ke6 next move.

81.♕f6 [81.h5 transposes to the game later.]

81...♖a6+ White does not achieve anything by going to the 7th or the 8th rank, because he has no shelter against the side checks of the rook.

82.♕f5 ♖a8 83.h5 White decides to avoid a repetition, but he does not have realistic winning chances.

83...♖f8+ 84.♕g4 [84.♕g6 was a safer way to the draw: 84...♖g8+ 85.♕f7 ♖xg3 86.e6 ♖f3 87.e7 ♖xf4+=]

84...♕e6 The black king has arrived. The pawns are not far advanced. It is suddenly White who needs to fight for a draw. Jakovenko finds the way to achieve it.

85.♕f3! [85.h6? 85...♖g8+ 86.♕h5 (86.♕h4 86...♕f5--+) 86...♖xg3 87.h7 Black uses the unfortunate situation of the king, that the pawn cannot be promoted because of the check on the h-file. 87...♕f7! 88.♕h4 ♖g1--+]

85...♖a8 86.g4 The pawns are successfully stopped, but Black cannot win them. There are too many of them...

86...♖a3+ 87.♕g2 ♔d5 88.h6 ♕e6 [The only possible winning attempt was 88...♕e4 but it also fails because of 89.g5 and Black does not have enough time to capture the f-pawn, because after h7 followed by g6 the pawns promote. 89...♕f5 90.♕f2 and Black just waits with Kg2-f2. (An instructive mistake is 90.♕h2? which loses to 90...♕g4!]

and White cannot push his h- or g-pawn because of Rh3!) 90...♖a4 91.♔g3 ♜c4 92.♔h3! There is no trick like in the 90.Kh2 Kg4 line! 92...♜c3+ 93.♔g2 ♜b3 94.♔f2!= Holding the draw! Black cannot make progress.]

89.♔h2 ♜b3 90.♔g2 ♜a3 91.♔h2= 1/2-1/2

Golden knowledge

GM Adrian Mikhachishin
FIDE Trainers Commission Chairman

(15) Yagupov, Igor - Mukhametov, Eldar

RUS, 1995

In pawn endgames the subject of break is clear, but when other pieces are on the board it becomes much more complicated. It is true that sometimes it is still possible to transpose into a pawn endgame later, but generally there are much more complicated developments.

62.b5! axb5 63.c6! bxc6 64.♔c5! Now the king blocks the opponent's bishop and the a-pawn is ready to run.

64...b4 65.a6 b3 66.♘c4 ♕f1 67.a7 ♕xc4 68.a8=♚ b2
69.♚b7 1-0

(16) Lu Shanglei-Ji Dan

China, 2010

39.f5+! gxf5 40.g5 White obtained a dangerous passed pawn and has a strong position of the King. So it was time for the pawn sacrifice.

40...hxc5 41.hxc5 c5 A desperate try, as all normal moves are losing easily. [41...♖d6 42.g6 ♖e6 43.g7 ♕f7 44.♖f4 ♖f6 45.♘xf7 ♖xf7 46.♖xf5 ♖xg7 47.♖e6 ♖g6 48.♖d6 ♖f5 49.♖xc6 ♖e4 50.♖c5! wins after this typical zugzwang maneuver.]

42.bxc5 b4 43.♘d3! Stopping the opponent's counterplay, as the knight will block the f5 pawn.

43...b3 44.♘f4+ ♖d7 45.♖d2 1-0

(17) Zorigt, Z.-Korzin, B.

Budva, 1963

1.g4!! The creation of a passed pawn is now very easy.

1...gxf4 2.gxf4 ♕g5 3.♕f8 h3 4.♖f3 ♖d5 5.h6? [Correct was the natural 5.♕g7]

5...♕xh6? [Black could make a draw in the pawn ending: 5...♖xe5 6.♕g7+ ♕f6 7.♖g3 ♖f5 8.♖xh3 ♖g6 9.♕xf6 ♖xf6 10.♖g4 ♖g6 11.♖f4 ♖xh6 12.c4 bxc4 13.b5 e5+ 14.♖e3 f5 15.b6 f4+ 16.♖e2 c3 17.b7 f3+]]

6.♕xh6 ♖xe5 7.♕g7+ ♖d5 8.♖g3 f5 9.♖xh3 e5 10.♖g3 ♖e4 11.♕h8 f4+ 12.♖g4 f3 13.♖g3 1-0

(18) Kovcan, V.-Antal, P.

Hungary, 1995

1.h5!! fxg5 [After 1...♙xe3 2.h6 gxh6 3.g6+- promotes.]

2.♙xb6 ♖xb6 3.h6! gxh6 4.f6 1-0

(19) Kosteniuk, A.-Polgar, Ju

Moscow RUS, 2009

63.g4! A great break!

63...♜c7 [63...gxh4 64.gxh5 h3 65.♙f1 h2 66.♙g2 ♜c7 67.h6 ♜e6 68.h7 ♜f4+ 69.♙xh2 ♜g6 70.♙g3+-]

64.gxh5 ♜e6 65.h6 ♜f8 66.hxg5 fxg5 67.♙f3 ♙d3 68.♙g4 ♙e2 69.♙xg5 [69.f3 was better and simpler.]

69...♙xf2 70.♙f6? [70.♜d6 70...♙f3 71.♙f5 was correct.]

70...e4? [70...♙f3 71.♙xe5 ♜h7 was holding the draw.]

71.♙f7 ♜h7 72.♙g6 ♜f8+ 73.♙g7 ♜e6+ 74.♙f6 ♜f8 75.♜d4 e3 76.♙g7 ♜e6+ 77.♜xe6 e2 78.♜f4 1-0

(20) Hoang Thi Bao Tram-Majdan, J.

Dresden GER, 2008

46...g5! With this sacrifice of the important passed pawn, Black prepares to create a new one on the far side with another sacrifice.

47. ♖xd3 g4! **48.** hxg4 h3 **49.** gxf5 h2 **50.** ♔e3 ♜d7 [50...♜d8 was a bit simpler.]

51. ♖e5 h1=♚ **52.** ♜c3 [52. ♖xd7 did not help because of 52...♚c1+]

52... ♚e1+ 0-1

(21) Aronian, L.-Svidler, P.

Moscow RUS, 2009

39...a3! 40.bxa3 [Or here is the break after the piece sacrifice: 40.b3 40...♖xb3+! 41.axb3 a2]

40...b3! This break can only be stopped with an exchange sacrifice.

41.axb3 ♖xb3+ 42.♔c3 ♖xd4 43.♔xd4 ♜a8 44.♖d3 ♜xa3 45.c5 dxc5+ 46.♖xc5 ♜xf3 47.♖e4 ♔e7 48.♔c5 ♜e3 0-1

(22) Vistanekis, I.-Sardarov, E.

USSR, 1963

1.f5!! Here White uses the break not to create a passed pawn, but to open the 7th rank.

1...exf5 [1...gxf5 2.g6 fxg6 3.♜h8]

2.e6 fxe6 [2...♜a6 3.exf7 ♔xf7 4.♜h8]

3.♜h8 1-0

(23) Lasker, E.-Levenfish, G.

Moscow, 1925

49.♔f6? [It was necessary to try and conduct the break as

soon as possible: 49.f5 49...exf5 50.e6 fxe6+ 51.♔xg6 ♔b5 52.♚a1 f4 53.h5 e5 54.h6 e4 55.♔f5 f3 56.♔xe4 f2 57.♔e3 ♚h7 58.♔xf2 ♚xh6 59.♔e2 ♚d6 60.♚d1! Destroying the cutting of the king and obtaining a theoretically drawn position.]

49...♔b5 50.♚a1 a4 51.f5 Better late than never... But it is too late!

51...exf5 52.e6 fxe6 53.♔xg6 f4 54.h5 f3 55.h6 e5 56.♚e1 [56.♔f5 56...f2 57.♔xe5 ♚h7 58.♚f1 ♚xh6 59.♚xf2 a3 and Black is winning.]

56...a3 57.♚xe5+ ♔c4 58.♚e1 a2 59.h7 ♚a8 60.♔g7 f2 61.♚a1 ♔b3 62.♚f1 a1=♔+ 63.♚xa1 ♚xa1 0-1

(24) Stein, L.-Vaganian, R.

Vrnjacka Banja, 1971

With two powerful pawn moves Black creates an important passed pawn.

1...h5! 2.gxh5 [2...fxg6 2...hxg4 3.♚xg4 f5=]

2...g5!! [2...gxf5? would be wrong in view of 3.♔b8 ♚a5 4.♔b7 ♔h6 5.♔b6 ♚a8 6.a5 ♚b8+ 7.♔c5 ♚a8 8.♚a4 ♔xh5 9.♔b6!+-]

3.♔b8 ♚a5 4.hxg5 fxg5

5.♚b7+ [5.♔b7 5...♔f6 6.♔b6 ♚a8 7.a5 ♚b8+ 8.♔c5 ♚xb4!=]

5...♔h6 6.f6 ♚xa4 1/2-1/2

(25) Carlsen, M.-Wang Yue

Bazna, 2010

46.g4! The creation of passed pawns sometimes demands sacrifices...

46...hxg4 47.h5 ♚e4 48.♚c7! Now the ook is ready to support the passed pawn.

48...f5 49.h6 f4 50.h7 g3+ 51.♔e1 f3 52.h8=♔ f2+ 53.♔e2 ♚d3+ 54.♔e3 1-0

(26) Filip, M.-Mozhny, M.

Chechoslovakia, 1977

1...b5!! The only and last chance, since after [1...axb4 2. ♖xb4 / Be1-f2-b6= White will transpose into a endgame with the bishop of the wrong corner color.]

2.bxa5 bxa4 3.a6 ♖c6 4.♗b4 ♗b6 5.♖xh4 ♖b5 6.♗a3 ♖xa6 7.♖g3 ♖b5 8.♖f3 ♗c5 9.♗c1 ♖c4 10.♖e2 ♖b3 [/ Bd4-b2-+] 0-1

(27) Bacrot, E.-Fedorchuk, S.

Bundesliga 2006-7, 2006

49...g5? Black does not want to suffer in a slightly worse endgame. [49...♗d8 50. ♖c4 ♗a5 51. ♖d5]

50.g4! Even here this break is possible.

50...gxh4 [Or 50...hxc4 51.h5 ♗f8 52. ♖e2 ♗h6 53.♗d4 ♗g7 54. ♖f2]

51.gxh5 h3 52. ♗g1 ♖e6 53.b6 ♖d7 54.h6 ♗f8 55.h7 ♗g7 56. ♖e3 f5 57.exf5 d5 58. ♖f4 d4 59.b7 ♖c7 60. ♖g5 1-0

(28) Sjugirov, S.-Blomqvist, E.

Chotowa POL, 2010

48.a5 bxa5 49.c5!! A great move! The creation of a passed pawn is the most important task here.

49...dxc5 50.bxa5 c4+ 51. ♖xc4 ♗d6 52. ♖xd4 And Black has no defence against the white king transfer to b7, winning the bishop. **1-0**

(29) Averbakh, Y.-Korchnoi, V.

Yerevan, 1965

36...g4! Taking the first chance to create a passed pawn.

37.hxg4 h3 38.♔c2 [38.f3 38...h2 39.♘f2 a5--]

38...♖c4+! 39.♔d2 ♖c1!! A typical blockade of the first rank to prevent Rb1. **0-1**

(30) Fressinet, L.-Grandelius, N.

Malmo SWE, 2014

45.b5! axb5 46.a6 The a6 pawn decides the game!

46...♖d8+ 47.♔c6 b4 48.♔b7 b3 49.♖c3 1-0

(31) Akobian, V.-Wang, P.

Los Angeles 88e/5, 2003

1...♖xf5+!! 2.♔g6 [2.♔xh6? 2...♙e3+--; 2.♔g4? 2...♖g5+--]

2...♖g5+ 3.♔xh6 ♙e3! 4.♖xg5 b5! The white king is pinned and Black creates a passed pawn.

5.h4 [Other moves didn't help: 5.♔g6 5...♙xg5 6.♔xg5 bxa4--; 5.bxa5 5...bxa4 6.a6 ♔c7--]

5...bxa4 6.♔h7 ♙xg5 7.hxg5 a3 8.g6 a2 9.g7 a1=♔ 10.g8=♔

Black exchanges queens now and the last passed pawn decides the game.

10...♔h1+ 11.♔g7 ♔g2+ 12.♔h7 ♔xg8+ 13.♔xg8 a4 0-1

(32) Svidler, P.-Dominguez Perez, L.

Moscow RUS, 2009

36.b5! ♖xa5 This move is forced, as other captures lose faster. [36...axb5 37.c6 bxc6 38.a6 and the pawn is unstoppable.]

37.c6 axb5 38.cxd7 ♔f7

Now White just has to be careful when realizing his extra piece.

39.♔f1 ♔e6 40.♖f4+ ♔xd7 41.♖xg6 b4 42.♔e2 b3 43.♖f4

Chess and the City. The worst tournament of my life....

WGM Elisabeth Paetz
Best rating: 2493

No it is not about the place, not about the people (ok maybe my opponents just play outstandingly), nor about the conditions - in fact they are all just great!

It is just me, who likely forgot how to move the pieces. As I mentioned in my last newsletter I am currently playing a GM round robin tournament in the very beautiful but small city of Lüneburg, in the northern part of Germany.

But let us not get distracted from the main issue here - I lost 4 in a row and as far as my slowly fainting memory serves, it is the very first time this happens to me. Usually one says that "the first time" can be full of surprises, excitement or adventures, but we are not talking about, well, you know what I mean... Losing 4 games in a row is simply painful! The Russian chess school suggests throwing in a draw after a double loss, but they never explain what to do if your opponent just does not agree...

My opponents never agreed until today! I finally managed to draw in round 6! Being too scared of a refusal I even dared to offer in the very early stage of the game to be sure my position

is still stable enough.

The biggest problem about such a series is that you are not only losing hope, but also confidence. This eventually affects your play and decisions during the game.

Anyhow there is actually nothing to advice in such situations but the will to survive and strike back. There are 3 rounds to go and a dream of mainly damage compensation.

The tournament is currently led by Andreas, who is probably the strongest IM in the world, especially if he finishes the tournament the same style he has begun it.

For those who are interested in the tournament or want to participate next year, you can find all information at <http://www.vmcg-schachfestival.de/>

Clash of the Titans

GM Kamil Miton
Best rating: 2655

1.♘f3 f5 2.g3 d6 3.d4 ♘c6 This move order is very rare. Black wants to play e5 very quickly. The main line is [3...♘f6 4.♗g2 g6 5.O-O ♗g7 6.c4 O-O 7.♘c3 and now Black has a few plans, like 7...Nc6 or 7...Qe8, but the most solid and best one is 7...c6 with many complex possibilities from both sides.]

4.d5 The most logical to prevent e5. [4.♗g2 also deserves attention. 4...e5 5.dxe5 dxe5 6.♖xd8+ ♖xd8 7.♘c3 ♘f6 (7...e4 8.♘g5! with f3 next.) 8.♗g5 and White has the initiative thanks to his better development. One of the typical ideas here can be to break the center with e4.; 4.♗f4!? with the idea to play d5 a bit later.]

4...♘e5 5.♘d4 [5.♘xe5 5...dxe5 6.♗g2 ♘f6 7.O-O e6 8.c4 (8.dxe6 8...♖xd1 9.♖xd1 c6 with good play for Black.) 8...exd5 9.cxd5 ♗d6 10.♘d2! (10.♘c3 10...a6 XNc3) 10...O-O 11.♘c4 f4⇒Black should have counterplay on the kingside.]

5...c5! A concrete move. Let's check what would happen if Black developed his pieces as usual: [5...♘f6 6.♗g2 g6 7.O-O ♗g7 8.♘c3 O-O 9.e4! Black has problems with the e6 square. 9...fxe4 10.♘xe4 ♗g4 (10...♘d5 11.♘g5+-) 11.♘xf6+ ♗xf6 12.f3 ♗d7 13.f4±]

6.dxc6 [6.♘e6 6...♗xe6 7.dxe6 ♖c8 8.♗g2 ♖b8 9.♗d5 (9.♘c3 9...♖xe6 10.♘d5 ♖d7+ and White doesn't have any compensation.) 9...♘f6 10.c4 g6 11.♘c3 ♗g7 12.O-O O-O∞]

6...♘xc6 [6...bxc6 7.♗g2 with f4 next.]

7.♗g2 ♗d7 8.O-O

8...e5 Black is fighting for the center. The alternative was [8...♘f6 9.c4 g6 10.♘c3 ♗g7 11.♘c2 (11.b3 11...♘e4 12.♘xe4 ♗xd4+-) 11...O-O 12.b3 ♖a5 (12...♘e4 13.♘xe4 ♗xa1

14. ♖xa1 fxe4 15. ♔d5+ 13. ♕d2 (13. ♕b2 13... ♖e4 14. ♖xe4 ♕xb2) 13... ♔b6∞]

9. ♖f3 The knight on f3 is not fighting for the weak d5 square but this is still the best option. [9. ♖xc6?! improves the black center. 9... bxc6 10. c4 ♖f6 11. ♖c3 ♕e7 12. ♕g5 O-O (12... ♔c7 13. ♖b5 ♔b8 14. ♕xf6 gxf6 15. ♖c3 ♔xb2 16. ♔d3 e4∞; 12... ♔b8 13. ♔a4 e4∞) 13. ♕xf6 ♔xf6 (13... ♕xf6 14. ♔xd6 e4 15. ♔ad1 ♔f7 16. ♖a4+=) 14. ♖d5 ♔f8 15. ♖xe7+ ♔xe7 16. ♔a4 e4 17. ♔fd1 f4±; 9. ♖b5 with the idea of playing according to the Sveshinkov System. 9... ♕e6 10. ♖1c3 a6 11. ♖a3 ♖f6 12. ♕g5 ♕e7 13. ♕xf6 ♕xf6 14. ♖d5 O-O 15. ♖c4 e4 16. c3 (16. ♖xf6+ 16... ♔xf6 17. ♖xd6 ♔ad8±) 16... b5 17. ♖ce3 ♕e5 Black is better, f4 will come soon.]

9... ♖f6 10. ♖c3 ♕e6 With the idea to take control over the d5 square, but this move is a bit slow and now White can take advantage of his better development. Let's check some other options: [10... e4 11. ♖g5 (11. ♖d4 11... d5! 12. ♖b3 (12. ♕g5 12... ♕e7+=) 12... ♕e6 13. ♖b5 ♕e7 14. ♖5d4 ♔d7 Black is better thanks to his space advantage and the limited bishop on g2.) 11... ♕e7 (11... h6 12. ♖h3 g5 13. f3! The knight will come back to play via f2. White is better because of the weak black structure.)

12. ♖h3! (12. f3 12... d5! 13. ♖xd5 (13. ♖h3 13... d4±) 13... ♖xd5

14. ♔xd5 ♕xg5 15. ♕xg5 ♔xg5 16. fxe4 O-O-O±) 12... ♕e6 13. ♖f4 ♕f7 14. ♖fd5! White is doing everything to avoid d5! 14... O-O 15. ♕f4; 10... ♕e7 A very solid move. 11. ♖d5 (If white tries to use the same idea as in the game 11. e4 11... fxe4 12. ♖g5 ♕g4± then Black is a tempo up!) 11... ♕e6 (11... O-O 12. ♖xe7+ (12. ♖xf6+ 12... ♕xf6 13. ♔xd6 e4↑) 12... ♔xe7 13. b3 d5 (13... ♔ad8 14. ♕a3 ♕c8 15. c4 f4∞) 14. e3 (14. ♕b2 14... d4=) 14... ♔ad8 15. ♕b2 ♕c8 White has the bishop pair, but Black has a strong center, so the position is unclear.) 12. ♖g5 ♕xd5 13. ♕xd5 ♖xd5 14. ♖e6 ♔d7 15. ♔xd5 ♕f6 16. ♔d1 with the trap 16... Ke7 17. Nc5! and I have no idea if the knight on e6 is strong or weak.]

11. e4! [11. ♕g5 is too slow. 11... d5 (11... ♕e7=) 12. ♕xf6 gxf6 (12... ♔xf6 13. ♖xd5 ♕xd5 14. ♔xd5 e4 15. ♔ad1 (15. ♖h4 15... g6 16. f3∞) 15... ♔d8 16. ♔b5 exf3 17. ♕xf3 and it looks like White has a strong initiative.) 13. e3! with the idea Nh4-Qh5-Rad1. 13... ♕b4 with the idea Qd7-Ne7-O-O-O. The position is unclear.]

11... fxe4 12. ♖g5 ♕g4 Black could give back the pawn and try to finish his development after [12... ♕f5!? 13. ♖gxe4 (13. ♖d5 13... ♖d4 14. ♖xf6+ gxf6 15. ♖xe4 d5±) 13... ♖xe4 14. ♖xe4 d5 (14... ♕e7 15. c4! O-O 16. ♕e3 ♔d7 and White has a stable advantage.) 15. ♖c3 d4 16. ♖e4 ♕e7 17. c3 ♔d7 (17... dxc3 18. bxc3 (18. ♔b3 18... ♖d4 19. ♔xb7 ♔b8; 18. ♔a4 18... ♔d4)

18...♖xd1 19.♗xd1 ♗d8 20.♕e3 b6 With an equal endgame.)
18.♖b3 ♕e6 19.♖b5 O-O= 20.♘c5 ♕xc5 21.♖xc5 ♕h3
(21...♗ad8 22.♕g5; 21...h6! White's idea is to look for the
initiative on the light squares.) 22.♖d5+! ♖xd5 23.♕xd5+
♗h8 24.♗e1 and without queens White has chances to prove
the advantage of the two bishops.]

13.f3 exf3 14.♕xf3 ♕xf3 [14...♖d7 15.♘d5 ♕xf3 16.♖xf3
transpose to the game.]

15.♖xf3 ♖d7 16.♘d5

16...♕e7?! This is another moment where Black could give
the pawn back but immediately solve the practical problems.
[16...O-O-O 17.♘xf6 (17.♕e3 17...h6! Solving all the tensions.
18.♘xf6 gxf6 19.♘e4 d5 20.♘xf6 ♖e6=) 17...gxf6 18.♖xf6 ♕e7
Black is fine. (18...d5 19.♘f7 ♕c5+ 20.♖g2 ♗hf8 21.♕h6±)
19.♖e6 ♖xe6 20.♘xe6 ♗d8]

17.♘e6! Now the black king will stay in the center.

17...♕d8 18.♘xd8 [18.♘xg7+ 18...♖xg7 19.♘xf6+ ♕xf6
20.♖xf6 ♖xf6 21.♗xf6 and White is better thanks to the
pressure over the 6th rank and the f-file. 21...♖e7 22.♕g5]

18...♖xd8 19.♕g5 A good move. White maintains the tension.
[19.♘xf6 19...gxf6 20.♖xf6+ ♖c7 21.♕h6]

19...♗f8 20.♖a3 Threatening Nb6. [20.♖h5± looks very

unpleasant for Black.]

20...♖e6 21.♖b3 [21.♗ad1 21...♖d7±; 21.♘b6 21...♗b8
22.♗ad1 ♖c7 23.♕xf6 gxf6 24.♘d5+ ♖d7 25.c3 White's idea
is very simple: play Rd2-Rfd1 and win because of the weak
black king. 25...f5 Black is looking for counterplay. 26.♗d2 f4
27.♗fd1 fxg3

28.♘b6+ (28.♘f4 was probably also winning. 28...gxf2+
29.♖h1 ♖f5 30.♖xd6+ ♖c8 31.♘e6 ♖f3+ 32.♗g2 ♗f7 33.♖d8+
♘xd8 34.♗xd8#) 28...♖c7 29.♗xd6 gxf2+ 30.♖h1 (30.♖xh2
30...♗f2+ 31.♖g3 ♗g8+ 32.♖xf2 ♖f5+ and Black should mate.)
30...♖g4 31.♘d5+! (31.♗d7+ 31...♖xb6 32.♖b3+ ♖a6 33.♖a3+
♘a5 White doesn't even have a draw! 34.♗1d6+ b6--)
31...♖c8 32.♘e7+ ♖c7 (32...♘xe7 33.♖c5+ ♘c6 34.♗xc6+
bxc6 35.♖xc6#) 33.♗xc6+ bxc6 34.♖d6+ ♖b6 35.♖xc6+ ♖a5
36.♗d5+--]

21...♘e7 [21...♗b8 22.♘xf6 ♖xb3 23.♘e4+--]

22.♕xf6 [22.♗ad1 22...♘exd5 23.♖xb7 ♘b6 (23...♘c7 24.♖c6
d5 25.♖xe6 ♘xe6 26.♗xd5+ ♖c7 27.♗xe5 ♘xg5 28.♗xg5
g6±) 24.♖xg7 (24.♖c6 24...♖e7--+) 24...♘d7 and Black is
well coordinated. 25.♕xf6+ ♗xf6 26.♖h8+ ♖e8 27.♖xe8+
♖xe8 28.♗xf6 ♘xf6 29.♗xd6 ♖e7 30.♗a6 ♗d8 31.♗xa7+
♖e6± Black is very active.]

22...gxf6

23.♖ad1 It is logical that White wants to keep the queens on the board but after [23.♘xf6 I think the endgame should be easily winning. 23...♙xb3 (23...♖xf6 24.♙xe6 ♖xe6 25.♖f8+--) 24.axb3 h6 (24...♖f7 25.♖ad1 ♘c8 26.♘d5±) 25.♘d5 (25.♘g4±) 25...♖xf1+ 26.♖xf1 ♔d7 27.♖f7 ♔e6 28.♖xe7+ ♔xd5 29.♖xb7 ♔e4 30.♔f2 d5 and as usual the point of counterplay is active play.]

23...♘xd5 24.♖xd5 b6 25.♖fd1 ♔e7 26.♙d3 e4?! This move saves the pawn but creates weaknesses. Now the black structure is worse. [26...♖ad8 27.♙xh7+ ♖f7 28.♙h4! with the idea to not let Black play f5-f4 too easily.]

27.♙d4 ♖ad8

28.a4! with idea to create additional weaknesses.

28...♖f7?! is too slow. [28...f5 29.♙g7+ (29.a5 29...f4! 30.♙g7+ ♖f7 31.♙g5+ ♖f6± and gxf4 doesn't work.) 29...♖f7 30.♙g5+ ♖f6∞]

29.a5 ♔f8 [29...f5 30.axb6 axb6 31.♙xb6 f4 It is too late now... 32.♙xd8+! ♔xd8 33.♖xd6+ ♙xd6 34.♖xd6+ ♔e7 35.♖d4+--]

30.axb6 axb6 31.♙xb6 ♖fd7 32.♙d4 ♔g7 The king is safe now but Black lost the pawn and time, so now White's position is much better.

33.♖e1± ♖e8 34.c4 ♖ee7 Preventing c5.

35.♖e3

35...♔f7 A very passive move. Black should at least try to create some counterplay. [35...♖a7! Why not activate the pieces? 36.♖e1 (36.♖xd6 36...♖a1+ 37.♔g2 ♙f5; 36.b4 36...♖a2 37.♖xd6 ♙f5±) 36...♖a6 and at least Black improved the rook.]

36.b4 f5 37.b5 ♙f6 38.♙d2! ♔e8 [38...♖a7 39.♖xd6 ♙a1+ 40.♖e1+--]

39.♖a3 and finally the a-file is useful for White!

39...♖e5 [39...e3 40.♖xe3 ♙a1+ 41.♔g2 ♖xe3 42.♙xe3+ ♖e7 43.♙d2+--]

40.b6+-- ♖xd5 41.♙xd5 ♙b2 42.♙e6+ ♔f8 43.♖a8+ 1-0

Editorial Preface

5 rounds have passed in the 3rd edition of the Sinquefield Cup and we find Aronian and Carlsen on top with 3.5/5. Carlsen started into the event with a loss to Topalov with White and was in big trouble in the second game against Caruana, but luck was once again on the side of the World Champion who won the game on the 40th move after an incredible 1-move blunder by Caruana.

Topalov had a perfect start with 2/2 but after drawing 2 games, he lost the 5th game, in a very complicated fight against Caruana.

Aronian is playing cunning chess with fantastic preparation and is deservedly sharing first place.

We can be sure that we will see great fighting chess in the next 4 rounds, which will decide the winner of what is probably the strongest event of the year.

In the current issue we focus our attention mainly on this super tournament.

A lot of other smaller tournaments are also under way, such as the Spanish Individual Championship, the Rubinshtein Open or the Serbian Individual Championship.

For the first time two Chinese players have entered the top 15 in the World! Ding Liren is currently the World Number 7 while Li Chao is Number 14, and we can be sure that these two talented players will even further improve their rankings.

The pairings for the World Cup 2015 in Baku are official and the event begins on the 11th September. The first 2 places qualify for the Candidates tournament, so this is clearly an event to watch out for on the calendar!

We hope you enjoy the current issue of Top GM secrets!

Two best games of the past week

(1) **Carlsen, Magnus (2853)**
- **Topalov, Veselin (2816) [B51]**

3rd Sinquefeld Cup 2015(1.1),
2015.08.23

GM Arkadij Naiditsch
Best rating: 2737

And the history is repeating. Already in Stavenger we saw the pairing Carlsen-Topalov in the first round- where Carlsen lost on time(!) in a winning position. In the current game, things developed very differently. Topalov managed to surprise Carlsen very early with the aggressive 7...g5. Carlsen, after thinking for a long time, went for a very aggressive line. He sacrificed a piece for the attack, which led nowhere after great defensive play by Topalov. From move 30 the players were in quite serious time trouble and when it was over, Carlsen had nothing else left than to resign.

1.e4 c5 2.♘f3 d6 3.♙b5+ Carlsen likes this move a lot. He had great results in this line, beating a lot of top players, like Anand for example.

3...♞d7 is probably the most aggressive reply. The most played move is 3...Bd7.

4.O-O [4.d4 is probably the most played move in the position.]

4...♞f6 5.♞e1 a6 6.♙d3 A strange-looking move, but nothing new. White is planning to play c3-Bc2 and d4. [The other possible line is 6.♙f1 6...b6 7.d4 cxd4 8.♞xd4 ♙b7 9.f3 and White is trying to reach a hedgehog system with a tempo

down, which doesn't matter much.]

6...b5 7.c4 We are in a position with almost no games played in it, but, there is one game Carlsen-Nakamura from the 2014 Zurich Rapid.

7...g5! I think this is a great reply and it is clear that this move was nothing new to Topalov. [7...♞e5 8.♙f1 ♞xc4 9.a4 ♙d7 10.d4 cxd4 11.♞xd4 followed in the game Carlsen-Nakamura, with a slightly better position for White.]

8.♞xg5 is clearly one of the most critical moves in the position. [Another one is 8.cxb5 8...g4 9.♞h4 (9.e5 9...dxe5 10.♞g5 ♙g7 with a very unbalanced game.) 9...♞e5 (9...e6 10.♞c3 ♙h6 11.♙e2 ♙g5 and now White has the great 12.d4 ♙xh4 13.g3 Winning back the piece and clearly keeping some advantage.) 10.♙e2 e6 11.♞c3 followed by d4 and maybe White can hope for some advantage.]

8...♞e5 Black is going for the c4 pawn.

9.♙e2 bxc4 We are looking at a very complex position. The black king will most probably remain in the center, but for that Black has a great knight on e5 and will clearly develop some play on the kingside. The white bishop on c1 is also very passive for now. White should try to play actively and open the position as much as possible and as soon as possible.

10. ♖a3 Carlsen is going for the c4 pawn, but it looks a bit too slow. [Probably it is too early for 10.f4 10... ♖d3 and the white king is even more vulnerable than before.; But very interesting is 10.d4!? 10...cxd3 11. ♕xd3 with the easy plan of playing Nc3 and starting some play in the center. The position is very complex.]

10... ♖g8 Simple and strong. White needs to decide what to do with the knight on g5.

11. ♖xc4?! I think that this piece sacrifice is a mistake. [The best move was probably 11.d4 11...cxd3 12. ♕xd3 but of course the white knight is already not that nicely placed on a3 as he could have been on c3. 12...h6 13. ♖f3 ♖xd3 14. ♖xd3 d5 and I think only Black can be playing for an advantage here.]

11... ♖xc4 The piece has to be taken.

12.d4 This was White's plan.

12... ♖b6 A very solid move. [A serious mistake would be to play 12...h6? 13. ♖xf7! ♖xf7 14. ♕xc4+ and White's attack is very dangerous.]

13. ♕h5 Carlsen was clearly going for this move before playing 11.Nxc4?!. [The endgame after 13.dxc5 13...dxc5 14. ♖xd8+

♖xd8 15. ♖xf7+ ♖e8 is clearly better for Black. Two pawns are not enough for a full piece.]

13... ♖xh5 The most principled and again Topalov's calculation is not letting him down.

14. ♖xh5 Now Black has several options.

14... ♖g7 Probably not the most accurate move. [To a clearly better position for Black leads 14... ♖g6 15. ♖xh7 (15.dxc5 15...dxc5 16. ♖xh7 ♖g7 17. ♖h8 ♖d4 and Black is much better.) 15... ♖g7 16. ♖h8 cxd4 17. ♖h7 ♖xh7 18. ♖xh7 e5 and Black has a clear advantage.; Playing the simple 14... ♖xg5 15. ♕xg5 cxd4 should also give Black some edge.]

15. ♖xh7 Carlsen is trying his chances.

15... ♖d7?! Another unlucky move by Topalov, giving White serious chances to make things very unclear. [I think the position after 15... ♕g4 16. ♖h6 ♖xh7 17. ♖xh7 cxd4 should be better for Black.]

16.dxc5 White is opening the position even more.

16...dxc5

17.e5? What a present by Carlsen... [Clearly both players misevaluated the position after 17. ♖xf8 17... ♔h3 18. ♔xh3 ♕xh3 19.g3 At first sight it seems like Black is going to win the knight on f8 somehow, but in fact it is really hard to do. White is two pawns up and wants to play Bh6 next. 19... ♖g8 20. ♗h7 f6 Trying to isolate the knight and threatening to play Rh8 next. 21.e5 ♖h8 22. ♗xf6+ exf6 23.exf6+ ♔f7 24. ♕g5 With a very complex position.]

17... ♔c6! The right choice! The g2 pawn is hanging and at the same time Black wants to play Qg6 next. This move probably came as a surprise for Carlsen.

18.f3 [Not better is 18. ♗f6+ 18... ♔d8 19. ♗e4 ♕e6 and all the black pieces are in the game, so Black should be close to winning.]

18... ♔g6 Of course you don't need to think long before going for the exchange of queens.

19. ♗f6+ ♔d8 There are no more checks left and that means that White doesn't have a choice but to enter a lost endgame.

20. ♔xg6 ♖xg6 21. ♗e4 White still has some hopes as long as the black king is on d8 and maybe there is a chance to grab the c5 pawn.

21... ♕b7 A very solid move, developing a piece and at the same time protecting the c5 pawn because of Bxf3.

22.h4 Carlsen starts looking for chances on the kingside.

22... ♖c8 Another very accurate move. Black is slowly bringing his pieces into the game.

23.h5 ♖g8 24. ♕d2 Ba5 is a threat now.

24... ♗c4 Black wants to exchange some pieces.

25. ♕c3 ♕h6 Black's pieces are now all in play.

26. ♖ad1+ ♔e8 The black king is feeling very safe on e8.

27. ♖d3 ♕f4! A strong move! White has big trouble defending the e5 pawn.

28. ♗f2 ♕c6 Black is preparing to play Bb5 somewhere.

29. ♗h3 is clearly not the best, but it is hard to give White any advice. [Maybe to a bigger fight would lead 29.g4 with the idea of playing Kg2 next and dreaming of playing Nh3, but of course all that would not change much, since Black would remain a piece up and with a clearly winning position in the long run.]

29... ♕g3 30. ♖e2 ♕b5 White's pieces are totally hopeless.

31. ♖d1 ♕c6 Being short on time, Topalov decided to repeat

the moves once. [31...♖b6 32.♞c2 ♞h8 and there is no way to defend from Rxf5.]

32.♜f2 Carlsen doesn't repeat the moves, which is not because White is playing for a win, but he is looking for chances before move 40, where both players will get an extra hour.

32...♙xe5! The decisive blow! Even when he doesn't have much time, Topalov doesn't miss such tactics.

33.♜g4 [After 33.♞xe5 33...♜xe5 34.♙xe5 ♙xf3 White can basically resign because Rxf2 is coming next.; 33.♙xe5 33...♙xf3 is over as well.]

33...♙xc3 34.bxc3 ♖f8 Now White only has a pawn for a piece. The end of the game is near.

35.♖f2 ♞h8 Topalov continues playing very solidly.

36.♜e5 ♜xe5 37.♞xe5 ♙e8 Everything is protected.

38.g4 f6 39.♞e6 ♙b5 There is only one more move to make to reach time control.

40.♞de1

40...♞c7 White can't even attack anything and the time trouble is over. Black's position is totally winning so Carlsen takes the only right decision and this is to resign this very unpleasant game for him. Another great victory by Topalov over Carlsen, who clearly was very emotional during the current game and didn't play on his usual level. **0-1**

**(2) So, Wesley (2779)
- Aronian, Levon (2765) [E20]**3rd Sinquefeld Cup 2015(4.3),
2015.08.26GM Csaba Balogh
Best rating: 2672

Levon Aronian had a bad period, he has dropped a lot of ratings, but his form and great style seem to be back as the following nice victory shows.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.f3 The Nimzo with 4.f3 is a clear sign that White also wants to win this game. Most of its lines lead to unusual and sharp positions.

4...c5 5.d5 O-O 6.e4 d6 A recent approach by Black to deal with this opening. He allows his opponent to occupy and to build a strong center with his pawns, but he wants to create counterplay by using his lead in development. The structure might remind us of the Saemisch system of the King's Indian defense, with the difference that the bishop stands on b4 instead of g7 now.

7.♘e2 a6 Black immediately wants to undermine the center with b5.

8.a4 White prevents b5, but it also has the drawback that it

weakens the dark squares on the queenside.

8...♙a5! A very nice idea! Black again prepares for the b5 break! The point of the last move was to temporarily close the a-file and to create a pin between the two rooks. b5 did not work before as White could simply take it with axb5, but with the bishop on a5, Black wants to take back with axb5 and he threatens to win a rook with Bxc3 check. White's next move serves to prevent this idea by avoiding Bxc3 check at the end and then the a8 rook is hanging.

9.♙d2 exd5 10.cxd5

10...♞h5! White successfully prevented the concrete ideas on the queenside, therefore Black switches to the other flank. By moving to h5 with the knight, Black sometimes opens the possibility of Qh4. This is especially strong if White wants to finish the development by removing his knight from e2. Another idea is to open the lines in front of the central king with f5.

11.g3 Due to the Qh4 check, White had no other way to complete the development than g3-Bg2 and 0-0.

11...♞d7 12.♙g2 b5! Black uses the last moment to execute this break and gain space on the queenside. Otherwise White castles in the next move and there will be no Bxd2 check to open the a-file.

13.g4 White wants to push back the knight to f6 with tempo with the idea of playing Ng3, which would also vacate the ideal e2 retreating square for the c3 knight after getting attacked by b4. However, Black has a strong intermediate move... [White should not be too materialistic with 13.axb5 13...axb5 14.♖xb5 because it lets the white king run to the middle of the board. There are too many pieces left for Black to create some dangerous compensation. 14...♗xd2+ 15.♔xd2 ♗a6 followed by Qb6 next.; 13.O-O was the alternative, but in this case Black's counterplay comes very quickly too! 13...b4 14.♗b1 ♗b6! with the idea of playing c4 check Nc5-b3 or Nd3, while after 15.♗e3 a5 followed by Ba6 looks very strong.]

13...b4! 14.♗b1 [White could win a pawn with 14.gxh5 but it ruins his structure and also lets the initiative pass to Black. 14...bxc3 15.bxc3 ♖h4+ 16.♗g3 ♗e5 With very strong compensation for the pawn!]

14...♖h4+ 15.♔f1

15...♗e5! Great play by Aronian! He wants to sacrifice a piece to launch a devastating attack against the f1 king and the temporarily immobilized white pieces.

16.♗e1 [16.gxh5 is strongly met by 16...f5! Opening the lines in front of the king. White can hardly survive such an attack,

especially with such discoordinated pieces.]

16...♖f6! This double attack on g4 and f3 forces White to accept the sacrifice on h5. [Actually 16...♖e7!? 17.gxh5 f5 was also possible, but the text move is even stronger.]

17.gxh5 ♗xf3 18.♗f2 The only move for White to unpin himself on the f-file.

18...♗g4 Developing and pinning the e2 knight at the same time. Black is threatening to play Nd4! [Black could also play 18...♖xb2!? 19.♗xf3 ♖xa1 20.♔g2 f5 but Aronian prefers to keep his active pieces on the board instead of gaining back some material.]

19.♖c1 [19.h3 19...♗xh5 does not solve any problems. Black is still threatening with Nd4 and White cannot unpin himself with 20.♗g3? because it allows 20...♗h2+! 21.♖xh2 ♗xd1+]

19...♗d4! An amazingly strong move! Black changes one of his big triumph for another one. He trades his strong knight, but it turns out to be a more important factor that it also opens the c-file, where his rooks are going to invade very soon. White is forced to trade knights because of the Nb3 threat.

20.♗xd4 cxd4 21.e5 [The beautiful key line goes with 21.♗d2 Trying to finish the development. 21...♖ac8 22.♖b1

d3! Otherwise White consolidates with Qd3, but now the diagonals are opening... 23. ♖xd3 ♜xb2 24. ♕d4

24... ♖c3! 25. ♕xc3 bxc3 With a double attack on two white pieces. The capture of any of them would be fatal from White's point of view and after 26. ♖b1 c2!! is the point and Black wins! 27. ♖xb2 c1=♚+ 28. ♔f2 ♜xb2--+]]

21...dxe5 22. ♘d2 In comparison to the 21.Nd2 line, White gets the e4 square for his knight and also closes the f6-b2 diagonal, which was the key resource for Black after pushing d3. On the other hand, it gave Black another pawn, even if he just plays slowly and removes his queen, followed by pushing f5-e4, the compensation looks to be very strong. But of course, Aronian continues playing the most direct and active moves.

22...♖ac8 23. ♜b1

23...b3! lures the knight from e4 by sacrificing another pawn. Black is ready to invade on c2, so White is yet again forced to accept the sacrifice.

24. ♘xb3 [24. ♘e4 24... ♜f4 and Rc2 next is decisive.]

24...♕b6 [Perhaps it was even stronger to play 24...d3!? 25. ♖xd3 (25. ♘xa5 25... ♖c2 26. ♜e1 ♖e2--+) 25... ♕b6 26. ♜d2 e4! Threatening to crush with e3! Black wins in all the lines: 27. ♕xe4 (27. ♔g1 27...e3 28. ♕xe3 ♖c2! 29. ♜xc2 ♕xe3+--+) 27... ♖fe8--+]]

25.a5 ♕a7 26. ♔g1 White leaves from the pin on the f-file, but it just prevents the concrete problems after d3! Black has other ways at his disposal to strengthen his position. [26. ♜d3 is nicely refuted by

26... ♖c2! 27. ♜xc2 d3! wins the queen as 28. ♜d2 loses to 28... ♕e2+-- and mate on f2.]

26...♕f5! 27. ♕e4 [27. ♜e1 27...e4!--+ The central pawns supported by the pieces are swapping White away!; 27. ♜d1 27... ♕c2--+ wins back the piece and collects the full point!]

27...♔g5+ 28.♚f1

28...♔f4! [A very nice last move in the style of the entire game! White resigned in view of 28...♔f4 29.♙xf5 d3 30.♔e1 ♖c2—+ With decisive problems around the f2 square.] **0-1**

3rd Sinquefeld Cup,
2015.08.26

GM Csaba Balogh
Best rating: 2672

Black is a pawn up, but there are opposite colored bishops on the board and we know that this sometimes makes it possible to save positions with even bigger material imbalance. The extra pawn is ideally placed, because the d6 passed pawn is well blockaded, while on the queenside Black has a three against one situation, which could give him realistic winning chances if he could create connected passed pawns with the help of the king. However, at the last move before time control, White comes up with a clever sacrifice...

40.d7! The key is to get access to the pawns and by attacking them with the bishop White will be able to create a successful blockade!

40...xd7 41.d6! This was the point and Black is forced to push his c-pawn, which allows Kd4. Black just did not have

enough time to ensure the flexibility of his pawns with Ke6-d5 at the initial position.

41...c4 [41...b6 does not make any difference. White can force the advance of the c-pawn by attacking the pawns. 42.dxc7 b5 43.dxb6 c4 44.cxd4 is basically the same as the game.]

42.cxd4 b5 43.cxc3 cxe6 [43...a5 would be a good move if the c4 was protected and Black could push b4 next. However now after 44.dxc7 Black is forced to play 44...a4 which allows another blockade, by simply occupying the f8-a3 diagonal with the bishop.]

44.dxc7

44...Kd5 Black tries to play Kc5 and b4, which would probably be enough for the win, because his pawns win back their mobility, but of course White can simply defend against this plan.

45.d8 h3 [On 45...c5 White should not be greedy by capturing the h4 pawn, but he prevents the advance of the b-pawn with 46.dxe7+ Kb6 47.d8+=]

46.b4!? was not necessary, but White simplifies the position and builds a fortress on the dark squares (b4-a5), which makes the win impossible for Black.

46...cxb3 47.♔xb3 ♕c5 Otherwise White goes Kb4.

48.♘e7+! ♔b6 Otherwise White plays Kb4 again and establishes a blockade on the a5-b4 squares.

49.♘d8+ ♕c5 [49...♔c6 50.♔b4 is a dead draw, as White only waits with his bishop and the h2 pawn can also be easily protected by the bishop.]

50.♘e7+ ♔b6 51.♘d8+ 1/2-1/2

(14) Topalov, Veselin (2816) - Nakamura, Hikaru (2814)

3rd Sinquefeld Cup 2015(2.1),
2015.08.24

GM Arkadij Naiditsch
Best rating: 2737

We are in the second round and Topalov once again shows his great class. With a wonderful win in the first round over Magnus Carlsen, Topalov was clearly going for nothing less than a full point in this much better endgame for him. The bishop pair is dominating the board and the 3 vs 2 pawns situation on the kingside is clearly very positive for White, but Black's position is still very solid and the material is equal. Let us take a look at the very nice technique of the current World Number 2.

44.h5! A great move! White not only fixes the black pawn on h6, but as we will see later on he is planning to put the king to h4 and play g5, which will create a passed h-pawn as well as probably win the f4 pawn.

44...♔f6 A solid move. Black cannot do anything active anyway.

45. ♔h3 The white king is going to the right position.

45...b5 This is maybe practically Black's only chance. White already wanted to play Bh4 followed by g5 and Kg4 at a good moment.

46. ♕d4+ ♖g5 I think this is the most logical move, even if it gives White the chance to end the game on the spot.

[In case of 46...♖f7 47. ♕b3 White would continue to dominate the position and probably next to follow is g5. 47...♖e2 48.g5! A very strong move. 48...hxg5 49. ♖c1 and the game is close to over.]

47. ♕xd5?! White still has a big advantage, but Topalov missed a very nice win here... [47. ♕b3 47...♖e2 (After 47...♖xb4 48. ♕f2! ♖f6 49. ♕h4+ ♖e5 White had to see 50. ♕f7! and the game is over because of the huge amount of threats to the black king. In case the black rook will move away from the e-file, the deadly Re1+ will follow.) 48. ♖c1! ♖e6 49. ♖c5 and Black is totally paralyzed, so White is winning.]

47...♖xd5 48. ♖c1 ♖e6 White's pawn structure is much better and the black pawns on the queenside are blocked, but how to proceed?!

49. ♖c5 ♖d6 Black keeps on waiting.

50. ♕g7 ♖e6 51. ♕d4 ♖d6 52. a3 After repeating the moves

once, White improves his position a bit by protecting the b4 pawn for the future.

52...♖e6 53. ♖c1 So we came back to the position from which we started and it is clear that White will try the plan with Bf2-Bh4 next.

53...♖e7 54. ♕f2 ♖f6 55. ♕h4+ ♖f7 56.g5 A very logical move. White is creating a passed h-pawn and freeing the g3 square for the king.

56...hxg5 57. ♕xg5 ♖d5

58. ♖g4 Black really can't do much but wait. It is clear that the f4 pawn is going to fall, but maybe Nakamura was still hoping to get some chances in the rook endgame!? As we know, the h+f pawns in the rook endgame is a draw in most cases.

58...♖g7 59. ♕xf4 ♖xf4 60. ♖xf4 So we have reached a rook endgame and if Black was able to trade the 3 pawns against the white a- and b-pawns, the position would be a theoretical draw- but it is just impossible. The position of the white rook on c1 is very active, keeping the black rook passive on the 6th rank.

60...♖d6 61. ♖c3! Wonderful technique by Topalov. There is absolutely no need to hurry with the play on the kingside. First it is important to avoid Black's play with Rd3.

61...♔f6 62.♔g4 White wants to play f4 followed by Rh3 and advancing the h-pawn.

62...a5 is maybe Black's last practical chance. To keep on waiting makes no sense any longer.

63.bxa5 It is never bad to take a pawn...

63...♖d4+ 64.f4 ♖a4 The black rook is finally active, but it just too late.

65.♖xc6+ ♔g7 66.a6! The last precise move of the game. 3 passed pawns are just too many to even dream about a draw any longer.

66...♖xa3 67.f5 b4 68.f6+ The white pawns are just too fast.

68...♔f7 69.h6 ♔g6

70.♖c8 The poor king is trying to stop all the white pawns at the same time, but it is impossible.

70...b3 [70...♖xa6 71.h7 ♔xh7 72.f7 and White is promoting next move.]

71.♖g8+ A lot of other moves would win as well.

71...♔f7 72.h7 ♖a4+ 73.♔f3 All in all ally impressive technique by Topalov, not giving Nakamura any chances for survival. In my opinion to be good in endgames a player must have these 3 attributes: patience, precise calculation

and good nerves. **1-0**

Golden knowledge. Rook and pawn against bishop

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

Theoretical knowledge is required when we play different kind of endgames. Rook and pawn against bishop seems to be easy business because of the great material advantage. But even here there are precise recommendations about how to handle such endings. There are three kinds of positions here:

- A) With central pawns
- B) With bishop and knight pawns
- C) With rook pawns

Everywhere there are different technical methods. The first part will be about central pawn. As usual, even the top players don't know the exact technique!

(15) Tomashevsky, E.-Movsesian, S.

Tsaghkadzor ARM, 2015

102.d7?? is premature. Tomashevsky had to prepare this move by improving his rook. The ideal position would be with the rook on the fourth rank. In this case the opponent's bishop will be cut off and unable to attack the d7 pawn. [It was necessary to prepare d7 with 102.♔e6 102...♟g4+ 103.♔e5 ♟e2 104.♚f7 ♟g4 (104...♟c4 105.♚f4 ♟a2 106.♚a4 ♟b3 107.♚b4 ♟a2 108.♚b8+ ♔d7 109.♚b7+ ♔d8 110.d7 ♔e7 111.♚b2 ♟e6 (111...♟c4 112.♚d2 ♔d8 113.♔d6 ♟b5 114.♚h2 ♟xd7 115.♚h8+ ♟e8 116.♚g8) 112.d8=♚+) 105.♚f4 ♟d1 (105...♟h3 106.♚h4 ♟f1 107.♔e6) 106.d7! ♔e7 107.♚d4]

102...♔e7! 103.♔c6 ♟g4 Now the white rook is stuck to protecting the d7 pawn. This is the key method of defence in this type of positions.

104.♖b7 ♗f5 105.♖c7 ♗g4 106.♖a7 ♗f5 107.♖b7 ♗g4
108.♖c7 ♗f5 109.♖a7 ♗g4 110.♔d5 ♗xd7 111.♔e5 ♔e8
112.♔d6 ♗f5 1/2-1/2

(16) Wojtaszek, R.-Malakhov, V.

Vladimir Petrov Memorial op, 2013

149.e7? This obvious and wrong move was played so many times! It is necessary to use automatic knowledge here: the rook on the fourth rank does the job! [149.♖c7 149...♗e3 150.♖c3 ♗d2 151.♖c2 ♗f4 152.♖c4

152...♗g3 (152...♗h6 153.♔d6 ♗f8+ 154.e7! ♗xe7+ 155.♔e6 ♔d8 156.♖d4+ ♔e8 157.♖a4) 153.♖g4 ♗h2 154.♖g8+ ♔e7

Brno GM, 2004

63.♗g4! Trying to transfer the bishop to d5 via f3 and win the pawn.

63...d5 64.♗f3 d4 65.♔d5 ♔b2? [It was necessary to hurry with 65...d3! 66.♔d4 ♖f2! 67.♗h5 ♖f5 (67...d2 68.♔e3 ♖f5 69.♗d1 ♖d5 70.♔f4 ♔b2) 68.♗d1 ♖f1 69.♗h5 d2]

66.♔c4! Bodycheck! The opponent's king has to be prevented from protecting the pawn.

66...♔c2 67.♗e4+ d3 [67...♔d1 68.♗d3]

68.♔d4 ♖d1 69.♗f5 Now the black pieces are pinned to protecting the passed pawn. This is a typical defensive position.

69...♔b3 70.♙xd3 ♔b4 71.♔e3 ♔c3 72.♙f5 ♖e1+ 73.♔f4
 ♔d4 74.♔g5 ♔e5 75.♙c2 ♖c1 76.♙d3 ♖c3 77.♙b1 ♖g3+
 78.♔h6 ♔f6 79.♔h7 ♖g7+ 80.♔h8 ♖b7 81.♙c2 ♔f7
 82.♙d3 ♖b4 83.♙c2 ♖h4+ 84.♙h7 ♖g4 85.♙b1 ♖g8+
 86.♔h7 ♖g1 87.♙a2+ ♔f6 88.♙b3 ♖h1+ 89.♔g8 ♖b1
 1/2-1/2

(18) Nepomniachtchi, I.-Bogosavljevic, B.

World Youth Stars 1st, 2003

64.♔d5! Preventing Kc4-c5-d6 and threatening Kd6.

64...♖g7 65.♙f5 ♖e7 66.♙g6 [No difference makes 66.♔d6
 66...♖e8 67.♔d5]

66...♔d2 67.♔d6 ♖g7 68.♙f5 ♔e3 69.♔xe5 ♖a7 70.♙g6

♖a5+ 71.♔f6 ♔f4 72.♙h7 ♖a6+ 73.♔g7 ♔g5 74.♙g8 1/2-1/2

(19) Frois, A.-Rocha, S.

Loures2, 1996

Here is a correct and very instructive transposition into a drawn endgame.

68.♖xc5! ♙xc5 69.♔xc5 ♔b2 70.♔d6 ♖b5 71.♙d5! ♔c3
 72.♔xe5 ♖xd5+ 1/2-1/2

(20) Arakelian, A.-Kudrin, S.

Yerevan (open) , 1996

14.♙g7 ♖a3+ 15.♔e2 ♔e6 16.♙d4 ♔f5 17.♙b6 ♖b3 18.♙c5

♔e5 19.♙e7 ♖b7 20.♙h4? [Better, but not saving the game, was 20.♙c5]

20...♔d5 21.♙g1 ♖b1 22.♙f2 (22.♙e3 22...♖b2+ 23.♔e1 ♔c4; 22.♙a7 22...♖b2+ 23.♔e3 ♖b7!) 22...♖b2+ 23.♔e3 ♖b3+ 24.♔e2 ♖h3 25.♙b6 ♖h6 26.♙a7 ♖h2+ 27.♔e3 ♖b2 and suddenly the bishop is in trouble. Black is threatening to play Rb7! 28.♔f4 ♖b3 29.♙e3 ♖d3 30.♙b6 ♖f3+ 31.♔g4 ♔c4 The white king is cut off now and the black king comes to d3, so Black is easily winning.]

20...♔f4 0-1

(21) Portisch, L.-Ftacnik, L.

Wijk aan Zee , 1985

Absolutely flawless technique was demonstrated in this classic.

64.♖f7 ♔e8 65.♖b7 ♙e1 66.♔e5! In this type of position the king has to come to f5.

66...♙g3+ 67.♔f5 ♙h4 68.♖b4! ♙e1 69.♖e4 ♙f2 70.e7 ♙c5 71.♔e6 ♙xe7 72.♖a4 1-0

(22) Dreev, A.-Hracek, Z.

EU-ch U21, 1989

57.♙e6 There is no defence in this position. [57.♙d7 57...♖g2+ 58.♔f1 ♖g7 59.♙b5 ♖b7 60.♙a6 ♖b6 61.♙e2 ♖b1+ 62.♔g2 ♔c3]

57...♖g2+ 58.♔e1 e2! 59.♔d2 ♖g7! 60.♙h3 ♖e7 61.♔e1 ♔e3 62.♙f5 ♖f7 0-1

(23) Planinec, A.-Grigorian, K.

URS-YUG, 1965

Now we will see the starting position of this kind of endgame. Simple technique was demonstrated here.

61. ♖g5 ♘c8 62. ♔f4 [It is necessary to remember this classical drawn position here (which is possible a rank up or down)! 62. ♔e4 62... ♘b7+ 63. d5? ♔c5=]

62... ♘e6 [62... ♘b7 63. ♖g8 ♘h1 (It is necessary to remember the powerful tool of transposing into a winning pawn endgame. 63... ♘c6 64. ♖g6+ ♔d5 65. ♖xc6 ♔xc6 66. ♔e5 ♔d7 67. ♔d5) 64. ♖g6+ ♔d5 65. ♔e3 ♔c4 66. ♖g5 ♘d5 67. ♖e5 ♘h1 68. ♖c5+ and the king is cut off.]

63. ♖g6 [A cheap trick was 63. ♔e4 63... ♘f7 64. d5 ♔c5]

63... ♔d5 64. ♔e3 ♘c8

65. ♖g8 ♘b7 [65... ♘d7 66. ♖d8 ♔e6 67. ♔e4 ♘c6+ 68. d5+ ♔e7 69. ♖h8]

66. ♖d8+ ♔c6 [Or 66... ♔e6 67. ♔d3 ♘a6+ 68. ♔e4 ♘b7+ 69. d5+ ♔e7 70. ♖b8]

67. ♖b8 1-0

(24) Kjartansson, G.-Hammes, M.

Budapest FS07 GM, 2007

60. ♔b3? [60. c6+ 60... ♔xc6 61. ♖xe6+ ♔b5 62. ♔d3 ♘h4 63. ♖g6 ♘b2+ 64. ♔e4]

60... ♘xd4! 61. ♔xa4 ♔c6! 62. ♖xe6+ ♔xc5 63. ♖e8

63... ♔d5 64. e6 ♘f6! and there is no defence as White loses the pawn after Kd6 and Be7.

65.♔b5 ♕d6 66.♔c4 ♘e7 67.♔d4 ♕xe6 68.♔e4 ♕d6
69.♕f5 ♕d7 70.♖a8 ♕c6 71.♕e6 ♘b4 72.♖c8+ ♕b7 73.♖c1
♘a5 74.♕d5 ♘c7 75.♖c2 ♘d8 76.♕d6 ♘h4 77.♖b2+ ♕a8
78.♖b3 ♘f2 79.♕c7 ♘a7 80.♖b4 ♘f2 81.♖a4+ ♘a7 82.♕c6
♕b8 83.♖b4+ ♕a8 84.♖a4 ♕b8 85.♖h4 ♕a8 86.♖h8+
♘b8 87.♖d8 ♕a7 88.♖d7+ ♕a8 89.♕b5 ♘a7 90.♕a6 ♘b8
91.♖b7 ♘f4 92.♖f7 ♘g3 93.♕b6 ♘b8 94.♖f3 ♘a7+ 95.♕c6
♘b8 96.♖b3 ♘a7 97.♖a3 1/2-1/2

(25) Kavutskiy, K.-Wang, P.

Southern California-ch, 2010

79.♖b6? [It is necessary to bring the king as soon as possible! 79.♕c2 79...♘a1 (79...♘d4 80.♕d3 ♘g1 81.♖b1 ♘h2 82.♖e1 ♕e7 83.♕c4 ♘f4 84.♕d5) 80.♖a5 ♘d4 81.♕d3 ♘g1 82.♖e5 ♕e7 83.♕c4 Achieving this theoretical position, which demands another technique.]

79...♘e5! 80.♕d2 ♕e7 81.♕d3 ♘d6 The classical cutting maneuver is conducted and the pawn is lost. Draw!

82.♕e4 ♕xe6 1/2-1/2

(26) Mikhalevski, V.-Wiersma, E.

Dieren op, 1999

79...♖b3 80.♘h6 ♖a3 81.♘g7+ ♕d5 82.♘h6 e3! The simplest way. [82...g3 leads to a theoretical position. 83.fxf3 ♖xg3]

83.f3 [83.♘xe3 loses on the spot since after 83...♕e4 84.♘g5 ♖a2+ 85.♕e1 ♕f3 86.♘h4 ♖a1+ 87.♕d2 ♖f1 88.♘g3 ♖xf2+ Black transposes into a winning pawn endgame: 89.♘xf2 ♕xf2]

83...gxf3+?? [Demonstrating completely wrong knowledge of the theoretical position into which he transposed! Easily winning was 83...g3 84.♘xe3 ♖a1 85.f4 g2]

84.♕xf3 ♕d4 85.♘g5 ♖b3 86.♘h6 e2+ 1/2-1/2

Chess and the City. All is well that ends well

WGM Elisabeth Paehtz

Best rating: 2493

The worst tournament of my life finally came to an end. After performing my personal record of two "short castles" in a row, I could dare to say "even a blind hen sometimes finds a grain"! I even managed to find two grains and scored 2,5 points out of the 3 remaining games. Personally I could not say I was too unhappy with that experience however it was painful and sad at the same time. Losing or playing bad is something every chess player needs to face in their lives, but to return and change the fate was eventually a feeling of pride and respect to myself.

Our strongest IM from Germany Andreas Heimann - as well as likely the strongest IM from the Netherlands, Jorden van Foreest - both achieved their GM norms with 6,5/9. The latter therefore needed to score 3/3 out of his three last games, while his performance in the open probably therefore had to suffer a bit. Playing 18 games would not be my cup of tea, but true chess lovers or addicted ones may see that differently.

I can strongly recommend the tournament itself as it is organized in a very nice hotel with an even nicer "salt sea bath thermae", and not to forget an unbelievable caring group of

organizers who did their utmost to fulfill everyone's dreams and wishes.

My next tournaments will start in less than a month and until then I hope I can succeed to find back to my old shape.

Clash of the Titans

GM Kamil Miton
Best rating: 2655

1.e4 e5 2.♘f3 ♘c6 3.♘c3 g6!? The more solid option is [3...♘f6]

4.d4 Black immediately takes ground in the center. The alternative is [4.♗c4 4...♗g7 5.a3 d6 6.d3 ♘f6 7.h3 O-O 8.O-O+=]

4...exd4 5.♘d5!? White is playing for the initiative. [5.♘xd4 would also bring an advantage. 5...♗g7 6.♗e3 ♘f6 7.♖d2 O-O 8.O-O-O ♖e8 9.f3 followed by a typical attacking plan with g4-h4, like in the Dragon System.]

5...♗g7

6.♗g5 ♘ce7 The only move. Black prepares c6 to get rid of the unpleasant knight from d5. [6...♘ge7 7.♘xd4! With a nice tricky line after 7...♗xd4 8.♖xd4 ♘xd4 9.♘f6+ ♖f8 10.♗h6#]

7.e5 White still tries to keep the initiative and doesn't hurry with recapturing the pawn on d4. [7.♘xd4 7...c6 8.♘xe7 (8.♘c3∞) 8...♘xe7 9.♖d2 h6 10.♗h4 d5! 11.O-O-O O-O 12.exd5 g5 13.♗g3 ♖xd5⇐]

7...h6 is logical in order to solve the problem with the pin. [7...d6!? 8.♘f6+ ♖f8 9.♘xg8 (9.♖xd4 9...h6) 9...♖xg8 10.♖xd4 h6!? (10...♖e8 11.O-O-O ♘c6 12.♖a4→ dxe5? 13.♖d8!+→) 11.♗f6 ♗xf6 12.exf6 ♘c6 13.♖f4→ and the black king can be weak.]

8.♗xe7 ♘xe7 9.♖xd4 ♘xd5 [9...♘c6!? 10.♖f4 This is probably the best place for the queen. (10.♖e3 10...O-O⇐ followed by Re8 next.) 10...O-O 11.O-O-O d6 12.♘f6+ ♖h8⇐ and the white pieces lose coordination.]

10.♖xd5 Thanks to the pawn on e5 White has more space but on the other hand Black has the potentially strong bishop pair.

10...c6 [10...O-O!? 11.O-O-O d6 An interesting idea to play for the attack. 12.exd6 ♗e6 13.♖a5 (13.♖xb7 13...♖b8 14.dxc7 ♖xd1+) 13...♖f6 14.c3 cxd6 (14...b6!? 15.♖a4 c5 and the d-pawn should be lost.)]

11.♖d6 Now Black's main task is to develop the bishop from c8.

11...♗f8! Let's check some other possibilities: [11...♖a5+

12.c3 ♖d8 is an original idea. 13.♗c4 ♜e8 14.♗xf7 (14.O-O 14...♗xe5 15.♘xe5 ♜xe5 16.♜d2 d5 The king goes to c7, where it should be safe.) 14...♗xe5 15.♜xg6 (15.♘xe5 15...♜xe5+ 16.♜xe5 ♜xe5+ 17.♖f1 (17.♖d2 17...♜f5) 17...b6 (17...g5 18.h4 g4∞) 18.♗xg6 ♗a6+ 19.♖g1 ♜e2 20.♜b1 ♖c7 With good compensation.) 15...♗xc3+ 16.♖f1 ♜b5+ 17.♖g1 ♗xb2 (17...♜xb2 18.♜b1) 18.♜b1 ♜e7∞; 11...♜e7 12.O-O-O ♜xd6 13.♜xd6 (13.exd6 13...b5 14.a4 a6!∞ Preventing the bishop development to c4.) 13...♖e7 (13...b5 14.g3 With the idea Bh3-Rad1.) 14.♗c4 Bxe5 is not a threat. 14...♜e8 15.♜e1 ♖f8 16.♜e4!+- with the idea Rf4.]

12.♜d4! [12.♜d2 12...d5! This is why White put the queen on d4.]

12...♜b6! Without the queens Black's position will be safer.

13.O-O-O ♜xd4 14.♘xd4 [14.♜xd4 14...♗c5 15.♜d2∞]

14...d5! 15.exd6 [15.c4 White is trying to get an advantage thanks to his more active pieces. 15...♗g4 (15...dxc4 16.♗xc4 ♗c5 17.e6 fxe6 18.♘xe6 ♗xe6 19.♜he1!→) 16.f3 ♗d7 17.cxd5 cxd5 18.♘b5 White's idea is to play against the weak d5 pawn. (18.♗b5 18...♜c8+ 19.♖b1 ♗c5=) 18...♜c8+ 19.♖b1 ♗c5 (19...a6 20.♘c3 ♗e6 21.♘xd5 ♗xd5 22.♜xd5 ♜c5 23.♜xc5 ♗xc5 24.♗c4 ♖e7 25.♗d5±) 20.♜xd5 ♗e6 21.♘d6+ ♗xd6 22.♜xd6 ♖e7 It looks like Black will be in time with counterplay.]

15...♗xd6 16.♗c4 White's initiative is based on active pieces Black has a huge problem with his bishop on c8. [16.♘xc6?? 16...♗f4+]

16...O-O [16...♖e7 The idea to keep the king on f6 looks risky. 17.♜he1+ ♖f6 18.♘e6 (18.♜d3!?→) 18...♗xh2 (18...♗xe6 19.♜xd6 ♜ad8

20.♜xe6+! fxe6 21.♜xe6+ ♖f5 22.♜e7↑ White will grab a lot of pawns.) 19.♘c5 ♗f4+ 20.♖b1 ♗f5 21.♘xb7 ♜he8∞]

17.♜he1

17...♗g4! Black is losing time but provoking weaknesses which will help him to solve the problem with developing the light squared bishop in the future.

18.f3 ♗c8 [18...♗d7 19.♘e2!+- Controlling the f4 square!]

19.g3 ♗c5 20.♘b3 [20.♜e5 20...♗d6 (20...♗b6) 21.♘xc6 (21.♜e2!?) 21...♗xe5 22.♘xe5 ♖g7 and Black doesn't have enough compensation.]

20...♗b6 21.♘d2! White's idea is to bring the knight to d6. [21.♜e7 looks very logical. 21...♖g7! (21...♗d8 22.♜xf7! ♗g5+ 23.f4 ♜xf7 24.fxg5 ♗g4 25.♜f1+-) 22.♜d6

reverting Kf6. 22...♖b8! (22...♙d8 23.♖xd8 ♖xd8 24.♖xf7+ ♙h8 25.♘c5 With a huge initiative.) 23.♙d3 ♙g8 Preventing Rxc6. The white pieces look very active but I have no idea how to improve the position... 24.♙xg6 fxg6 25.♖xg6+ ♙h8 26.♖xh6+ ♙g8 27.♖g6+ ♙h8=]

21...♙h3 [21...♙f5 22.g4]

22.♘e4 [22.♖e7 is premature. 22...♖ab8 23.♘e4 ♖bd8! With unexpected counterplay over the first rank. 24.♖e1 (24.♘d6 24...♙c5 25.♙xf7+ ♙h8 and the white pieces lost coordination.) 24...♙c8 25.♘f6+ ♙g7 26.♘e8+ ♙g8=]

22...♙a5 23.c3 ♖ad8 24.♘d6 b5?! In my opinion there was no need for this weakening. [24...♖d7 25.♘e8!? (25.♘xf7 not works 25...♖dxf7 26.♖e7 ♙g7--)]

25.♙b3 ♖d7 [25...♙c7? 26.♘xf7 ♖xd1+ 27.♙xd1 ♖xf7 28.♖e7+--]

26.♘e8 ♖xd1+ 27.♙xd1 The knight on e8 paralyzes the rook and king but Black can easily solve this problem.

27...♙g2 [27...♙e6 leads to a draw. 28.♙xe6 ♖xe8 29.♙d7 ♖xe1+ 30.♙xe1 b4=]

28.♘f6+ ♙g7 29.♘e8+ ♙h8 Black is playing for a win.

30.♙c2! [30.f4 30...c5 With the idea c4 and White doesn't

have Bd5.]

30...♙xf3 31.♘d6

31...♙d5? A serious mistake. Black should keep the strong bishop pair! For example [31...♙g7 32.♖e7 ♙f6 33.♖xa7 ♙b6 With Bg1 next and Black has no problems.]

32.♙xd5 cxd5 33.♘xb5 [33.♖e7 also looks promising for White. 33...a6 (33...♙b6 34.♘xb5 ♙g1 35.h3 ♙g7 36.♘c7 ♖d8 37.♘e6+ ♙f6 38.♖xf7+ ♙xf7 39.♘xd8+ ♙f6 40.♙d3±) 34.♘xf7+ ♙g7 35.♘d6+ (35.♘e5+ 35...♙f6 36.♘c6 ♖c8--+) 35...♙f6 (35...♙g8 36.♖a7 ♖f2+ 37.♙b3 ♖xh2 38.♖xa6 ♙c7 39.♘xb5 ♙xg3 40.♖xg6+) 36.♖a7 ♙g5 37.♖xa6 ♙c7 38.♘xb5 ♙e5 With some hope to create counterplay on the kingside.]

33...♙b6 34.♙d3 Thanks to his more active king and the control over the e-file, White's advantage is clear.

34...♔g7 [34...f5!? Only active defense can give some practical chances. 35.♖e7 g5 (35...f4 36.gxf4 ♖xf4 37.♘xa7 ♖h4↗) 36.♘xa7 (36.♔e2 36...f4 37.gxf4 ♖xf4!↗) 36...f4 37.gxf4 gxf4 38.♘b5 (38.♔e2 38...f3+ 39.♔f1 ♖g8--+) 38...f3 39.♖e1 f2 40.♖f1 ♖f3+ 41.♔e2 ♖e3+ 42.♔d2 (42.♔xf2 42...♖xc3+) 42...♖h3 43.a4 ♖xh2 44.b4±]

35.b4 [35.♖e7 35...♔f6 36.♖d7 ♔e6 37.♖b7 ♕g1 38.h3 ♕f2 39.g4 ♔e5 40.♘xa7 (40.♔e2 With Kf3 next to prevent Kf4.) 40...♔f4 41.♘c6 ♔g3 42.a4 ♔xh3 43.a5 and it looks like White is faster.]

Editorial Preface

The 3rd Sinquefield Cup was won by Aronian, who played very solidly and deserved the clear first place with 6/9. Second placed was shared by 4 players: Carlsen, Giri, Nakamura and Vachier-Lagrave, all with 5/9. In the interview Carlsen was very unhappy about his result and the level of play, the same as Caruana who let slip away a lot of promising positions and "only" scored 3.5/9.

The very strong Abu Dhabi Open had 5 winners, all with 7 points. Best after tiebreak was Grandelius Nils, who admitted that it was his biggest success ever. Kravtsiv, Jobava, Areschenko and Rapport were the other co-winners.

The Spanish Champion is Vallejo Pons, who was the clear favorite for the title and had a start-finish victory.

Kasper Piorun won the Barcelona Open with the great score of 8.5/10 2nd-3rd places were shared by Edouard Romain and Daniel Vocaturo, both with 8/10.

In just a week from now, the FIDE World Cup will start in Baku. Most of the players are deep in the preparation because the pairings were already published. The next week is quite calm, but then the excitement will start.

For now we wish you a great weekend.

Two best games of the past week

(1) Caruana, Fabiano (2808)
- So, Wesley (2779) [A15]

3rd Sinquefeld Cup 2015(9.5),
2015.09.01

GM Arkadij Naiditsch
Best rating: 2737

It was clearly not the tournament of Caruana or So, as both players missed a lot of chances in the previous games and were ranked on the lower end of the crosstable. Anyhow, the game we are going to see is a very exciting one. From the opening Caruana managed to get a big attack on So's king and a huge advantage, but he missed the best continuation in the tactical calculations. The game then became very unclear and finally ended up in a draw.

1. ♘f3 ♘f6 2. c4 To guess Caruana's openings is a difficult task. Fabiano is very well-prepared and plays both 1.e4 and 1.d4.

2...b6 3.g3 c5 In the current position there are a lot of different move orders and many different positions depending on who wants to reach what...

4. ♗g2 The system with g3 and Bg2 is one of the most popular ones.

4...♗b7 5.O-O g6 [5...e6 is the other main possibility.]

6.d4 cxd4 7. ♖xd4 The line with Qxd4 is a very tricky one. White's idea is simple, to get the queen to h4 in a good moment and to play Bh6 followed by Ng5, with attack.

7...♗g7 8. ♘c3

8...d6 Of course all this has been played many times before.

9. ♗e3 ♘bd7 10. ♖ac1 ♖c8 Black is trying to delay the short castle to avoid Qh4-Bh6. In the current position after Qh4 Black always has h6.

11.b3 a6 12. ♖fd1 Now that Black doesn't have any more useful moves, So castles.

12...O-O 13. ♖h4 and of course Caruana is going for the main idea of the whole line.

13...♖e8 Very logical. In case White could exchange the dark squared bishops, White's position should be a bit better, so Black is preparing to play Bh8 after Bh6.

14. ♗h3! An excellent move with multiple ideas. First of all White is not afraid of Bxf3 exf3 which would just lead to a

better position for White. Now he can move the knight from f3 without exchanging the white squared bishops, which is good, and the rook on c8 is also sort of pinned.

14...♖c7 15.g4 and here comes Caruana! White's idea is simply to play g5 next.

15...♚a8 A very logical reply, even if the queen is out of play on a8, but now Black is prepared to answer g5 with Ne4.

16.♙d4 White wants to finally play g5 and exchange the bishops, which would weaken the position of the black king a lot. [In case of 16.g5 16...♞e4 17.♞a4 b5 things are looking very unclear.]

16...h6?! Here I have to disagree with So. This move just looks too dangerous to me. [16...b5!? Maybe Black could have tried to complicate things after 17.g5 ♞h5 18.♙xg7 ♞xg7 but maybe even here White can keep some advantage by playing 19.♞d5 ♙xd5 20.cxd5 and it is still not that simple to achieve equality for Black.; Black is almost losing after 16...♙xf3? 17.exf3 ♚xf3 18.g5 ♞h5 19.♞d5 with very strong play for the pawn.]

17.g5 Of course there is no reason to hesitate about playing g5.

17...hxg5 18.♞xg5 Now Black must always be careful about

the h7 square. This is a very unpleasant position in a practical game.

18...e6 After this move White gets a clear target, the d6 pawn, but Black was clearly very afraid of the upcoming Nd5 move. [In case of a passive move like 18...♚d8 19.♞d5 ♙xd5 20.cxd5 White's position is clearly much better.]

19.♙e3! Great play by White! The d6 pawn is in serious trouble.

19...♚b8 20.♙f4 Another good move by White. [A big mistake would be 20.♖xd6? 20...♖xc4 21.♚xc4 ♙xd6 and Black is fine.]

20...♙f8? This is just a blunder... [The only way to go on was 20...e5 21.♙e3 ♙f8 with a bad position.]

21.♖xd6? and White gives back the present... [Of course Caruana saw 21.♙xd6 21...♙xd6 22.♖xd6 ♖xc4 23.bxc4 ♙xd6 but here he clearly missed the winning move

24.♚h8+! A very nice combination! 24...♚xh8 25.♞xf7+ ♙g7 26.♞xd6 With a winning endgame for White.]

21...e5 Now the position is really complex.

22.♖xd7 exf4 The threats around the black king are still not gone, but a little less dangerous.

23. ♖cd1 Caruana wants to keep the d-file for himself.

23... ♗g7? Another mistake... [Much stronger was 23... ♔g7! with the idea of moving the bishop from f8 and playing Rh8.]

24. ♖7d3?! Caruana missed two much stronger options: [White could have gone for the very complicated 24. ♘xf7 24... ♖xd7 25. ♗xd7 ♔xf7 26. ♗xe8+ ♔xe8 27. ♗g5 ♔f7 28. ♖d4 with a clearly better position, even if things are not that clear here from a practical point of view.; Much simpler was 24. ♖7d6 24... ♗a8 25. ♗xf4 Why not just win a full pawn?! White is clearly better here.]

24... ♖ce7 and although White is still a pawn up, things are very unclear in this position.

25. ♗g2 Very logical. The exchange of bishops will help White to gain control of the white squares and the bishop on h3 has done his job.

25... ♗xg2 26. ♔xg2

26... ♘h5! So is back in the game.

27. ♘d5 Caruana finds nothing better than to give up the e2 pawn, which is actually not a bad decision at all.

27... ♖xe2 28. ♗g4 The white queen is going to take place on f3, which is a nice square for the queen.

28... ♖d6 29. ♗f3 ♗c5 30. ♖3d2 As we can see, the position is really complicated and hard to play for both players.

30... ♖2e5 A good choice. Black wants to control the e-file and then the exchange of rooks would make things easier for White.

31. h4 b5 In case the knight on d5 could be chased away, Black would already be better!

32. ♖c2 The pawn on c4 has to be defended.

32... b4 33. ♖cd2 Both players were already in time trouble.

33... a5 34. ♗g4 Caruana just keeps on waiting.

34... ♗h6 35. ♔f1 Both players are trying to make solid moves.

35... ♖f5 I think this is not the most logical. [Why not simply play 35... ♗xg5 36. hxg5 ♖f5 with the easy threat of playing Re5 next. The g5 pawn could be in danger.]

36. ♘f3 Now the rook on f5 is sort isolated.

36... ♗g7 37. ♗g2 A slightly strange move in my opinion, but White probably just wanted to make a safe move without changing much before the 40th move.

37... a4 38. ♖d3 ♗a5 Black is trying to annoy White a bit with the idea of playing axb3 axb3 and Qa3 somewhere.

39. ♘g5 axb3 40. axb3 ♙f8 So the time trouble is over and it is time to think things over.

41. ♚f3 The queen clearly belongs to f3.

41... ♙c5 42. ♘e4 The knight is well-placed on e4 too.

42... ♚g7 Black keeps on waiting.

43. ♘xc5 and Caruana finds nothing better than to exchange the knight. After this move we should evaluate the position as equal. Black just wanted to play Rfe5 and back to controlling the e-file, which gives him enough counterplay.

43... ♚xc5 44. ♖d4 Can White win the the f4 pawn?!

44... ♚h6 Black just keeps on waiting...

45. ♚d3 [Of course White cannot play 45. ♘xf4?? 45... ♚e5 since the knight on f4 is just gone.]

45... ♚h7 46. ♚f3 ♖e6 Could it be that So decided to play for a win?! Well maybe, but maybe he just liked the position of the black rook better on e6 than on e8.

47. ♚g1 ♚a5 48. ♚g2 Now it is Caruana who keeps on doing "nothing".

48... ♚h6 49. ♖1d3 ♚d8

50. ♚g4 and because both players showed no ideas of how to

improve their position, the game ended with a draw offer. We just saw a very interesting game where White clearly missed a lot of very promising chances. **1/2-1/2**

**(2) So, Wesley (2779)
- Nakamura, Hikaru (2814) [E99]**3rd Sinquefeld Cup 2015(6.4),
2015.08.29GM Csaba Balogh
Best rating: 2672

A brilliant attacking game by Nakamura! We don't often see a top GM getting mated with the king on g6 whilst all pieces are still on the board.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♗g7 The King's Indian defense! A clear sign that Nakamura wants to win this game, despite having the black pieces.

4.e4 d6 5.♘f3 O-O 6.♗e2 e5 7.O-O ♘c6 8.d5 ♘e7 The initial position of the classical main line. White has a wide range of choice here, all of them with huge theory. His plans are mainly connected to the queenside, while Black soon launches an attack on the kingside with f5.

9.♘e1 The old main line. White drives his knight to d3 from where it supports the queenside break with c5 and also allows to stabilize the center with f3 against the f5 plans. [9.b4 recently became the most common line.]

9...♘d7 10.f3 By starting with the 10.f3 or 10.Be3 move order (in comparison to 10.Nd3), White successfully transfers his bishop to the g1-a7 diagonal, from where it increases pressure on the queenside and also vacates the c1 square for the heavy pieces.

10...f5 11.♗e3 f4 12.♗f2 g5 A typical King's Indian game. White soon executes the c5 break, while Black focuses all his pieces to the kingside for an attack. There are still thousands of games in the databases for this position.

13.♘d3 [Wesley So had a game last year for 13.♖c1 and; he also tried 13.g4 which is another strategy. White tries to lock the kingside first (possibly with h4-h5) before continuing the queenside actions. Nakamura was definitely prepared against all ideas.]

13...♘g6 14.c5 ♘f6 The black pieces are going towards the kingside. He soon prepares for the break with g4.

15.♖c1 ♖f7! A standard multifunctional move in the King's Indian. Black protects the critical c7 square against the cxd6 cxd6 Nb5 idea and at the same time he prepares to strengthen his kingside attack by transferring his rook to g7 (after Bh6).

16.♔h1 h5 17.cxd6 cxd6 18.♘b5 We can see now the point of 15. ..Rf7! White would threaten with Nc7 and the a7 pawn is hanging, as well as the positional threat of installing the knight to e6 after which Black's attack has much less potentials.

18...a6 19.♘a3

19...b5! We are still following theory, but Black's last move is instructive anyway. The question was to weaken the c6 square or to allow Nc4-b6?! The key idea is that Black needs his light squared bishop for a succesfull attack. First of all it supports g4 and secondly without the bishop White could defend perfectly with g4-Bg1-g3-h3, however with the bishop on c8, Black always has the sacrifices on h3 at his disposal. Therefore it becomes clear that giving up the c6 square has smaller value than allowing the knight to jump to b6.

20.♖c6 White would like to lure the bishop to b7, because the bishop clearly belongs to the c8-h3 diagonal. Bd7 does not work because of the d6 pawn and White wants to triple on the c-file with Qc2 and Rc1.

20...g4 21.♔c2 ♕f8! Another strong positional move! White was ready to bring his rook to c1 and suddenly Black cannot do anything with his bishop on c8! However now after Qf8, he can play Bd7 as the d6 pawn is already defended.

22.♖c1 ♕d7 23.♖c7 ♕h6 [Another possible plan was 23...h4!? just like in the game. Black wants to push h3 and g3, destroying the kingside structure. The concrete question is 24.fxg4 That is also the reason why Nakamura started with 23...Bh6, to push f3 now. 24...♗xe4 25.♕f3 ♗g5 If White could consolidate the e4 square with his knight or somehow use the

c2-g6 diagonal with his queen, he could be more than fine, but the d3 knight is standing poorly. Black seems to be doing well.]

24.♕e1 h4! This is the right way to continue the attack! Black wants to explode the kingside with h3! If he had started with g3, then White would have played h3 followed by Bf1, strengthening all the pawns on the kingside.

25.fxg4 [25.♕b4 25...h3! 26.gxh3 g3! This looks like the most effective way to open the lines in front of the king. Bxh3 and Nh4 are coming next. 27.♕f1 a5 Black has to send the bishop away from b4, because the direct Nh4 runs into Nxe5. 28.♕e1 ♗h4→; 25.♗b4 is also met by 25...h3! 26.gxh3 g3! Nh4 is coming next combined with Bxh3 and it looks extremely dangerous from White's point of view.]

25...f3! [25...♗xg4? loses to 26.♖xd7; 25...♕xg4 allows exchanges, which helps White to survive the attack and positionally he is better on the queenside. 26.♖xf7 ♕xf7 27.♕xg4 ♗xg4 28.♕c7]

26.gxf3

26...♗xe4!! Nakamura had correctly foreseen this move and its consequences two moves earlier, when he started to sacrifice his pawns. The concrete line shows that the attack is extremely strong and White is probably in deep trouble. The

threat is Rxf3, completely destroying the defenders around the king. [26...♙xc1? 27.♚xc1 would let the initiative pass to White! Black needs the King's Indian bishop to break through with the attack, while the rook is not doing anything temporarily on c1.]

27.♖d1 [27.fxe4 is similar to the game. 27...♖f1+! 28.♙g2

28...♙e3!! This is the key move just like it happened later in the game! Black threatens with mate after h3 or Rg1! 29.♙xf1 h3+! 30.♙g3 ♚xf1 and White has no adequate defense against the mate! Bf4 is the direct mate threat, but Black also could play Rf8 next. 31.♖xd7 ♙f4+ 32.♘xf4 exf4# Unusual mate!; 27.♖xd7 is also met by 27...♖xf3! 28.♙xf3 ♚xf3+ 29.♚g2 (29.♙g1 29...h3—+ Be3 comes next and after anything moves to f2, there is mate on g2!) 29...♚xd3—+ The c1 rook is hanging and Nf4 or h3 is coming next.]

27...♖xf3! Nakamura calculates correctly! It is easy to feel that with so many pieces around the king the attack should break through!

28.♖xd7 [28.♙xf3 28...♚xf3+ 29.♙g1 h3!—+ Just like in the 27.Rxd7 line, Be3 is coming next, followed by mate on g2!]

28...♖f1+! **29.♙g2 ♙e3!** [29...h3+! was even stronger according to the computers, having in mind the following amazing mate: 30.♙xh3

30...♖f2!! 31.♙xf2 ♚xf2!! 32.♘xf2 (32.♖f1 32...♘g5#) 32...♘f4+ 33.♙h4 ♙g5#

It would have been shocking to finish the game like this!]

30.♙g3 [30.♙xf1 leads to forced mate after 30...h3+ 31.♙xh3 ♚f3+ 32.♙g3 ♘g5#]

30...hxc3! Nakamura leads the attack precisely! He frees the h4 square for the knight! White cannot create any counterplay against the g8 king and he is lacking coordination between his pieces to organize any kind of defense.

31.♖xf1 ♜h4+ 32.♔h3 [32.♔h1 32...g2#]

32...♚h6! White cannot unpin himself on the h-file! It is clear that the story should soon end in mate!

33.g5 [On 33.hxc3 the fastest mate is 33...♜g5+ 34.♔h2 ♜hf3+ 35.♔g2 ♚h2#]

33...♜xg5+ 34.♔g4

34...♜hf3! Another great sacrifice! Black threatens with Qh3 mate in one move and also to further haunt the king with Qh4!

35.♜f2 [35.♜xf3 35...♚h3#]

35...♚h4+ 36.♔f5 ♜f8+ 37.♔g6

Well, of course Black has many good moves against such king on g6, but Nakamura finishes the game in style!

37...♜f6+! 38.♔xf6 ♜e4+ 39.♔g6 [39.♔f5 could have prolonged the game by a move: 39...♚f4+ 40.♔e6 ♚f6#]

39...♚g5# WOW! 0-1

Young & Talented

GM Etienne Bacrot

Best rating: 2749

(3) Rapport, Richard (2671)
- Sandipan, Chanda (2585) [C02]

Abu Dhabi(5),
 2015.08.26

The 19-year old Richard Rapport is 3rd on the Junior FIDE list. He is having a difficult chess year but it seems like he is coming back, as he shared first place in the strong Abu Dhabi open.

1.♖f3 e6 2.e4 d5 3.e5 c5 4.c3 ♘c6 5.d4 An unusual move order to get the French advance.

5...♙d7 6.♙e2 cxd4 Not the most popular but quite a sound way to play.

7.cxd4 ♘ge7 8.♘c3 ♘f5 9.O-O ♚c8 A good move. Chanda knows this position well. [9...♙e7 10.♙d3! g6 (10...♘fxd4 is not possible: 11.♘xd4 ♘xd4 12.♚g4!±) 11.♙xf5 gxf5 12.♙f4+= ♘a5 13.b3 ♚c8 14.♚c1 ♚g8 15.♚d2 b5 16.♘e2 followed by the knight march to h5, which gave White a huge advantage in Sandipan-Belezky Bundesliga 2014.]

10.a3 a6 Another useful slow move. 10...Qb6 11.Na4 or 10...Be7 11. Bd3 is better for White.

11.♚b1 An interesting novelty, provoking the queen to go to b6 before playing Be3. [11.♙e3 11...♙e7 12.♙d3 ♘xe3 13.fxe3 O-O is the usual way to play and Black goes f5 next, with an unclear position.]

11...h6 I don't really like this move because it weakens the white squares around the future logical place of the king. [11...♚b6 is the main move. 12.♙e3 (12.♘a4 12...♚a7!∞ The square was cleared by 10...a6!) 12...♙e7 13.♙d3 ♘xe3 14.fxe3∞ and one of Rapport's ideas behind 11.Rb1 might be 14...O-O 15.♘a4!? ♚a7 16.♘c5 ♙xc5 17.♙xh7+ ♚h8 18.♙c2]

12.♙h1 Same strategy!

12...b5 [12...♚b6 is even met by 13.g4! ♘fxd4? 14.♙e3+–]

13.♙e3 Enough prophylaxis, it is time to play!

13...♘a5 [13...♙e7 14.♙d3 ♘xe3 15.fxe3 O-O 16.♚e2 f5 17.exf6 ♚xf6 18.e4 looks slightly better for White.]

14.♙d3 g6? This is very strange. Black was forced to take the bishop: [14...♘xe3 15.fxe3 ♙xa3 (15...♙e7 is also playable.) 16.♚e1 (16.♘xd5 16...exd5 17.bxa3 ♘c4∞) 16...♙b4 17.♚g3 O-O 18.♘e2 with compensation.]

15.♙c1! The best move, but even 15.Bxf5 should be better for White.

15...♖h4

16.♗e1+= Since there is no more pressure on d4, White regroups before pushing with his space advantage.

16...♗c4 17.♗e2 ♗f5 [17...a5 followed by a4 to save the c4 square for the knight was a better idea.]

18.♗c2 ♗a5 doesn't look great, but b3 was coming anyway.

19.♗d2 ♗c6 20.b4 White took control over the entire board.

20...♚h4 21.♗e1 h5 22.f3 ♚d8 23.g3

23...g5 Black cannot wait. A move like [23...f6 might give practical chances: 24.f4 (24.g4 24...hxg4 25.fxg4 fxe5 26.gxf5 gxf5 27.dxe5 ♗xe5 28.♗g3+=) 24...♗g7 25.♗f2 O-O+= White has a nice choice between two knight transfers: Nc1-b3-c5 or Ne1-f3.]

24.g4 ♗g7 [24...♗h4 25.♗g3±]

25.♗g3 f5! is the crazy idea behind 23....g5!

26.♗d2 [26.gxf5 26...exf5 (26...♗xf5 27.♗xf5 exf5 28.♚e2 ♗e6 29.a4±) 27.f4 h4 28.♗e2 g4 29.♗e3 ♗e6 is better for White, but with a fighting position.]

26...h4? The losing move. Now Black can't close the kingside. It was necessary to play [26...f4! 27.♗xh5 (27.♗e2 27...♚f7 is more pleasant for White but playable.) 27...♗xh5 28.♗g6+ (28.gxh5 28...♗e7∞ followed by Kf8-Be8.) 28...♚e7 29.♗xh5 ♗e8 30.♗xe8 ♚xe8+= Black invested a pawn but got rid of the bad pieces and closed the kingside. A long fight is ahead.]

27.♗e2 ♗e7 [27...f4 is not possible because of 28.♗g6+ ♚e7 29.♗xf4+-]

28.f4! +- The position becomes open and White's light pieces clearly surpass their counterparts. The black king is also in big trouble.

28...fxg4 is obviously not the best defense but it is already too late anyway.

29.♗g6+ ♚f8 30.fxg5+ ♗f5 31.♗f4 ♚g7 32.♚xg4 ♗xe5 33.dxe5 ♚xc2 34.♗xe6+ ♗xe6 35.♗xf5 ♚xd2 36.♗xe6 ♚f8 37.♚h5 and fast mate is unavoidable. 1-0

Endgame section

(14) Carlsen, Magnus (2853)
- Nakamura, Hikaru (2814)

Sinquefield Cup,
2015.08.31

GM Csaba Balogh
Best rating: 2672

We are facing an amazing mistake by the World Champion. Black is more or less fine materially, but the power of the two bishops in such endgames should give White a technically winning position. However- as is typical in many kind of endgames- the attacking side needs some extra material to be able to create new weaknesses and let the two bishops work with full power and automatically decide the outcome. All the circumstances are given in the present case as White's rook will be able to cooperate with the bishops. However Carlsen makes a horrible positional mistake which allows Nakamura to trade a pair of rooks.

39. ♖e3?? Carlsen obviously knew that he needed the rooks for the win, but some kind of chess blindness deprived him from seeing Black's easy next move... [Any other moves, for

instance **39. ♖a4** followed by **Be3** and the rook penetration on the b-file should give White a winning advantage. He could also improve his pawn structure with **h4-g3** before making progress. Black should collapse fairly soon.]

39... ♜b8! Black moves into the pin, but there is no check which could win the rook. White has nothing better than simplifying the position with

40. ♖c4 ♜xb2 41. ♖xd5+ ♔h8 We have reached another interesting endgame to think about. The a-pawn is not advanced far enough and White can block it with precise play, but the question is rather if he has enough material left on the board to win the game?!

42. ♖d4 ♜b1 43. ♔e2 The king must hurry towards the queenside to stop the passed pawn.

43... a4 44. g3 a3 45. ♔d2 We can see how strong the two bishops are. They control all the important squares, but the problem is how to make progress?!

45... h5 46. h4 ♔h7 Black improves his structure and rescues his king from its squeezed situation in the corner.

47. ♖c4 g6 48. ♔c2 ♜e1 Black always has some kind of tactical idea in mind. As long as the bishop was on d5, he was always keeping an eye on the d1 square to penetrate with his rook.

Now with the bishop on c4 Re4 is in the air. For instance 49.Kb3 is a blunder in view of a2! 50.Ka2 Re4! As long as Black ties the pieces to the a-pawn, he tries to get rid of some pawns on the kingside with f4.

49.Ke3 White avoids this Re4 idea and seemingly prevents f4! However

49...f4! still works and it forces further simplifications!

50.Ke4 [50.gxf4 50...Kh1 is not what White wants.]

50...a2 51.Kea2 Re2+ 52.Kb3 Rxf2 The danger of the a-pawn is gone, but Black successfully traded his f-pawn, further reducing the material. He has only one weakness/target left, the pawn on g6, but he can easily ensure its safety with the king and rook.

53.Ke1 Re2 54.Kc4 Kg7 55.Kd5 Re1 56.Kc2 Re2 57.Kd3 Re1 58.Ke4 White has all the time to try and improve his position, but in the critical situation when he is already close to the g6 pawn, he will be unable to make progress.

58...Rd1+ 59.Ke5 Re1 60.Kd2 Re2 61.Kc3 Kh6 62.Kb4 Rf2 Black only needs to care about his g6 pawn. Pinning or attacking one of the bishops, attacking the g3 pawn or simply preventing the king's movement to f6 are all possible defenses.

63.Kc5 Rf1 64.Kb4 Rf2 65.Ke7 Rf1 66.Kf6 Rg1 67.Kg5+ Kg7 68.Kf4 Re1 Black has a very easy defensive task. Carlsen tries everything, but his advantage is not enough to win.

69.Kd5 Rd1+ 70.Ke6 Re1 71.Ke5 Re2 72.Kd5 Re1 73.Kd3 Kh7 74.Kd4 Kg7 75.Ke3 Ra1 76.Ke4 Ra4+ 77.Kf3 Ra3 78.Kb5 Rb3 79.Ke8 Rb1 80.Kc6 Rb4 81.Kd2 Rb6 82.Kc3+ Kh6 83.Kd5 Rb1 84.Kf4 Rf1+ 85.Ke5 Rg1 86.Kd2+ Kg7 87.Kf4 Re1+ 88.Kd6 [88.Ke4 We have already seen this position 20 moves ago and he could not make progress anyway. The text move however allows Black to activate his king and force further simplifications.]

88...Kf6 89.Kf3 Kf5 90.Kd5 Rf1 91.Ke4+ Kg4! Nakamura calculates the forced draw, otherwise he could also have gone back to f6 and hold the fortress.

92. ♖xg6

92... ♖xf4! 93. gxf4 ♔xf4! and White cannot save his h4 pawn.

94. ♖xh5 ♔g3 95. ♖d1 ♔xh4 1/2-1/2

(15) Nakamura, Hikaru (2814)
- Grischuk, Alexander (2771)

3rd Sinquefeld Cup 2015(9.4),
2015.09.01

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round and Nakamura really needs a full point to share 2nd place. After a very fighting game where Grischuk also had his chances, we are in an endgame which is clearly much better for White. The e7 pawn is very dangerous and the black pieces are very passively placed. During the next moves, we will see a beautiful realization by Nakamura, with a very nice final position where Black simply doesn't have any moves left to make!

63. ♖g3! A very strong move. The bishop will cut the options of the black knight on e8 and at the same time White wants to put his rook on f8 to stop the black rook from moving as well.

63...h6 Black is preparing to put the king on h7 to defend from Rf8.

64. ♖e5+ ♔h7 65. ♖f7+ Winning a tempo. The white rook belongs to f8 anyway.

65...♔g6 66.♚f8 ♔h7 So White has reached almost everything he could, but what next?! If it wasn't for the a6 pawn, a move like Kh4 would just finish the game, but for now White needs an idea about how to continue next.

67.♘f4! Nakamura manages his winning position very precisely. White is going for all the black pawns.

67...a5 68.♘xh6 One pawn is gone.

68...a4 69.♘e3 a3 70.♘xc5 And another one...

70...a2 71.♘d4 It is now already White who is a pawn up and Black still can't do anything.

71...♞c7 72.♘a1 ♞e8 All Black can do is to move his knight to c7 and back to e8.

73.c5 ♞c7 74.c6 ♞e8 White has improved the position of the pawn, but how to finish the game?!

75.♔h4! Just beautiful! The last white piece which was out of the game is getting the decisive role.

75...♞c7 76.♔h5 Rf7 is a deadly threat and Black has no defense.

76...♞e8 77.c7 A very beautiful finishing position of an exciting game. With this win Nakamura also got back to the 2nd live rating position in the world. **1-0**

Golden knowledge. Rook and pawn against bishop - part II

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

(16) Ravnik, F.-Znidaric, A.

Slovenija, 2011

The young generation knows some theoretical positions, but not all!

95.c7?? The same mistake as in the Tomashevsky game!

95...♔b7! 96.♔c5 ♕xc7 97.♔b5 ♔b8 98.♔c6 ♕h2 99.♖b7+

99...♔c8?? It is not sufficient to know that a certain position is draw- it is necessary to know how to do it! The king in the white corner was an easy theoretical draw here.

100.♖h7 ♕e5 101.♖e7 ♕f6 102.♖e8+ ♕d8 103.♖g8 1-0

(17) Doroshkevich, V.-Taimanov, M.

Rostov, 1971

A completely different story happened in this classical game. This pawn is an important theoretical draw and is frequently seen in practice. Black tried his last chance...

1...c2 and White resigned! But a similar maneuver as in the previous game,

2.♔d2 ♚b3 3.♙g6 was an easy draw! 0-1

(18) De Firmian, N.-Georgiev, K.

Nis, 1981

Some experienced Grandmasters demonstrated bad knowledge of handling this drawn position!

53...♙b6? [Correct was the simple 53...♙d6 54.♔d5 ♙f4 55.c7 ♚b7!]=]

54.♔d5 ♙f2 55.♖g7 ♙e3 56.♔e5 ♙c5?? [The correct position for the bishop was 56...♙d2 57.c7 ♚b7 58.♔d5 ♙f4]

57.c7! +- ♙b4 58.♖f7 ♙a5 [58...♔b7 did not help since after

59.♔e6 ♔c8 60.♖h7 ♙a3 61.♔d5 ♔b7 62.♖h3 ♙e7 63.♔e6 the king comes to d7.]

59.♔d6 ♔b7 60.♖g7 ♙b6 61.c8=♚+ and Black resigned in view of

61...♔xc8 62.♔c6 ♙a5 63.♖g8+ ♙d8 64.♖e8 1-0

(19) Szabo, L.-Botvinnik, M.

Budapest, 1952

Now let us see how this positional draw is used in practice, even in top games.

1.d4 e6 2.c4 f5 3.g3 ♘f6 4.♙g2 ♙e7 5.♘f3 d5 6.O-O O-O 7.b3 c6 8.♙a3 ♘bd7 9.♚c1 ♘e4 10.♘bd2 ♙xa3 11.♚xa3 b6 12.♖ac1 ♙b7 13.♖fd1 ♚f6 14.cxd5 exd5 15.♘e1 a5 16.♘df3 f4 17.♘d3 fxg3 18.hxg3 ♖ae8 19.♖c2 ♚h6 20.♚c1 ♚d6 21.♙h3 ♖f6 22.♔g2 c5 23.♙xd7 ♚xd7 24.♘fe5 ♚d6 25.f4 cxd4 26.♖c7 ♘c5 27.♖xc5 bxc5 28.♚xc5 ♚xc5 29.♘xc5 ♙a8 30.♖xd4 ♖c8 31.♘cd3 ♖c2 32.♖a4 ♖xe2+ 33.♔f3 ♖c2 34.♖xa5 ♖f8 35.♔e3 d4+ 36.♔xd4 ♖d8+ 37.♔e3 ♖g2 38.g4 ♖c2 39.b4 ♙d5 40.a4 ♙h1 41.♖a7 ♖a2 42.b5 ♖a3 43.a5 g5 44.f5 ♖d5 45.♖e7 ♖xb5 46.f6 ♖xe5+ 47.♖xe5 ♔f7

Now Botvinnik goes for a forced line to reach the theoretical

position:

48.♖f5 ♘b7 49.♔d2 ♘c8 50.♞e5+ ♔f8 51.♞xg5 ♜xa5
52.♞d7+ ♘xd7 53.♞xa5 ♘xg4 54.♔e3 ♘e6 The desired
position is finally reached and the h7 pawn is not important.

55.♔f4 ♘c4 56.♞a7 h5 57.♔g5 h4 58.♔xh4 ♘b3 59.♔g5
♘c4 60.♞c7 ♘a2 61.♞c1 ♘d5 62.♔f5 ♔f7 63.♔e5 ♘b3
64.♞c7+ ♔f8 65.♞b7 ♘c4 66.♞b4 ♘a2 67.♔f5 ♘d5 68.♔g6
♘f7+ 69.♔g5 ♘d5 70.♞h4 ♘b3 71.♞h8+ ♔f7 72.♞h7+ ♔f8
73.f7 ♔e7 74.♔g6 ♘c4 75.♞g7 ♘b3 76.f8=♞+ ♔xf8 77.♔f6
♔e8 78.♞e7+ ♔d8 1/2-1/2

(20) Timoshenko, G.-Rogozenko, D.

Cappelle la Grande , 1998

When the pawn did not reach the sixth rank, the win is very simple as the king comes to the sixth rank himself!

63.♞h3 ♔c8 64.♔c6 ♔b8 65.♞h8+ ♔a7 66.♞h7+ ♔b8
67.♔b6 ♔c8 68.♞h8+ 1-0

(21) Dao, Thien Hai-Rohl Montes, J.

Elista ol (Men), 1998

Now it is the other bishop and the position has to be winning without problems too. But even strong players are not able to win such positions.

87.♘b6 ♜a6 88.♘g1 ♜a2+ 89.♔c3 ♜a3+ 90.♔c2 c3?
remature... Not the first time, not the last one...

91. ♖d3! ♜a1 92. ♙e3 ♜e1 93. ♙b6 ♜c1 94. ♙e3 ♜e1 95. ♙b6 ♜b1 96. ♙a5 ♜b3 97. ♙xc3 ♜a3 98. ♖d2 ♖c4 99. ♙g7 and it is time to agree a draw. 1/2-1/2

(22) Okhotnik, V.-Cvetkovic, Sr

Satu Mare , 1985

Now we can show the correct technique.

2... ♜c5 3. ♙g8 [3. ♙b3 3... ♖e4+; 3. ♙f3 3... ♜c2+ 4. ♙e2 ♖e4+; 3. ♙b7 3... ♜c2+ 4. ♖f3 ♜c3+ 5. ♖f2 ♖g4+; 3. ♙f7!]

3... ♜c8 [Simpler was 3... ♜c2+! 4. ♖f3 ♜c3+ 5. ♖f2 f3! 6. ♖g3 ♖e4 7. ♙f7 f2+ 8. ♖g2 ♖e3]

4. ♙d5 ♜d8 5. ♙f7 ♜d7

6. ♙h5 [White has so many options here, but every one of them is losing: 6. ♙g8 6... ♖e4+; 6. ♙c4 6... ♖e4+; 6. ♙b3 6... ♜d2+; 6. ♙a2!? 6... ♖e5! (6... ♜d2+ 7. ♖f3 ♜xa2?) 7. ♙b1 (7. ♙g8 7... ♖e4+; 7. ♙c4 7... ♖e4+; 7. ♙b3 7... ♜d2+; 7. ♖f3 7... ♜d3+; 7... ♜d6! 8. ♖f3 (8. ♙h7 8... ♜h6! 9. ♙b1 ♜b6 10. ♙h7 ♜b2+ 11. ♖f3 ♜b3+ 12. ♖f2 f3! 13. ♖g3 ♜b7+) 8... ♜h6! 9. ♖f2 ♜b6 10. ♙h7 ♜b2+ 11. ♖f3 ♜b3+ 12. ♖f2 f3! 13. ♖g3 ♜b7 14. ♙c2 (14. ♙d3 14... ♖d4 / Ke3+) 14... f2! (14... ♜f7! 15. ♖f2 ♖f4 16. ♙d1 ♖g4 17. ♙c2 ♜b7+) 15. ♖g2 ♖f4 / Ke3+]

6... ♜h7 7. ♙d1 [7. ♙e8 7... ♖g4+]

7... ♜h2+ 8. ♖f3 ♜a2 9. ♙c2+! Trying a stalemate chance. [9. ♙e2 9... ♜a3+ 10. ♖f2 ♖e4+]

9... ♖g5 10. ♙d1 ♜a3+ 11. ♖f2

11... ♖h4!! 12. ♙e2 [12. ♖g2 12... ♜d3! Controlling the d-file. 13. ♙a4 ♖g4+]

12... ♜a2 13. ♖f3 ♜xe2! Now it is time to transfer into a pawn ending, according to Capablanca's rule.

14. ♖xe2 ♖g3 0-1

(23) Miladinovic, I.-Beliaevsky, A.

Ohrid, 2001

But when there are multiple choices, even great players sometimes mix up winning and drawish positions. Knowledge of precise theoretical positions is the key instrument for all players.

1...gxf3? [Correct was 1...Rxf3+ 2. Kg2 Rxd3 3. Qc7 (3. Qf8 3...g3 4. Qh3 Qf4) 3...Qg5! As in previous examples, the right position of the king just wins! 4. Qe5 (4. Qg3 4...Rd2+ 5. Qf1 Qf5 / Ke4)

4...Rd5! 5. Qc7 (5. Qc3 5...Qf4; 5. Qg7 5...Rd2+ 6. Qg3 Rxd3+ 7. Qg2 g3! / Kg4) 5...Rd2+ 6. Qg3 Rxd3+ 7. Qg2 Qh4 8. Qa5 g3]

2. Qc5 Qe4 3. Qf2 Rxc3 4. Qa7 Rxc2+ 5. Qf1 Rxc6 6. Qf2 1/2-1/2

(24) Beliaevsky, A.-Haba, P.

Koszalin, 1998

It is very strange that such a great player decided correctly a few years before this game!

65. Rxf6 [After 65.gxf6+? the game is just a draw: 65...Qf7 66. Qg5 Qb3 67. Rb4 Qd5 68. Rb5 Qc4 69. Rb7+ Qf8 70. Qg6 Qd3+]

65...Qe2 66. Qg3 Qd3 67. Qf4 Qb1 68. Rd6 Qc2 69. Qg4 Qe4

70. Rd4! As in all similar cases, the rook has to be placed

on the fourth rank- from where it cuts the opponent's bishop maximally.

70...♙c2 71.♖d7+ ♔g6 72.♖d6+ ♔g7 73.♙h5 1-0

(25) Bednarski, J.-Hecht, H.-J.

Wijk aan Zee II , 1973

9...♖b1+ 10.♙g2 ♖b2+ 11.♙g1 g2! 12.♙h2 With the knight pawn this maneuver doesn't save the game.

12...♖b6 [There are a few other ways here, like cutting the king and transposing into a famous winning position with rook against bishop. 12...♖f2 13.♙d5 g1=♔+ 14.♙xg1 ♙g3 15.♙b7 ♖b2 16.♙e4 ♖e2 17.♙d3 ♖e1+ 18.♙f1 ♖c1]

13.♙xg2 [13.♙d5 13...♖g6—+]

13...♖h6+ 14.♙g1 ♙g3 0-1

(26) Kovalev, V.-Dubov, D.

EICC 2015 Jerusalem, 2015

80...♙b4 81.♙d4 ♖f4 [A simpler technique was 81...♖h5 82.♙b2 ♖h2+ 83.♙b1 b2 84.♙a2 ♖c2! Preparing a cage for the king. 85.♙e5 b1=♔+ 86.♙xb1 ♙b3 87.♙b8 ♖c8 88.♙a7 ♖a8 89.♙b6 ♖a6 90.♙e3 ♖e6 Completing the winning plan.]

82.♙e5 ♖e4 83.♙g7 ♖f4 84.♙e5 ♖f5 85.♙d4 ♙a3 86.♙b2+ ♙a4 87.♙d4 ♙b4 88.♙b2 ♖f1 89.♙c3+ ♙c4 90.♙e5 ♖f2+ 91.♙b1 ♙b5 [91...b2 92.♙a2 ♖c2]

92.♙d4 ♖g2 93.♙f6 ♖e2 94.♙g7 ♙b4 95.♙f8+ ♙c4 96.♙g7

96...b2 Finally!

97.♔a2 ♖g2 [The black player did not know the direct way here! 97...♖c2 98.♙f6 b1=♚+ 99.♙xb1 ♔b3]

98.♙f6 ♖h2 99.♙e5 ♖f2 100.♙g7 ♔d3 101.♙b1 ♖f7 102.♙e5 ♖b7 103.♙f6 ♔c4 104.♙xb2 ♔b3 105.♙e5 ♖e7 106.♙g3 ♖e3 107.♙f2 ♖f3 0-1

(27) Bruzon, L.-Fridman, D.

36th Olympiad, 2004

79.♙e4 ♔c7 80.♖b3 ♔d6 81.♙d3 ♙e5 82.♙c2 ♔e6 83.♖f3 ♙d4 84.♖f1 ♙e5 85.g6 ♙f6 86.♙b1 ♔e7 87.♖f3 ♔e6 [Better was 87...♙d4 88.♖f7+ ♔e8 (88...♙e6 89.♖b7 ♙e5 90.g7) 89.♙c2 ♙e5 90.♖f1 ♙d4 and it is still not easy to win.]

88.♖b3 ♔f5 89.♖g3 ♙g7 90.♖g2 ♔f4 [Better was 90...♙e6]

91.♖xb2 ♔g5 92.♖g2+ ♔h6 93.♙c2 ♙f6 94.♙d3 ♔g7 95.♙e4 ♙c3 96.♔f5 ♙a1 97.♖d2 ♙c3 98.♖d7+ ♔g8 99.♙e6 ♙b2 100.♖d3 ♔g7 101.♙f5 ♔g8 102.♖b3 ♙d4 103.♙g5 ♙e5 104.♖e3 ♙b2 105.♖e8+ ♔g7 106.♙f5 ♙c3 107.♖d8 ♙b2 108.♖d7+ ♔g8 109.♖c7 ♙d4

110.g7 This move was finally found as it was the last chance for White! We saw poor knowledge of main positions in the endgame even among top players!!

110...♙h7 111.♙e6 ♔g8 [111...♙xg7 112.♙f5 (112.♙f7) 112...♙h6]

112.♖b7 ♙c3 113.♙f5 ♔h7 114.♖f7 ♙d4 115.g8=♚+ ♔xg8 116.♙g6 ♙g1 117.♖f1 ♙h2 118.♖h1 ♙g3 119.♖h3 ♙d6 [119...♙f2 120.♖h2 (120.♖c3 120...♙f8 121.♖f3+) 120...♙g3 121.♖g2]

120.♖d3 ♙e7 121.♖c3 1-0

(28) Timofeev, A.-Inarkiev, E.

Moscow RUS, 2008

This is a good example on how to break a blockade of the pawn at an early stage.

101. ♖b4 ♗e6 102. ♖c3 ♖e5 103. ♖d3 ♖f6 104. ♖a7 ♖g5 105. ♖e3 ♖f5 106. ♖f3 ♗d5+ 107. ♖f2 ♗e6 108. ♖a5+ ♖g4 109. ♖c5 ♗b3 [109... ♗d7 110. ♖c4+ ♖g5 111. ♖f3]

110. ♖e5 ♗g8 [110... ♗c2 111. ♖b5 ♗d1 112. ♖b1 ♗c2 113. ♖b4+ ♖g5 114. g4 ♖h4 115. ♖f3 ♗d1+ 116. ♖f4 ♗xg4 117. ♖b8]

111. ♖e4+ ♖g5 112. g4 ♖h4 As we mentioned before, this typical move does not save the game because of the mate threats in the end.

113. ♖e3 ♖g5 114. ♖d4 ♗e6 115. ♖f3 ♖h4 116. ♖f4! ♗xg4 117. ♖d8 1-0

(29) Ilincic, Z.-Korchnoi, V.

GM, 2008

77. ♗d2 ♖g4 78. ♗e1 ♖e4 79. ♗f2 ♖f4 [79...b4 80. ♗g1 ♖c6 81. ♖a4 ♖e1 82. ♗f2 ♖b1]

80. ♗a7 ♖c6 81. ♗g1 b4! The same as in previous annotations.

82. ♖a4 ♖f1 83. ♗e3

83...b3 [Or 83... ♖b1]

84. ♖a3 ♖d5 85. ♖b2 ♖c4 86. ♗h6 ♖f2+ 87. ♖b1 b2! Great player know this maneuver very well!

88. ♖a2 ♖c3 89. ♗g7+ ♖c2 90. ♗xb2 ♖f8 0-1

(30) Suetin, A.-Smejkal, J.

Sochi , 1973

59.♔g1!! Here White tries to get a drawish endgame.
[59.♔f3? 59...♚g4!±; 59.♔f1 59...♚g4! 60.♔e1 ♜xf2 61.♞d4!
♞f3! 62.♙xf5 ♞xf5 63.♞xg4 ♔g6!-+]

59...g4 60.♔f1 f4 61.♔e1 ♞a2 62.♞d4! g3 63.fxg3 fxg3
64.♔f1 ♞d2 65.♞d6 ♚e4 66.♙xe4! = ♞xd6 67.♔g2 ♞e6

68.♙f5 Now White is able to win the passed pawn with the
typical rook cut.

Chess and the City. Interview with GM Sergei Tiviakov

WGM Elisabeth Paetz
Best rating: 2493

Sergei is one of the leading Dutch players and a well-known GM in the chess arena. Many active players regard him as a guru on all topics related to the Scandinavian defense and the Alapin variation of the Sicilian. Moreover, amateurs who look for entertaining tournaments in exotic locations can surely benefit from reading his colorful reports, which never lack in beautiful pictures. Today he is a welcome guest in my home here in Erfurt, and I took the chance to ask him a few questions:

E: You have travelled the world, and have probably been to Germany hundreds of times. Which city or Land has impressed you most?

S: I think Hamburg impressed me most, where I also spent most of the time in Germany. In Germany I played only a few tournaments, mostly in Neustadt an der WeinstraSse, which is rather small and not too exciting but has good vineyards. In Hamburg I saw a lot as I usually go there to record DVDs for Chessbase.

E: You are well-known as a globetrotter. Which is the weirdest place, or situation, you have found yourself in?

Sergey: Once I went to China and there I drank the blood of the snake and turtles and another very interesting experience was to go caving in Mexico and Iran.

E: Did not you catch any food poisoning from drinking blood from such animals?

Sergey: Luckily not from drinking blood from snakes and turtles but food poisoning happens quite often in poor countries with bad hygiene.

E: In 1994 was the last time you played for the Russian National team. Nowadays they are objectively the strongest chess nation in the world. However, they haven't won any Olympic gold medal for more than a decade. Do you have an explanation as to why?

Sergey: The level of chess has increased dramatically in the last years and in any tournament or round or concrete game anything can happen. On paper a weaker player can beat any stronger player. So there is nothing surprising in that.

E: But if we look at Armenia for instance, they won the Chess Olympiad 3 times in the last 10 years, so there should be some explanation for their success. Also statistically Russia should have won at least one gold medal after their last victory in Bled 2002.

Sergey: It also depends on the status of chess in the society and the recognition that you get for victories. Although the status of chess is high in Russia, it cannot be compared with the status of chess in the Caucasus, where the victors in the team tournaments are treated like national heroes. So the players have much higher motivation to win the team tournaments and also you have to take into account that all Russian players are already acknowledged players with high status. So they do not even try to perform above their

expectations.

E: Since 1999 you are an official member of the Dutch national team. If you compare both teams regarding mentality, discipline and team spirit, what are the biggest differences?

Sergey: There is not any pressure on the Dutch team to fight for the medals because it is quite difficult to be on equal terms with teams like Russia for example. In a certain sense our team is an amateur team and for Russia every result besides the first place is considered a huge disappointment.

E: How do you evaluate or see the current political situation in Russia?

Sergey: Because of the unjust sanctions of the United States and the European Union the economical situation in Russia has become much worse than before. Also the fall of the oil price contributed to that. But I hope that the European Union will sooner or later understand that the sanctions should be abolished and gradually the economical situation will improve.

E: Thank you for the interview.

Editorial Preface

It is now all about the World Cup 2015 in Baku, with an amazingly strong line-up (just 3 players from the Top 20 are missing: Carlsen, Anand and Li Chao).

Just one round has been played and we already have a lot of surprises. Grischuk, Giri and Gelfand started with just a draw and Dominguez even lost the first game of the match!

Of course the rating favorites managed to win most of their games, but in some match-ups the rating difference was just too huge for the underdog to put up a fight.

The most interesting fights are in the middle of the field, where players with more or less the same rating are competing against each other.

Many Chinese players have done very well by winning the first rounds game, such as Lu Sheilong against Moiseenko or Wen Yan against Kovolenko and we are not speaking about the "Top Chinese" players like Ding Liren, Yu Yanyui or Wei Yi.

The other event of interest this week is the World Junior Championship in Khanty-Mansiysk. After 9 rounds in the Open section the Polish player Jan Krzysztof Duda is leading the event with 7/9. In the girls section Zhansaya Abdumalik is showing no mercy and is on 8/9. A total of 13 rounds will be played.

We hope you all enjoy following the World Cup and we can definitely look forward to some exciting games and especially tie-breaks, where nerves play an important role!

Two best games of the past week

(1) Wojtaszek, Radoslaw (2746)
- Jakubowski, Krzysztof (2562)
[E04]

TCh-POL Ekstraliga 2015(6.3),
2015.09.06

GM Csaba Balogh
Best rating: 2672

Radoslaw Wojtaszek introduces a strong novelty against a recently popular line of the Catalan opening, which seems to create real difficulties for Black.

1.d4 d5 2.c4 e6 3.♘f3 ♘f6 4.g3 Not the standard moveorder, but we have reached the initial position of the Catalan opening by transposition.

4...dxc4 5.♗g2 ♕d7 Quite an unlogical move I must say. Black gives up his light squared bishop and gives complete control on the long diagonal to the one on g2 for winning some tempi in the development.

6.♞e5! ♖c6 7.♞xc6 ♞xc6 8.0-0

Black is temporarily up a pawn, but the one on c4 will not last

for long. The d4 pawn should not be taken, because Qxd4 drops material after Bxc6 intermediate check, while Nxd4 ruins his own pawn structure after taking on b7.

8...♞d7 9.e3 0-0-0 This is the idea of the entire setup of Black. It looks scary to castle in the long diagonal, but it takes time to organize the attack and meanwhile Black aims to create counterplay either with h5-h4 or in the center with e5. Obviously after some calm development with Be7 and 0-0, White simple wins back the c4 pawn and gets a comfortable advantage thanks to the g2 bishop.

10.♞d2 [The alternative is 10.♞a4 after which Black plays 10...♞d5 11.♞xc4 h5 followed by h4 and f5 (consolidating the outpost of the d5 knight) and g5-Qh7. Looks slow, but actually White is also far away with his attack.]

10...e5 11.♞xc4 exd4

12.♞a4! This is basically the novelty against which it is not easy to find a proper reaction as Black. [The highest level game continued with 12.exd4 12...♞e6 13.♞a4 ♞xd4 14.b3 Black seems to be in trouble, because Be3 is coming with tempo and the attack seems to be decisive, but he has 14...♞e4! 15.♗b2 ♞c5 traps the queen 16.♞xc6 bxc6 17.♗xd4 ♞e4 18.♞ae1 f5 19.f3 ♞d5 and Black was just in time to consolidate in Giri-Harikrishna, Biel 2014.]

12...d3 Black solves the tension in the center, but it also gives free hand to build an attack for White. Black is a pawn up, but with queens in board, White has a very strong compensation against the king on c8. The power of the g2 bishop is getting more sensible. [The most natural move to me was 12...♙c5 developing, protecting the a7 pawn and threatening with dxe3 as White would prefer to take this back with the bishop. However, most probably the preparation of Wojtaszek has continued with

13.b4! sacrificing another pawn in order to open the b-file, making the b7 square more vulnerable with the bishop on g2. 13...♟xb4 14.♞b3 I tried different defenses, but none of them turned out to be adequate. 14...♞e6 (14...dxe3 15.♙xe3 ♙xe3 16.fxe3 c5 17.a3 ♟c6 (17...♞d3 18.♞a4 ♞xc4 19.axb4→The lines are opening and the black king is getting weaker in each move. He cannot last for long.) 18.♞ab1→ looks also more than dangerous.) 15.♙a3 b5 is a concrete line, but Black fails to trade queens, which would solve his problems... 16.♙xb4 ♙xb4 (16...bxc4 17.♞a3 ♙xb4 18.♞xb4±) 17.♞xb4 ♞xc4 18.♞a3 ♞a4 19.♞c5→with full compensation for the pawns against such a weak king.]

13.♞d1 [Actually, I don't see anything wrong with 13.b4! The pawn cannot be taken and otherwise White pushes b5 next and the a7 pawn is hanging.]

13...♙c5 14.♙d2! Simple and strong. White does not need to hurry with finding compensation for the pawn. He slowly wants to bring his rook to c1 or sometimes to play b4-b5 with tempo, increasing the pressure on the queenside.

14...♟d5 [I tried 14...♞b8 but White has a comfortable choice here between 15.♙xc6 simplification to a favorable endgame... (Or 15.b4 15...♙b6 16.b5 ♟e7 17.♙c3± looks also very strong. The white pieces are just too active and he soon wins back the d3 pawn.) 15...♞xc6 16.♞xc6 bxc6 17.b4 ♙b6 18.a4! It is important to send the bishop first to a7 because of the following line 18...a6 19.a5 ♙a7 20.♟e5 ♞d5 21.♟xc6+ ♟b7 22.♟xa7 ♟xa7 23.♙c3± and Bd4 next followed by taking on d3 leaves White with an extra pawn.]

15.♞ac1 ♟b8 16.♞b3 [It seemed to be even stronger to play 16.♟a5 16...♙b6 (The tactical point is, Black cannot trade the pieces with 16...♟xa5 because he loses a piece after 17.♞xd7 ♞xd7 18.♞xc5+- doubleattack.) 17.♟xc6+ bxc6 18.♙c3± and Black is in big positional trouble. White wins back the pawn next move and he keeps all the structural and strategical advantages he had before.]

16...♔e6

17.♘e5 White could not increase the pressure anymore, it was time to gain some concrete benefits.

17...♙b6 [If 17...♘xe5 18.♖xc5 c6 19.e4 seems to win a piece on the spot, because after trading the queens the e5 is hanging, but Black has 19...♔d6! 20.♖a5! ♘c7 If the knight goes some other place, Rxe5 Qxe5 Bf4 wins. 21.♙b4 ♗f6 22.f4 ♘g4 23.♙c5 and again Black ends up in trouble. 23...a6 24.♗b6+—]

18.♘xc6+ bxc6

19.♖c4! A subtle move! White again continues his previous strategy to increase the pressure as much as possible instead of trying to do something concrete. The threat is to play Rdc1 or a4-a5. [On the direct 19.a4 Black could play 19...a5 getting

the b4 square for the knight and after 20.♙xa5 ♘xe3! creates counterplay. The rook on c4 prevents also this tactical idea.]

19...c5 [19...♔a8 20.♖dc1+—]

20.♖e4 ♗d6 21.a4! The story is not the same anymore as it was 2 moves before. Black has no tricks after 21...a5 22.Bxa5 and otherwise White traps the bishop with a5 next move. The only move to delay it was

21...♘b4 22.♙xb4 cxb4 23.♖xb4 White just restored the material balance, but his position is completely winning. The principle says, that in case of opposite colored bishops, the side is better who is more active. The black bishop on b6 is not doing anything, the e3 pawn is safely protected, the d3 pawn is well blockaded, while on the other side, the b8 king is naked and is under the attack of all the white pieces. a5 is the concrete threat.

23...♗c5 [23...a5 24.♖b5 and Black has no defense against Rxa5, even after 24...♔a7 25.♖xa5+ works 25...♙xa5 26.♗b7#]

24.♖b5 [Another pretty win was 24.a5 demonstrates well how vulnerable the black king in reality is 24...♗xa5 25.♖a4 ♗c5

26. ♖xa7! ♙xa7 27. ♖a1+-- and mate either on a8 or on b7.]

24... ♖c2 25.a5 wins the piece. All the white pieces are protected each other.

25...c6 26. ♖b4 Black resigned. [Another stylish way to win was 26. ♖xb6+ 26...axb6 27. ♖xb6+ ♙c8 28. ♕h3+ ♖d7 29.a6! ♖xd1+ 30. ♙g2+- and Black has no defense against a7 or Qb7xd7.] **1-0**

(2) Mamedyarov, Shakhriyar (2736) - Idani, Pouya (2569) [D05]

FIDE World Cup 2015(1.19),
2015.09.13

GM Arkadij Naiditsch
Best rating: 2737

We are in the first knock-out match of the World Cup 2015 in Baku. Everyone has the same goal, to get into the Final, which would guarantee the participation in the Candidates Tournament. In the first round a lot of matches have a clear favorite, but in a 2 games match anything can happen, which is why it is extremely important to start well and Mamedyarov is doing it the right way. We are going to see a clear domination in understanding and precise finishing by the Azeri Super GM. A very nice game to take notes from.

1.d4 d5 2. ♘f3 ♘f6 3.e3 Hard to call this move a "preparation" but on the other it is quite common for a strong player to try and avoid the preparation of the "weaker" one in order not to run into some deep analyses where the strenght of play would not matter any longer.

3...e6 Black could have continued with 3...Bf5 or just 3...c6 but Idani was probably not ready to play the Slav defense which would appear after 4.c4.

4. ♕d3 ♕e7 A slightly strange move order. Usually Black chooses to play 4...c5 and then to see where to put the bishop, on e7 or d6. Usually it is a better idea to keep the bishop on d6 in connection with Nbd7 and on e7 in connection with c5-Nc6.

5.b3 b6 Black keep s on copying White's moves. which will give White a small opening plus- something that should not happen in a normal case after a move like 3.e3.

6. ♖b2 ♜b7 7. ♘bd2 ♙bd7 In my opinion Black should have tried the c5 move and then Nc6, which is a better setup.

8. O-O O-O 9. c4 Now White has some opening advantage.

9... ♗e4 and this is another very risky move for Black. In the future Idani's idea is clearly to play f5, but it will weaken a lot of squares and give White some tactical motifs.

10. ♖c1 The rook clearly belongs to the c-file.

10... ♜d6 Why play Be7 in case you want to play Bd6 later?! This is not a good idea.

11. ♕c2 White wants to provoke Black into playing f5 and then put some more pressure on the c-file.

11... f5 The provocation has worked.

12. ♖fd1 A very solid move, but maybe not the best. [12.cxd5! looks very logical. 12... exd5 13. ♗e5 Putting Black under a lot of pressure. 13... ♕e7 14. ♘df3 Black can never take on e5 because of the weak c7 pawn and White is just planning to play Nc6 or Bb5 next. It is clear that White should be clearly better here.]

12... ♕e7 The queen is well placed on e7.

13. cxd5 exd5 14. ♗e5 This is clearly White's main idea, but now we can see that a move like Rfd1 is not really useful- for

now at least.

14... c5? This is already a blunder. [Black should have tried to just be solid with 14... ♖ac8 15. ♘df3 (Of course White can't play 15. ♗c6? since after 15... ♖xh2+! it is already him who is losing. 16. ♔xh2 ♕h4+ 17. ♔g1 ♕xf2+) 15... c5 With a better position for White, but the fight has just begun.]

15. ♗xe4!! Mamedyarov doesn't miss his chance to almost finish the game.

15... fxe4 16. ♖xe4! This was White's idea. Now we can see how useful the rook on d1 is.

16... dxe4 Black has no choice.

17. ♗xd7

17... ♕xd7? After this move Black's hopes are all gone. [The

only move was 17...♖f5 but after 18.dxc5 bxc5 19.♖c4+ ♔h8 and the exchange sacrifice 20.♖xd6 ♖xd6 21.♘xc5 Black is also in deep trouble. White has 2 pawns for the exchange and the bishop on b2 is a beast. Black still has some chances to fight, but White is clearly better.]

18.dxc5 ♕xh2+ [Not better is 18...bxc5 19.♕e5 and Black can't defend the d6 bishop in a nice way. 19...♖f6 20.♕xf6 gxf6 21.♖xc5 ♖d8 22.♖xa7 White has 3 pawns for the rook vs 2 black bishops, which gives White a totally winning position.]

19.♔xh2 ♖c7+ 20.♔g1 ♖ac8 Black is hoping to escape into an opposite colored bishop endgame, but it is only possible in theory.

21.♖c4+ ♖f7 22.cxb6 Very simple and strong.

22...♖xb6 [In case of 22...♖xc4 23.♖xc4 ♖xc4 24.bxc4 axb6 25.♖d8+ ♖f8 26.♖d6 White would collect the b6 pawn and just be 2 pawns up in a winning endgame.]

23.♖a4 With the idea of playing Bd4 at some point and win the a7 pawn.

23...♖cf8 Attacking the f2 pawn.

24.♖d7 Exchanging one pair of rooks.

24...♖xd7 [24...♖xf2 25.♖xg7+ ♔h8 26.♖xb7+ and the game is over.]

25.♖xd7

25...♖f7 One of Black's main problems still remains- the very bad bishop on b7 against the great white bishop on b2.

26.♖e8+ ♖f8 27.♖a4 Now of course White is already threatening to play Bd4 and win the a7 pawn.

27...a6 28.♖c4+ ♖f7 In case of 28... Kh8 White would win with 29.Qc7!, attacking the g7 pawn.

29.♖d1 The c8 square is protected by the bishop on b7, so White is going for the d8 one.

29...♖c7 30.♖e6 Of course not exchanging the queens.

30...♖e7 and in a bad position Idani blunders again. [30...h6 31.♖d6 would keep the game alive for a couple of more moves, but the result would probably be the same.]

31.♕a3! It is all over. Of course Black can't play 31...Qxe6 because of 32.Rd8 Rf8 and 33.Rxf8 mate. A great start for Mamedyarov into the World Cup in his home country Azerbaijan. **1-0**

(3) Duda, Jan Krzysztof (2645)
- **Gordievsky, Dmitry (2511) [B51]**

World Junior Open 2015(5.2),
2015.09.06

Here is one more game by the 17-year old Jan-Krzysztof Duda, the top seed and current leader of the World Junior Championship held in Khanty-Mansiysk.

1.e4 c5 2.♘f3 d6 3.♙b5+ Some years ago this was mostly a drawish line but since the reply 3...Bd7 experiences some difficulty it became more fashionable lately.

3...♘d7 4.d4 ♘f6 5.e5 A rare move. 5.Nc3 or 5.O-O are considered to be the main lines.

5...♙a5+ [5...cxd4 seems to be the best answer. 6.exf6 (6.O-O 6...dxe5 7.♘xe5 a6=; 6.♙xd4 6...dxe5 7.♘xe5 a6∞) 6...♙a5+ 7.♙d2 ♙xb5 8.fxe7 ♙xe7 9.♘xd4 ♙e5+ 10.♙e3 O-O The bishop pair should compensate for the isolated pawn.]

6.♘c3 ♘e4 7.♖b1! This improvement has already been played. [7.♙d2 7...♘xc3 8.♙xd7+ ♙xd7 9.♙xc3 ♙a6 Anand-Gelfand 2012.]

7...d5?! [7...cxd4 8.♙xd4 ♘xc3 9.bxc3 ♙xa2 10.♖b2 ♙e6 11.O-O With a great initiative for the small material investment.; 7...a6 8.♙xd7+ ♙xd7 9.O-O d5 10.♘xd5 e6 11.♙e1!± Naroditsky-Molner 2014]

8.e6! A great sacrifice to disturb Black's development.

8...fxe6 9.O-O ♘d6 The best practical move. [9...a6 10.♙xd7+ ♙xd7 11.♘xe4 dxe4 12.♘e5 cxd4 13.♘xd7 ♙xd7 14.♙xd4+ is just winning for White.]

10.♙xd7+ The most logical and human way, taking the black squares but somehow letting the opponent go out with his pieces. The engine clearly prefers [10.♙e2 For example: 10...♘xb5 (10...a6 11.♙a4! b5 12.dxc5 bxa4 13.cxd6±) 11.♙xb5 ♙xb5 (11...♙c7 12.♙e2 cxd4 13.♘b5±) 12.♘xb5 ♙f7 13.♘c7 ♖b8 14.♖e1 cxd4 15.♘xe6]

10...♙xd7 11.dxc5 ♙xc5 12.♙e3 ♙c7 13.♙d4+=

13...O-O-O I cant understand this move. It is clear that for the moment Black's king is much safer in the center and White's task would be much more complicated if his opponent would try to go out with his kingside pieces, for example: [13...♖g8 14.♞e1 g6 15.♘e5 ♘h6 16.♙d4 ♙c4 and it is not easy to crack Black's position.]

14.♞e1± ♘f5 [14...♙b8 would be the logical follow-up, but the simple 15.♘g5 wins material.]

15.♘e5 ♙b6 We can see that Black's king is in big danger.

16.♘d4 It is a good idea to exchange the only semi-active black piece.

16...♘xd4 17.♘xd4 ♙a6 18.♘e5 ♘e8 [18...b6 Trying to improve the king's position on b7 was better even if the position is very difficult.]

19.b4+— The most aggressive and expeditive way. I would probably choose [19.♞e3 followed by Ne2 and if 19...d4 20.♞d3!+—]

19...d4 20.b5 ♙a5 21.♘xd4 The more solid 21.Ne2 was winning as well.

21...e5 22.♞xe5 e6 23.♙g4 With material up and the attack, White is of course completely winning.

23...♙a3 24.♞e3 ♙a5 25.♙xe6+ ♘d7 26.♙c4+ ♙b8 27.♘e5+ ♙a8 28.♘d5 ♞c8 29.♘c7+ ♙b8 30.♞d3 Black's f8 bishop had no chance to go out since the strong 8.e6! move.
1-0

(14) Navara, David (2728)
- Nabaty, Tamir (2597)

FIDE World Cup 2015(1.25),
2015.09.13

GM Arkadij Naiditsch
Best rating: 2737

White was putting pressure right away from the opening and finally ended up being a pawn up in a rook endgame, but the limited number of pawns give Black good drawing chances. Let us take a look at a great defense by Tamir Nabaty.

32...a4 A good start, the a-pawn has to be exchanged.

33.♖b5 White wants to force Black into playing axb3 axb3, after which the rook endgame might be winning because of the idea of putting the rook to b8, pawn to b6 and start running with the king to the b6 pawn. [If White would start with 33.h5 33...axb3 34.axb3 ♖b4! would put the white rook on a passive position. 35.♖c3 ♖b5 with good chances to make a draw.]

33...g6! Very nicely played! Black should not allow White to play h5 and for the future the pawn structure of g6-h5 can be good.

34.♖b8 A solid move by Navara. There are no direct threats but the white rook is nicely placed on b8.

34...♔f6 An extremely risky move. [34...♔f7 is looking much safer, not allowing Rf8+.]

35.♖f8+! White is taking his chance.

35...♔e5 The only move, since in case of Kg7 White would just go Rf4 and the game would be over.

36.bxa4 ♖xa4 37.f4+ White has to try this move. Now the a2 pawn is of course getting lost, but Navara is hoping to collect some pawns on the kingside.

37...♔e4 38.♖f6 The g6 pawn is lost for sure!

38...♖a3+! An important check! Before taking the a2 pawn BBlack is chasing away the white king to h2.

39.♔h2 ♖xa2 40.♖xg6 White doesn't have a better move.

40...♔xf4 Now the big question is, can White take the pawn on h6 and hope to win the game?

41.♔h3 This is probably the best try. [In case of 41.♖xh6 41...♔g4! secures the draw. 42.♖h8 e5 43.h5 ♔g5 44.h6 ♔g6

and the black king stops the h-pawn while the e-pawn will start advancing. The position is a draw.]

41...h5 Nabaty continues defending perfectly.

42.g3+ ♖e4 43.♗xe6+ [43.♗g5 also leads to a draw. 43...♖f3! 44.♗xh5 ♗a1 and because there is no check on the f-file the position is just a draw. 45.♖h2 ♗a2+ 46.♖h3 ♗a1]

43...♖d4 Black is planning to protect the pawn on h5 by keeping the rook on the 5th rank.

44.♗g6 ♗a5 45.♗e6 [45.♗g5 didn't help since after 45...♗e5 46.♗xe5 ♖xe5 47.♖g2 ♖e4 48.♖f2 ♖e5 49.♖f3 ♖f5 the pawn endgame is just a draw.]

45...♗e5 Black keeps on waiting.

46.♗a6 ♗b5 47.♗e6 ♖d5 48.♗e3 ♖d4 49.♗e1 ♗a5 50.♖g2 White's only hope is to get his king to f4.

50...♗e5 51.♗f1 ♖d5 52.♗f6 ♗e6 53.♗f8 ♗e5 54.♖f3

54...♖e6 Even having the king on f3 doesn't help...

55.♖f4 ♗a5 56.♗h8 ♗f5+ The last precise move to secure the draw.

57.♖e4 We just saw a great defense by Black, almost not giving White any winning chances! **1/2-1/2**

- Derakhshani, Dorsa (2192)

Abu Dhabi Open,
2015.08.25

GM Csaba Balogh
Best rating: 2672

My friend showed me his instructive and study-like endgame he just played. At first sight, White is completely winning as he has the light squared bishop which fits to the a8 square. He also can easily protect the pawn on a2 and the c5 passed pawn can be easily stopped with the king. We could ask, what is the problem then with the win?! However chess is a very tricky game, White has only one winning move here.

46.♔d2? The game is drawn after this most natural move. [The winning plan was 46.♘d1! the key is to get the pawn to a4 to avoid the stalemate idea, which occurred later in the game! 46...c4 (46...♔a3 47.♘b3 ♔b4 48.♔d3+- wins as the black pawn did not reach the c3 square. White simply waits with his bishop and soon Black finds himself in zugzwang.) 47.a4!

The rest is already easy. White only needs to get closer with his king to the c-pawn and he can get it by putting his opponent into zugzwang. 47...♔c3 Trying to block the king's path towards the pawn, but Black cannot hold his position for long. (47...c3 48.♔d3+-) 48.♔e2 ♔b2 Otherwise White creates zugzwang with Ke3-e2 49.♔d2 c3+ 50.♔d3+-]

46...c4! The game is drawn now! The black pawn reaches the c3 square and White cannot get his pawn to a4. We will soon realize the point...

47.♔c2 c3 48.♘a6 White has already realized the problems and he tries to block the a-pawn, but it does not help anymore. Black sends away the bishop...

48...♔a5 49.♘c8 ♔b4 50.♘d7 ♔a3 51.♘e6 ♔b4 [I guess the players did not agree yet to draw, but it does not change

the evaluation. White cannot make progress because of the following idea... 51...♔b4 52.♘f7 a5 53.♙e6 a4 54.♘f7

54...♔a3!! This is the point! Black has squeezed himself to the a-file, therefore the pawn on c3 cannot be taken because of the stalemate! From now on Black just plays the moves Kb4-a3 and the story will never change. White cannot make progress as the bishop must defend the a2 pawn and the king must stay in front of the c3 pawn. The game is drawn! 55.♙xc3=] **1/2-1/2**

Golden knowledge

GM Adrian Mikhachishin
FIDE Trainers Commission Chairman

The most complicated win in this endgame is with the a- or h-pawn. Even top players sometimes don't remember the correct maneuver. The main method is still the sacrifice of the pawn and creation of a mating net in one case (with one color of bishop) and careful cutting of the opponent's king, using a smart tactical maneuver which has to be well remembered.

(16) Hansen, L.-Romanishin, O.

Altensteig, 1993

Let's see the correct classical winning way in this position where thousands of mistakes were committed.

63. ♖g7+ ♔a8 [63... ♖b8 64. ♖a6 / 65. Rb7 Kc8 66. Kb6 64... ♕e3 65. ♖b7+ ♖c8 (65... ♖a8 66. a5 as in the game.) 66. ♖b3! ♕f2(66... ♕d4 67. ♖b5 / Kc4; 66... ♖c7 67. ♖c3+ transferring to the next variation.)

67. ♖c3+! ♖b8 68. ♖f3! ♕g1 (68... ♕d4 69. ♖b3+ ♖c7 70. ♖b5 / Kc4; 68... ♕c5 69. ♖b3+ ♖c7 (69... ♖a8 70. a5 as in the game.) 70. ♖c3 ♖d6 71. a5) 69. ♖b3+ ♖c7 (69... ♖a8 70. a5) 70. ♖b7+ ♖c8 (70... ♖c6 71. ♖b1 ♕e3 72. ♖b3 ♕d4 73. ♖b4 / Rc4, Kb5) 71. ♖b5! ♕e3 72. ♖a5 / Kb4-c4 72... ♕d2+ 73. ♖b6 ♖b8 74. ♖e5! Preventing the check and White is easily winning.]

64. ♖a6 ♕e5 65. ♖a7+ ♖b8 66. ♖b7+ ♖a8 [66... ♖c8 67. ♖b6 ♕d4+ 68. ♖c6 ♕c3 69. ♖b5 (69. a5 69... ♕xa5 70. ♖a7)]

67. a5 The theoretical winning position is reached!

67...♙f4 68.♖f7 ♘e5 69.♖f8+ ♙b8 70.♔b5 ♚a7 71.♖f7+
♚a8 72.a6 ♙a7 [72...♙e5 73.a7]

73.♖f8+ ♙b8

74.♔a5! Now the universal triangle maneuver is performed.

74...♚a7 75.♖f7+ ♚a8 76.♔b6 ♙e5 77.a7 1-0

(17) Gritsayeva, O.-Gaponenko, I.

UKR-ch 72nd (Women), 2012

[Mueller,Karsten]

67.a5? Now the position is only drawn. With a pawn on a4 White always wins on the other hand. [67.♖a7+ 67...♚b8 68.♖e7 (68.♖f7?! would of course be very bad technique, but still wins. I just want to illustrate the difference with

a pawn on a4. Now White's king can use the a5-square: 68...♙e3+ 69.♚a6 ♙d4 70.♖b7+ ♚c8 71.♖b5 ♚c7 72.♖b3 ♙f2 73.♚a5 ♙e1+ (73...♙g1 74.♖b5+-) 74.♚b5 ♚b7 (74...♙f2 75.♚c4+-) 75.♖f3 The rook dominates the bishop. 75...♙h4 76.a5 ♙g5 77.a6+ ♚a7 78.♖f7+ ♚a8 79.a7 ♙e3 80.♚a6+-; Moves mentioned before are winning but the most technical is as in the previous game. 68.♖b7+) 68...♚a8 69.a5 ♙h2 70.♖a7+ ♚b8 71.♖g7 71...♚a8 72.a6 ♙e5 73.♖a7+ ♚b8 74.♖d7 74...♚a8 75.a7 ♙d4+ 76.♚a6 ♙b6 77.♖e7 ♙d8 78.♖g7 ♙c7 79.♖g8+ ♙d8 80.♖xd8#]

67...♙e3+ 68.♚a6 ♙f4? [The king must escape from the corner immediately with 68...♚b8!=]

69.♖f7 ♙h2 70.♖a7+ ♚b8 71.♖h7? This allows the bishop to reach the all important g1-a7 diagonal and misses the last chance to win with [71.♖g7 71...♙f4 72.♖b7+ ♚a8 73.♖e7 ♙g3 74.♖e8+ ♙b8 75.♚b5 ♚b7 76.a6+ ♚a7 77.♖e7+ ♚a8 78.♚b6 ♙g3 79.a7+-]

96...♙g3 [Of course not 96...♙d6?? 97.♖a7+ ♚b8 98.♖d7+-]

97. ♖a7+ ♔b8 98. ♖f7 [98. ♖g7 98... ♕f2+=]

98... ♔a8 99. ♖f3 ♕h2 100. ♖f8+ ♕b8 101. ♖f1 ♕e5 102. ♖d1
♕f4 103. ♖d3 ♕h2 104. ♖h3 ♕e5 105. ♖h5 ♕f4 106. ♖h8+
♕b8 107. ♔c6 ♔a7 108. ♖h7+ ♔a8 1/2-1/2

(18) Khenkin, I.-Bartel, M.

Bundesliga , 2012

82. ♕e5 h5 83. ♕b8 This is a tricky endgame. In order to win, Black must smoke out the enemy king from h1 and then get his own king out of h3. That can't be done with the pawn on h4, so Black must not push his pawn too soon!

83... ♔g4 84. ♕d6 ♔h3 85. ♔g1 ♖g2+ 86. ♔f1 [With the black king on h3 the corner is no longer safe for the white king:
86. ♔h1? 86... ♖d2 87. ♕c5 h4 88. ♕e3 ♖d1+ 89. ♕g1 ♔g4
90. ♔h2 h3 91. ♕e3 ♖d3 92. ♕g1 ♖d2+ 93. ♔h1 ♔g3 94. ♕c5 h2]

86... h4?? After this move Black can't win any longer.
[86... ♖g8! 87. ♔f2 ♔h4 88. ♕c7 (88. ♕e7+ 88... ♔g4 89. ♔g1
(89. ♕d6 89... ♔f5 90. ♔f3 h4; 89. ♔g2 89... ♖g6! 90. ♔h1 h4

Now it's OK to push the pawn - Black should just make sure that the bishop does not get back to the b8-h2 diagonal.
91. ♕c5 h3 92. ♕a7 ♖g8! 93. ♕c5 ♖d8 94. ♕b4 ♖d3 95. ♔g1 ♖d4

Bad Pistyan Breyer Memorial-A, 1922

61...h4?? [The simple winning way was 61...♔h3 62.♕d4
 ♖g2+ 63.♔f1 (63.♔h1 63...h4) 63...♔g3 64.♕e5+ ♔f3 65.♕f6
 h4 66.♕xh4 ♖h2 67.♕f2 ♖h1+ 68.♕g1 ♔g3]

62.♕d4 ♔h3 63.♕e5 ♖g2+ 64.♔f1 1/2-1/2

(21) Fraczek, D.-Leniart, A.

POL-chT, 2009

[Mueller,Karsten]

84.♕a7? [84.♔g1 and White cannot be driven out of his
 fortress. The king remains on f1, f2 or g2 and the bishop on
 the b8-he diagonal.]

84...♖h2+ [84...♖c1+ 85.♕g1 ♔g4 wins more quickly.]

85.♔g1 ♖a2? This allows White to get back into the drawing
 fortress. [The winning procedure was: 85...♖g2+ 86.♔h1 ♖b2
 87.♕c5 ♖b1+ 88.♕g1 ♔g4 89.♔g2 h3+ 90.♔h2 ♖b2+ 91.♔h1
 ♔g3 92.♕d4 ♖h2+ 93.♔g1 ♖e2 94.♔h1 h2 95.♕e5+ ♔h3
 96.♕g3 ♖d2 97.♕e1 ♖b2--]

86.♕b8 ♖a1+ 87.♔f2 ♖a8 88.♕c7 ♖g8 89.♔f1 ♖g3 90.♔f2
 [Of course not 90.♕xg3?? 90...hxg3 91.♔g1 g2 92.♔f2 ♔h2--]

90...♖g7 91.♕d6 ♖g8 92.♔f1 ♖g6 93.♕e5? [93.♕c7=]

93...♔g4! 94.♕c7 [94.♔g2 94...♔f5+-- shows why the

bishop is unfavourably posted on e5.]

94...♔f3 0-1

(22) Vancura

1924

In this kind of position it is necessary to know that if the black bishop will come on the diagonal b1-h7 then it will be a draw! So White has to try to prevent it and to play h6-h7 with the king on g5 (h5).

1.♖g2 ♘d1 [1...♙b5 2.♖d2 ♘c6 3.♖d4 ♔h7 4.♔f6]

2.♖d2! [2.♔f6 2...♙f3 3.♖d2 ♘e4 and on this diagonal it is a draw!]

2...♙f3 3.♖d4! ♔h7 4.♔f6 ♘c6 5.♔g5 ♘e8 6.♖e4 ♙b5 7.♖e7+ ♔h8 8.h7!

(23) Tal, M.-Zhidkov, V.

URS-ch40, 1972

With the bishop of the corner color the business is easy. It is necessary to sacrifice the pawn correctly and not to allow the opponent's king out.

84.♖d6+ ♔g7 85.h5 ♘e3 86.♖g6+ ♔h7 87.♖f6 ♔g7 88.♔f5 ♘d2

89.h6+! ♘xh6 [89...♔h7 90.♖g6 ♘e3 91.♖g7+ ♔xh6 92.♖g6+ ♔h7 (92...♔h5 93.♖g3 ♙f2 94.♖h3+ ♘h4 95.♖h2) 93.♔f6 ♘d4+ 94.♔f7 With the classical win.]

90.♖g6+! ♔h7 91.♔f6 ♘e3 92.♔f7 Now the king is cut off and the win is easy.

92...♙a7 93.♖a6 ♘b8 94.♖a8 ♘c7 95.♖c8 ♘f4 96.♖c4
♘g5 97.♖c3 1-0

(24) Swinkels, R.-Hachijan, A.

Dieren op, 2010

Now let us see how young strong players are completing these techniques.

65...♙g4 66.♘e6+ ♙f4 67.♘f7 h4 68.♘e6

68...♖g3+ [Correct was transposing to Tal's game: 68...h3+
69.♙h2 ♖g3 70.♘d5 (70.♘d7 70...♖g2+ 71.♙xh3 ♖g3+ 72.♙h2
(72.♙h4 72...♖g7) 72...♙f3 73.♘c6+ ♙f2) 70...♙g4 71.♘e6+
♙h4 72.♘d5 ♖d3]

69.♙h2 ♙f3 70.♘d5+ ♙f2 71.♘e6 ♙f3 72.♘d5+ ♙g4
73.♘e6+ ♙h5 74.♘f7+ ♙g5 75.♘e6 ♖e3 76.♘d7 ♙f4
77.♘c8 ♖g3 1/2-1/2

(25) Timman

1972

Not every position is won here- a great case found by Jan Timman.

1.♘c8 ♖h8 2.♘g4 ♙f4 3.♘d7 [3.♘xh3 3...♙f3]

3...♖d8 4.♘e6! [4.♘xh3? 4...♖d2+ 5.♘g2 ♙g4 6.♙g1 ♙g3]

4...♖d6 5.♘c8 ♖d3 6.♘e6 ♖c3 7.♘d7 ♖c7 8.♘e6 ♙f3

9.♙f5 [9.♙d5+? 9...♖g4 10.♙e6+ ♖h4 11.♙xh3 ♜c2+ 12.♙g2 ♖g4]

9...♜e7 10.♙c8 ♜e8 11.♙d7 ♜f8 12.♙e6 ♜d8 13.♙f5 ♜d2+ 14.♖xh3 ♜d5 15.♙g4+=

(26) Jurek, J.-Marek, M.

Olomouc IM 2014, 2014

52...♜h6 53.♖c3 ♜h3+ 54.♖b2 ♖c4 55.♙f8 ♜f3 [Once more Tal's game is an example: 55...a3+ 56.♖a2 ♜b3 57.♙g7 (57.♙d6 57...♜b2+ 58.♖xa3 ♜b3+ 59.♖a4 ♜b6) 57...♖b4]

56.♙e7 ♖b5 57.♖a2 a3? 58.♙xa3 Now it is a draw!

58...♖a4 59.♙d6 ♜f2+ 60.♖b1 ♖b3 61.♖c1 ♖c3 62.♙e5+ ♖d3 63.♙g7 ♜c2+ 64.♖b1 ♜c7 65.♙f6 ♜b7+ 66.♖c1 ♜b3 67.♙e5 ♜c3+ 68.♙xc3 ♖xc3 1/2-1/2

(27) Can, E.-Mchedlishvili, M.

EU-chT (Men) 18th, 2011

This endgame is won with very precise play.

86.♜b2 ♙f3 87.♜a2 ♙d5 88.♜a1 ♙f7 [88...♙b3 89.♖c6 ♙xa4+ 90.♖c5]

89.♖c6 ♙e8+ 90.♖c5 ♙f7 91.♜a3 [A slightly shorter way was 91.♜f1 91...♙h5 92.♜f2 ♙d1 (92...♖xa4 93.♖c4 ♖a3 94.♖c3 ♙d1 95.♜f1 ♙b3 96.♜a1+ ♙a2 97.♖c2) 93.♖c4 ♙g4 94.♜f4 ♙e6+ 95.♖c3 ♙g8 96.♜f8 ♙e6 97.♜a8+ ♖b6 98.♖b4 Coming to Tal's position.]

91...♙e6 92.♜e3 ♙g4 93.♜e7 ♖a6 94.♖b4 ♙f5 95.♜f7 ♙g4 96.♜f6+ ♖b7 97.♖a5 ♙e2 98.♜b6+ ♖c7 [98...♖a7 99.♜e6 ♙d1 100.♜e7+ ♖b8 101.♖b5]

99.♜b2 ♙f1 100.♜b1 ♙d3 101.♜d1 ♙e2 102.♜d2 ♙f1 103.♜b2 ♙d3

104. ♖b4! ♔c6 [The idea behind all this preparation is this:
104... ♖b7 105. ♖c3+]

105. ♖c3 ♕f1 106. ♖d4 1-0

(28) Estremera Panos, S.-Sedina, E.

Genova , 2004

Here is a practical example of achieving the right draw in a theoretical position.

1... ♖xg4! [1... ♕f3+? 2. ♖f2 ♖h3 (2... ♖xg4 3. ♖xf3 ♖h4 4. ♖g6 ♖h7 5. ♖f8+) 3. ♖e7 ♕xg4 4. ♖e8+ ♖h7 5. ♖g5+ ♖g6 6. ♖g8+ ♖xh6 7. ♖xh3+--]

2. ♖xg4 [2. ♖g5 2... ♖xg5 3. ♖xg5 d4]

2... ♕f5 3. ♖a4 [3. ♖d4 3... ♕xe6 4. ♖f3 ♖h7]

3... ♕xe6 4. ♖e3 d4+ 5. ♖f4 [5. ♖xd4 5... ♖h7 6. ♖f4 ♕b3 7. ♖g5 ♕c2 The bishop came to the right diagonal and now it is a draw!]

5... d3 6. ♖g5 d2 7. ♖d4 ♕a2! 8. ♖d8+ ♖h7 9. ♖xd2 ♕b1
Mission completed.

10. ♖d7+ ♖h8 11. ♖b7 ♕c2 12. h7 ♕xh7 13. ♖h6 ♕g8 14. ♖b8
1/2-1/2

Chess and the City. German Wedding Traditions

WGM Elisabeth Paetz
Best rating: 2493

Well the headline says it all - I just got married about a week ago. However I did not plan to focus my newsletter entirely on the most beautiful day of my life, but rather on some traditions which are common to my country. Before I introduce them to you, I shall add that I actually married a chess player, (former Italian national player Iart Luca Shytaj), remembering that in a previous newsletter of mine I listed

the pros and cons regarding that issue. Fortunately I still consider myself lucky that he is not an active player anymore, but a professional researcher into infectious diseases, and thus there is no danger of facing each other over the board or getting into any fights connected with chess - at least that is my belief. But let's get back to the traditional games of a German wedding, chiefly wood cutting!

The idea of the game is that the newly-married couple proves that they can master hard physical exercises together and can be ready for any tasks in future. Moreover the cutting also represents an equal balance of both partners in the marriage, as the cutting only works when both partners alternately pull and push. The next game (and here I want to mention that I was the faster one ?) is cutting half each of a heart-shape out of a bed sheet to represent team work. This way the couple shows again that they can master a task together. Basically a similar meaning, the only difference being that here speed actually matters and you may tease your beloved about how hopeless he is. ? Besides all that, the event was full of chess players from all over the world, and I am very happy and thankful that almost all my most important chess friends were able to join me on the precious day.

Elisabeth Paehtz

I just wanted to add a brief perspective as one of Elisabeth's close friends. The whole day was beautifully and thoughtfully organised. I say 'thoughtfully' because every guest was given a role to play in the festivities, and Lizzy went to some lengths to describe how she got to know each of us - more embarrassing for some than others... ? I'll finish by wishing the couple a wonderful, fulfilling and happy future together.

Keith Arkell

1.e4 c5 2.♘f3 e6 3.♙c3 ♘c6 4.d4 cxd4 5.♘xd4 a6 6.♙e2
[6.♘xc6 6...bxc6 7.♙d3 d5 8.O-O]
6...♙f6 7.O-O

7...d5 It is too early to fight for the center. Nowadays we know that the main moves are [7...♙c7 and; 7...d6]

8.exd5 ♘xd5 9.♙xd5 [9.♘xc6 9...bxc6 10.♙e4! and thanks to his better structure White has a typical stable advantage.]

9...exd5 Objectively better was [9...♘xd4 10.♙xd4 ♙xd5 11.♙xd5 exd5 Let's check how White can develop pressure against the weak d5 pawn. 12.♖d1 (12.♙f3 12...♙e6 13.c4 O-O-O 14.cxd5 ♙xd5 15.♙g5 f6 16.♖fc1+ ♔b8 17.♙xf6 (17.♙f4+ 17...♙d6=) 17...gxf6 18.♖d1 ♙xf3 19.♖xd8+ ♔c7 20.♖xf8 ♖xf8

21.gxf3 ♖d8= and being a pawn up has no meaning here.) 12...♙e6 13.♙f3 O-O-O 14.♙e3 ♙d6 15.♖d2 ♙e5 16.c3 ♖d7 17.♖ad1 ♖hd8 18.♙b6 ♙c7 19.♙d4 Black managed to hold the weak pawn, but the position is very unpleasant for him.]

10.♙f3 White gets a huge advantage thanks to his better development.

10...♙e7 11.♖e1 Another way which could also bring White a pawn up was [11.c4!± In my opinion this move was more accurate.]

11...O-O

12.♙xd5! ♙xd5 13.♘xc6 ♙xc6 [13...♙xd1 14.♙xe7+--]

14.♖xe7 ♙e6?! Black is trying to maybe catch the rook, but more active was [14...♙f5! 15.♙f4 (15.c3 is too slow, since now the first rank is weak! 15...♖ad8 16.♙e2 ♙e4! ♖ 17.f3? ♙c5+--+) 15...♙xc2 16.♙d2 ♙e4 (16...♖ad8 17.♙b4 ♖d7 18.♖ae1 ♖xe7 19.♖xe7 ♖e8? 20.♙xb7+=) 17.♖c1 ♙g6 18.♙g3 ♙c6 and Black is very solid.]

15.♙f4 ♖fd8 16.♙e2 ♙d5 [16...♖ac8 looks more logical, with the threats of Kf8 or Qxc2. 17.♖d1 (17.c3 17...♙f8!) 17...♖xd1+ 18.♙xd1 h6 Now the pawns on a2 and c2 are hanging. 19.a3 ♙e4=]

17.♖c7 ♙f6?! [17...♙g6 18.♙g3 ♖dc8 19.♖xc8+ (19.♙e7

19...♖xc7 20.♗xc7 ♗e4 21.f3 ♗d4+ 19...♖xc8 20.♗d2 (20.c3 20...♙xa2!) 20...♗f5 21.♗a5 h6 22.c3+= (22.♖d1 22...♖xc2=)]

18.♗e5 [18.♙e5 18...♗g6 19.f4 This kind of move usually cannot be good because now the h1-a8 diagonal is weaker. 19...f6=]

18...♗b6 Black is losing time because of the queen jumping without any sense.

19.c4 ♙c6? [19...♙e6 20.b3±]

20.♗f5?? White could simply win after [20.♙e3 20...♗b4 21.♙d4 ♗f8 (21...f6 22.♖xg7+--) 22.♙c5 ♗e8 23.♖e7+--]

20...♗xb2 21.♖b1 ♗d4 So many years ago chess was very sharp game, which is maybe why Black didn't play more solidly. [21...♗f6 22.♗xf6 gxf6 White should have no time to create an attack after Rb3-Bh6 because of the weak back rank.]

22.h4 A typical move for development initiative. White avoids mates on the first rank and prepares h5-h6, which can create additional weak squares. [22.♗xf7+ 22...♙h8 White needs to avoid Rf8 and Qd1 threats now. 23.♗e7 ♖e8 (23...♗d1+ 24.♗e1 ♗xe1+ 25.♖xe1 ♖d7! should also be enough. 26.♖xd7 ♙xd7 27.f3 (27.♖e7 27...♖e8=) 27...♖e8 28.♖d1 ♙c6 White is pawn up, but because of his bad structure Black should make

a draw.) 24.♗g5 ♖e6! Great! Black not only solves the problem with the weakness on g7 but he gets counterplay against g2!]

22...♖f8 [Easier was 22...♗xc4 23.♖xb7 ♗d5 24.♗xd5 ♙xd5=]

23.♖e1 ♗xc4

24.♖e3 Nice! An additional piece joins the attack. I am impressed by the chess understanding so many years ago. [24.♗g5!? with the idea Be5. 24...♗d3 25.♖e6 Avoiding Qg6. 25...h6 26.♖xh6 ♖ae8 Preventing Be5 and preparing counterplay over the first rank. The position is very complex.]

24...♖ae8 25.♖g3

25...♖e6?? A big blunder. Black should have played

[25...♖e1+ 26.♔h2 g6 Black will probably be first with his attack since Qf1 is coming.]

26.h5?? Once again White missed an easy win... [26.♖xg7+! 26...♔xg7 27.♖g4+ ♔h8 28.♕e5+ ♖xe5 29.♖xc4+- Black has no chance to create a fortress.]

26...g6 [26...♖e1+ 27.♔h2 ♖f1 28.♖xg7+ ♔xg7 29.h6+- With mate to follow.; 26...♖d4!? This is a good place for the queen to control the important a1-h8 diagonal.]

27.♕e5 [27.hxg6 27...fxg6 (27...hxg6 28.♕e5 ♖c1+ 29.♔h2 ♖h6+ 30.♔g1=) 28.♖g7+ ♔xg7 29.♕h6+ ♔xh6 30.♖xf8+ ♔h5 31.♖h3+ ♔g5 32.♖g3+ ♔h5 33.f4 ♖d4+ 34.♔h2 ♖f6 35.♖g5+ ♖xg5 36.fxg5 ♔xg5= Black is not worse here.]

27...♖d5? Decisive mistake, black could save position after queen exchange [27...♖e4! now white is force to exchange queens, maybe black didnt see after 28.hxg6 ♖e1+! this important check 29.♔h2 ♖xe5 30.gxf7+ ♔h8+- and rook rook is pin! white is not able to play Rg8]

28.f4+- ♖d1+ [28...♖e4 Now it is too late... 29.hxg6 ♖xg6 (29...hxg6 30.♖xe6+-) 30.♖xg6+ hxg6 31.♖h3+-]

29.♔h2 ♖d5 30.hxg6 hxg6 31.♖h3 ♖xe5 [31...♖xe5 32.♖xg6+!+-]

32.fxe5 ♔g7 33.♖xe6 An interesting fighting game! Of

course both players didn't see strong moves in many important moments but the general play and understanding of how to develop an initiative was on a high level. **1-0**

Editorial Preface

The World Cup 2015 in Baku has reached the 4th round and a lot of top players have left the tournament. Already in the first round Gelfand, Kasimdzhanov and Kamsky -3 former World Cup winners- lost their matched. In the 3rd round big favorites as Grischuk, Kramnik have left the tournament. Especially Kramnik can blame himself a lot for not winning a totally won position in the first rapid game against Andreikin (in the last World Cup these two played in the final!). The match between Nakamura and Nepomniachtchi went all the way to the armaggedon, but in the end Nakamura managed to win the gam. However, Nepomniachtchi made an appeal because Nakamura used both hands when castling, which is illegal in chess. It is going to be very interesting which decision the appeal's committee will take.

The other favorites like Caruana and Giri made it into the 4th round quite easily.

From the 6 Azeri players only one has made it and that is Mamedyarov who won his first 3 matches quite easily and now has to face Caruana. Radjabov lost to Svidler after losing his 2nd rapid game.

The 4th round is going to be very exciting as there are no more big favorites left in any match.

In the current issue we of course focus our attention on the World Cup! Enjoy!

Two best games of the past week

(1) Karjakin, Sergey (2762)
- Yu, Yangyi (2721) [B45]

FIDE World Cup 2015(3.11),
2015.09.17

GM Arkadij Naiditsch
Best rating: 2737

Karjakin is the fear of the Chinese players. Not so long ago, he won all alone in the friendly match between Russian and China against the 4 best Chinese players in a row! In the current game we are going to see a long theoretical line which ends up very badly for Yu Yangyi. White managed to consolidate and easily converted his advantage.

1.e4 Karjakin is one of the few players at the top who keeps on playing mainly 1.e4.

1...c5 2.♘f3 e6 3.d4 cxd4 4.♘xd4 ♘c6 5.♘c3 ♘f6 The Chinese player clearly wanted to surprise Karjakin by choosing this quite rarely played line. Karjakin is usually very well prepared with deep analyses in the openings he plays.

6.♘xc6 bxc6 7.e5 ♘d5 8.♘e4 We are in the main position where Black has a few moves to choose from.

8...♚c7 The main idea is to provoke the f4 move and then to play Qb6, not letting the white king castle that easily.

9.f4 ♚b6 10.c4 This is also the main move. Strategically White's position is clearly better because of the terrible bishop on c8 and because of the hole on d6, so Black's only chance lies in dynamic play.

10...♙b4+ There is still nothing new...

11.♚e2! A well-known, but still pretty move. The white king is actually quite happy on e2.

11...f5 Black tries to open the position.

12.exf6 ♘xf6 13.♙e3 Winning a tempo for development. So far both players were playing very quickly.

13...♚d8 [In case of 13...♚c7 14.♘xf6+ gxf6 15.♚f2 White's position should be clearly better because of the Qh5 threat and it is the black king who is in trouble.]

14.♘d6+ White is going for the bishop pair, which is a good decision.

14...♙xd6 [14...♚e7 would also lead to a better position for White. 15.c5 ♘d5 16.♚d4 and the great knight on d6 does the job.]

15.♚xd6 ♙b7 It seems like Yu Yangyi wanted to reach the current position, which seems very strange to me. White has the bishop pair and a much better structure. It is hard to imagine that the bad position of the white king on e2 compensates for all the minuses of Black's position. I think White is clearly better here.

16.♞d1 ♞c8 Black wants to play c5 to activate the bishop.

17.g4! A very strong move by Karjakin who is not wasting any time but starting with the direct action. We can see that the white king on e2 is actually not in any danger.

17...c5 18.♖g1 White wants to play g5 or f5 or even Bg2.

18...♞f8?! I can't imagine this being the right decision. [Black should have continued with the very forced 18...♞c6 19.♞e5 O-O At least the black king is safe now. 20.♗g2 (20.g5 20...♞h5 21.♗h3 d6 22.♞xe6+ ♔h8 and Black's play could be dangerous.) 20...♞xg4 21.♞c3 After the nice

21...d5! the position is very concrete but White is probably better after 22.♞xd5! exd5 23.♗xd5+ ♔h8 24.♗xc6 ♗xc6 25.♞xg4 ♞d7 26.h3 but because of the opposite colored bishops it is unclear if White's pawn up is enough to win the game. The white king is very open.]

19.f5! Great play! Now it is White who is crushing in the center. [White could also have reached a better endgame after the calm 19.♗g2 19...♗xg2 20.♞xg2 ♞b6 21.♞xb6 axb6 22.♞f3 with some advantage.]

19...♞b6?! But now Black enters a very bad endgame... In my opinion Yu should have looked for his chances in more dynamic play. [19...♞e4 Now things are pretty forced again. 20.♞e5 ♞f6 21.♞xf6 ♞xf6 White has the bishop pair but it is not that easy to make use of. 22.♗g2 exf5 23.gxf5 ♞xf5 and it is unclear if White can put some serious problems, but Black's position remains quite dangerous.]

20.fxe6 dxe6 21.g5 Black's pawn structure is horrible.

21...♞d5 It seems like there is nothing better for Black.

22.♞xb6 ♞xb6 23.♞e1 Now White can breathe freely. The queens are gone and he remains with the bishop pair and a great pawn structure, which gives him a big advantage. [23.♞d3 was possible as well.]

23...♞d7 24.♗e2 ♞e7?! Black misses White's next move. [Better was 24...♞e5 25.♞f1 ♞f5 and Black keeps on fighting.]

25.♞d3! A very strong move. The rook is going to take a great position on a3, attacking the black a-pawn.

25...♙e4 26.♖a3 ♜c7 27.♚d2 Now that the black pieces are focused on defending the weak pawns, White improves his king's position.

27...e5 28.♖f1 The exchange of rooks is good for White.

28...♖b8 29.♚c3 What a domination of the white pieces. Even with equal material on the board, White is almost winning here.

29...♖b6 30.♖d1 White wants to put pressure on the c5 pawn by playing Ra5 and Bg3.

30...♖bc6 31.♙g4 Following the plan...

31...♘b6 32.♖a5 It is already hard to find a move for Black.

32...g6 33.b3 A nice move, even if 33.Re1 was probably stronger. There is no need to rush things here, as Black is hopelessly busy with protecting the c5 pawn for the rest of the game.

33...♙f5 Getting the knight back to d7.

34.♙e2 ♘d7 35.a3 Now Karjakin is pretending to prepare b4, which he might really play somewhere, but of course White has a lot of other options as well.

35...♙e6 36.h4 ♙f7 and Yu Yangyi blunders, which is very rare for a Chinese player! But maybe it is just a sign he had no more hopes of saving the game. [36...♖b6 would have been the way for longer suffering.]

37.♙f3! Precision until the end! Black cannot save the c5 pawn any longer.

37...♖b6 [37...♖d6 is also hopeless after 38.♖xd6 ♚xd6 39.♖a6+ ♚e7 40.♙g4]

38.♖xd7+ Too easy to miss...

38...♚xd7 39.♙xc5 The black rook has no squares to go and the a7 pawn is falling. The game is over.

39...e4 40.♙g4+ The time control is reached and now Sergey would get an extra 30 minutes to convert his winning position. A great game and an important victory for the Russian prodigy who thus entered the 4th round of the World Cup 2015 in Baku.
1-0

(2) Adams, Michael (2742)
- Laznicka, Viktor (2676) [B46]

FIDE World Cup 2015(2.15),
 2015.09.15

GM Csaba Balogh
 Best rating: 2672

A dramatic fight in the second round between Adams and Laznicka. In general they are both very solid players, but the first draw they made was in the 7th game of the match. Before somebody always took the lead, but the other successfully leveled the score. At the very end, Adams won the Armageddon game and passed to the next round, but now let us see how convincingly he bounced back after losing the first - normal timecontrol - game.

1.e4 c5 Laznicka's main repertoire is the Caro-Kan defense, but almost everybody prepared some surprises to the World Cup.

2.♘f3 e6 3.d4 cxd4 4.♗xd4 ♘c6 5.♗c3 a6 The Taimanov Sicilian.

6.♗xc6 The drawback of the 5...a6 moveorder. [By starting with 5...a6 compared to the most popular and most common 5...Qc7, Black wants to anticipate the sharpest line with opposite side castling. Now after 6.♗e3 6...♗f6 7.♖d2 ♗b4 8.f3 d5 9.a3 ♖a5! This is the point! Black saved an important tempo to play Qa5 in one move and a6 is very useful. Black is considered to be fine at the end of the theoretical lines.]

6...bxc6 7.♗d3 d5 8.O-O ♗f6 This is the moment, where White has to choose between several setups and plans. Adams seemed to be extremely well prepared and plays a rare, but rather problematic line from Black's point of view.

9.♖f3 [9.♖e1 9...♗e7 10.e5 ♘d7 11.♖g4 is the main line.]

9...♗e7 10.♖g3 O-O 11.♗h6 White forces the f6 knight to a more possible place before occupying the ideal square with his bishop.

11...♗e8 12.♗f4 Black was threatening to win a piece with Bh4 Qg4 e5 and the queen cannot keep any longer the pin on the g-file.

12...♗h4 13.♖f3 ♗e7 A standard plan in this opening to send away the queen from g3 even in a cost of a tempo. To be honest, I am not sure if Black really needs it, perhaps he could try 12...Nf6.

14.♗a4! This is the novelty! The most common plan in this structure, but somehow in this particular position it was not played yet. The move has two ideas behind it, White keeps an

eye on the weakened dark squares on b6 and c5, but it is more important to initiate favorable changes in the center and on the queenside with c2-c4!

14...♘f6 15.b3 A necessary preparation to the c4 break. White has to strengthen his knight on a4. [On the direct 15.c4 Black has a strong tactical reply 15...♙a5! 16.b3 e5! pushing d4 next move with a favorable structure. In case of d4, White should always be able to play e5 himself. The pawn cannot be taken now 17.♙xe5? as it loses a piece after 17...dxe4]

15...♙a5 Black parries the c4 idea by refreshing the e5 positional threat. However White changes his plan now and the queen gets a bit misplaced on a5. [White does not need to worry, that he loses the bishop pair after 15...dxe4 16.♙xe4 ♘xe4 17.♙xe4+= because Black has seriously damaged his own pawnstructure. He quickly comes with Rd1 and creates problems on the dark squares. This could be good for Black if he could play Bb7 and c5, but now it takes too much time to execute it.]

16.e5! ♘d7

17.♙g3! This is very unpleasant now! White is threatening again with Bh6 and Black does not have Bh4 at his disposal.

17...♖e8 Black wants to strengthen the g7 pawn with Bf8.

18.h4!? White once again uses the fact, that the black queen is away from d8. He creates serious potential attacking chances by advancing the pawn towards h5. There will be a concrete threat as well to play Bh6 and after Bf8 Bxg7 Bxg7 h6 wins.

18...c5 19.c4! Adams employs the standard plan again! By playing c5, Black was threatening with c4, sending away the bishop from the ideal diagonal. On the other hand, the d5 square is weakened and White immediately attack it with c4, forces Black to make a serious decision. 19... dxc4 20.Bxc4 would again damage Black's structure, he should not allow cxd5 exd5, because after the white pawn majority on the kingside creates dangerous attacking threats, such as e6 or Bh6 followed by f4-f5. Therefore Laznicka decided to close the center with

19...d4 Black creates a protected passed pawn which could be an excellent triumph in all the endgames, but of course it is very far away until Black could trade some pieces, especially queens. White has gained two important light squares with the changing of the pawn structure. He could later use the e4 square with his bishop and drive his knight back to d3 through b2.

20.h5 ♙c7 Black prevents Bh6 by attacking the e5 pawn. [20...♙b7 loses to 21.♙h6 ♙f8 22.♙xg7 ♙xg7 23.h6+-]

21.♖ae1! Bringing another piece to the attack and refreshing the Bh6 threat. [21.♗h6 did not work in view of 21...♞xe5 22.f4 ♞e3+! (But not 22...♞f6? because of 23.♗g5! traps the queen.)]

21...♗f8

22.♗g5! It is getting more and more dangerous. Adams frees the path of the f-pawn. White only needs two moves f4-f5 and suddenly new lines are opening in front of the black king. The structure is closed, Black should principally open the position somehow against the attack, but he is unable to do it. He can only try to defend somehow, but he does not have enough time to organize it.

22...g6 23.f4 ♗g7 Black would like to strengthen his kingside with Nf8, but of course by playing g6, allowing White to open the h-file, he faces new problems...

24.♞h4 ♗b7

25.♞f2! A spectacular attacking move! White drops his rook to h1!

25...♞f8 [25...♞c6 is met by 26.♗e4+- preventing the counterplay on the long diagonal.; 25...♗f8 defends the h7 square against Rh1, but it allows 26.♗f6! threatening to take on g7 followed by Qf6, h6 and mate on g7. 26...♗xf6 27.exf6+- and again the queen soon appears on h6.]

26.♞h1 f5 A desperate attempt to run away with Kf7 and Rg8, but White comes first with

27.hxg6 hxg6 28.♞h7+ ♞f7 29.♞h6! Black resigned! A very nice attacking game by Adams! **1-0**

Young & Talented

GM Etienne Bacrot

Best rating: 2749

(3) Antipov, M2. (2538)

- Van Foreest, Jorden (2541) [C50]

World Junior Open 2015(8.3),
2015.09.10

Mikhail Antipov is the new Junior Champion! The 18-year old Russian won the title with 10/13, ahead of Duda on the third (!!) tie-break. He showed interesting chess but was also very lucky in a few games, especially when he won the last one from a totally lost position. Champions also need it! In round 8 he produced a brilliant attack:

1.e4 e5 2.♘f3 ♘c6 3.♙c4 The new champion is not very aggressive in his opening choices, here he goes for the Italian.

3...♘f6 4.d3 ♙c5 5.O-O O-O 6.c3 [6.♘bd2 is a better move order, introduced by Radjabov, with the idea to meet 6...d5 with (6...d6 is normal.) 7.exd5 ♘xd5 8.♘e4! With some advantage in Giri-Bacrot 2011.]

6...d5 [6...d6 is still the more popular move.]

7.exd5 ♘xd5 8.b4 This is not very good. 8.a4 and 8.Nbd2 lead to an unclear game.

8...♙e7 9.b5 ♘a5 10.♙xd5 ♙xd5 11.c4

11...♙d7 This is a well-known sacrifice, since of course defending the pawn with 11.Qe6 is not great.

12.♘c3 A novelty that doesn't change the evaluation, Black has no opening problem. [12.♙d2 12...e4 13.♙xa5 exf3 14.♙xf3 a6 Black is better since the files will open quickly. Vallejo and Fressinet played this already.]

12...f6 A logical reaction over the board, but it might be even better to first play [12...b6!? The complications seem to be in Black's favor: 13.♘xe5!? ♙d4 14.♘d5 ♙d6 15.♘f3 ♙xa1 16.♙c2 c6! 17.♘c3 cxb5 18.cxb5 ♙f5 19.♙d2 ♙xf1+ 20.♘xf1 ♖ac8=+]

13.♘d5 ♙d8 14.♙a3 White develops quickly but it doesn't bring anything for the moment. Black has the better structure and two bishops.

14...♖e8 15.♖c1 a6!? It seems like White has no good solution to this question, but... [15...c6 would drive away the knight but give it another strong square on c5. 16.bxc6 bxc6 17.♘c3∞ followed by Ne4.]

16.b6! A nice reaction!

16...cxb6 [16...c6!? 17.♘e3 ♙xb6 18.c5 ♙c7 19.♚a4 with unclear play, since the knight on a5 is not in great shape.]

17.♘d2 Thanks to the pawn sacrifice White improved the position of the knight on d5 and tries to reach d6 with the other one.

17...f5 Weakening the position, but Ne4 has to be stopped.

18.f4! The black pieces are strangely placed for the moment so White acts very quickly.

18...e4? I was even thinking about not putting an interrogation mark since it is a very logical move. The best way to play is [18...b5 19.fxe5 bxc4 20.dxc4 b5 21.♙d6 ♙b7 With unclear play.; on 18...exf4 19.♚f3 b5 20.♖ce1 and White has great activity.]

19.♖e1 White only plays good developing moves.

19...b5 20.dxe4 fxe4? The losing move, but it was very easy to miss White's tactic. [20...♚f7 needs to be played to continue the fight.]

21.♘xe4 ♘xc4 22.♚h5 ♖e6 Black was definitely counting on this defensive move but he missed the following beautiful sequence:

23.f5!! ♚xd5 24.♘g5!! ♙xg5 25.♚e8+ ♖xe8 26.♖xe8+ ♙f7 27.♖f8#

1-0

Endgame section

(14) Wojtaszek, Radoslaw (2741)
- Lalith, Babu M.R. (2557)

FIDE World Cup,
2015.09.12

GM Csaba Balogh
Best rating: 2672

Black is just about to win back the pawn on d6 and restore the material balance. However, it is not enough for equalizing positionally, because the b5 protected passed pawn still gives White a nice edge. The question is how should White improve his position? Wojtaszek finds a subtle positional maneuver to increase his advantage.

34. ♖c2!! The knight is heading to a1-b3 from where it not only attacks the weakness on c5, but also prepares to support the b5 passed pawn with Na5.

34... ♜xd6 [34... ♜xd6 is also met by 35. ♖a1! ♜xd3

36. ♕xd3!± (36. ♜xd3? is a mistake because it allows Black to build a blockade with 36... ♜xd3 37. ♕xd3 ♜f6! 38. ♖b3 ♜d7 defending the c5 pawn and blocking the passed pawn on b6. Black brings his king to d6 and he saves the game.)]

35. ♜a1! White has already found the right plan, he only needs to execute it properly.

35... ♕c8 The only way to save the c5 pawn was to protect the rook in order to be able to play Nb7.

36. ♖b3 ♜b7 37. ♜xd7 ♜xd7 38. ♜xd7 ♕xd7 White has accomplished the first task by driving the knight to b3. What to do next?

39. f4! The knight on b7 protects the c5 pawn, but it does not have stability. White needs to transfer his bishop to the long diagonal before Black can reach the d6 square with his

king to replace his knight from defending the c5 pawn. 39.Bd3 would have been met by f5, but now White wants to play either Be2-f3 or g3-Bg2.

39...♔f8 40.g3 ♙c8 [Black is just missing one tempo to reach the d6 square.... 40...♔e7 41.♙g2 ♘d6 42.b6 ♙c8 43.♘xc5+-]

41.♙g2 ♘d6 Otherwise Bxb7 and Nxc5 is hopeless.

42.♘a5! The last accuracy! White does not exchange his c5 pawn for the one on c4, but helps promote his passed pawn. Black cannot stop it.

42...♔e7 43.b6 Black resigned! It was very instructive to see how Wojtaszek increased his advantage move by move with a straightforward plan. **1-0**

**(15) Giri, Anish (2793)

GM Arkadij Naiditsch
Best rating: 2737

Many players tend to evaluate an equal endgame as a draw, which is a big mistake. An equal endgame means nothing else than an equal position, which could as well appear in any random situation during the game and the current game is a great example. It seems like White is at most slightly better in this endgame and Leko is a great defender, but even he went down under the pressure Giri was creating. A great game to follow and to learn from in this very typical Catalan endgame.

25.♔f3 White is not in a hurry and brings his king closer to the center, where the action is clearly going to take place.

25...♘d7 A solid move. Black wants to put his bishop on f6.

26.♙e3 ♔e8 This is also the correct move. The black king has to come closer to the center. [The exchange of the a-pawn is usually good, but not now. 26...b5 27.axb5 axb5 28.♖xc8+ ♖xc8 29.♗a1 and White takes control, with the easy threat of

playing Ra7 and Rb7. The black b-pawn might get in trouble.]

27. ♖d4 ♜f6 Leko continues defending very solidly and the exchange of bishops brings the draw even closer.

28. ♜xf6 ♞xf6

29. ♞e5! A nice move! In case Black could play Nd7 and Ke7 the position would probably already be very close to equal.

29... ♖e7 30. e4 White puts some pressure with the little material left on the board. His plan is clearly to push the pawn to win some space.

30... ♜xc1 31. ♜xc1 ♞e8! A strong defensive move! Black wants to get rid of the knight with the f6 push.

32. ♞d3 a5?! The first move when Leko starts to go wrong. In my opinion he should have continued with passive defense. [The right way to go on was 32... ♜d8! with the idea of exchanging rooks. 33. ♖e3 ♜d7 34. a5 (In case of 34. ♜c8 34... ♜c7 35. ♜xc7+ ♞xc7 36. ♖d4 b6 the position would be very close to a draw.) 34... f6 and Black can choose to play Nd6 next or Kd8. Of course White can continue pushing but his winning chances are not very big.]

33. ♜c5 A nice move, checking what Black is going to do next.

33... ♖d6 34. ♜c3 And as we can see, Black is already in big trouble! White wants to play Rb3 with a very unpleasant attack on the b7 pawn.

34... ♜a6 Another unlucky decision by Leko. A mistake never comes alone... Black should have continued with 34... f6.

35. e5+! Giri doesn't miss his chance! Now White is going to have a fantastic knight on c5.

35... ♖e7 36. ♞c5 The black rook has to get to a passive position on b6 and protect the b7 pawn.

36... ♜b6 37. ♜d3 Rd7 is unavoidable.

37... ♜xb2 38. ♜d7+ ♖f8 39. ♞xb7 and it is already unclear if White's position is winning or not and just 14 moves earlier it looked like an endgame where many would expect players to agree to a draw.

39... ♜b3+ 40. ♖g4 A nice move. White is going to need his king in the near future.

40... ♜b4 Other moves would lead to more or less the same.

41. ♖d8! Giri continues playing excellently. The pawn on f7 is falling.

41... ♔g8 42. ♖e7 Now it is all over as the black knight has no squares...

42... ♜f5+ 43. ♔h5 The last trick did not work for Leko.

43... ♔h7 44. ♖xe8 and White is just a full piece up.

44... ♖b2 45. h3 ♜h2 46. ♔h4 With this win Giri proceeded to the 4th round of the World Cup in Baku 2015 and Leko had to take his ticket home. A very instructive endgame! **1-0**

Golden knowledge. Centralization of the queen

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

As we have already seen, in queen endings two very important factors are the safety of the king and the possibility of penetrating the opponent's position. At the same time the role of the queen is also extremely important. The queen attacks the opponent's pawns and king and supports the own passed pawn. For these purposes the position of the queen is very important and the best solution is usually the centralization of the queen.

(16) Schoeneberg, M.-Vukic, M.

Ybbs, 1968

1... ♖e4! Total centralization and doubled pawns can in many cases create a safe haven for the king.

2. ♖f1 g6! This is the most important part of the plan: to create an own passed pawn.

3. hxg6 ♖xg6 4. ♖f4 [4. ♖b5 4... ♖g1+ 5. ♔a2 ♖g4 6. a4 ♖g5 and then finally starting pushing the own pawn.]

4... ♖g5 5. ♖a4+ ♖a5 6. ♖h4 h5 7. ♖e4 [7. ♖c4 7... ♖e5!]

7... ♖b5! 8. ♖f4 ♖d7 9. ♖e4 ♖g4! 0-1

(17) Ballon-Mikhalchishin

Bern, 1995

41... ♖f5! Black's task is to penetrate White's position with the queen and in coordination with it to try and push forward the passed pawn on c4.

42. ♔g1 [42. ♔e1 would allow an unfavorable transposition into a pawn ending, because of the strong protected c4 pawn. 42... ♖e6]

42... ♖d3! Another typical speculation with the useful pawn ends for Black. White has to avoid it and then Black's passed pawn will be ready to move forward.

43. ♖f4 c3 44. ♗g4 Trying to start the mechanism of perpetual, which is broken by the opponent on the next move.

44... f5! 45. ♗h5+ ♔e6 46. ♗e8+

46... ♔d5! Simple and effective. This is the most typical plan of exploitation of the passed pawn.

47. ♗e5+ ♔c4 48. ♗c5+ ♔b3 49. d5 c2 50. ♔h2 ♗c4! 0-1

(18) Minev, N.-Chaprazov, I.

BUL-ch, 1965

39. ♗e5! ♔h8 40. f5 White tries to open the opponent's king position.

40... ♔h7 41. f6 gxf6 42. ♗xf6 ♗c4 43. ♗e5

43... ♗d3 44. h4 ♗c4 45. ♔h3 ♗d3+ 46. ♔h2 ♗c4 47. ♗f5+ ♔h8 48. ♔h3 ♗c3+ 49. g3 ♗c4 50. h5 ♗c6 51. ♗e5+ ♔g8 52. ♗d4 ♗b5 53. ♗g4+ ♔h8 54. ♗c8+ ♔g7 55. ♗c7+ ♔g8 56. ♗d8+ ♔f7 57. ♗c7+ ♔g8 58. g4 White opens his king, but he uses the typical idea of marching his king deep into his opponent's position.

58... ♗f1+ 59. ♔g3 ♗d3+ 60. ♔f4 ♗d2+ 61. ♔e4 ♗e2+ 62. ♔f5 ♗f3+ 63. ♗f4 ♗c6 64. ♗e4 ♗c5+ 65. ♗e5 ♗f2+ 66. ♗f4 ♗c5+ 67. ♔g6 ♗c6+ 68. ♗f6 1-0

(19) Lisitsin, G.-Capablanca, J.

Moscow, 1935

42. ♗c4 The white queen is better centralized at the moment,

but it has to protect the isolated pawn. Black has to try and remove the white queen from this strong position.

42...h5 43.♔h1 g6 44.♔g1 ♔g7 45.♔f1 ♔d6 46.♔g1 ♔f4
47.♔c3 ♔h7 48.♔f1 ♔f5 49.♔c4 ♔g7 50.♔f2 ♔g5 51.♔e2
♔f6 52.♔b2 ♔d5

Finally the black queen dominates the board.

53.♔e3 e5 54.f4 exf4+ 55.♔xf4 ♔e6 56.h4 f6 57.♔e3 ♔c4
58.g3 g5 59.hxg5 fxg5 60.♔h2 ♔b3+ 61.♔e4 g4 62.♔e2
♔xg3 63.♔c4+ ♔e7 64.♔c8 ♔f3+ 65.♔e5 ♔f6+ 66.♔d5
♔d6+ 0-1

(20) Romanovsky, P.-Stahlberg, G.

Moscow, 1935

49.♔d5! The powerfully placed queen attacks both black pawns and stops the king's activation.

49...♔b2+ [Passive defense is deadly for Black: 49...♔c7
50.♔e3 ♔e7 51.♔e4 ♔f6 52.h5]

50.♔e3 ♔c1+ 51.♔e2 White is not sure yet, but two moves later the king decides to go forward.

51...♔c2+ 52.♔e3 ♔c1+ 53.♔e4 ♔e1+ 54.♔f5 ♔xg3
55.♔xc5+ ♔g8 56.♔c4+ ♔h8

57.♔g4! [57.♔e4 This centralization was good too.]

57...♔e1? [57...♔h2 promised more defensive chances.
58.♔e4 ♔g8]

58.♔g6 ♔c1 59.♔d7 ♔g1+ 60.♔f7 ♔h7 61.♔f5+ g6
62.♔d7 1-0

(21) McDonald, N.-Csom, I.

Elekes Memorial, 1996

28.a5 f6 29.c4 ♔f8 30.♚e4! Putting the queen on the most central position.

30...♚d1+ 31.♔g2 ♚b3 [Keeping passive defense will be deadly sooner or later: 31...♚d7 32.b3 (32.♚xh7 32...♚c6+) 32...g6 33.h4 ♔f7 34.g4 f5 35.♚f4 ♚e7 36.g5 ♚d7 37.♚e5]

32.♚xe6 ♚xb2 33.h4 ♚b4 34.h5 ♚e7 35.♚d5 ♚c7 36.f4 ♚c6 37.♔f3 Now both sides are trying to get a good pawn ending.

37...♔e7 38.♔e4 ♚e6+ 39.♔d4 ♚d6 40.♔e4 ♚e6+ 41.♔d4 ♚d6

42.f5! ♚b8? [The best defense was 42...b5 43.cxb5 axb5

44.♚xd6+ ♔xd6 45.a6 ♔c6 46.a7 ♔b7 47.♔c5 ♔xa7 48.♔xb5 ♔b7 49.♔c5 ♔c7]

43.♚e6+ ♔f8 44.♔d5 ♚a8 45.c5! Black is close to running out of useful moves. **1-0**

(22) Gufeld, E.-Mineev, N.

Sofia, 1967

White's strong queen controls the board. Now it is possible for the white king to try and come to c4, attacking the black pawns.

1.♔f1 f5 2.h4 ♚c7 3.♔e2 ♚b6 4.♚f7+ ♔h6 5.b3 ♚d6 6.♚c4 ♔h7 7.♔e1 ♚b6 8.♚b5 ♚c7 9.♔d2 ♚e5 10.♔c2 ♚a1 11.♚xc5 ♚a2+ 12.♔c3 ♚xf2 13.♚c7+ ♔g8 14.♔d4

14...♚b2+ [14...♚d2+ 15.♔e5 ♚xe3 16.♔f6]

15. ♖c3 ♜f2 16. ♜xa5 ♜xg3 17. ♜d8+ ♔h7 18. a5 ♜e1
 19. ♜b6 f4 20. ♜c7+ ♔g8 21. a6 ♜d2+ [21... ♜xe3+ 22. ♔e5]
 22. ♔e5 ♜b2+ 23. ♔e6 ♜xb3+ 24. ♔f6 ♜b2+ 25. ♜e5 1-0

(23) Levenfish, G.-Alatortsev, V.

URS-ch16, 1948

26. ♜d4 The beginning of the centralization.

26...b6 27. ♔f1 h5 28. g3 ♔h7 29. ♙d5 ♜e7 30. ♔g2 ♞xd5
 31. ♜xd5 g6

32. g4! With such a strong queen position it is necessary to try and create some weakness in the opponent's position.

32...hxg4 33. hxg4 f6 34. ♜c6 ♜b4 35. ♜xf6 ♜xb3
 36. ♜e7+ ♔h6 37. ♜xe4 b5 38. ♜f4+ ♔h7 39. ♜c7+ ♔h6

 and Black resigned because the position is absolutely lost after

57. d5 1-0

Chess and the City. Two is better

WGM Elisabeth Paetz

Best rating: 2493

Two is always better than one and that is why I decided to get married again! :) Well obviously to the same guy, but in a different country with different traditions and mentalities. My husband's roots are Albanian and for that reason our second wedding will take place in Tirana, the capital of Albania, in just under 2 weeks. Getting wed to someone means that you do not only marry him, but also his parents, family, relatives and probably a bunch of his friends too!

For me this is a special challenge since my parents in law, my parents and my lazy self have no real common language and that often leads to unavoidable misunderstandings, escape plans or even surprising head shakes. The most amazing thing I have discovered so far involves the communication between our mothers. In speaking to each other, one uses German and the other Italian, and they handle this so well that one might think that they have invented an entirely new language which only the 2 of them understand!

I am really looking forward to this second marriage ceremony, after the first one was a mixture of delays (naturally my husband, being a true Italian citizen, always finds creative new ways of being late - even on the day of our first wedding

ceremony!), overzealous party makers and a follow up illness which knocked me out for another 10 days afterwards. This time however I've decided to be clever. My dearly beloved's best friends will not be under the same roof, nor a room next door, nor will they get the opportunity of extensive wine imbibing the night beforehand! Also, I've made sure that the most fervent of these won't be there this time to indulge their excesses! :) Last but not least I am really happy that I'll soon be repeating this experience, and even happier that the last segment of my best friends - those who could not make it to Germany - will get to come to Albania. Pictures, stories and gossip will follow in my next newsletter.

Clash of the Titans

- Blackburne, Joseph Henry [A25]

London m(14), 1887

GM Kamil Miton
Best rating: 2655

1.c4 e5 2.e3 ♘c6 3.a3 Nowadays we can say that White's idea is to play a Paulsen System with a tempo up.

3...g6 The best recation. Black prefers development over g6 where the move a3 is less need than after a plan with d5.

4.♘c3 ♕g7 5.g3 ♘ge7 6.♕g2 d6 7.♘ge2 ♕e6 8.♘d5 The only move, otherwise Black play d5 and the connection with the e3-g3 moves will be very bad for White.

8...O-O 9.d3 ♖d7 10.O-O

10...♘d8! It is hard to believe that this main idea was known so many years ago! Black is going to get rid of the knight from d5. Sometimes is possible to first play [10...♘c8!? and then

Nd8-c6. 11.d4 ♘d8 12.b3 c6 13.♘dc3 f5∞]

11.d4 c6 12.♘xe7+ ♖xe7 13.d5 [13.b3 13...exd4 (13...f5∞) 14.♘xd4 (14.exd4 14...d5!) 14...d5 (14...c5 15.♘xe6! and the rook on f8 is also hanging. White is clearly better thanks to the strong bishop on g2.) 15.cxd5 (15.♘xe6 15...♘xe6 16.♖b1 dxc4 17.bxc4 ♘c5 Because the white bishops are very limited Black doesn't have any problems.) 15...♕xd5 16.♕xd5 cxd5 17.♕b2 ♘e6 Black is ready to fight for the important d4 square. 18.♖d2 ♘g5↗ The weak light squares give Black good opportunities for counterplay.]

13...cxd5 14.cxd5 ♕d7 15.e4 f5 16.♕e3 ♘f7 17.♖d2 b6 Preparing Rc8. A more original idea was the following pawn sacrifice: [17...f4 18.gxf4 exf4 19.♕xf4 g5! (19...♘e5 20.♕g5 ♖f7 21.f4 ♘c4 22.♖d3 ♘xb2 23.♖b3↑ and the black pieces lost a bit of coordination.) 20.♕e3 g4 with Ne5 next. Black has nice compensation.]

18.♖ac1 ♖ac8 19.♘c3 ♖c7 20.♖c2 ♖fc8 21.♖fc1

21...h6 looks logical to improve the position. Black can still use the idea with the pawn sacrifice after f4 or play [21...♖f8 with the idea Bh6 to exchange the typical bad bishop on g7.]

22.f3 g5 23.exf5 [23.♕f1!? with the idea to get control over the c-file after Ba6-Nb5.]

23...♙xf5 24.♘e4 ♖f8 [24...♗xc2 25.♗xc2 ♗xc2 26.♗xc2 h5 and g4 next with the idea to weaken the e4 square and try to activate the pieces over g5-h6.]

25.♗xc7 [25.♗c6!? 25...♗xc6 26.dxc6 ♙e6!⇒Preparing d5 and it is hard to say if the c6 pawn will be strong or weak.]

25...♗xc7 26.♗xc7 ♖xc7 27.♖c3 ♖xc3 28.♘xc3

28...♙d7 Avoiding Nb5.

29.♙f1! and White keeps a plus thanks to the better pieces and potential pressure against the pawns on the queenside.

29...♖e7 30.♖f2 ♖d8 It looks logical to bring the king to the queenside. Another idea was to play h5-g4-Bh6.

31.♙d3 [31.♘b5 31...♙xb5 32.♙xb5 e4!⇒and the black pieces get activated.]

31...♖c7 32.♙g6 ♘d8 [32...♘h8 33.♙h5±]

33.b4 a6 34.♖e2 b5 35.g4 The character of the position is closed but the black pieces are very limited (Bg7 and Nd8), which is why White keeps a stable advantage.

35...♘b7 36.♖d3 [36.♙f2 36...♙f6! The only move. (36...♖d8 37.h4 ♖e7 38.hxg5 hxg5 39.♘e4 ♙f6 40.♙e3+—; 36...e4!? with the idea to find some counterplay. 37.♘xe4 ♙b2 38.♙e1 ♙xa3 39.♙c3 a5! 40.bxa5 b4 41.♙g7 (41.a6 41...bxc3 42.a7

c2) 41...♘a5 42.♙xh6 b3 43.♙xg5 b2 44.♘d2±) 37.♘e4 ♙e7 38.♖f1 ♖d8 39.♖g2 ♙e8 40.♙xe8 ♖xe8

41.h4 (41.♘g3 41...♙f8 42.♘f5 ♖f7 43.♙b6) 41...♘d8! (41...gxh4 42.♖h3 ♖f7 (42...♙g5 43.♘xg5 hxg5 44.♙e3) 43.♙xh4 ♙xh4 44.♖xh4 ♖g6 45.g5 hxg5+ 46.♖g4 ♖h6 47.♘xg5 ♘d8 48.♘e4 ♘f7 49.♖f5+—) 42.♙e3 ♘f7 Black is on time!]

36...♖d8 37.♘e4 ♖e7 38.♙b6 Black is paralyzed but this is not enough for White to win the game, he will need to find a way to create some pawn weaknesses.

38...♙f8 39.♙f2 ♙g7 40.h4 ♙f6 41.hxg5 [41.♙e3 41...gxh4 42.♙xh6 h3⇒]

41...♙xg5 42.♘xg5 hxg5 White managed to create a weak pawn on g5 but on the other hand Black got rid of the limited bishop.

43.♖e4 ♖f6 44.♙h7 ♙e8 45.♙f5 ♙g6 46.♙b6? White missed a nice winning idea: [46.♙xg6 46...♖xg6 47.♙b6 ♖f6 48.♙c7

48...♔g6 It looks like Black can build a fortress but after 49.♙xd6! ♜xd6+ 50.♙xe5 ♜f7+ 51.♙e6 the d-pawn will decide the game in White's favor.]

46...♙xf5+ 47.gxf5 ♙f7 Now White is not able to improve his position and objectively it is a draw.

48.f4?! A very optimistic idea.

48...gxf4 [48...exf4 49.♙f3 ♙f6 50.♙g4 ♙e5! (50...f3 51.♙d4+--)] 51.♙xg5 f3 52.f6

52...♜d8! and Black holds the position.]

49.♙f3 ♙e8 50.♙g4 ♜d8 51.f6 ♜f7 52.♙f5 ♙f8 53.♙f2 ♙g8 54.♙e6 ♙f8 [54...e4 55.♙d4! (55.♙f5 55...e3 56.♙g1 e2 57.♙f2 ♜e5 58.♙xf4 ♜d3+--)] 55...e3 56.♙e7 e2 57.♙f2 f3 Probably with a positional draw because the f6 pawn stops the knight from helping promote the black pawns.]

55.♙f5 ♙g8 56.♙e6 ♙f8 57.♙f5 ♜d8 58.♙b6 ♜f7 59.♙f2 Both sides have no idea how to improve their position.

59...♙e8 60.♙h4 ♙f8 61.♙f2 ♜h6+

62.♙g5? A mistake... [62.♙g6 62...♜f7= (62...♜g4 63.♙b6 f3 64.f7 f2 65.♙c7+--)]

62...♙f7! A strong move! Now the white king is out of play and the two passed pawns supported by the black king will easily win against the bishop.

63.♙xh6 ♙xf6 64.♙h5 ♙f5 65.♙a7 [65.♙h4 leads to similar lines as in the game: 65...e4 (65...♙e4 66.♙g4 ♙xd5 67.♙f5 ♙c4 68.♙e4 ♙b3

69.♙c5! This nice trick helps White to escape with a draw!) 66.♙h3 e3 67.♙h4 ♙e4 68.♙g2 f3+ 69.♙f1 ♙xd5 70.♙g3 ♙c4

71.♙xd6 ♖b3 72.♙f4 ♖xa3 73.♙xe3 ♖xb4 74.♖f2 ♖c3 and it looks like the white pieces are too far to stop the black pawns.]

65...e4 66.♖h4 e3—+ 67.♖h3 ♖e4 68.♖g2 f3+ 69.♖g3 f2 70.♖g2 ♖d3 0-1

Editorial Preface

The FIDE World Cup in Baku slowly coming to the final stage. 4 players qualified for the Semi-Finals and these are Anish Giri, Pavel Eljanov and the two Russians Sergey Karjakin and Peter Svidler.

Karjakin is playing Eljanov and Giri is playing Svidler. Clearly the hero of the event is Pavel Eljanov. He started the event with 6 wins in classical chess, then made 2 draws and in the 1/4 finals he easily beat Nakamura with 1.5-0.5. I cannot remember such an outstanding result by any player during the World Cup event.

Giri has also been playing very well throughout the whole event, sometimes winning in classical games, sometimes in rapid, and generally showing very smart and practical play. Svidler had a lot of tough matches but always managed to consolidate in the most important moment and to get into the next round.

Karjakin is clearly the luckiest guy of the event, as already in the second round he was very close to get eliminated by Onischuk after his loss in the first game, but somehow he managed to get back in the match and win it in the tiebreaks. His matches against Andreikin and Mamedyarov were also anything but easy.

The final matches of the World Cup are going to be very exciting and we wish everyone great fun watching it!

Two best games of the past week

(1) **Giri, Anish (2793)**
- **Wojtaszek, Radoslaw (2741) [A18]**

FIDE World Cup 2015(4.3),
2015.09.22

GM Arkadij Naiditsch
Best rating: 2737

We are in the first game of the tie-break, which has the time control of 25 min + 10 seconds per move. It is a very long rapid game which often has almost the same quality as a classical game of chess. Giri clearly tricks his opponent into a position which he doesn't know well out of the opening and later on crushes the black chances for survival with a nice mating attack.

1.c4 ♘f6 2.♘c3 White often uses this move order against players who don't like to play 1.c4 e5 or 1.c4 c5.

2...e6 3.e4 This is the key behind this move order. Wojtaszek mainly plays the Nimzovich and now he cannot get it.

3...d5 4.cxd5 This is a quite recent development, before White was usually playing 4.e5 d4 etc.

4...exd5 5.e5 ♘e4 6.♘f3 ♙f5 Both players are clearly very well-prepared, as a move like 6...Bf5 is not an easy move to play during a practical game.

7.d4 ♙b4 Black is winning a tempo and develops the bishop.

8.♙d2 ♙xc3 9.♙xc3 O-O Such a position is very difficult to evaluate. On one hand White has the better center and a bit more space, but on the other hand the black pieces are nicely

developed and there are ideas of c5 or f6 pushes. I would say that here White is just a bit better.

10.♙e2 c5 A very logical move.

11.dxc5 The right choice. [11.O-O 11...c4 followed by Nc6 and b5-b4, with great play for Black.]

11...♘xc3 Now the exc hange is forced, otherwise the white bishop would take a superior position on d4.

12.bxc3 ♙e4 White would put his knight to d4 anyway, so Black is preventing it for one move.

13.O-O ♘d7 14.♘d4 ♘xc5 It is hard to say if White is still better here or if Black fully equalized. It is clear that Black's play should be against the c3 pawn, by playing Rc8-Qa5, and White should do something on the kingside where he has more space.

15.f3 ♙g6 16.♘b5 Very logical play. White covered the e4 square with f3 and now he is trying to get his knight to d6.

16...♙e8 17.f4 Not the most accurate move. [Maybe White should have continued with 17.♙d4 17...♘e6 18.♙e3 and now f4-f5 is really a dangerous threat.]

17...♙e4? A big mistake. [Black should have continued with 17...♘e4 using the fact that White doesn't have anything but an equal position after playing f5. 18.f5 ♙b6+ 19.♙h1 ♙xf5

20. ♖xf5 and here comes the move that Black has probably overseen:

20... ♖xe5! Now the position is a forced draw. 21. ♕f1 ♖xf5 22. ♕xf5 ♘f2+ 23. ♙g1 ♘h3+ 24. ♙h1 ♘f2+]

18. ♘d6 Now the white knight on d6 is a monster.

18... ♖e7

19. c4! A very nice move. It is important not to let the black pieces consolidate.

19... dxc4 20. ♕xc4 The white pieces are dominating the game and now the pawn on f7 is also in trouble.

20... ♕c6 21. ♕c2 Giri continues increasing the pressure by making solid and good moves! Now Bxf7 is a threat.

21... ♘e6 22. ♖ad1 Bringing the last inactive piece into the game.

22... ♕b6+ 23. ♙h1 White's position is winning even if he has no material advantage. The threat of playing f5 is just deadly.

23... g6 This move doesn't really help.

24. f5 Of course!

24... ♘d4 25. ♕d2 The game is over now...

25... ♘xf5

26. ♖xf5 The last accurate move.

26... gxf5 27. ♘xf5 and Black cannot do anything against Qg5 next. It seems like White did nothing special to win this game, but in fact such "easy" play is sometimes the hardest thing to do. 1-0

**(2) Mamedyarov, Shakhriyar (2736)
- Caruana, Fabiano (2808) [E60]**FIDE World Cup 2015(4.1),
2015.09.20GM Csaba Balogh
Best rating: 2672

One of the favorites, Fabiano Caruana was eliminated by Mamedyarov. The local super GM won the first game of the match in a very nice and convincing attacking game.

1.d4 ♘f6 2.c4 g6

3.♗g5!? A very rare move on the highest level, although it is a clever attempt to confuse a Gruenfeld player. White wants to avoid the 3.Nc3 d5 4.Bg5 Ne4 main line of the Gruenfeld defence!

3...♞e4 [3...♗g7 is the most natural move, but then White plays 4.♞c3 and Black either allows e4 and plays a King's Indian, which was definitely not the idea of a Gruenfeld player, or plays 4...d5 but then he could not play 4. ..Ne4 instead of 4...Bg7.]

4.♗f4 Jumping to with the knight before the white knight has developed to c3 allows White to occupy the center with f3-e4. Black must try to challenge the center anyway.

4...c5 5.♞c2! White is familiar with the subtleties of the opening. [5.f3 was less accurate in view of 5...♞a5+! 6.♞d2 ♞xd2 7.♗xd2 ♞b6! and the b2 pawn is under attack. That is the reason of playing 5.Qc2.]

5...♞a5+ 6.♞d2 f5 [Now on 6...♞xd2 7.♗xd2 ♞b6 White has a pleasant choice between 8.dxc5 (and 8.d5 which is also better for him due to the nice center after e4.) 8...♞xc5 9.♗c3 Provoking some unwanted weakening in the pawn structure with f6 or e5.]

7.f3! Forcing the active knight to make a decision. It either retreats or takes on d2, but in both cases White will be able to build a strong center with d5-e4.

7...♞f6 8.d5 d6 9.e4

9...♞a6! Nice prophylaxis against White's main idea... [Black was rightly afraid of 9...♗g7 10.exf5 ♗xf5 11.♗d3! with tempo, because Black is not really willing to trade the light squared bishops after playing f5, because he loses the control over the e6 square, which could be occupied quickly by the g1 knight. With the knight on a6, this idea obviously does not work because of Nb4.]

10.♞e2! A known idea from the King's Indian Saemisch defense. The knight cannot develop to its most natural square on f3, but it goes to c3 from where it supports the central

pawns. Black is going to undermine them with e6 or b5 and then the knight on c3 could become very useful.

10...fxe4 Caruana decides to release the tension in the center, since the g1 knight cannot develop to f3 anymore.

11.fxe4 ♟g7 12.♞c3 O-O 13.♟e2 White quickly wants to finish the development with O-O after which he could conclude the opening stage of the game with a slight edge thanks to his strong center. Black must quickly try to make use of the temporary loose position of the f4 bishop and try to gain some benefits from the pin on the f-file.

13...♞h5?! Caruana comes to the right conclusion, but executes it in a wrong version. [It was probably much stronger to play 13...♞g4! 14.O-O (14.♟g5 14...♟d4 White is missing one important tempo to find safety for his king.) 14...♟d4+ 15.♞h1 ♞f2+ 16.♞xf2 ♟xf2 17.♟h6 Followed by Nf3, with compensation for the exchange, but it is doubtful if it could be also enough for an advantage... Black might even consider giving back the material but completing the development with 17...♟d7 18.♟xf8 ♞xf8 Black cannot be worse here with the two bishops.]

14.♟g5! [14.♟e3 14...♞f4 was Black's idea and if White plays 15.O-O ♞xe2+ 16.♞xe2 ♞xf1+ the a2 pawn is hanging, while after 17.♞xf1 b5!+= Black grabs the initiative.]

14...♞d8 is too passive. Black admits the mistake of his previous move. [14...♞f4 would have been consequent after the previous move, but it also fails to equalize. White plays 15.O-O! ♞xe2+ (On 15...♟xc3 16.♟xf4+= protects the knight on d2.) 16.♞xe2 ♞xf1+ 17.♞xf1 ♞xa2 18.♞c3+= followed by taking on e7 next move.; 14...♟d4 also fails to create enough counterplay, because after 15.♟xh5 gxh5 16.♞f3! Qd2 is coming next, forcing back the bishop from its active position. Then White could already castle kingside, the e7 pawn starts

to hang and the damaged situation of the black kingside will also start to tell after Bh6.]

15.♟xh5 gxh5

16.♞f3! The opening stage of the game has clearly finished in favor of White! The only problem of his position was his uncastled king, but it is going to be solved now. At the same time he achieved many advantages, such as having a strong center, keeping the strong dark squared bishop and damaging the opponent's kingside. He has potential attacking chances with Qd2-Bh6 or transferring the knight to the kingside through Ne2-g3 or Nf4.

16...h6 17.♟e3 ♟g4 18.O-O e6 19.♞d2! ♞h7 20.♞ad1! An excellent positional move, forcing Black to decide what he wants to do in the center by increasing the pressure on the d6 pawn.

20...e5 This had to be a very sad moment for Caruana. He definitely wanted to avoid playing this move, which closes the center and his dark squared bishop. The game becomes static, where Black remains without counterplay. [20...exd5 was met by 21.♞xd5! winning the d6 pawn. Although it probably would still have been preferable to try and compensate a pawn down in an opened position rather than suffer in a cramped one with passive pieces.]

21.♖f2! The center is fixed, the d1 rook has already done its job. It is time to activate it by doubling on the f-file.

21...♘c7 [This was the last moment for Black to trade on f3, however it is not obvious to him this exchange favors him.
21...♙xf3 22.gxf3 ♔h4 23.♙h1 ♖f7

24.♘e2! followed by Ng3-f5, paralyzing Black with a single knight on f5 and clearly using the fact that the g6 pawn was lured to h5 before.]

22.♖df1 ♖b8 23.h3 ♙d7 Black needs this bishop to try and keep his position together. [23...♙xf3 24.♖xf3 ♖xf3 25.♖xf3+- is hopeless positionally. White can easily focus all his pieces to the kingside and Rf5 or Ne2-g3 are coming next.]

24.♘e2! Mamedyarov is extremely strong in attacking chess. He drives his knight to g3. Black must prevent it, but he can only do it temporarily.

24...h4 25.♙h2! Preparing for the opening of the kingside.

25...b6 Another sad decision, but it was difficult to be clever. [25...b5 is rather leading to suicide after 26.b4! cxb4 27.c5!+- Black just destroys himself on both sides of the board.]

26.g3! By undermining the h4 pawn, White opens the path for his knight towards the kingside. All his pieces are perfectly focused for a successful attack, while the black ones are disorganized and not well organized to defend properly. Black also lacks the space for the movement of his pieces.

26...hxc3+ 27.♘xg3 Black cannot hold all the squares. Nh5 is coming next and if he prevents it with Be8 then the knight goes to f5, while in case of Qe8 the h4 square becomes free to play Nh4-f5. In all the cases, the knight's arrival is decisive!

27...♖g8 [27...♔e8 28.♘h4+-]

28.♘h5 ♘e8 [28...♙f8 for instance loses to 29.♘f6+ ♖xf6 30.♘g5+-; 28...♙h8 29.♙xh6+-]

29.♘xg7 ♘xg7 30.♙xh6 The game is over. White has won material and he continues attacking.

30...♘h5 31.♘g5+ ♙g6 32.♖g1 From now on all the moves are just winning for White. Mamedyarov finishes the game in style.

32...♔e7 33.♘f7+ ♙h7 34.♙g5 ♔e8 35.♔e2 ♘g7 36.♖f6 ♖f8 37.♖h6+ ♙g8 38.♙f6 ♖xf7 39.♔h5 and Rh8 is mate in the next move! **1-0**

Young & Talented

GM Etienne Bacrot
Best rating: 2749

(3) Bluebaum, Matthias (2580)
- **Loiseau, Quentin (2419) [D46]**

World Junior Open 2015(5.8),
2015.09.06

Back to the World Juniors, here is the game between the 18 year-old Bluebaum, who took bronze in Khanty, and my compatriot Loiseau, who played excellently in Khanty and finished in 4th place.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 e6 5.e3 ♘bd7 6.♚c2 ♕d6 7.♕d3 O-O 8.O-O dxc4 9.♕xc4 b5 10.♕e2 This is an ant line of the Meran. This retreat became more fashionable than 10.Bd3, which I use to play.

10...♕b7 11.e4 e5 12.dxe5 ♘xe5 13.♘d4 ♘eg4 14.g3

14...g6 A rare move. [14...♕xg3 15.hxg3 ♚xd4 16.♚d1 ♚xd1 17.♚xd1 leads to an unbalanced endgame where White is pushing.; 14...♕c5!? 15.♘f5 ♚e8 16.♕f4 ♚b6 17.♚g2 ♘xf2 18.e5 was very complex in Giri-Shirov 2014.]

15.♘b3 A good novelty. [15.h3 15...♘xf2 16.♚xf2 ♕xg3 17.♕e3 ♕xf2+ 18.♕xf2 ♚e8 with an unclear position. Barbot-Gozzoly 2014]

15...a5 [15...♚e8 16.h3 b4 might be checked as well.]

16.h3 ♘e5

17.f4!? Entering the forced lines. White could have chosen a positional way as well: [17.♚d1 17...♚e7 18.♕g5 a4 19.♘d4 ♚fd8∞; 17.♕h6 I prefer this move. 17...♚e8 18.♚ad1 a4 19.♘d2 and I think White should be able to claim an advantage in this line.]

17...♘c4 [After 17...a4 18.♘d2 ♘ed7 19.e5 ♘xe5 20.fxe5 ♕xe5 21.♘de4 Black definitely doesn't have enough for the sacrificed piece.]

18.e5 a4 Freeing the c5 square.

19.♕xc4 bxc4 20.♘d2 ♕c5+ 21.♚h2 ♘d5

22. ♖de4 Going for the attack. [Of course after 22. ♖xc4 22... ♖xc3 23. bxc3 ♖a6 Black has good compensation.]

22... ♖d4? Very risky and wrong. The f6 square should be defended: [22... ♖e7! 23. f5 ♖c8 (23... a3 is also an option.) 24. f6 (24. fxg6 24... fxg6 25. ♖h6 ♖f5 White's attack is over.; 24. ♖h6 24... ♖xf5∞) 24... ♖b4 25. ♖d2 (25. ♖d2? 25... ♖e8±) 25... ♖d7 with unclear play.]

23. ♖xd5 cxd5 24. ♖f6+ ♖h8

25. ♖d2!! A very strong move, heading to h6 with tempo.

25... ♖b6? [25... ♖c5 would maintain some hope thanks to the following great defensive idea: 26. f5 ♖e8 (26... ♖a6 is deadly met by

27. b4!! A prophylactic move! (27. ♖h6 27... ♖xf6 28. ♖g5 ♖b6!! lets black escape; 27. ♖xh7 This human move leads to a better position for White, but with counterplay. 27... gxf5 28. ♖xf8 d4) 27... ♖e7 (27... axb3 28. ♖h6 ♖xf6 29. ♖g5+- is completely lost.) 28. ♖b2 ♖xf6 29. exf6 gxf5 30. ♖d4 and Black will be destroyed on the dark squares.) 27. ♖xe8 (27. ♖h6 27... ♖xf6!! Again this strong queen sacrifice to attack the king. 28. exf6 ♖e2+ 29. ♖f2 ♖xf2+ 30. ♖g1 ♖xf5+ 31. ♖e3 ♖f8=+) 27... ♖xe8 28. ♖e2± Somehow the material advantage should prevail.]

26. ♖d7 ♖a7 [26... c3 27. bxc3 ♖b5 28. ♖a3+-]

27. f5+- Black is under big attack and will soon also have a huge material deficit.

27... ♖g8 28. ♖h6 gxf5 29. ♖f6+ ♖g7 30. ♖h6 ♖g8 31. ♖xf5 ♖a6 32. ♖xg7+ ♖xg7 33. ♖d1 The last piece joins the action.

33... a3 [33... ♖xb2 34. ♖xa6 ♖xa6 35. ♖xd5+- with an hopeless endgame.]

34. bxa3 c3!? Black finds some counterplay.

35. ♖xd4 c2

36. ♖f1 is good enough but it was more precise and prettier to finish the game with [36.e6! 36...c1=♚ (36...♙xe6 37. ♙xe6 fxe6 38. ♖f8+ ♖g8 39. ♖f1+-) 37. ♙d8+ ♖g8 38. ♙xg8+ ♙xg8 39.exf7+]

36... ♙e2+ 37. ♙h1 ♙a6 38. ♙d8+ White is just winning some time on the clock.

38... ♖g8 39. ♙f6+ ♖g7 40. ♖df4 d4 [40... ♙d3 is also lost: 41. ♙c5 ♙h5 42. ♙g2 ♙xf1+ 43. ♖xf1 ♙d1 (43... ♙e2+ 44. ♙f2) 44. ♙b3+-]

41. ♙d8+ ♖g8 42. ♙f6+ ♖g7 43. ♙c5! It is all over...

43... ♙c4 44. ♙d8+ ♖g8 45. ♙f6+ ♖g7 46. ♙d8+ ♖g8 47. ♙xd4 ♖xg3 48.e6+ f6 49. ♙xf6+ ♖g7 50. ♙f8+ ♖g8 51. ♙xg8+ ♙xg8 52. ♖g1+ ♙h8 53. ♖f8# 1-0

- Vachier-Lagrave, Maxime (2744)

FIDE World Cup 2015,
2015.09.21

GM Csaba Balogh
Best rating: 2672

We are facing a very interesting endgame. Black is a piece up, but he has only two pawns left against the four. However they are ideally placed, White can only exchange one pair of pawn with f5, but the h5 remains on board.

47...♖c6! A difficult decision! Vachier-Lagrave correctly evaluates that forcing the trade of the rooks leads to a winning endgame, but it requires very subtle technique.

48.♙xc6 White has no choice. [48.f4? opens the king's position and allows Black access to the h4 pawn after 48...♖c2+! 49.♖g3 ♖c3+ 50.♖g2 ♜f3--+]]

48...♜xc6 49.f4 White could have brought his king to e3 first, but he has to play f3-f4 at some point anyway and it is always going to be a transposition.

49...♖f7 50.♖f3 ♖e6 51.♖e3 ♖d6

52.♖d2! White finds the most tenacious defense! He correctly realizes that the position with the white king on d3 and the black one on c5 is a zugzwang, therefore he sidesteps this square. [On 52.♖d3 52...♖c5 White cannot touch his pawns, because e5 gives the f5 square for the knight, while f5 allows the knight to occupy e5. 53.♖e3 (The king can never go too far from the h4 pawn, because it loses to 53.♖c3 53...♜d4-- and Nf3 next.) 53...♖c4 White is in zugzwang again. The king goes to d4... 54.f5 ♜e5 55.♖f4 ♖d4 56.fxg6 ♜xg6+ 57.♖f5 ♜xh4-- White has no access to the h5 pawn because of his own pawn on g5.]

52...♖c5 53.♖d3 ♖b4 The most natural move. Black tries to squeeze the king, however it does not bring success. A few moves later, Black already finds the right path towards the win.

54.♖d2! White continues defending perfectly. We have already seen that White is lost if it is his move with the kings on e3 and c4, therefore he tries to give the move to his opponent. [54.♖e3 54...♖c4-- See the line 52.Kd3.; 54.f5 loses to 54...♖c5 55.fxg6 ♜e5+--]

54...♖c4 55.♖e3 ♖c5! Black admits his mistake and searches for another plan... [The thematic way to squeeze the

king was 55...♔c3 however it allows White to push 56.e5! and the point is that whenever White plays e5, Black should be able to play Kd5, otherwise the white king gets to e4. 56...♔c4 57.♕e4 ♖e7 Otherwise White plays f5. 58.e6 ♔c5 59.♕e5 ♔c6 60.♕f6 ♔d6 61.♕f7 Black is in zugzwang and loses his g6 pawn.]

56.♕d3

56...♞d8! Black realized that with the knight on c6, he cannot make progress. The question is where to drive the knight before starting the same squeezing technique like it happened unsuccessfully before...

57.♕e3 ♞f7 58.♕d3 ♞d6 This is the ideal placement of the knight! White's rescue with e5 like it happened in the 55... Kc3 line does not work anymore. The only saving attempt remains to push f5. **59.♕e3 ♔c4 60.f5**

60...♞e8!! The only winning move, which was correctly foreseen by Vachier-Lagrave. The point is that the knight stands between the white pawns in any case. If he takes on g6, the knight goes to g7 while in case of f6, Nc7-e6 creates a perfect blockade. White will have no access to the h5 pawn and the black king will collect all the pawns one by one. [60...gxf5 spoils the win after 61.♕f4! fxe4 62.g6 ♞e8 63.♕xe4 and the king goes to the h5 pawn. 63...♞g7 64.♕e5 Kf6 is coming next.]

61.fxg6 [61.f6 61...♞c7 62.♕f4 ♔d4—+; 61.♕f4 61...♔d4—+]

61...♞g7 62.e5 Another clever attempt, but today nothing helps, Black simply plays the endgame perfectly. [If White decides to stay with 62.♕f4 62...♔d4 63.♕f3 ♕e5 64.♕e3 the winning method is the following: 64...♞e6 65.♕f3 ♞d4+ 66.♕e3 ♞c6 67.g7 ♞e7 After provoking g7, the black king gets access to it. Another important factor is the fixed situation of the h4 pawn. Black can attack it in one move with Ng6. 68.♕f3 ♕e6 69.♕f4 (69.g6 69...♕f6—+) 69...♞g6+ 70.♕g3 ♕f7—+ After taking on g7, Black goes for the e4 pawn and collects the rest as well.]

62...♔d5 63.♕f4 ♔d4 64.e6

64...♔d5! The last accuracy! The path of the white king had to be blockaded, the knight must stay on g7. [64...♞xe6+?

65.♔f5 ♖g7+ 66.♔f6]

65.e7 ♔e6 66.♔e4 ♔xe7 67.♔e5 ♔e8 68.♔d5 [68.♔f6 68...♔f8 White must retreat. 69.♔e5 ♔e7 transposes to the game.]

68...♔d7 [White resigned in view of 68...♔d7 69.♔e5 ♔e7 70.♔d5 (70.♔e4 70...♔e6 71.♔f4 ♖f5—+) 70...♖f5 and Black takes on h4 as the king stops the g-pawn. With this nice endgame victory, Vachier-Lagrave eliminated Wesley So and advanced to the final 8 players.] **0-1**

**(15) Wei, Yi (2734)
- Svidler, Peter (2727)**

FIDE World Cup 2015(5.6),
2015.09.25

GM Arkadij Naiditsch
Best rating: 2737

Svidler was dominating this match throughout all the games, but in the first 5 games he could not reach more than a draw. With the crucial win which we are going to see, the Russian progressed into the semi-final of the World Cup.

41.f5!? An interesting choice! It is clear that White is fighting for a draw, but the bishop pair is very strong so Wei Yi clearly has good chances to reach it. With the f5 move, the Chinese player decides to open the position even more and exchanges some of the pawns.

41...exf5 42.exf5 [Another interesting option was 42.♕g5+ 42...♔e8 and now maybe the slightly strange looking move 43.♕c4!? (43.exf5 43...♖xf5 and Black is holding things together.) 43...♖c6 (We can see White's threat after 43...fxe4? 44.♕xd8 ♔xd8 45.♕e6 and the knight is lost.) 44.♕f7+ ♔xf7 45.♖xd7+ ♔e6 46.♖xc7 ♖e5 47.exf5+ ♔xf5 48.♕f4 and

because of the little material left on the board, White has decent chances to save the game into a draw.]

42...♖f7 Black is defending against Bg5+.

43.♗f4 Attacking the c7 pawn.

43...♖de5 It is very important for Black to keep both connected pawns alive, as one would clearly not be enough to win the game.

44.♖c1 [More logical was 44.fxg6 44...hxg6 45.h4 Trying to exchange another pawn by playing h5.]

44...c6 45.♗e3 b5 Black continues to do everything he can to keep both passed pawns alive.

46.♗c5+ ♖f6 47.fxg6 hxg6 48.♖f1+ ♖e6 49.♗d1 ♖g5 The knight will be out of the game for some time on g5. [49...♖d6 followed by Ndc4 looks more solid.] **50.♗b3+ ♖c4**

51.♖g2? This is a big mistake... [51.♗b4! would lead to a draw as in many lines the bishop on c5 is under attack. 51...♖a7 52.h4 The black knight has no good squares. 52...♖e4 53.♖e1 ♖d5 54.♖d1+ ♖e5 55.♖e1 and Black doesn't have anything better than to agree to a draw.]

51...♖a8 52.♗b4 ♖e4 53.♖e1 ♖d5 The black king is starting his march into the white defenses.

54.♖d1+ ♖e5 55.♖e1 ♖d4 56.♖d1+ ♖e3

57.♖c1? After this move all of White's hopes are gone. [White would still keep some chances after 57.♖e1+ 57...♖d3 58.♖d1+ ♖cd2 and 59.♗f7 The g6 pawn is under attack. 59...♖c2 60.♖e1 ♖a4 61.♗f8 and it is still unclear if the position is winning or not...]

57...c5! Svidler doesn't miss his chance to get into the semi-final!

58.♖e1+ ♖d4 59.♖d1+ ♖e5 The black pawns are rolling!

60.♗xc4 bxc4 61.♗e1 ♖a3 There is no more hope for White, as Black wants to play Rd3 followed by c3 and Kd4 next.

62.♖f1 ♖a2 To cut the king on the first rank is always a good idea! [62...♖d3 63.♖e2 ♖d4 would also be enough to win the game.]

63.♖c1 ♖d4 64.♖d1+ ♖e3 White is just hopeless against the

upcoming c3 move.

65. ♖c1 ♔d3 66. ♖d1+ ♘d2+ 67. ♙xd2 ♖xd2 68. ♔e1

68...c3 A very nice win by Svidler, but also a big pity for the just 16-year old Wei Yi who played a great event with a lot of tough matches! **0-1**

Golden knowledge. Drawing in winning positions

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

In chess loss of control is a typical thing, especially during or after time trouble. Sometimes players resign in a drawn position as they don't know the theoretical way to achieve the draw. It mostly happens in endgames, but there are many cases of offering draws in winning positions.

The reasons are

- 1) Bad knowledge of theoretical maneuvers
- 2) Overlooking tactical ways of realization
- 3) Wrong calculation of some lines

Let us take a look at some of the most interesting and typical cases.

(16) Gelfand, Boris-Henriquez Villagra, Cristobal

Chess and the City. Where the eagles dare... Part I

WGM Elisabeth Paetz

Best rating: 2493

In my previous newsletter I already mentioned that my next trip would lead me to the country of eagles - Albania.

As you know the connection between me and Albania is not strictly chess related, but connected with my freshly wed husband, who happened to be born in Tirana, the capital of the country. The driving force to my new trip to Albania is indeed my second marriage, (un)surprisingly to the same guy. However as is the case with every chess professional, the royal game is always sneaking in my activities and I can proudly say that the average rating of my guests will around 2400.

It is also relieving that adding my rating or that of my husband would not lower this average...

That said, already from the first day, the main difference between the German and the Albanian wedding struck me immediately. The German wedding had a schedule based on specific times, whereas the Albanian one has a schedule based on...parts of the day. For example, what in Germany would be an appointment with Herr and Frau XY at 10am becomes in Albania a meeting with some friends or relatives

in the morning, and mind you, the definition of morning can easily include early afternoon as well. Fortunately, I got a very tough training in Italy to be able to cope with the shock. The second difference is orientation. In Germany the most important information needed to move from point A to point B is the address of the latter. In Albania the address is mostly useless and you should better know the names of some arbitrarily "important" bars or clubs in the surroundings which will be precious to eventually guide your driver to the right destination. This lesson came after the severe mistake of entrusting a taxi driver only with the name of our hotel and its address. This lack of clarity on our part resulted in a 20 min trip for a 500 meters distance (it was raining heavily and going by foot was not an option). After several stops accompanied by harsh insults profused by our driver against random passerbies (including a policeman) "guilty" of not knowing themselves the route to the hotel, we finally managed by pure chance to complete this titanic mission. To underline our mistake the driver also tried to charge us with an extra fee, maybe because we had forced him to insult more people than he expected for the evening.

So the take home message from my first day in Tirana is - get to know the names of the pubs and clubs in the surroundings quickly- and while studying the pubs give a try to the qofte and dhalles, they are delicious!

Editorial Preface

After more than 20 days of high level and very exciting chess, we are finally in the final of the FIDE World Cup 2015 in Baku. The finalists are Sergey Karjakin and Peter Svidler. Both Russian players are from the current national team, but from two very different generations. Peter is close to 40 and Sergey is just in his middle 20s.

Both qualified with hard fights, but especially Karjakin's match against Eljanov was a test of nerves.

Who is now the favorite to win the World Cup?! It is hard to say... Karjakin is younger but seems to be very tired, and Svidler already has a lot of experience of being in the final and even winning it once.

Now that we know that Svidler started the mini match out of 4 games with a nice victory, his chances are clearly better to make the needed 1.5 points in the next 3 games to get the title and the nice prize money of 120.000\$ as a winner.

Both players were definitely also relieved after getting into the final stage because it guarantees them qualification for the Candidates Tournament in 2016.

Anyhow, we can expect Karjakin to do all he can to come back in the match during the next 3 games!

There are a few other big events starting soon, like the Poker Stars Isle of Man tournament (which begins on Saturday) or the FIDE World Rapid and Blitz Championship in Berlin, which is to begin on the 9th of October.

For now we hope you enjoy the current issue of Top GM Secrets!

- **Karjakin, Sergey (2762) [A08]**

FIDE World Cup 2015(7.1),
2015.10.01

GM Arkadij Naiditsch
Best rating: 2737

We are in the final of the World Cup 2015 in Baku and we see a fight between 2 Russian players who are already very happy because of the qualification for the Candidates and a nice prize money that is awaiting both of them. But still, to win a World Cup is something very special so we can expect a huge fight. The mini match is out of 4 classical games, and in case of a tie, tiebreaks will be played in shorter time controls. But let's come to the current game. After a rather unambitious opening Black seemed to have comfortable play, but in fact the position was very tricky. With very dynamic play Svidler managed to put a lot of pressure in the center and in the end the game very quickly ended in his favour. We are going to see a very nice and clean win by Svidler.

1.♖f3 ♜f6 2.g3 Svidler is one of the few players who still enjoys playing the Reti with White. But Karjakin is also very experienced in it and even plays it from time to time himself.

2...d5 3.♗g2 e6 This modest 3...e6 is just a try to get into a Catalan over a different move order. Other main moves are 3...Bg4 or 3...g6.

4.O-O ♜e7 5.d3 [5.d4 5...O-O 6.c4 and we are back into the Catalan.]

5...O-O 6.♘bd2 White is preparing to play e4.

6...c5 7.e4 ♜c6 This position is also nothing new. It appears more often after 1.e4 c5 2.Nf3 e6 and 3.d3 after which White develops the bishop on g2 and we are back to the current position.

8.♝e1 Quite a tricky move by Svidler, who is waiting to see what Black is going to do next. [The usually more often played 8.e5 8...♘d7 9.♝e1 b5 leads to a very unclear fight, where White is playing with a Nf1-h4-N1h2-Ng4 plan and Black is starting the rush on the queenside.]

8...b5!? An interesting reply! [In case Black would hurry to reload the center with 8...dxe4 9.dxe4 e5 White would keep some advantage, playing some sort of KID with a few tempos up. 10.♘c4 ♜c7 11.♘e3 With nice play for White.]

9.exd5 ♜xd5 I'm not sure that this is the best move. [9...exd5 looks more solid and actually there were many games in this position where White did not manage to get anything out of the opening.]

10.♘e4 A slightly strange move in my opinion. [I think White could have tried to be better after 10.c4 10...bxc4 11.dxc4 ♜b6 12.b3 (It is too early for 12.♘e5 12...♘xe5 13.♗xa8 ♜d3 and it is Black who is playing for an advantage now.) 12...♜c7 13.♗b2 and because of his better pawn structure I see White

as favorite here.]

10...♟b7 Now Black is fully developed and I don't see any reason why White should be having any opening advantage here.

11.c3 A move like c3 is clearly a prophylactical choice to cover the b4 and d4 squares in the future.

11...a6 looks very solid, but is a bit passive. [Why not play 11...♞b6 with the idea of putting a rook on d8.]

12.a4

12...b4?! This is an inaccuracy. Karjakin doesn't feel the danger that is in this position. [An easy move like 12...h6 would guarantee Black comfortable play.]

13.♟g5! An excellent move! Svidler feels that Black's center is starting to shake.. . White's idea is simply to create play on the c-file by playing Rc1.

13...f6 Another very risky choice. [More solid was 13...h6 14.♟xe7 ♞xe7 15.♞c1 bxc3 16.bxc3 ♞ab8 and maybe White is already a bit better, but Black's position is still very solid.]

14.♟d2 e5 15.♞c1 Now Black needs to be very careful! Svidler is not only planning to play cxb4 somewhere, but also Qb3 or d4. This is often the problem of having an advanced pawns in

the center: it is great in case it is possible to keep them solid, but it can be a big problem when everything is falling apart.

15...♞f7 looks like a solid move, but Black probably had better options to prepare against the d4 push.

16.d4! Here we go!

16...bxc3 Now that the b-file is opened, the bishop on b7 is going to "hand" all the way. [It was better for black to keep the b-file shut. 16...cxd4 17.cxd4 exd4 But still White's position is clearly very promising. 18.♟c5 ♟xc5 19.♞xc5 With nice play for White.]

17.bxc3 cxd4 18.cxd4 ♟xd4 [Not better was 18...exd4 19.♞b3 (19.♟c5 19...♟xc5 20.♞xc5 ♞d6 21.♞xd5 ♞xd5 22.♟g5 also looks very interesting for White.) 19...♞b8 20.♟fg5! A small but pretty tactic. 20...fxg5 21.♟c5 and it seems like Black's position is just falling apart.]

19.♟xd4 exd4 20.♞b3 Now we can see how nicely coordinated the white pieces are and that Black is in big trouble.

20...♞b8 Not a nice move to make- but what else to play?!

[In case of 20...♔d7 21.♖c4! this simple attack on d4 is just deadly. 21...f5 22.♖b1 and it is hard to see how Black should hold here...]

21.♖b1! A great move by Svidler! The pin on the b-file will now stay forever.

21...♔d7 22.♖ec1 Peter is playing moves like 22. Rec1 almost instantly, feeling that it is the right choice- and in fact it is probably the strongest move White can play in this position. Black has no good defence against the upcoming Nc5.

22...♔e6 This move is losing, but the position is close to being lost already anyway.

23.♘c5 Of course!

23...♙xc5 24.♖xc5 ♖d8 The knight on d5 was hanging.

25.♙a5 ♖d6 26.♔c4 and now Rxb7 is the threat. The game is over.

26...♘c3 White is a full piece up now. [26...♙a8 of course doesn't help: 27.♖b8+ ♖f8 28.♖xf8+ ♔xf8 29.♖c8+ followed by Rxa8.]

27.♖xb7 ♔e1+ 28.♙f1 ♘e2+

29.♔xe2 and being 2 pieces down Karjakin decided it was time to stop the suffering. A nice dynamic win by Svidler which came almost out of nowhere, and a great example of how a position can turn from a very safe one into an almost losing one with just a few "normal" moves. **1-0**

(2) Giri, Anish (2793) - Svidler, Peter (2727) [C92]

FIDE World Cup 2015(6.1),
2015.09.29

GM Csaba Balogh
Best rating: 2672

We are in the semifinals of the World Cup. Giri was showing outstanding performance throughout the entire tournament with the white pieces and he had huge confidence to outplay Peter Svidler in the extremely complex Ruy Lopez middlegame. However, Svidler turned out to be the one, who is more familiar with the ideas and he successfully organized his counterplay on the queenside, before the attack could have broken through...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1 b5 7.♙b3 O-O 8.c3 d6 9.h3 The old main lines of the Ruy Lopez are recently slightly disappeared from the highest level, but hopefully some games like this one will bring it back to the practice.

9...♙b7 10.d4 ♖e8 The so-called Zaitsev variation.

11.♘bd2

11...exd4 This is the modern development of the theory. Such

moves in the past has never come into consideration, because everybody respected the center (rightly so). However the computers are changing the general understanding and after making such an antipositional move, they start to defend Black's position. As we will see, we soon reach an unbalanced middlegame, where both sides have their chances to outplay the opponent. [11...♙f8 is the beginning of the old main lines, where White has a wide range of choice.]

12.cxd4 ♘d7 After giving up the center, Black is forced to put pressure on the d4 pawn as soon as possible, otherwise the exd4 move makes no sense at all.

13.♘f1 White accomplishes the standard Spanish manoeuvre.

13...♘a5 14.♙c2 ♙f6 Black is going to push c5 next move forcing some action in the center. He either takes on d4 after which all his pieces start to participate in the game or White pushes typically d5 (closing the b7 bishop and grabs space advantage), but it gives up the e5 square, opens the diagonal of the dark squared bishop and allows the a5 knight to join into the game. This is the concrete point of this new setup with 11...exd4.

15.♖b1 Played by Giri without thinking. A common plan in the Spanish. White prepares to push d5 after c5 and intends the shut out the a5 knight from the game with b3. The

alternatives are: [15.♘g3 15...g6 Black prevents Nh5 first and will follow his plan with c5 next.; 15.♘h2 is perhaps the most natural with the idea of playing Ng4 and now on g6 in comparison to the 15.Ng3 line, he has Ng4 Bg7 Nh6! at his disposal. However Black finds his counterplay here as well with 15...c5 16.♘g4 cxd4 17.♗xd4 ♙xd4 18.♙xd4 ♖c8 with a very concrete position, but practice shows, that Black gets strong counterplay in all lines.; Just a few month before Svidler already employed this opening. That game continued with 15.♙f4 15...♗f8 16.♘g3 ♗e6 17.♙d2 ♗c4 18.♙c3 c5 again with counterplay.]

15...c5 16.d5 ♗c4! A necessary manoeuvre, otherwise the knight is going to suffer in the entire game at the edge of the board after b3.

17.b3 ♗ce5

18.♗h2 We are still following some games. Only one pair of pawns are traded and the position is full of subtle plans for both sides. The last move is another typical and principled plan. White has space advantage and should aim for keeping the pieces on board. By exchanging pieces he would give more options for maneuvering.

18...♗g6 19.♗g3 ♙c8 Black improves his worst piece. After the structure got fixed in the center, the b7 bishop got out

of the game. In the last 2 moves, White was heading with his knights towards g4 and f5 and Black anticipates this plan by preparing to take one of them. [19...♙g5 was also in the spirit of the position. Black eases his position by trading pieces and in the same time he tries to establish control over the dark squares. 20.♗f5 ♙xc1 21.♖xc1 ♗f6 Bc8 next with counterplay.]

20.♖f1 Somehow White gets confused from this point. He has several plans at his disposal. Now he intends to launch an attack with f4, but then in the next moves he switches to other ideas without being in harmony with each other. [On 20.♗f5 20...♗b6 just like in the game. The knight supports well the counterplay on the queenside from b6.]

20...♗b6 21.♗g4 [On 21.f4 21...b4! followed by a5-a4 and sometimes even Ba6. Actually the white center looks very dangerous, but it is difficult to make progress with it, because Black controls perfectly the e5 break, while f5 allows the knight to occupy an excellent outpost on e5.]

21...♙xg4 22.hxg4 h6 Preventing g5 just in case. It was not threatening yet, I believe Black could have also started with b4-a5, but the move is useful anyway.

23.♗f5 [After h6, I thought a plan with f4-g5 could be more dangerous, but White cannot do it at once, because of Bd4 check followed by Qh4. If he prepares with 23.♙e3 Black can simply continue his plan with 23...b4 24.f4 a5 a bit strange, but actually it is similar to the 21.f4 b4 line, that it all looks beautiful for White, but how to make progress with the attack?!!]

23...♗e7! Well, it is better to get rid of such knights. [On 23...b4 White was probably intending to play 24.g3 followed by Kg2, Rh1 and some sacrifices on h6.]

24. ♖e3

24...b4! Black just starts his counterplay on the queenside, but within few moves he will be already there. At first sight, this a5-a4 plan does not even look dangerous, but the opening of the a-file gives many extra options for Black. White cannot oppose on the a-file, because the f6 bishop controls the long diagonal.

25.g3 a5 26. ♖g2 a4 27.bxa4 I don't like this move, because it opens the a-file anyway and it just helps the b6 knight enter to the game through a4-c3. [Even after 27. ♖h1 27...axb3 28.axb3 ♖a2 Black seems to be fine, maybe even more than that.]

27...♖d7 Black wins back the pawn.

28.♖d3 White pinned his hopes to this move, he is threatening with e5 and a decisive check on h7, but Black simple prevents it...

28...♗g6! The b1-h7 diagonal is safe! The concrete threats are parried and Black is coming with Na4-c3.

29.♗f5 ♗xa4 30.♗xa4 Otherwise Nc3, but by giving up his light squared bishop, White loses a huge potential attacker.

30...♖xa4 31.♖h1

31...♗e7! Yet again! Just like in the 23rd move, Black wants to get rid of the f5 knight. He had to leave for a while until White was threatening with e5, but after the light squared bishop is gone, Black can initiate the favorable exchanges again. [On 31...♖xa2 32.g5! hxg5 33.♖f3 was the plan.]

32.g5 Kind of desperation! White has already lost the fight positionally, his only chance is to find a break through on the kingside. [32.♖f3 32...♗xf5 33.gxf5 ♖xa2 34.♖g4 ♖f8 Black simple walks away. White cannot create any serious threats.]

32...hxg5 33.♗e3 [If White tries 33.♖f3 33...♗xf5 34.exf5 ♖xa2 35.♖h5

35...♖xf2+! wins in a nice way (The simple 35...♖f8—+ is also good. White has only one check.) 36.♖xf2 ♖xf5+ 37.♗f4 (37.♗g2 37...♖c2+ 38.♗f1 ♖d3+ 39.♗g2 ♖e2+ 40.♗h3 ♖f5+

41. ♖g4 ♗h7+—+) 37... ♖c2+ and the b1 rook falls with check.
38. ♖f3 ♗e2#]

33... ♖xa2 Black is already materially ahead. He keeps all his positional triumphs he had before and White is very far from any threats. The game is basically over.

34. ♕d2 [34.e5 just drops further material, because after 34... ♕xe5 35. ♖h7+ ♖f8 36. ♖h8+ ♗g8—+ Black is completely safe!]

34... ♗g6 35. ♗f5 ♗e5 36. ♖e2 g6 37. ♗h6+ ♖g7 38. ♗f5+ ♖g8 Completing the timetrouble.

39. ♗h6+ ♖g7 40. ♗f5+ gxf5 41. ♖h5 ♗g6 White resigned as he soon runs out of checks! Very impressive victory and understanding by Svidler! **0-1**

(3) Wei Yi (2734)

- Svidler, Peter (2727) [A01]

FIDE World Cup 2015(5.6),
2015.09.25

Wei Yi won many unclear matches in the World Cup and was stopped in the quarter finals by Svidler, losing the first game where he had some advantage after 5 difficult draws.

1.b3 The Chinese prodigy had problems in the openings in this match, so he correctly decided to change his first move.

1...e5 2.♘b2 ♘c6 3.e3 ♘f6 4.♘b5 ♘d6 5.♘e2 [5.♘a3 is more popular but Black has many good weapons at his disposal.]

5...O-O 6.O-O ♖e8 Changing from the game Wei Yi-Karjakin, where Black played 6...a6. **7.♘g3**

7...a6 I don't think this is precise here. [7...♘f8 is more logical and if White wants to fight for an advantage, an interesting sequence is: 8.f4 exf4 9.♖xf4 ♘e5! 10.♖f5 a6! 11.♘xe5 ♖xe5 12.♖xe5 axb5♖ With full compensation thanks to the oddly placed rook.]

8.♘e2 ♘f8 [8...b5!?]

9.c4! The white pieces are nicely placed for this move.

9...d5 10.cxd5 ♘xd5 11.♘c3 ♘e6 12.♖c1 ♘db4?! Not an easy position to play in a rapid time control. I would fight for the e4 square with: [12...♘xc3!? 13.♘xc3 f5∞]

13.d3 ♖d7 Here it seems necessary to fight for the control of c5 by playing [13...a5!? 14.a3 ♘a6]

14.a3 ♘d5

15.♘ce4+= White simply takes the bishop pair after the loss

of two tempi by his opponent.

15...a5 16.♘g5 ♘b6 17.♗xe6 ♜xe6 18.♙g4 ♜d6 19.♜c2 ♘d5 This knight just moved too many times!

20.♞fd1± ♞ed8 21.♙f3 g6 22.♘e4 ♜e6

23.♘c5?! White should keep the pressure and not go for the second bishop. Some improving moves like Qc4, g3, Kg2, h4 and waiting for a good opportunity to open the position was better.

23...♙xc5 24.♜xc5 ♞a6! This strong rook maneuver, putting some pressure on the b3 pawn as well as parrying the Qb5 threat was probably missed by White.

25.♜c4 ♞b6 26.g3?! A prophylactic move. Instead, 26.Ba1 followed by Rb1 was needed.

26...♘de7!

27.♜xe6 Losing all the remaining edge, but the only way to keep an advantage was too difficult to find with little time on the clock. [27.♞c3!! += and if Black tries to repeat moves with 27...♘d5 28.♞c2 ♘de7 29.d4! is strong now that the bishop on b2 is protected by the rook.]

27...fxe6∞ 28.b4 [28.♙xc6 28...♘xc6 29.♞c3 e4! is very ok for Black.]

28...axb4 29.axb4 ♘d5 30.♙c3 ♞d7 31.d4 [31.♙xd5 is the other way to play for equality.]

31...exd4 [31...♘xc3!? It is maybe a good idea to swap one bishop. 32.♞xc3 ♘xb4 33.dxe5 ♞xd1+ 34.♙xd1 ♘d5 35.♞c1 c6 The passed pawns should ensure Black's advantage.]

32.♙xd4 ♞xb4 33.♙c5?! The wrong diagonal. The bishop would be better placed on a1.

33...♞a4 34.♙e2 ♞a5 35.e4 ♘f6 36.♞xd7 ♘xd7 37.♙e3 ♙f7+= 38.♞b1 ♘d8 [38...b6 immediately is more logical.]

39.f4 On the verge of collapsing, White chooses the right path and goes for opening the position.

39...b6 40.♞d1 ♙e7 41.f5! exf5 42.exf5 ♘f7 43.♙f4 ♘de5 44.♞c1 White is provoking the pawns to advance. Much more natural is [44.fxg6 44...hxg6 45.h4 with good drawing chances.]

44...c6 45.♙e3 b5 46.♙c5+ ♚f6 47.fxg6 hxg6 48.♖f1+ ♚e6 49.♙d1 ♜g5? The rook should be improved first. 49....Ra8 would have given Black a big advantage.

50.♙b3+ ♜c4

51.♚g2? Missing the chance: [51.♙b4! 51...♖a8 52.♖e1+ Black has some problems now to stop the checks: 52...♚d5 53.♖d1+ ♚e5 54.♖e1+ ♚d4 (54...♜e4? 55.♙c2+-) 55.♖d1+ ♚e4 56.♖e1+ ♜e3 A try not to repeat moves. 57.♚f2! ♜h3+ 58.♚e2 and somehow the black pieces completely lost coordination.]

51...♖a8 More precise is [51...♜e4 52.♖e1 ♚d5+ is almost over.]

52.♙b4 [52.♙c2! 52...♚d5 53.♙f2! was still a fight.]

52...♜e4+ Now the black moves play themselves.

53.♖e1 ♚d5 54.♖d1+ ♚e5 55.♖e1 ♚d4 56.♖d1+ ♚e3 57.♖c1? Strange. If White had continued with checks Black would have needed to be precise to conclude the game: [57.♖e1+ 57...♚d3 58.♖d1+ ♜cd2 59.♙f7 c5!? 60.♙xd2 ♜xd2 61.♙xg6+ ♚e2 62.♙h5+ ♚e3+ Black pawns should be faster than White's.]

57...c5—+ It is all over now.

58.♖e1+ ♚d4 59.♖d1+ ♚e5 60.♙xc4 bxc4 61.♙e1 ♖a3

62.♚f1 ♖a2 63.♖c1 ♚d4 64.♖d1+ ♚e3 65.♖c1 ♚d3 66.♖d1+ ♜d2+ 67.♙xd2 ♖xd2 68.♚e1 c3 The junior is eliminated after a tense fight. **0-1**

Endgame section

(14) Giri, Anish (2793)
- Vachier-Lagrave, Maxime (2744)

World Cup 2015,
2015.09.25

GM Arkadij Naiditsch
Best rating: 2737

We are facing a very interesting rook endgame. At first sight, despite the pawn down, Black should hold the draw rather comfortably because of his active pieces and the vulnerable positions of the white pawns. However Giri plays the entire endgame with great resourcefulness, he explores all his chances and manages to convert his advantage.

47.♖c2! Giri follows the very important principle, that in rook endgames the rook should stay behind the passed pawn! This is true for both sides, if it was Black's move, he should also quickly go behind the b-pawn. [47.♖c4 allows 47...♗d2 48.h3 ♗b2 and Black is too active, White cannot make any progress.]

47...♗b5! Not the best place for the rook, but Black could not avoid Rb2 whereafter the pawn must be blockaded. [Black

could have restored the material balance with 47...♗d4 but it lets the pawn run too far after 48.♗b2 ♗xf4+ 49.♕h3 ♗e4 50.b5 ♗e7 51.b6 ♗b7

52.♕h4 We can see the reason why they say, activity in the rook endgames play a key factor. Despite the limited material, Black seems to be hopeless... 52...♕h6 53.♗b5 ♕g6 54.h3 Black is in zugzwang. He either loses his h5 pawn with check or plays 54...f5 but it allows 55.♕g3+- followed by h4 and Kf4.]

48.♗b2 ♕f5 Vachier-Lagrave tries to defend actively, in general this is the right idea!

49.♕g3! White temporarily switches to passivity, but the f-pawn had to be protected. [49.♕xh5 gives Black an f-passed pawn, which will always ensure adequate counterplay. 49...♕xf4+ 50.♕h4 f5=]

49...♕e4 [Black cannot trade his h-pawn for the f, as White is not forced to grab it. Actually it just helps White, because the king wanted to go to c4 anyway. 49...h4+ 50.♕f3]

50.♖b1! Another very clever move by Giri! It gives the move to Black, who again finds himself in a sort of zugzwang. He cannot move his rook as it lets the b-pawn advance and all the other options have a drawback as well. In general, it is very good practical idea to ask ourselves, what would our opponent do if it was his move. We can find many zugzwangs like this.

50...♔d3 [Black still cannot trade his h-pawn for the f4, because 50...h4+ is met by 51.♔g4 and the h-pawn just becomes weak.; 50...f5 with the idea of pushing h4 now is strongly met by 51.♖e1+! ♔d4 52.♔h4 and the black king is cut.]

51.♔f3 ♔c2 Black could not find anything better, than capturing the b-pawn by sending away the rook, but in the same time his king gets too far from the kingside. There will be none to defend the f6-h5 pawns.

52.♖a1! ♖xb4 53.♖a5! We have reached another scenario within our rook endgame. If Black could get back his king, let's say to g7 he could hold the draw even without his pawns, as it is known, that f- and h-pawn in rook endgames is a theoretical draw. However the problem is, that the king is too far and it is going to be cut along the 5th or the 6th rank.

53...♖b3+ [53...h4 looks bad as well 54.♔g4 ♔d3 55.♖a6 and the pawns start to fall.]

54.♔e4 h4 [The critical line would have started with 54...♖h3 55.♖a2+! ♔b3 56.♖f2 ♔c3 57.♔f5 ♔d3 58.♔xf6 ♔e3 59.♖f1 ♖xh2 60.f5 It is very ult to judge, wether this endgame is drawn or winning for White. Actually in a practical game, I would say Black's is in big trouble, but perhaps Black could save this endgame somehow?! 60...h4 (60...♔e2 61.♖a1 ♔f3 62.♔g5 h4 63.f6+- wins.) 61.♔e5! h3 62.f6 and White is winning, because the king is cut along the f-file, he cannot go to support the h-pawn. 62...♖a2 63.f7 ♖a8 64.f8=♔ ♖xf8 65.♖xf8 and Black cannot play Kf3 to ensure the draw... 65...h2 66.♖h8+-]

55.♔f5 ♔d3 [55...♖b6 56.♖a3 ♔d2 57.♖h3 was also bad.]

56.♔xf6 ♔e4 57.f5 h3 Black pins his counterplay to the h2 pawn, but White is able to protect it with his rook and support his f-pawn in the same time.

58.♖a4+ ♔f3 59.♔g5 ♜b5 [59...♔g2 60.♜a2+- followed by pushing the f-pawn.; 59...♜b2 60.f6+- and Black has no time to grab the h2 pawn.]

60.♜a2 ♜b4 [60...♔e4 is met by 61.♔g6! as the pawn cannot be taken. 61...♜xf5 62.♜a4+-]

61.f6 The rest is easy...

61...♜g4+ 62.♔f5 ♜f4+ [62...♜g2 63.♜a3+- wins the h3 pawn.]

63.♔e6 ♜e4+ 64.♔d6 ♜d4+ 65.♔e7 ♜e4+ 66.♔f8 ♜b4 67.f7 ♜f4 68.♜b2 ♜a4 69.♜b6! [The last accuracy! White wins the bridge building method, Black has no time to collect the h2 pawn. Black resigned in view of the following lines: 69.♜b6! 69...♔g2 70.♔g7 ♜a7 (70...♜g4+ 71.♜g6+-; 70...♜f4 71.♜f6+-) 71.♜b2+ ♔g1 72.♔g8+- Great endgame by Giri! My feeling says, that Black should have been able to hold the draw somehow, but it is difficult to suggest where he should have improved his play...] **1-0**

Golden knowledge. Bishop against Knight, inventive fight

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

In chess we have many cases of great Bishop versus Knight fights. There a lot of different, but very typical cases. Many of them are connected to different blockading themes and many are devoted to fighting for the promotion of the pawn. Of course we first have to study what our great predecessors from the 19th century did in this certain area. Then we can check how this knowledge is used in practice by modern players. We see here that with the modern time control with 30 seconds increment, there are a lot of wrong decisions in classical situations.

And my recommendation is simple: study as many typical endgame positions as possible to be ready to handle them in semi-automatic mode during the game!

(15) Gashimov, Vugar-Ponomariov, Ruslan

FIDE World Cup 2011

In chess we have some legendary classical endings, which are appearing from time to time and in such cases top players have to demonstrate knowledge of classics. Nowadays it is more difficult, as we have special time control without adjournments and 30 sec increment. For this reason the importance of studying endgames is obvious. It is interesting to see one recent example of how a top player found a classical maneuver. And if you still have this question- do they know it or do they try to find it during the game? We used to call this process many years ago: to reinvent the bicycle! This position was analyzed 150 years ago!

82.♔h4 ♘f4 83.♖g3 ♕e4 84.♙a1 ♘d3 85.♖g2 ♕e3 86.♖g3 ♘c5 87.♖g2 ♕e2 88.♖g3 ♘a4 Black built the perfect Harwitz position and can proceed with the king to c1 according to the Chekhover maneuver!

89.♖g2 ♘b6 90.♖g3 ♘c4 91.♖g2 ♘e3+ 92.♖g3 ♘d1 93.♖g2 ♕e3 94.♖g3 ♕d2 95.♖f3 ♕d3 96.♖f4 ♕c2 97.♖e4 ♘b2 98.♖e3 ♘a4! 99.♖e2

99...♔c1! Yes, this is the exact position from Chekhover's study, which was first found by Horwitz. Now it is easy.

100.♔d3 ♕b1 101.♔d2 ♖b2 102.♔c3 ♕xa1 103.♔c2 ♖d3 0-1

(16) Loyd, S.

The Chess Monthly, 1860

Incredibly the first time this position appeared was in the analysis of this great composer and it was well before Harwitz!

1.♔d7 [1.♔c6+? 1...♔g1 2.♔h1? ♕xh1 3.♔f1 ♕h2 4.♔f2 ♖g6 5.♔f1 ♕g3 6.♔g1 ♖e5 7.♔h1 ♖g4 8.♔g1 h2+ 9.♔h1 ♖f2#]

1...h2 [1...♖f3+ 2.♔e2 ♖d4+ 3.♔e3 h2]

2.♔c6+ ♕g1 [2...♖f3+ 3.♔e2 h1=♔ 4.♔xf3+]

3.♔h1!! ♕xh1 [3...♖g2+ 4.♔e2 ♖f4+ 5.♔e1]

4.♔f2! The idea has to be conducted correctly. There is always room for wrong decisions. [4.♔f1? 4...♖f3 5.♔f2 ♖d2] **1/2-1/2**

(17) Chekhover, V.

1939

1.♖a5 ♔a8 2.♔c8!! This was found by Harwitz many years ago. There were no endgame databases, so such eminent composers repeated old findings!

2...♔e8 3.♖c4 ♔e7 4.♔b8 ♔d8 5.♖a5 ♔d7 6.♖b7 ♔c6 7.♔xa8 ♔c7 8.♖d6 Exactly, as performed by Ponomarev!! **1-0**

(18) Horwitz, B.

The Chess Monthly @2, 1885

1. ♖b6! ♜c4 [1... ♜a4 2. ♘c6 ♜b3 3. ♘a5+ ♜b4 4. ♘b7 ♜c4 5. ♜c7 ♜d5 6. ♜b8]

2. ♘a6 ♜d4 [2... ♜f3 3. ♘c5 ♜a8 4. ♘b7 ♜d5 5. ♜c7 ♜e6 6. ♘a5 ♜e7 Study Chekhover- it is just a sideline of Gorwitz!]

3. ♘c7 [3. ♘c5! 3... ♜d5 4. ♘b7 ♜e6 5. ♜c7]

3... ♜g2 4. ♘e6+ ♜e5 5. ♘d8 ♜a8 6. ♜c7

6... ♜d5! 7. ♘b7 [7. ♜b8? 7... ♜d6! 8. ♜xa8 ♜c7]

7... ♜e6 8. ♘a5 ♜e7 9. ♜c8 ♜e8 10. ♘c4! ♜e7 11. ♜b8 ♜d8 12. ♘a5 ♜d7 13. ♘b7! ♜c6 14. ♜xa8 ♜c7 15. ♘d6 and it is

Chekhover! 1-0

(19) Harwitz, B.

1885

When the white king is not on c8, then the winning maneuver doesn't exist!

1. ♘c3 ♜a8 2. ♘a4 ♜g2 3. ♘c5 ♜a8 4. ♘b7+ ♜d7 5. ♜xa8 ♜c8 1/2-1/2

(20) Lehmann, Heinz-Stephan, Werner

FRG-ch 02nd, 1953

The after-war generation was not very precise in endgames and in a German magazine this was considered as a DRAW! It was written that everybody has to know how to play such endings! But Ernst Gottschalk from Braunschweig wrote a letter about this mistake. Then there were some long discussions, during which the old analysis of Harwitz was remembered.

1. ♖a1 ♜b2?? [The way to win is simple as classics found it: 1... ♜c5+ 2. ♖e3 ♜b1 3. ♖h8 ♜a4]

2. ♖e3 ♜b1 3. ♖d2 ♜xa1 4. ♖c1 ♜d3+ 5. ♖c2 1/2-1/2

(21) Stein, Leonid-Dorfman, Josif

USSR , 1970

/ There are funny annotations by the legendary Yugoslavian IM Rudolf Maric. First it seems that he does not know which Dorfman plays- it was not GM Josif but the weaker player Cicero, and Maric is also not aware of Horwitz' analysis!

1. ♖f6 ♜d3 2. ♖a1! ♜b2 3. ♖e1 ♜b1 [3... ♜a4 4. ♖e2 ♜c1 5. ♖e1 ♜c5 6. ♖e2 ♜b1 7. ♖d1 ♜d3 8. ♖d2 ♜b2 Nunn, but it is known from Horwitz to Chekhov!]

4. ♖d2! = ♜xa1 5. ♖c1! ♜c4 6. ♖c2 1/2-1/2

(22) Sakaev, K.-Sunye Neto, J.

Sao Paulo , 1991

But the young generation was not better and the same mistakes were repeated!

1... ♜c3+ 2. ♖e3 ♜a4! 3. ♖e2 [A similar win will be achieved after 3. ♖d4 3... ♜b1 4. ♖d3 ♜c5+! 5. ♖c3 (5. ♖d2 5... ♜b3+--+) 5... ♜xa1 6. ♖c2 ♜d3--+]

3...♖b2? [One of the best young GMs of the 90s did not know the correct way... 3...♖c1! 4.♖e1 (4.♖d3 4...♖b1 5.♖d2 ♖b2⊙) 4...♖c5 5.♖e2 (5.♖g7 5...♖d3+ 6.♖e2 ♖b2--+) 5...♖b1 6.♖d1 (6.♖d2 6...♖b3+--; 6.♖g7 6...♖a4--+) 6...♖d3 7.♖d2 ♖b2 8.♖c3 ♖xa1 9.♖c2 ♖d3--+]]

4.♖e3 ♖b1?? 5.♖d2= Now it is a draw!

5...♖c4+ 6.♖d1 ♖a5 7.♖g7 ♖b3 8.♖f6 ♖c5 9.♖g7 ♖d3 10.♖a1 ♖b4 11.♖g7 ♖c2 12.♖d2 ♖a3 13.♖d1 ♖c4 14.♖a1 ♖e3+ 15.♖d2 1/2-1/2

(23) Gerbaus

1920

Few chess players were accidentally developing the same

idea in very concrete situations, forgetting about the invention and the inventor. Everything was known before, but the position was published!

1.♖f3 ♖f4 2.♖h1 ♖g2+ 3.♖e2 ♖h4 4.♖e1 ♖f5 5.♖a8 ♖h4 6.♖h1 1/2-1/2

(24) Prokop, F.

1.p Ceskoslovensky Sach#251 @2, 1930

There were a few brilliant old studies on this subject.

1.♖e5! ♖a8 2.♖b6 ♖b7 3.♖e6! ♖d8 4.♖d6 ♖e8 5.♖c7 ♖g2

6.♖c8! [A second solution was found here, which by no

means reduces the educational value of Prokop's work.
6. ♖c4! 6... ♔e7 7. ♖c8 ♜f3 8. ♜a5 ♜a8 9. ♖c7 ♔e6 10. ♜b7
♔e7 11. ♜d8 ♔e8 12. ♜e6 ♔e7 13. ♜d4 ♔e8 14. ♜f5!]

**6... ♜a8! 7. ♖b8 ♔d8 8. ♜d6! ♔d7 9. ♜b7! ♖c6 10. ♖xa8
♔c7 11. ♜d6 1-0**

(25) Gufeld, Eduard-Smyslov, Vasily

Moscow, 1966

It is very funny that a slightly similar idea happened in this knight endgame...

1... ♜a8 2. ♖b7! [2. ♖xa8 2... ♔c7! (But not the wrongly recommended by Gufeld 2... ♖c8 since after 3. ♜f7 ♔c7 4. ♜d6 is winning, as in our main examples.)]

2... ♜c7 3. ♜c4 ♜a8 [3... ♔d7 4. ♜e3 ♔d6 (4... ♔d8 5. ♜d5 ♜a8 6. ♖c6) 5. ♜d5]

4. ♜e3 ♜c7 5. ♜d5 ♜a8 6. ♖c6!! 1-0

Chess and the City. Where the eagles dare - Part II

WGM Elisabeth Paetz
Best rating: 2493

I'm happy to say that for the second time my "old" husband did not hesitate to marry me once again. The marriage itself certainly went more smoothly than our Albanian-style taxi trip, which I mentioned in my previous newsletter. However, without any obstacles, there would be no unforgettable moments! And again this time there were moments when I just wanted to beam myself onto another planet. Naively I imagined there would not be anything stressful as the entire wedding was organized by my husband's large family, but this is to overlook the proverb "too many cooks spoil the broth". And not only that, but I got involuntarily roped into the prolonged preparations thanks to my dear mother in law. Any hope of being left alone in our hotel room was rudely interrupted by constant demands from her from dawn 'till dusk, which were announced by my husband's ringtone of Mozart's Turkish march, which rather reminded me of a Russian invasion!

Unfortunately, this was just the tip of the iceberg. Albanian weddings are very traditional, and this leads us to my next

crisis - the Albanian wedding outfit.

It was a big fight to actually choose the long beige coat, which is not actually typical for the Tirana region. The initial "skirt" I was supposed to wear reminded me of a huge white balloon which would require just the lightest of puffs to make me fly away. It's hard to say whether it was the Albanian outfit or my first Albanian hairdresser's visit which brought me nearer to a heart attack! It's hard to describe the shock I got when I looked at myself for the first time after an hour of hair and make-up. However many times I opened and shut my eyes, the image wouldn't go away. I barely recognized the creature that was glaring back at me, horrified. Despite the cost being double, maybe his family should have made it clear that I was not attending a vampire show, but instead my own wedding!

Keith and I at my German wedding

Anyway, apart from looking like another person, and being forced into some old and historical dress which at least did not turn out to make me fly, I had a wonderful day! Comparing the two weddings I would even dare to say that the Albanian one was more to my taste, as the whole atmosphere seemed more Eastern style, as opposed to the more modern German wedding. The make-up however was not for nothing, as I may use it to scare off my opponents over the chess board! :) P.S. It is time to give a special thank you again to my dear friend Keith Arkell, who transforms my articles into something which sounds less "Germenglish" and a bit more English.

Editorial Preface

And the winner of the World Cup is Sergey Karjakin! He showed amazing stability and self-control, defending very bad positions again and again and fighting on in seemingly hopeless situations! We can learn a lot from such great fighting spirit!

The final match between Svidler and Karjakin was a very special one. Svidler started with a nice win with White and continued with a very lucky win with Black, where Karjakin was pushing all game long and simply blundered a piece. Now it was a must for Karjakin to win the next 2 games to come back and get into the tiebreak, but how to win a game with Black against somebody as solid as Svidler!?

So, in game 3 the position was quite calm until Karjakin did the only thing he had to do, to push for all or nothing, and it looked as if it was clearly going to be nothing... Svidler had around 5 different ways to win and many more to draw the game, but after blundering move after move he finally "managed" to lose. What a drama! In the 4th game Karjakin made his way to the full point in a long endgame where he was better all the time and finally managed to win- a very nice game to watch.

The tiebreak was similarly dramatic, win-lose-lose-win etc... It was clear that both players were totally exhausted and fighting from the last drop of energy.

In the end, the really "lucky" winner was Karjakin but he did absolutely the best he could, fighting until the very end and taking all the chances he could get. Many congratulations to the once youngest GM in the World!

Svidler also played a great event and can't be too unhappy as he qualified for the Candidates and won a nice amount of money. Congratulations to him too, even if I guess he will be

not able to forget the final day for at least a few weeks, since the victory was incredibly close.

The other big event that is underway is the Isle of Man International Chess Tournament, sponsored by Pokerstars. After 8 rounds, Harikrishna is leading with 6.5/8, followed by a big group of players on 6/8. The last round is going to be very exciting and is definitely worth following.

The World Blitz and Rapid is about to begin with an amazing line-up. Carlsen is the top seed of this spectacular event, which is held in Berlin.

The Millionaire Chess Open is also underway and the Top 3 US Grandmasters are playing: Nakamura, Caruana and So. But actually there are only 5 players over 2700 ELO and then the list of GMs is dropping rapidly.

These are a lot of events for just one week but clearly the main excitement is going to be seen in Berlin. Enjoy!

(1) **Svidler, Peter (2727)**
 - **Karjakin, Sergey (2762) [B53]**

FIDE World Cup 2015(7.3),
 2015.10.03

GM Csaba Balogh
 Best rating: 2672

We are in the third round of the World Cup final. Svidler leads 2-0 and he only needs a draw to win the championship. He played a perfect tournament until this point, but a terrible blunder in this game has brought back Karjakin into the match...It is fair to add, that the tournament was already in progress since almost a month, both players were extremely exhausted which has ruined the quality of their games. Their main aim has been already fulfilled by reaching the final and by this qualifying to the Candidates tournament next year.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♙xd4 Svidler wants to avoid the sharp lines of the Najdorf.

4...a6 [The other option is **4...♘c6 5.♙b5 ♘d7 6.♙d3** followed by **c4**. It leads to the same structure and similar positions like in the game.]

5.c4 This is the point of this setup. White takes space advantage by occupying the center with the pawns. It usually leads to a positional game, where Black has to be accurate to maintain the balance. But of course, draw was not an acceptable result for Karjakin.

5...♘c6 6.♙e3 ♘f6

7.h3 A very useful move to avoid sometimes the disturbing of the queen with **Ng4** and also to prevent a dark square strategy of Black, by fianchettoing his bishop to **g7** and play **Bg4**, trade the knight on **f3** and **Nd7**, playing for the **d4-c5-e5** squares.

7...g6 8.♘c3 ♘g7 9.♙e2 ♘d7 Black has to play on the dark squares, using the only drawback of the strong white center.

10.♖b1 Standard plan in this opening. White already thinks about the ideal development of the **c1** bishop. It should go to **b2** (the queen occupies the other diagonal anyway) to oppose the strong one **g7**. White is going to play **b3** but for this he needs to leave the long diagonal with his rook. [On the direct **10.b3** Black could overtake the initiative with **10...♙b6**]

10...♘de5 11.O-O O-O 12.♖d1 White takes the **d4** square under control and intends to create a weakness with **c5** or just finishing the development with **b3-Bb2**. A very safe a solid position, it is just a dream when you only need to make a draw.

12...♘xf3+ 13.♙xf3

13...f5! Even objectively it is the best, but considering the match situation it is the only chance. Black must play actively to find some counterplay, otherwise he ends up in a long term positional suffering after b3-Bb2. [13...d5 14.♘e2 ♘e6 15.b3+= followed by Bb2 and at some point jump Nd5, with a riskless and comfortable advantage.]

14.exf5 ♘xf5 15.♘e4 ♖d7 16.♘d5! White still wants to develop his bishop to b2, but it did not work tactically. [16.b3? would have dropped material after 16...♘xc3! 17.♘xf5 ♖xf5 18.♖xc3 ♖xb1]

16...♖e6! Prevents Nb6 and forces actions in the center.

17.♘xf5 ♖xf5

18.♘d2! Finally the bishop is on the way to trade the g7. With

the knight on c3 this move did not come into consideration, because it allows Bd4, but now everything is under control.

18...♖ae8 [18...♘d4? loses to 19.♖xd4! or 19.Nxe7 is also good. 19...♘xd4 20.♘xe7+ wins a pawn.]

19.♘c3 The position is getting simplified. White has no weaknesses, Svidler had all the reasons to be satisfied.

19...e6! Black uses the moment, that the knight has to be misplaced a bit. Bxg7 does not work because of the intermediate move exd5 and otherwise the knight cannot retreat to a safe square (e3 or c3), has to get a bit out from the game.

20.♘b6 d5! Very well played! Karjakin wants to create a passed pawn with d4, which could let him to grab the initiative. A critical moment for White, it is easy to lose the thread now. He must pay special attention to his knight on b6, but Svidler manages to deal with it... [After the passive 20...♖d8 21.♖e1+= and Rbd1 next, White occupies both opened files and puts pressure on the backward pawns.]

21.♘xg7 ♖xg7

22.♖c5! Strong reaction! White allows d4, but only in a cost of exchanging the queens, which leads to a drawish endgame. [It was tempting to initiate further simplifications,

but Svidler correctly avoided it, because 22.cxd5?! 22...exd5 23.♔d2 d4! Suddenly all the black pieces are very active (after the exchange on d5, the e8 rook also takes part in the battle). If White could put back his knight to d3, then of course there could be nothing to worry about, but now the knight still does not find it's place on the board. 24.♔e1 (24.♘c4 24...♔f6=+ and Rfe6 next. White has problems with the knight.) 24...♔xe1+ 25.♔xe1 ♔b5± illustrates the problem of the b6 knight.]

22...♔f6 This is the moment when the game gets a bit weird. Karjakin could not play "normal" moves because they lead to draw, he has to adopt some strange ideas to confuse his opponent and create some tricks. This is obviously very risky and not recommended strategy in general, but the match situation showed, that draw or loss is equal to Karjakin. [If the score of the match was level, then the game would have most probably continued with 22...d4 23.♔xf5 ♔xf5 (23...gxf5 24.f4! prevents e5 to connect the black pawns.) 24.b4 e5 25.f3 with a balanced endgame. White could slowly regroup his knight to a4-c5 and d3 or e4.]

23.b4! White activates his b1 rook by opening the b-file with b5. [The greedy 23.cxd5 23...exd5 24.♘xd5 allows 24...♔e2! and suddenly White has some problems. This was the trick of 22...Rf6.]

23...♘e5 Trying to create complications, but Black does not have enough pieces to get a serious one.

24.cxd5 ♘d3 25.♔e3 ♘xf2? A mistake, committed again because of the must-win situation. Black had to keep the queens on the board. [The right move was 25...♔xf2+ 26.♔xf2 ♘xf2 27.♔e1 but then the draw is inevitable. 27...♘d3=]

26.♔f1 ♔e4 Sad, but nothing else to do, otherwise Black loses a piece.

27.♔be1 It is respectable, that Svidler wants to play the best moves and plays for win even in a situation when he could practically force a draw with [27.♔xe4 27...♘xe4 28.♔xf6 ♔xf6 29.♔e1 and draw will be agreed soon.]

27...exd5!? Another very clever trick by Black. Objectively it loses, but this gives the biggest chance for White to go wrong. [Objectively the best was 27...♔ef8 28.♔xe4 ♘xe4 29.♔xf6 ♘xf6 30.dxe6 and try to save this endgame somehow.]

28.♔xf2? A mistake which spoils the win, but the draw remains still in the hand... [

The winning move was 28.♔c3! 28...♔f5 (28...♔f4 29.♘xd5! all the pieces are hanging and tactics does not work for Black. 29...♘xh3+ 30.gxh3 ♔g5+ 31.♔h2+--) 29.♔xe8 ♘xh3+ 30.♔h2! ♔xf1 31.♘xd5+-- and game over. Black soon runs out of checks. On this level, it is not so difficult to calculate such line, but of course the high stake, the tension and the pressure affects the player's decision. 31...♔g1+ 32.♔xh3 ♔h1+ 33.♔g3+--]

28...♔h4! Another great trap! It is very nice how resourcefully Karjakin managed to create tricks from a dry position. It also brought it's fruits at the end. [28...♖xf2 loses to 29.♔xe4+--]

29.♔d2?? A terrible blunder, based on an oversight in the next move... [The only move was 29.♔xe8 which leads to draw after 29...♔xf2+ 30.♔h2 ♔xb6 (30...♖xb6 31.♖e7+ ♔h6 32.♔g8= forces Black to give perpetual with Qf4-c1.) 31.♖e7+ ♔h6 and White can decide how to make a draw. 32.♖d7 intending to play Qg8, which was not possible immediately because of Qd6. (32.♔d7 is also good. 32...♔d6+ 33.♔g1 ♔xd7 34.♖xd7 White wins back the pawn and they can agree to draw.) 32...♔xb4 33.♔g8= and Black again has to give perpetual check.]

29...♖xf2 30.♔c3+ Svidler thought, that next move he takes on e8 and then he checks the f2 rook with Qe3. However the shocking surprise arrived... [30.♔xf2 30...♖xe1+--]

30...d4 and suddenly White has to resign. Chess is a cruel game. **0-1**

Best rating: 2749

(2) Rambaldi, Francesco (2547)
- Naiditsch, Arkadij (2682) [A05]

PokerStars IoM Masters(4.5),
2015.10.06

16-year old Francesco Rambaldi missed the podium in the recent World Junior Championship by losing the last round from an absolutely winning position. Here I will comment a game he lost against Arkadij, but no doubt I will soon be checking one of his victories again.

1.♘f3 ♘f6 2.g3 g6 3.b3 d5 4.♙b2 It is maybe early to develop the bishop on b2 as the game will show. [4.♙g2 4...♙g7 (4...c5!?) 5.♙b2 c5 6.c4 d4 7.b4∞ was played in Kramnik-Svidler 2015.]

4...c5 5.c4 d4 6.b4 We get into some kind of reversed Benko opening.

6...♘c6! A strong novelty. Black wants to fix the situation on the queenside. 6...Bg7 was played in many games.

7.b5 [7.bxc5 7...e5 8.d3 e4!? (8...♙xc5) 9.dxe4 ♘xe4 10.♙g2 ♙g7 seems ok for Black.]

7...♘a5 The knight on the rim, which is quite unusual in this structure, is Black's only drawback.

8.d3 b6 9.♙g2 ♙b7 10.O-O White should protect the g2 bishop. [10.♙c1 is met by 10...e5!]

10...♙h6!? This is an interesting way to play against Bc1-d2 idea. 10...a6 is also possible.

11.♗c1 It is normal to exchange the bishops. On b2 White's bishop was against a wall on d4. [11.♘bd2 11...a6∞]

11...♗xc1 12.♖xc1 ♖d6 13.♘bd2 [13.♖h6!? was maybe a better way: 13...♘g4 14.♖g7 ♖f6 15.♖xf6 ♘xf6 with a roughly equal endgame.]

13...a6 14.bxa6?! A strange decision which alters the structure in a bad way. 14.a4 was necessary.

14...♖xa6=+ 15.♘b3 O-O 16.♘xa5 ♖xa5 17.♖d2 ♖fa8 18.♗fb1 ♖8a7 19.♗b2

19...♖g7?! After logical developing moves from both side, Black gives a strong opportunity to White. 19. ...e5 is normal with a little advantage.

20.♖f4! White doesn't miss the chance to exchange queens.

20...♘d7 [20...♖xf4 21.gxf4 ♘h5 22.♘e5∞]

21.♖xd6 exd6 22.♘g5 Exchanging bishops also brings White closer to equality.

22...♗xg2 23.♖xg2 ♖f6

24.♘h7+ To play such a risky move you need to be very exact with calculation. [24.♘e4+ 24...♖e7 25.g4 is the normal way to play with a probable draw.]

24...♖f5 25.e4+?? The lone knight is now lost, as is the game. White had an incredible and unique way to salvation: [25.h4 25...f6 26.♖h3! g5 (26...♘e5 27.♘f8 ♖f7 28.g4+ (28.f4!?) 28...♘xg4 29.♘xg6=) 27.hxg5 fxg5 28.f4! gxf4 29.gxf4 and when Black takes on f4, Rf1-Nf8 comes with equality.]

25...dxe3 26.fxe3 g5! 27.h4 gxh4 28.gxh4 f6 29.h5 ♖a8! Arkadij is very precise and White has no chance to save the game.

30.♗f2+ ♖e6 31.♗af1 ♖xa2—+ This move was probably missed by White when he played 25.e4.

32.♖xa2 ♖xa2+ 33.♖h3 ♖a8 34.♖g1 ♖f7 35.h6 ♖g8 36.♖xg8 ♖xg8 37.♘xf6+ ♘xf6 38.♖g3 ♖h7 39.♖f4 ♖g6 40.d4 d5 41.cxd5 ♘xd5+ 42.♖e4 c4 0-1

After a very long fight I thought I finally had very good winning chances. The knight on g7 can't move because the h5 pawn is going to fall, and all I need to do is to get my king to g5 to win the game. All logical, but Granda Zuniga finds an amazing way to draw this position!

62...♔e7 The correct move, the black king is going to f8. [Of course White is just faster after 62...g5? 63.gxh5 gxh4 64.h6 and h7-h8Q is unstoppable.]

63.♔c3 ♕f8 [It is too early for 63...♖e8 64.gxh5! A pretty winning idea! 64...♖xf6 65.exf6+ ♔xf6 66.h6! and Black obviously has to move his king after which h7 just wins the game.]

64.♕d3 My next moves are clear, to play Ke2-f4-g5.

64...♖e8! Exactly the right timing! This move is not that difficult to find because of the simple reason that Black has no other chance, but what is shocking is that all pawn endgames are drawn here! But here I had another, better option: [Of course g5 still doesn't work because of 64...g5 65.♖h7+]

65.♖xe8 [The better try was to go for a queen endgame with an extra f-pawn, which appears in many moves from now, but is forced: 65.♕e3 65...♖xf6 66.exf6 ♔e8 67.♔f4 ♕d7 68.gxh5 gxh5 Now White has 2 choices: 69.♕e5 (A big mistake would be 69.♕g5

69...e5! A small but nice tactic! 70.dxe5 ♕e6 71.♔f4 d4 and the position is immediately a draw after 72.♕e4 d3 73.♕xd3 ♕xe5) 69...♕c7! The only move, since Black must have Kc6

after White's f4. 70.f4 ♖c6 71.f5 exf5 72.♙xf5 ♖b5 Again the only move for Black. The king is going for the d-pawn. (White is winning after 72...♙d6 73.♙g5 ♖e6 74.♙xh5 ♙xf6! and the winning move is 75.♙h6 ♙f5 76.♙g7 ♙g4 77.♙xf7 ♙xh4 78.♙e6) 73.♙g5 ♖c4 The next moves are forced. 74.♙xh5 ♙xd4 75.♙g5 ♖c5 76.h5 d4 77.h6 d3 78.h7 d2 79.h8=♚ d1=♚ Both players got a queen, but White is winning the f-pawn now. 80.♚f8+ ♖b5

81.♚xf7 and objectively this position should be a draw, but to draw this queen endgame is a very hard task to manage, so I would keep some practical chances for a full point.]

65...♙xe8 66.♙e3 ♙e7 [66...hgx4 67.fxg4 ♙e7 would lead to the same.]

67.♙f4 [67.gxh5 67...gxh5 68.♙f4 f6 and the position is a draw.]

67...hgx4 The only move again! [67...f6 loses to 68.exf6+ ♙xf6 69.g5+ ♙f7 70.♙e5 ♙e7 I now have an extra tempo with 71.f4 and my king is entering Black's position.]

68.fxg4 f6 Surely Black can't let the white king go to g5.

69.exf6+ ♙xf6 Now I have 2 choices, but both only lead to a draw.

70.g5+ [Another try is 70.h5 70...g5+ 71.♙e3 but Black keeps the draw by exchanging the e-pawn: 71...e5 72.dxe5+ ♙xe5 73.♙d3 ♙f6 74.♙d4 ♙e6 and I can't improve my position any longer, only by pushing the h-pawn: 75.h6 ♙f6 76.♙xd5 ♙g6 77.♙e6 ♙xh6 78.♙f6 ♙h7 79.♙xg5 ♙g7 with a well-known draw.]

70...♙f7 71.♙g4 I want to play h5, after which the game would be over, but again my opponent finds the only moves.

71...e5! The only right way!

72.dxe5 d4! The only move that saves the game! [It was easy to go wrong with 72...♙e6 73.h5! and now White is just in time: 73...gxh5+ 74.♙xh5 d4

75.g6 d3 76.g7 ♙f7 77.♙h6 ♙g8 78.e6 d2 79.e7 ♙f7 80.g8=♚+ ♙xg8 81.e8=♚#]

73. ♖f3 I need to go back to catch the pawn.

73... ♖e6 74. ♖e4 d3 75. ♖xd3 ♖xe5 76. ♖e3 and of course this position is nothing but a draw.

76... ♖f5 77. ♖f3 ♖e6 78. ♖f4 ♖f7 This is still the only move to make a draw here... But of course it is too easy to miss. [78... ♖d6 would be a big mistake since after 79. ♖g4 ♖e6 80. h5 gxh5+ 81. ♖xh5 ♖f7 82. ♖h6 the arising pawn endgame is already winning for White.]

79. ♖f3 ♖e7 80. ♖e3 ♖d7 81. ♖d3 ♖e6

82. ♖e4 The rest of the moves don't need any comments, the position is a dead draw.

82... ♖d6 83. ♖f3 ♖e7 84. ♖g4 ♖f7 85. ♖g3 ♖e7 86. ♖f4 ♖e6 87. ♖g4 ♖f7 88. h5 gxh5+ 89. ♖xh5 ♖g7 90. g6 ♖g8 91. ♖h6 ♖h8 92. g7+ ♖g8 93. ♖g6 Well, it is difficult to be happy after such a game, where I was soooo close to the win, but on the other hand my opponent defended greatly and that all the pawn endgames are drawish is just amazing!
1/2-1/2

FIDE World Cup 2015 (7.5),
2015.10.05

GM Csaba Balogh
Best rating: 2672

We have reached a study-like endgame with opposite colored bishops. White is a pawn up, but it seems like Black has successfully built up an unbreakable blockade. He just moves Be6-d7 and White cannot do anything, because his king cannot pass the 8th rank. However the truth is different. Both players had less than a minute on the clock, but Karjakin found a brilliant idea with which he could continue fighting on and it seems like, even objectively his position is winning. The only existing idea is to sacrifice pawn with d5 Kxd5 and Kc7, but then Black plays Ke6 keeping the blockade. The key is, White can give the move to black with a triangulation and he finds himself in zugzwang.

77. ♗g5! ♗e6 78. ♗h6! ♗d7 79. ♗f4! Here we are! It is Black to move now and he has nothing other move than Be6.

79...♙e6

80.d5+!! This is the fantastic idea! White gives up his material advantage, but he gets access with his king to the kingside pawns. The difference with the bishop on e6 is after Kxd5 Kc7 Black cannot block the way with Ke6!

80...♙xd5 [The alternative was 80...♙xd5 81.♙c7 The unfortunate placement of the black pawns allows the king to march towards f6 and collect the g6 and h5 pawns. Black cannot protect the latter one, because the e5 passed pawn must be blockaded and it occupies both of his pieces. 81...♙c4 running towards the c-pawn does not save Black... 82.♙d6 ♙g8 (82...♙f7 also loses after 83.e6 ♙e8 84.♙e5 ♙d3

85.♙e7 ♙c6 86.♙d8 ♙e4 87.♙f4 ♙d3 88.e7 ♙xc3 89.e8=♙ ♙xe8 90.♙xe8+— White gives up his bishop for the b-pawn

and takes all the kingside with his king.) 83.e6 ♙xc3 84.♙e5 b4 85.♙f6 ♙xe6 86.♙xe6 b3 87.♙f6+— and the same story as in the 82...Bf7 line.]

81.♙c8! Black cannot prevent Kd8-e7-f6 or if he allows White just advances his e-pawn.

81...♙b3 82.♙d8 ♙c4 Svidler decides to wait. [Active defense does not help either 82...♙d5 83.♙e7 ♙c4 84.♙f7 ♙xc3+ 85.♙xg6 b4 86.♙xh5 ♙c4 87.♙g6 b3 88.♙c1+— and the white passed pawns decide the outcome.]

83.♙e7 ♙b3 84.e6 [84.♙f6 84...♙d7 85.♙xg6 ♙e6 86.♙xh5 should be also winning.]

84...♙c4 85.♙f6 ♙b3

86.♙c1! White drives his bishop to a3 in order to push e7, placing it to a protected square and then the king is free to take on g6 and h5, gaining another passed pawn. [86.♙g5 was also good with the same purpose.]

86...♙c4 87.♙a3 ♙b3 88.e7 ♙d7 89.♙xg6 [Black resigned in view of 89.♙xg6 89...♙e8 (There is no time for 89...♙d7 90.♙f7) 90.♙xh5 ♙f7 91.♙g5 ♙e6 92.h5 ♙d7 93.h6+— and Black is unable to create a blockade.] **1-0**

Chess and the City. How can a GM cope with a "4-some"?

WGM Elisabeth Paetz
Best rating: 2493

As you already remember the name from previous newsletters, my right hand, or work slave, or simply my wannabe English teacher, GM Keith Arkell has a pretty rough or some may even call it paradise kind of time here at the Isle of Man Poker star tournament, which by the way is the strongest open tournament to ever be held in the British Isles. Well what is so special about him, but being honoured to be a common English editor slave? He just played his 4th women in a row and I decided to take this unique opportunity (I don't remember any GM facing 4 women in a row in an open tournament) to get an exclusive interview from him.

E: Keith, how does it feel to face 4 women consecutively in an open tournament?

K: There was a time in my past when I felt very uncomfortable playing against women players. Instead of feeling competitively towards them, I felt almost chivalrous. As condescending as this sounds, I felt almost smugly superior to any female player I ever faced.

E: Doesn't it sound a little arrogant?

K: Well in 1987 when I played 12-year old Judith Polgar, I learned that my smugness was completely misplaced.

E: Did you actually manage to lose to her even as a kid?

K: To be honest, she completely outplayed me from start to finish...

E: So how come after such an experience you can even dare to feel superior nowadays?

K: First of all, clearly Judith is exceptional, and secondly my psychological make-up predisposes me to placing the female on a pedestal to which she is in reality unworthy. This is my psychological dichotomy. When they are in reality worthy of placing on a pedestal, then I face a conflict.

E: Does it influence your performance whether she is attractive to you or not?

K: Very much so. If she is attractive to me I have to make a strong endeavour to fight against the feeling that I am unworthy to sit opposite her. My natural inclination is to offer myself to her as a slave...

E: And yet you scored 3 out of 4... And objectively all 4 of them are actually quite beautiful, at least to my taste.

K: There was a time when I was scoring very badly against women players. For example I lost twice against Harriet Hunt, twice against Ketevan Arakhamia and twice against Irina Krush. But at some moment, I had to overcome my natural masochism, divorce myself from this sexual aspect of my personality and just fight as a professional chess player. From this moment onwards I have scored against women as I should do according to my strength.

E.: Do you believe you are unique amongst English GMs in overcoming this problem?

K: Yes! Because as far as I am aware I am the only masochist amongst us! If you want to dig deeper into the subject of human sexuality regarding chess, maybe the next person to ask is my good friend, Sexologist Dr. Nigel Short! :)

Keith Arkell is an English chess grandmaster and recent European and World Senior (50+) Champion.

1.d4 d5 2.c4 e6 3.♘c3 ♘f6 4.♙f4 a6 5.e3 [5...cxd5 5...♗xd5! (5...exd5 6.e3 The a6 move is not very useful now and forces Black to play over c5, which leads to a position with an isolated pawn.) 6.♗xd5 ♖xd5 7.a3 c5 with easy equalization.]

5...c5 6.♗f3 ♘c6 7.a3 A typical waiting move. 7. Rc1 was also possible. This is amazing understanding considering this game was played so many years ago!

7...cxd4 [7...♙e7 8.dxc5 ♙xc5 9.♖c2 with Rd1 next and White keeps the initiative.]

8.exd4 dxc4 [8...♙e7 with the idea to wait for the Bf1 to move, but White gets the additional option to play 9.c5 but then 9...♗e4! is a typical plan for counterplay. 10.♙d3 (10.♗a4 10...g5 Trying to get the b8 square for the rook.) 10...♗xc3 (10...f5!?) 11.bxc3 b6! Otherwise White will play Rb1, with pressure over the b-file. 12.cxb6 ♖xb6 13.O-O O-O=]

9.♙xc4 b5 10.♙d3 ♙b7 [10...♗xd4 11.♗xd4 ♖xd4 12.♙xb5+-; 10...b4 11.axb4 ♗xb4 It looks like Black takes control of the d5 square but 12.♙b5+! ♙d7 13.♙xd7+ ♖xd7 14.♗e5 ♖b7 15.♖a4+ ♗d7 16.O-O and d5 next should crush the black position.]

11.O-O ♙e7 12.♙e5 O-O

13.♖e2 [13.♙xf6 13...♙xf6 14.♙e4 White is too slow for the d5 break. (14.d5 14...exd5 15.♗xd5 ♙xb2+) 14...♖b8 15.♖d3 g6 16.♖ad1 ♗e7=]

13...♗d5 [13...♗xe5 14.dxe5 ♙xf3 (14...♗d7 15.♙e4) 15.♖xf3 ♗d7 16.♖ad1 ♖a7= (16...♗xe5 17.♙xh7+)]

14.♙g3 [14.♗xd5 14...♖xd5 15.♙e4 ♗xd4!]

14...♗h8 I have no idea why Black played this move because White could play 15.Qe4 anyway.

15.♖fe1 [15.♖e4 15...f5? (15...♗f6 16.♖h4!→ A typical queen transfer into the attack.) 16.♖xe6 ♗xc3 17.bxc3 f4 18.♖e4+-]

15...♙f6 [15...g6 Avoiding a change of structure, like in the game. 16.♗xd5 (16.♖e4 16...♗xc3 17.bxc3 ♗a5 18.♖g4 ♙xf3! Without the knight, White's pressure is not enough. 19.♖xf3 ♙f6 20.♙c7 ♖xc7 21.♖xf6+ ♗g8∞; 16.♗e4!? Playing against the weak c5 square.) 16...♖xd5 17.♙e4 ♖d7 18.♖ad1 d5 is coming soon. White has a strong initiative.]

16.♖e4 g6 17.♗xd5 ♖xd5 18.♖xd5 exd5

19. ♖e5 White has a stable advantage thanks to his better structure and the limited bishop on b7.

19... ♖ad8 [19... ♖xd4 20. ♖d7]

20. ♖xc6 is premature. White could have played [20. ♖ac1! 20... ♖xe5 (20... ♖xd4 21. ♖c7; 20... ♖xe5 21. dxe5± The dark squares are too weak.) 21. dxe5 ♖g7 22. ♖c7 and because of the strong rook on the 7th rank, things look very bad for Black.]

20... ♖xc6 21. ♖ac1 ♖c8 22. ♖d6 ♖g8 [22... ♖fd8 23. ♖e7 ♖xe7 24. ♖xe7 ♖d7 25. ♖xc6! +- ♖xc6 26. ♖xd7 ♖c1+ 27. ♖f1]

23. ♖e5 ♖g7 24. f4 ♖d7 25. ♖f2 h6 This looks like Black is just losing time, but it is not easy to find the correct way. [25... ♖xc1 26. ♖xc1 ♖c8 27. ♖c5! ♖xe5 (27... ♖xc5 28. dxc5 ♖xe5 29. fxe5 d4 30. ♖f3 ♖c6+ 31. ♖e4+-) 28. fxe5 ♖e6 and compared to the game Black is a tempo up, since h6 is not needed.; 25... ♖f5 26. ♖xf5 gxf5 27. ♖c5 Sometimes just one weak square can create huge problems.]

26. ♖e3 ♖xc1 27. ♖xc1 ♖c8

28. ♖c5! ♖xe5 29. fxe5 ♖e6 30. a4 [30. ♖xc8 30... ♖xc8 31. ♖d2 ♖d7! 32. ♖c3 a5= on time; 30. ♖d2 with the idea to improve the king and I have no idea how to defend this position. 30... ♖xc5 (30... ♖f8 31. ♖c3 ♖e7 32. ♖b4+-) 31. dxc5 ♖f8 (31... d4 32. ♖e4) 32. ♖c3 ♖e7 33. ♖b4+-]

30... bxa4 31. ♖xa6 ♖b8 32. ♖b5 ♖d8 Once again Black is losing time. Why not play [32... ♖a8 33. ♖b7 (33. ♖b6 33... ♖c8⇒) 33... ♖b8 34. ♖c6 ♖c8 35. ♖xd5 ♖xd5 36. ♖xd5 ♖b8⇒]

33. ♖b6 ♖a8 34. ♖d2

34... ♖c8 Usually the biggest chance to get counterplay is in rook endgames. [34... ♖f8 35. ♖c3 ♖e7 36. ♖b4 ♖d7 37. ♖xa4 ♖c7 38. ♖a5+-; 34... ♖a7! looks promising for Black. How to improve the white position now? 35. ♖c3 ♖c7+ 36. ♖b4

$\text{Rc2} \leftrightarrow 37. \text{Qxa4 R} \times \text{g2} \infty]$

35. Qxc8 Rxc8 36. Rb5 Ra8 37. Rxd5 a3 38. bxa3 Rxa3 39. Rc5 Qf8 40. Qe2± Qe7 41. d5 Qd7 [41... Ra2+ 42. Qf3 Ra3+ 43. Qf4 Ra4+ 44. Qe3 Ra3+ 45. Qd4 Ra2 and now the d-pawn should decide the game. 46. Rc7+ Qe8 47. d6 Rxc2 48. Re7+ Qf8 49. Ra7 Qe8 50. Qd5 Rd2+ 51. Qc6 Rc2+ 52. Qb6 Rxc2 53. Re7+ Qf8 54. Qc7+—]

42. Rc6 h5 43. Rf6

43... Qe7? [43... Qe8 The white king is cut and that is why it is not easy to improve the position. 44. e6 (44. d6 44... Ra5!) 44... fxe6 45. dxe6 (45. Rxe6+ 45... Qf7 46. Re3 Ra2+ 47. Qf3 Rd2=) 45... g5 46. Rf5 Ra2+ 47. Qf3 g4+ 48. Qf4 Rxc2 49. Rxc2 Qe7 50. Qf5 Rf2+ 51. Qxc4 Qxe6=]

Editorial Preface

It has been an amazing week of chess, with a lot going on at the highest level.

Let us start with the biggest event, the World Championship in Rapid and Blitz in Berlin.

Rapid: For the second year in a row it is Magnus Carlsen who seems to just be unstoppable and wins by a full point margin, ahead of 3 players on 10.5/15: Nepomniachtchi, Radjabov and Dominguez.

Blitz: In the blitz Carlsen was also leading the event, but things went wrong and he lost 3 games in a row. After that Vachier Lagrave took the lead with a full 2 points advantage, but there was no luck for him either, as he lost 2 games in a row. Finally, the winner was Grischuk, who had a fantastic finish and ended up on a great score of 15.5/21. Second place was shared by Vachier Lagrave and Kramnik, both with 15/21. It was an amazing event with great fighting chess and suspense until the very last second! Clearly it makes a lot of sense to download the games and take a look at the crucial moments!

The Millionaire Open was won by Nakamura, who had a tough event, but again and again he showed great fighting qualities and his final match against Le Quang Liem was actually the easiest part of the event for him. This victory brings Nakamura a nice amount of 100.000\$ and another trophy.

In the PokerStars Isle of Man Tournament, 3 people shared first place, all with 7/9: Harikrishna, Fressinet and Sargissian.

Already on Sunday the European Club Cup will begin in Skopje and most of the top players will participate in it, so this is clearly another event to follow online!

For now we hope you enjoy the current issue!

Two best games of the past week

(1) **Grischuk, Alexander (2774)**
- **Adhiban, Baskaran (2674) [A45]**

World Rapid 2015(1.2),
2015.10.10

GM Arkadij Naiditsch
Best rating: 2737

Grischuk is clearly one of the best players in the world, and especially so in rapid and blitz, which he proved once again by winning the blitz event. In the rapid things didn't go too well for him, although he showed great and exciting chess. In the current game, things are getting very interesting already from the beginning. White later on sacrificed a piece for the attack and managed to mate the black king in beautiful style. A great game to just enjoy the beauty of chess!

1.d4 ♘f6 2.♙f4 Lately we could see a few games by Grischuk playing this slightly strange opening, but he is showing great results in it, beating Anand in it in classical chess not that long ago for example.

2...c5 Adhiban is going for one of the most forced lines possible, but of course Black also has calm moves like 2...g6 or 2...d5.

3.e3 ♖b6 This is Black's idea, to directly disturb White in the development by attacking the b2 pawn.

4.♘c3 We are still following theory. White gives up the b2 pawn.

4...♖xb2 5.♘ge2 An interesting move. [5.♘b5 5...♘d5 is the main line.]

5...♖b6 After taking the b2 pawn, the black queen is going back to hide on d8. [Maybe Black had another interesting choice: 5...d6!? with a very complicated position.]

6.♖b1 ♖d8 7.dxc5 The material is equal and White has much better development, but on the other hand White's pawn structure is really bad, so White will need to act dynamically.

7...g6 8.g3 To put the bishop on g2 is nice of course, as the b7 pawn will always be under attack.

8...♘a6 9.♖d4 The c5 pawn needs to be protected.

9...♙g7 10.♙g2 Grischuk is going for the piece sacrifice!

10...♘h5 is Black's best choice. If he would not try to fight, White's position would be clearly better.

11.♙e5 f6 The bishop has no moves, but it doesn't matter!

12.♙f4 Strong play!

12...e5 13.♖c4 exf4 14.exf4 Grischuk is going for a big fight. [14.♙xb7! seems to have been stronger. 14...♙xb7 15.♖xb7 ♘c7 16.g4 Trapping the knight on h5.]

14...♙f8! Adhiban is also playing a good game. Black can't castle so something needs to be done. By playing Bf8 Black not only attacks the c5 pawn, but also brings the bishop to e7 if needed.

15.0-0 ♖xc5 A normal move for rapid chess, but it was better to take the c5 pawn with the bishop. [15...♖b8 16.♘d4 ♗xc5 Black's position is still very dangerous, but it seems like White doesn't have anything immediate.]

16.♘d4 White only has a pawn for the piece, but because of his excellent development and great position of his pieces Black is in trouble!

16...♘g7 The second knight joins the defense.

17.♖fe1+ ♘ce6

18.♘d5 All the white pieces are in the attack, but Grischuk once again doesn't take on b7, which would have been the strongest move. [The simple 18.♗xb7 18...♗xb7 19.♘xe6 ♘xe6 20.♖xb7 ♗e7 21.♘d5 would have put big problems in front of Black and it seems like the idea of playing Rxe6 is hard to defend against.]

18...♖b8 19.♖bd1 The last piece joins the attack.

19...♗e7 This is a mistake, as now White has a direct blow! [A crazy move like 19...♔f7! would keep the game alive. It is hard to see how White can win something directly and a piece up is a piece up...]

20.♘xe6! The beginning of a small, but nice combination.

20...♘xe6 21.♖xe6 dxe6 22.♘c7+ ♔f7 23.♖xd8 ♖xd8 The material is now more or less balanced, but Black still has problems with the king.

24.♗f3 Defending from Rd1 check and threatening to play f5, but now Black is in time to defend from this threat. [White could have tried 24.f5 24...♖d1+ 25.♗f1 gxf5 26.♖e2 and Qh5 check is very unpleasant.]

24...a6 Black doesn't feel the danger. [24...f5 would have been the right choice to defend, and the position is very unclear.]

25.f5! White is starting to crush.

25...b5 26.♖b3 ♖b6 This move just loses on the spot. [26...gxf5 would lead to a bad, but fighting position. 27.♗h5+

♔g7 28. ♖xe6+ ♗xe6 29. ♔xe6 ♗f8 and of course White's chances to win the game are good, but things are far from over, especially in rapid chess.]

27. ♔e3! A great move. The white queen is getting transferred from b3 to h6!

27... ♖bd6 28. ♔h6 and the game is over. Black cannot defend against Qxh7.

28... exf5 29. ♔xh7+ ♔f8 30. ♔xg6 All the pawns are falling and Bh5 is a deadly threat.

30... ♗e6 31. ♖xe6+ ♖xe6

32. ♗h5 There is no way to defend from Qf7 mate! A nice game by Grischuk, showing great feeling for the position and the active pieces! **1-0**

(2) Nakamura, Hikaru (2816) - So, Wo (2760) [A18]

Millionaire TB Final 2015(3),
2015.10.12

GM Csaba Balogh
Best rating: 2672

The qualifier stage of the 2nd Millionaire Chess tournament was very exciting. 3 players qualified with 6 points and there was a 9-player tiebreak for the 4th and final place with 5.5 points, including the three top seeds, Nakamura, Caruana and Wesley So. This is already the last game of the tiebreak, where with a brilliant victory Nakamura secured his place in the Final Four!

1.c4 ♗f6 2. ♖c3 e6 3.e4 A dangerous weapon against the players who want to employ the Nimzo Indian defense.

3...d5 4.cxd5 exd5 5.e5 ♗e4 6.d4 Theory is just about to develop here, there are not too many games played in the database so far.

6... ♖c6 [Most of the games continue with 6... ♗b4 although I prefer White's chances even here after 7. ♔a4+ ♖c6 8. ♗b5 ♗d7

9. ♗e2+= followed by 0-0. White's structure looks more

healthy. Black should undermine the center either with c5 or with f6, but the c6 knight or the weakness of the d5 pawn prevents him from executing these plans properly.]

7. ♖b5 ♗e7 8. ♘ge2 0-0 9. 0-0 ♜f5 We have already reached a new position without any games in the database. It is quite rare on the highest level, that such things occur after only 9 moves.

10. ♜e3 ♘a5 Black has in mind to explode the center with c5 or to play Nc4. [10...f6 seemed more principle to me, but it also fails to equalize: 11. ♘xe4 ♜xe4 12. ♘g3 ♜g6 (12...fxe5 leads to worse positions everywhere: 13. ♘xe4 dxe4 14. ♖b3+ ♔h8 15. ♜xc6 bxc6 (15...exd4 16. ♖ad1 bxc6 17. ♖xd4 ♜d6 18. ♖xe4+= with an obvious long-term advantage because of the ruined pawn structure on the queenside.) 16.dxe5± Black is clearly worse because of his damaged pawn structure.) 13.f4 fxe5

14.dxe5! White breaks the symmetry in his own favor. A very dangerous queenside attack with f5-e6 or f5-f6 is in the air. Black should play Ne7-f5 to be fine, but his pieces do not allow it.]

11. ♘xe4 ♜xe4 12. ♘g3 a6 13. ♜d3 Nakamura evaluates that his potential attack with f4-f5 is stronger after trading the light squared bishops. [Actually it was quite a pleasant choice for White, because 13. ♜e2!? also looks very promising. 13... ♜g6

14.f4 f5 (14...f6 15.f5 ♜e8 16.e6 This protected passed pawn on e6 cannot lead to anything good from Black's point of view.) 15. ♖c1± with a clear positional advantage thanks to the space advantage, the protected passed pawn on e5 and the superior pieces.]

13... ♜xd3 14. ♖xd3 ♘c4

15. ♜c1! White saves his bishop for the future. It might have serious attacking potential, because the knight can go to h5 or f5 and if Black sends it away with g6, he must always deal with Bh6!

15...f6 [Perhaps it was a better try to defend with 15... ♖d7 putting the queen to e6 and in case of f4, Black could play f5!]

16.b3 ♘b6

17.e6! This pawn completely paralyzes the black pieces! He is

not in time to quickly attack it and otherwise it is soon going to be defended securely by the f-pawn.

17...♔d6 [Another defensive attempt was 17...♔d6 18.f4 ♘c8 building a blockade, but it just solves the direct problems. In the long term, Black cannot coordinate his heavy pieces, while White slowly builds his attack. 19.f5 ♘e7 20.♘h5±]

18.♖e1 g6 Nf5 had to be prevented.

19.♘h6 ♖fe8

20.f4! f5 is coming next, using the fact that Black cannot play f5 followed by Bf6 himself because of a tactical refutation...

20...♔h8 [20...f5 loses to 21.♘xf5! gxf5 22.♔g3+- and mate on g7.]

21.f5 g5 22.♘h5! The attack is rolling! White is threatening to play Bg7xf6!

22...♖g8

23.h4! Nakamura does not waste time until Black slightly consolidates. He immediately opens the kingside to break through with his attack.

23...g4 [23...gxh4 24.♔h3+- and Black cannot use the opening of the g-file. All the squares are perfectly controlled by the white pieces.]

24.♖f1! Freeing the e1 square for the other ook and also intending to attack the g4 pawn with Rf4 and Qe2!

24...♔d8 25.♔e2! Rf4 is the direct threat!

25...♔e8 26.♘f4 ♔d6 27.♖ae1! Bringing the last unemployed piece to the game!

27...c6 Black protects his d5 pawn in order to transfer his knight to c8-e7, but it is too slow. The penetration is coming now!

28.e7! Qe6 is coming next!

28...♘c8 [There is no time for 28...♔f7 followed by Rae8, because White is coming faster with 29.♔e6! ♔xe6 30.♖xe6 and the f6 pawn falls. 30...♔xf4 31.♔xf4 ♔g7 (31...♖ae8 32.♖xf6 ♖xe7 33.♔e5+- wins. Black cannot escape from the deadly pin. 33...♘d7 34.♖e6+)]

32.♔c7! Quite an unusual trapping of the knight! 32...♘d7
33.♖d6!+- shows well the power of the e7 pawn, which completely discoordinates the black pieces.]

29.♔e6 [29.♔f8+- was also quite spectacular and strong.]

29...♔xe7 30.h5!! Preparation for the final break!

30...b5 Black tries defending with Ra7, which could be followed by Nd6-e4, but it is already too slow.

31.♘g6+!! The point of the previous move! White sacrifices a piece in order to open the h-file. A rook arrives there soon and Black will have no defense against the mates.

31...hxg6 32.hxg6 ♖a7

33.♔f2! The final part of the h5-Ng6-hxg6 idea. Rh1 is coming next and Black has no defense despite his extra piece. They are completely tied up and paralyzed.

33...g3+ 34.♔f3 ♖xg6 Desperation, but it was over anyway.

35.fxg6 ♔xg6 36.♔xc8+ ♔h7 37.♖h1 Black resigned! A great attacking game by Nakamura! 1-0

Young & Talented

GM Etienne Bacrot

Best rating: 2749

(3) Fedoseev, Vladimir3 (2659)

- Vovk, Yuri (2617) [C07]

World Rapid 2015(4.30), 2015.10.10

The World Rapid in Berlin was no great success for junior players (for me neither!). Here is a nice attacking game played by Fedoseev, who took 21st place.

1.e4 e6 2.d4 d5 3.♘d2 c5 4.♘gf3 cxd4 5.exd5 ♙xd5 6.♙c4 ♙d6 7.O-O ♘f6 8.♘b3 ♘c6 9.♘bxd4 ♘xd4 10.♘xd4 a6 11.♞e1 ♞c7

12.♙d3!? Quite a rare move in this topical position of the 3.Nd2 french. 12.Bb3 is more often played.

12...♙c5 Maybe not the best reaction: [12...♙d6!? is more solid. 13.g3 (13.♘f5 13...♙xh2+ 14.♙h1 ♙f8 15.g3 exf5 16.♙xh2 h5 seems fine for Black.) 13...O-O 14.♙g5 ♙e7 15.♞e2 h6 16.♙f4 ♙d6 17.♙xd6 ♙xd6 18.♞ad1 ♞d8 19.♘f3 Black is not far from equality. Harikrishna-Lenderman Gibraltar 2015]

13.c3 ♙d7 14.♙g5 [14.♞f3 14...♙xd4 15.cxd4 ♙c6=]

14...♙xd4 Quite logical even if White's pieces look strong. [14...O-O-O is the risky top choice of the computer as Black has difficulty to castle kingside. But after 15.b4!? ♙d6 16.b5!? I doubt Black can defend, especially in rapid time control.]

15.cxd4 ♙c6 16.♞c1 ♞a5?! A dangerous journey that will be nicely refuted. The backward move [16...♞d8!? gives more saving chances: 17.♙e4 (17.♞c5 17...♞xd4 18.♞xe6+ fxe6 19.♙g6+ hxg6 20.♞xd4 ♞d8 21.♙xf6 ♞xd4=) 17...♙xe4 18.♞xe4 ♞d5 19.♞e5 ♞d7 20.♙xf6 gxf6 21.♞ec5 ♞d8+=]

17. ♖c5!

17... ♙xa2? loses to an easy tactic... [17... ♙b4 18. ♖c1 ♖d8 19. ♘xa6!? ♙xd4 20. ♘f1±]

18. ♘xf6 gxf6 19. d5 ♘xd5 [19... ♘d7 20. dxe6 ♘xe6 21. ♘c4 is no better way to end the game from Black's point of view.]

20. ♘b1! Take the piece and continue the attack!

20... ♙xb2 21. ♖xd5 ♖c8 22. h3 h6 23. ♖d7 ♙b5 24. ♖xe6+ White concludes with an easy forced mate:

24... fxe6 25. ♘g6+ ♔f8 26. ♖d6+ ♔g8 27. ♖xe6+ 1-0

(4) Bacrot, Etienne (2697)
- Fedoseev, Vladimir3 (2659) [D87]

World Rapid 2015(5.9),
2015.10.10

30... ♘xc4! With a few seconds left on the clock Fedoseev found this great saving idea. [30... ♙xc4 31. ♘xf6 is hopeless for Black.] 31. ♖xe8 ♘xe8 32. ♘xf6 ♘xd6! 33. ♘xd6?! [33. ♘e5 is just slightly better for White.]

33... ♙xd6 34. ♘xe8

34... ♙d7 A nice trap! Black wins back the piece and achieves a draw.

35. ♙e5 ♙xe8 36. ♙d5+ ♔f6 37. ♙d4+ ♙e5 38. ♙xa7 ♙xc3 39. ♙b6+ ♔g5 40. ♙xb7 1/2-1/2

Endgame section

(15) Dubov, Daniil (2661)
- Grischuk, Alexander (2774)

World rapid Championship,
2015.10.12

GM Csaba Balogh
Best rating: 2672

We are facing a very instructive rook endgame, where the young russian talent Daniil Dubov wins with perfect technique, despite the most tenacious resistance of Alexander Grischuk.

57. ♖f6! The unfortunate placement of the black pieces prevents him from saving his f7 pawn. [57. ♗xa6+ is not enough. 57... ♖xa6 58. ♖xa6 ♗xa6 59. ♗d4 the black king comes towards the e4 pawn in time. 59... ♗b5 60. ♗d5 ♗b4 61. ♗d6 ♗c4 62. ♗e7 ♗d4=]

57... ♗xf1 58. ♖xf7+ ♗b6 59. ♖xf1 Here we are! The key of this endgame is the bad position of the black king. First of all, it has no chance to get in front of the e-pawn - which would result in an immediate draw - it will be cut either vertically or horizontally by the white rook. It still would not be a problem

if it was placed on the other side of the board. A well-known defense in such endgames is to have the king on the shorter side of the pawn and giving checks with the rook from the longer side (here, king on g7 and rook checks along the a-file). However, the black king is on the wrong side, which allows checks with the rook only from the shorter side, but it is too close to the king and Black runs out of checks too fast. We see all the details very soon.

59... ♖e7 Grischuk tries to defend with the frontal attack. As long as the white pawn has not passed the half of the board, often this defense gives the only salvation. [On 59... ♗c5 an important move is 60. ♖d1! to cut the king along the d-file.; 59... ♗c6

It is very important to find the right move for the win here: **60. ♖f6+!** (60. ♖d1? does not work now because of 60... ♖d7!

and the king gets in front of the pawn because the pawn endgame is drawn. 61.♖xd7 ♔xd7 62.♔f4 ♔e6=) 60...♔c5 61.♔f4+- and the cut along the 6th rank deprives Black from reaching the defensive position.]

60.♖c1! Cutting the king with two lines from the pawn. [60.♔d4 60...♔c7 leads to a draw, because White cannot cut the king along the d-file.]

60...♖e8 This should be the ideal placement of the frontal attack. The rook should be on the 8th rank to be able to give as many checks when the white king leaves from behind the pawn to support its advance. The black king should be on b6 or b5; the point being that often the only way to make progress is Rc4, defending the e4 pawn and then going forward with the king. However, now Rc4 is met by Kb5 and the rook must come back. Still the game is won, because the black king is on the wrong side of the board. [60...♖c7 does not work now, because the pawn endgame is winning after 61.♖xc7 ♔xc7 62.♔f4 ♔d6 63.♔f5! ♔e7 64.♔e5!+- and White gets the opposition!]

61.♔f4! ♖f8+ 62.♔e5 ♖e8+ 63.♔f5 ♖f8+ 64.♔e6 Gaining some time.

64...♖e8+ 65.♔f5 ♖f8+ 66.♔g6! ♖e8 This is the method of the frontal defense, but it does not help now.

67.♖e1! ♔c7 The king can finally come closer, but it is not enough to save the game now.

68.♔f7 ♖e5 [68...♖h8 leads to the same as in the game 69.e5 ♖h7+ (69...♔d8 70.♖d1+ ♔c7 71.e6+-) 70.♔g6

Here we can see the reason why the rook should give the checks on the longer side of the board. If he could continue giving checks, that would lure the white king one file to the right, which would already allow Re7 and the black king goes to d8-e8 and saves the game. However, there are no more checks now... 70...♖h2 71.♖d1! Cutting the king again and the pawn advances soon. 71...♖g2+ 72.♔f7 ♖f2+ 73.♔e7 We soon reach the bridge-building position. 73...♖h2 74.e6 ♖h7+

75.♔f6 and again Black has the same problem! The rook is on the wrong side, therefore he runs out of checks. If the black king was on g7 and the rook could give a check on a7, then the game would be drawn. 75...♖h6+ 76.♔f7 ♖h7+ 77.♔g6+-]

69.♔f6 ♖h5 70.♖d1! [But not 70.e5? because of 70...♔d7!]=]

70...♖h6+ 71.♔g5 The 68...Rh8 line has already shown us Black's problems!

71...♖e6 72.♔f5 ♜h6 73.e5 ♜h5+ 74.♔f6 ♜h6+ 75.♔f7 ♜h7+ 76.♔g6 ♜e7 77.♔f6 ♜h7 78.e6 ♜h6+ 79.♔f7 ♜h7+ 80.♔g6 Black resigned! A very instructive rook endgame and it is useful to remember its defensive and attacking ideas, as these are quite common in practice! 1-0

(16) Carlsen, Magnus (2850)
- Ivanchuk, Vassily (2726)

World Rapid 2015(12.1),
2015.10.12

GM Arkadij Naiditsch
Best rating: 2737

We are in a very interesting rook endgame and Carlsen shows once again how well he can handle them! The material is equal, but it is not easy for Black to defend the a-pawn and in case it is going to fall, the position might just be lost. The black king is also cut along the e-file, but still... All black needs to do is to get one of the white pawns to achieve a draw.

50...♜c2 A normal move, Black keeps on waiting.

51.♜c4 Now a4 is hanging.

51...♜a2 Black continues waiting.

52.♔b5 This is White's best try.

52...a3 The first inaccurate decision. Black could have kept the passive strategy with 52...Ra3!, asking White what's next.

53.♔b4 Now the white king is getting to b3 and the black rook is even more passive.

53...♔e5! The right move! Black activates his king, although the a-pawn is going to fall now.

54.♔b3 ♜a1 55.♜a4 The question is whether Rxa3 is a threat or if the pawn endgame is just a draw?!

55...♜c1! Another good decision by Ivanchuk! White can't take the a3 pawn with the king because the c3 pawn would fall, so there is no other choice for Carlsen but to let the black king pass the 4th rank.

56.♜xa3 ♔f4 57.♜a4+ ♔f3 Now it is clear that Black's target is the g4 pawn.

58.♜d4 White wants to play c4 next.

58...♔e3?! Black miscalculates the pawn endgame, as he only had very little time on the clock. [58...♜g1! would have led to a direct draw: 59.c4 ♜xg4 60.♜xg4 ♔xg4 61.c5 ♔f5 62.♔b4 g4 63.c6 ♔e6 64.♔b5 g3 65.♔a6 g2 66.c7 g1=♜ 67.c8=♜+]]

59. ♖b4 ♜f1 Black has another plan and that is to get the rook to f4.

60. ♖c5 ♜f4 This is the wrong plan. [The tricky 60... ♜c1 would lead to a draw: 61.c4 and now the black rook is getting to the 8th rank. 61... ♜a1 62. ♖d5 ♜a8 63. ♜e4+ ♖f3 and White can only free the rook from e4 by losing the g4 pawn, which would mean a draw.]

61. ♖d5

61... ♖f3? Black misses the only clear way to a draw... [61... ♜f8 with a similar idea as in the line before would still keep a draw, even if Black needs to be very careful.]

62. ♜xf4+! Carlsen doesn't miss his chance... The queen endgame that is going to appear is going to be very difficult to hold for Black.

62... ♜xf4 [Of course Black is not in time with 62... ♖xf4 63.c4 ♖xg4 64.c5 ♖f3 65.c6 and White is faster.]

63.g5 ♖e3 64.g6 f3 65.g7 f2 66.g8=♜ f1=♜ So from a rook endgame we got a queen endgame with an extra c-pawn for White, which is very hard to hold for Black.

67. ♜e6+! A very important check. Usually Black should keep his king on h3-h2 and try to give as many checks as possible, but now the black king is going to be stuck in the wrong side of the board.

67... ♖d2 68.c4 ♖c3 69. ♜e3+ ♖b4 70. ♜b6+ ♖c3 71. ♜d4+ ♖b3 72.c5 The c-pawn starts to advance. It is almost impossible to give the right checks in a rapid game.

72... ♜f7+ [72... ♜b5 would have been the right way to proceed.]

73. ♖c6 ♜e6+ 74. ♖b7 Black is running out of checks, which means the game is over.

74... ♜e7+ 75. ♖b6 ♜e6+

76.c6 and Black resigned because there is nothing to do

against Kb7 followed by c7. The position would be a draw only with the black king on h3-h2-g2, and even then it is very hard to achieve it. So, another drawish endgame which was quite easily won by the stronger side, which shows us once again how tricky rook endgames are! **1-0**

Golden knowledge. THE ROLE OF CLASSICS

GM Adrian Mikhalchishin
FIDE Trainers Commission Chairman

Recently I spoke to the great trainer GM Lev Psakhis and he told me that he has huge problems finding good and proper examples for his exercises in modern games. True, I had the same experience, as the best and most instructive examples are usually found in older classical games. Everybody used this knowledge later. Here I want to present how one old and great idea of Akiba Rubinstein was used by other great guys and how these old ideas can be used in a wrong way too!

(17) Cohn, Erich-Rubinstein, Akiba

St Petersburg, 1909

1.d4 d5 2.♘f3 c5 3.c4 dxc4 4.dxc5 ♔xd1+ 5.♔xd1 ♘c6 6.e3 ♘g4 7.♘xc4 e6 8.a3 ♘xc5 9.b4 ♘d6 10.♘b2 ♘f6 11.♘d2 ♔e7 12.♔e2 ♘e5 13.♘xe5 ♘xe5 14.♖hc1 ♖ac8 15.♘b3 ♖hd8 16.♘c4 ♘xc4 17.♖xc4 ♖xc4 18.♘xc4 ♘e4 19.♔e1 ♘xf3 20.gxf3 ♘d6 21.♘e2 ♖c8 22.♔d2 ♘c4+ 23.♘xc4 ♖xc4

24.♖c1?? Such transpositions into pawn endgames are completely wrong. In most cases in chess it is the most natural defence in rook endgames! [White could easily stop Black's rook activity with 24.♖g1 24...g6 25.f4]

24...♖xc1 25.♔xc1 ♔f6 26.♔d2 ♔g5 27.♔e2 ♔h4 28.♔f1 ♔h3 29.♔g1

And from this moment onwards starts the great plan of Rubinstein: to exchange all pawns on the kingside and then come to the queenside and win the white pawns.

29...e5 30.♔h1 b5 31.♔g1 f5 32.♔h1 g5 33.♔g1 h5 34.♔h1 g4 35.e4 fxe4 36.fxe4 h4 37.♔g1 g3 38.hxg3 hxg3 0-1

50... ♔c3 51. axb5 axb5 52. ♔c1 ♔xb4 53. ♔b2 With a theoretical draw! **0-1**

Chess and the City. From one island to the other

WGM Elisabeth Paehtz

Best rating: 2493

The strongest tournament ever to be held in the British Isles, at the Isle of Man, finally came to an end. The tournament winner turned out to be Harikrishna, the well-known Indian grandmaster, and incidentally, one of my closest friends. This, coupled with my good personal result, made the tournament successful for me. Looking back at this year, I can even claim this to be my most (perhaps the only) succesful tournament so far. However, there was no time to rest and enjoy this good feeling, since I had to immediately travel to an even stronger event, the "Checkmate" show-round robin event held in the island of Gozo, Malta. This event draws its inspiration from a successful TV show held by the BBC in the 80's, involving a very strong lot of players (5 men and 5 women) and a lot of TV broadcasting, which is quite unusual for chess players. The first impression was pleasant since I managed to get a professional make-up and hairstyle right before the game. Likely this joy was not shared by my men colleagues, which may explain my unexpected first round victory. I had relied on my husband to provide more insight into the island

surroundings, but, as my readers already know he is not only Italian by nationality, but also by character and it is taking his time to stroll around. So you may expect some more info on the very last day (hour?) of the tournament. Well, maybe never at all! :)

Last but not least, some of my friends claim that upon marriage you are supposed to lose about 50 rating points, in my case the loss preceded the marriage so perhaps I will avoid this dark fate and just take the opposite direction (that is gaining points, not divorcing). Time will tell, stay tuned for the updates! Here is one snapshot from one of the many beautiful landscapes of the island. The picture is kindly provided by Irina Krush.

17...fxe4! [17...♙xe5 18.♙f3 with b4-b5 next and White has a stable advantage.]

18.♗c4 ♙c7 19.♗d2! Otherwise Black was ready to play the very unpleasant Qh4!

19...♙f5 20.♗f1 ♞ad8 [20...h5!? with the idea to play h4, thus preventing Ng3. 21.♗g3 ♙d7 (21...h4 22.♗xf5 gxf5 23.♞e2 ♞f7→ also looks good for Black.) 22.♞ad1 ♞ad8 (22...h4 23.♗xe4) 23.f3! (23.♞b3+ 23...♙e6 24.♞xb7 h4 and Black is winning because of the Bxh2 trick.) 23...♙xg3 24.hxg3 ♙f5=]

21.♗g3 ♞d5 22.♞ad1 ♞ed8 23.♞xd5 ♞xd5 24.♞d1

24...fxg3?! Personally I don't like this move, because I think it is too early to exchange this bishop. Why not play the solid [24...Qd7 25.Qb3 b6! is the simplest. (25...Le6 26.Qe1! (26.Qxd5 26...Qxd5 27.Qxb7 Qd1+ 28.f1 Lc4 29.Qc8+ Ld8+) 26...Qd2 27.Qxb7 (27.Lxe4 27...Lxh2+! 28.Kh1 Lxb3 29.Lf6+ Kf7 30.Lxd7 Qxd7=) 27...Qxf2 28.Qa6 Lxg3 29.hxg3± The black king is weak.) 26.Qxd5 Qxd5 27.Qxd5+ cxd5=]

25.fxg3! is better than another recaptures on g3 because White will be able to improve his position by playing h3-g4 or Qf2-Qf6 and the king will also be safe on h2.

25...Qxd1+ 26.Qxd1 Qd7

27.Qe1! White is playing for the win.

27...Le6 Improving the bishop.

28.b3 [28.a3 28...Lb3 with the idea of playing Qd1 and getting an equal position.]

28...c5 It is logical to put the pawns on dark squares. I also thought about the idea of bringing the king to b7 to make him safe, for example: [28...Qf7 29.Qf2+ Ke8 30.h3 (30.Qf6 30...Qd1+) 30...Qf7! (30...b6 31.Qf6 Qf7 32.Qe5!→) 31.Qd2 Qd7=]

29.h3

29...b5? It seems very logical to push b4-c4 and reduce the material but this move has the huge disadvantage that it weakens the queenside a lot! In fact this was probably the decisive mistake! [29...Qd3 30.Le5 Kf7 (30...Qd5 31.Lb2 Qd3 32.Qf2→) 31.Qf2+ Ke8 32.Qf6 Qxe3+ 33.Kh2→ and Black lost coordination.; 29...b6 looks most solid! 30.Qf1 Qf7 31.Qb5 Qd7=]

30.Qf1 b4 31.Le5 Qd8 [31...Qf7 32.Qb5± The black pawns are very weak now.]

32.Qb5 Qc8 33.Kh2± There are just too many weaknesses to hold this position.

33...Ld5 34.Ld6 a6 35.Qa5 Kf7 36.Lxc5 Qc6 37.Qxb4+— Le6 38.Ld4 h5 39.Qb8 Ke7 40.Qe5 Qd5 41.Qf6+ 1-0
